The truth is, America's real trouble doesn't lie in the rice paddies of Vietnam, in the masses of China or the endless turmoil of the Middle East. Our real trouble lies in places like the playgrounds of St. Louis, the hillside mansions of San Francisco and the slums of Chicago. A disease is slowly eating at the lives of Americans in the small towns—and in the big industrial cities like Birmingham. The disease is cynicism—a lack of faith.

This is the age of the cynic—"The man who knows the price of everything and the value of nothing", as Oscar Wilde once said. It is the year of the unbeliever—the era of doubt. We've killed all our sacred cows, overexposed our faults and destroyed many of the images—and there is nothing much left to respect—too little old fashioned love of country, God and family. There are people who stare at their shoelaces when the national anthem is played. They don't want to be seen at a political rally, or a town hall meeting. Other people are not sure they want to be caught with their eyes closed during public prayer. Our heroes are often the bad guys who get away with things. And patriotism—pride in our country, the old, hand over heart, flag waving, singing patriotism is fast going out of style—it's embarrassing. Our form of government is the same; we still say America stands for the same things; the fundamentals haven't changed—we have, you and I. To prove it, next time at a gathering, ask someone to sing America and see what happens.

Our enemies know this, for they have seen the pictures in the papers and on TV, of the discontented marching around the country. They have distorted and blown up our mistakes, and they have been driving steel wedges into the wall of our solidarity. They say, don't attack America—wear it down gradually and it will eventually fall of its own corruption. This sneering cynicism, once stamped out by the bloody feet of a tattered Continental Army in 1776, has risen again. This daily "let George do it" attitude lights the way for the Viet Cong in the swampy jungles of Vietnam. This "better Red than dead" cancer may be more dangerous than all the Communist mortar shells, for it kills the spirit and vitality of America. Democracy is a frail and fragile instrument, made of hope, prayer, confidence and American ingenuity—and held together by pride, and 4th of July patriotism—and it is in danger today.

But I do not want to sound like a prophet of doom and gloom, because I really am not. I think America will come out of this period of cynicism—in the long run of our history, it will seem as a short temporary detour on our road of progress.

In fact, I think our best days are still ahead of us—for several reasons. One is that we have identified our national problems now. We know what they are: ecology, pollution, quality education, civil rights, poverty and the rest. The problems are out on the table. We can talk about them, and we do—and this is the vital first step. And, we are moving to solutions—not always quick or easy solutions—often halting and unsure, with much noise and debate. But we are shouldering our burdens and moving again in the right direction—and we will succeed.

Just as important, we have good material to work with. This younger generation, the "now generation", is the finest we have produced. When they are given meaningful jobs to be done—and provided with good leadership—and respect for their effort, and their ideas—they cannot be surpassed. I see them every day in the Army, and I know you can depend on them when it counts. They are superb—and they will help us solve these national problems better than we could ever do by ourselves.

Finally let me observe that our national spirit—our sense of concern for our country and its people—is returning. I sense it in my daily contacts and in my travels. The spirit of the 70's was so well stated by President John Kennedy when he said, "Ask not what your country can do for you; ask what you can do for your country". I see this spirit expressed in many forms. It is on the rise and it will pull us through.

Yes, America's future is bright—brighter than ever before. And in the America of the future, we will pause on future 4th of Julys—and in the noble words of our song, "America the Beautiful", we shall look across our spacious skies, our amber waves of grain, our purple mountain majesties, and we will know that God has truly shed his grace on our country—and crowned our good with brotherhood—with peace—with pride in our country—from sea to shining sea.

THREAT TO EDUCATIONAL TV

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. HARRINGTON. Mr. Speaker, the President's recent veto of the Corporation for Public Broadcasting appropriations bill may have dealt a damaging blow to the important and innovative cultural and educational programing provided by public TV. One of the leading noncommercial stations, WGBH in Boston, detailed the extensive cutbacks it will have to make, both in program quality and quantity. Such a result is the product of the long line of administration efforts to undermine freedom of the press in this Nation.

I urge all my colleagues to read the inserted articles from the Boston Globe. One of them reveals the problems facing public television in Boston and many other cities in the wake of the veto. The other is an editorial examining the impact of President Nixon's action on the future of noncommercial television.

The articles follow:

NIXON VETO OF PUBLIC BROADCASTING BILL SEEN LEADING TO SEVERE CHANNEL 2 CUTBACK

(By Percy Shain)

A severe cutback in broadcasting activity will become necessary at WGBH–TV (Channel 2) as a result of President Nixon's veto of the $155 million appropriations bill for public broadcasting, it was revealed last night.

Old shows will be reduced in episodes and new shows will never get off the ground because of the action, David O. Ives, Ch. 2 president, said in a statement issued from his island home on Naushon.

At the same time, Rep. Torbert MacDonald, chairman of the House subcommittee on communications, blasted the last-minute veto as an "incredible sacrifice of the public's interest on the altar of partisan politics. Despite Nixon's shallow protestations I am absolutely convinced that this Administration has decided that their interests will best be passed by muzzling the voice of public broadcasting directly."

"WGBH has been very active in developing plans for new programming—exciting plans dependent on Federal funding," said Ives. "Now those plans must be shelved, for how long we just don't know.

"Of those programs WGBH is currently producing for the national audience of the PBS network, we are already constrained by limited funds to less than a full season's run. At present our grant support for The Advocates extends to no more than 26 programs—the shortest season for this series in four years on national television. Zoom, which was a runaway success this season, is assured of only 33 new programs—far short of the year-round service it should be.

"Perhaps more damaging is the blow to totally new programs. WGBH has developed a number of series that would be pioneering in their fields. Some of them have already reached the stage of pilots.

"Two in particular were virtually certain of being funded, if the CPB's (Corporation for Public Broadcasting) appropriation for this fiscal year had been at least somewhere in the $55 to $65 million range.

"One of these new program projects would launch, here in Boston, a permanent first rate production unit for the making of science-documentaries, children's series, and even some co-productions with the foreign broadcasters whose achievements in science far outshadow anything American television, short of moon shot coverage, has ever mustered.

"Another new program project jeopardized by the veto would be a fresh, dramatic and useful weekly treatment of the causes and curses of crime in our cities.

"Locally, moreover, this setback will hurt our news and public affairs programming most. We have been counting on an increased annual CPB grant for community services to help make up the difference in support for the Reporters when the Ford Foundations's partial grant for this new local news operation ceases as of Aug. 31.

THREAT TO EDUCATIONAL TV

It has been argued that government financing of television, even on a partial scale, involves the same risks as would government subsidy of an otherwise free press. What government gives, government can take away (as President Nixon now has done), and therein lies the constant threat of control.

There is something in this. And in the radio and television industry the threat of control and hence of government suppression of all criticism is aggravated by licensing laws.

What needs to be emphasized, however, in assessing President Nixon's last minute veto of a two-year, $155 million appropriation for the Corporation for Public Broadcasting, is that public, or educational, TV magnificently serves one of the main purposes of the land-grant colleges established by the Morrill Act 110 years ago. There can be no sound criticism of them, and no President has dared to impoverish them.

"A nation that acts by the will and judgment of the people," said the author of the land-grant college act, Rep. Justin Smith Morrill, of Vermont, "must make available to the people the knowledge and spirit of the civilization they are expected to sustain and develop." This is precisely what public TV has been doing.

The Carnegie Commission paraphrased the Morrill philosophy when it fostered the Public Broadcasting Act of 1967, setting up the system under which such public service stations as Boston's superb WGBH, better known, perhaps, as Channel Two, operate today. President Lyndon B. Johnson also said much the same thing in his State of the Union message in January of that year:

"We must develop educational television into a vital public resource to enrich our homes, educate our families and to provide assistance in our classrooms."

* * * * *

The President has not succeeded in wrecking Public TV entirely—not yet, anyway. There are still foundation grants and individual donations. And at the last minute, the Senate joined the House in passing a resolution to keep it going at the present level of funding—$39 million—pending new legislation. But serious question remains as to why he tried at all, especially in view of the Congress's overwhelming support of the project—the House approved the appropriation 256 to 69 and the Senate, 82 to 1, surely enough to override the veto.

He is convinced, the President said in his veto message, that "the problems posed by Government financing of a public broadcast system are much greater than originally thought."

* * * * *

DR. MELVIN R. POSTON—OPTOMETRIST OF THE YEAR

HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. WALDIE. Mr. Speaker, in the July 1972 Optometric World, there appeared an article praising a constituent of mine, Dr. Marvin R. Poston, an optometrist from Danville, Calif.

I would like to take this opportunity to place this article in the CONGRESSIONAL RECORD.

DR. MARVIN POSTON, FIRST BLACK TO BE NAMED "OPTOMETRIST OF THE YEAR" BY AOA

Dr. Marvin R. Poston, a prominent, black, Oakland, Calif., citizen and optometrist, was named the 1972 national "Optometrist of the Year" by the American Optometric Association. He is the first black to be so honored in AOA history.

The honor, in recognition of Dr. Poston's public service contributions to his community and profession, was announced at a 75th anniversary tribute and awards evening held as part of the association's annual congress in St. Louis, Mo. More than 2,000 optometrists and their guests attended the function.

The national award of the 17,300-member association, which represents the nation's largest vision care profession, follows Dr. Poston's selection as the California "Optometrist of the Year" in March. He was the first black ever given the honor in California.

A resident of Danville, Calif., Dr. Poston has practiced optometry in downtown Oakland for over 31 years.

One of his major interests has been youth and he has devoted many hours to his work with the Alameda County Juvenile Delinquency Committee. He has served as president of the Northwest Branch of the Young Men's Christian Association and as a member of the board of directors of the Oakland area YMCA. He is also a member of the board of directors and Minority Adoption Committee of the Children's Home Society of Northern California.

Concerned with the renewal of his urban community, Dr. Poston has served as a member of the board of the Oakland Council for Social Planning and as a member of the Danville Renewal Corporation. He is director of the Oakland/Fukuoka (Japan) Sister City Committee and is an active member of the Oakland NAACP, the Oakland Rotary Club, the board of directors of the Contra Costa County Tuberculosis Association, and the African Methodist Episcopal Church.

Dr. Poston has been an organizing member of at least four major vision care programs in the Bay Area and throughout California. These include the West Oakland Health Group, where he is vice president and chairman of the center's eye group; the Children's Vision Center of the East Bay; vision screening programs for the East Bay Skill Center; and the California Vision Service, a prepaid vision care plan covering over 700,000 eligible participants in California.

Dr. Poston has served as co-chairman of the Merritt College Optometric Assistants' Advisory Committee and as a member of the Public Advisory Council on Education for Oakland Public Schools. He also is a member of the board of directors and treasurer of the community Committee for African Students and works with the University of California at Berkeley and the American Optometric Association in minority recruitment programs.

The noted optometrist is a past president and currently a member of the California State Board of Optometry. He is a past president of the Alameda and Contra Costa Counties Optometric Society. He has also served as a member of the Long Range Planning Committee of the California Optometric Association.

Dr. Poston resides at 567 El Pintado Road in Danville.

BALLOTS, NOT BULLETS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. STOKES. Mr. Speaker, on August 30, 1972, as Gov. George Wallace was leaving the hospital after two more operations, reporters pressed him for his comments on the political scene. He fended off the questions, saying that he had not had much time for politics, that he was concentrating on getting well. The newscaster reporting the story added that Governor Wallace had told a friend that:

> If I had all the money in the world—if I was the king of Siam—I'd give it all up just to be able to walk again.

The really tragic part of this vignette is that it never had to be. The shooting of George Wallace—and of Dr. Martin Luther King, Senator Robert Kennedy, President John Kennedy, and Malcolm X—could easily have been prevented. It is not too late, of course, to start thinking about ways to prevent future killings and maimings.

Congressman William L. Clay discussed some of the means of prevention in an article he wrote for The Boston Globe. His column appeared on July 25, 1972 and it contained a number of important, provocative ideas on the subject of political assassinations. His thoughts range from the need for gun control legislation, through media overexposure of assassins, to a discussion of the violent society in which we live.

I hope that Congressman Clay's ideas receive the wide discussion they certainly merit. For this reason, I include his column for the benefit of my colleagues:

Opposition to Men Like Wallace Must Be by Ballot, Not Bullets

(By Congressman William L. Clay)

George Wallace stood opposed to the leadership of the late John F. Kennedy. He stood in the schoolhouse door blocking the entrance and orders of integration carried by former Attorney General Robert Kennedy.

For Dr. Martin Luther King, Jr., it is fair to say that George Wallace held only contempt—for they stood at the very opposite ends of the political and ideological spectrum. Until two months ago, the only thing these men shared in common was that both had the spotlight in center stage debating national issues. And it must have been that spotlight which attracted the senseless bullets that struck each of them.

No matter how repugnant the politics of George Wallace, nothing is more regretful than the notion that these men who inspire controversy and/or who seek to lead this nation are fair game for thousands of kooks, misfits and degenerates.

Assassinations and attempted assassinations are only so prevalent because of availability of firearms is prevalent. Many argue that strict gun control would not eliminate political assassinations. This may be a fact. But it is also a fact that the abundance of guns in America, the deification of those who possess them and the false sense of security experienced by gun owners contribute significantly not only to assassinations, but to 28,000 other deaths each year in America.

George Wallace was not shot because of his views. The shots came from a man who was probably void of politics. If the would-be assassins of this country believe they will become heroes in the eyes of those who renounce their political targets, let us make as clear as we can to these demented minds that they are wrong. Assassins are despicable to all Americans—about that, at least, there is consensus in this country.

The men who commit these acts are weak and faceless—and they should remain nameless. If it is the promise of notoriety which drives their sick minds, it should be deprived them.

It is unlikely that there are any "bullet-proof" guarantees to protect public office seekers from assassins, especially since those who have aimed the guns over this last decade came alone, unnoticed and silent. Nevertheless, it may be very important at this time for those of us who disagree with George Wallace to speak up. We have sought and we will continue to seek to defeat the influence of George Wallace. But we join the supporters of George Wallace in a deep concern for his welfare. The only thing we would want cast against him is the vote.

The Wallace philosophy will not be overcome by gunfire or by any other violent act. Americans do not make heroes of men who bring such tragedy.

We must also be concerned for the welfare of the nation as a whole—for if men are not allowed to go to the public to seek the vote, what is to become of the democracy we have strived to practice?

MAN'S INHUMANITY TO MAN

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,757 American prisoners of war and their families.

How long?

JACKSON, MISS.

HON. CHARLES H. GRIFFIN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. GRIFFIN. Mr. Speaker, education plays a key role in the development and growth of any area. The city of Jackson has made great strides in its growth because of the dramatic steps it has taken in its educational program to offer unlimited opportunity for all citizens.

I am especially pleased to note that recent figures for cities of comparable size—100,000 to 250,000—show that Jackson, Miss., has the highest educational level in the South and 10th highest in the United States. This is certainly an outstanding achievement and a fine tribute to a growing city.

I am sure that with the new innovate education plans being developed, Jackson will continue to enjoy a prosperous and expanding future.

I include, as a part of my remarks, an editorial from the Jackson Clarion-Ledger on this subject.

Educational Level of Jackson Is 10th Highest in United States

Many impressive facts and figures are listed in "Change and Challenge—The Story of Jackson, Mississippi Today" issued by City Hall officials as a dramatic reminder of our city's amazing progress and vast potential for future growth.

Among the most gratifying phases of this handsomely illustrated brochure is the section devoted to education. Its text notes that our area's educational facilities run the gamut—from nursery school to graduate school with everything in between.

City schools include 37 elementary facilities, ten junior high schools, and seven senior high schools. There is also a state school for the deaf and for the blind. Most of these facilities have a complete array of advanced equipment and are in excellent condition. They serve the student demand well. Approximately 75 percent of the City school system's graduates go on to college. The City also has a number of private schools at each level.

An exciting new project to centralize the City's public schools into a unique creative learning concept is being planned. Two educational plazas will be constructed for fifth and sixth graders in areas where there are presently no homes. One plaza is scheduled for North Jackson and the other in Southwest Jackson. Both will have about 2,000 students, and employ the latest teaching techniques.

The program of the City's schools include closed circuit instructional television, special computers, teaching teams, creative organizational patterns, and new courses.

The Jackson area offers a wide choice of institutions of higher education. There are five 4-year colleges, two junior colleges, the University of Mississippi Medical Center, the Universities Center and the Jackson School of Law in the metropolitan area. The unique Universities Center is a joint venture of the University of Mississippi, Mississippi State University, Jackson State College, and the University of Southern Mississippi. It offers undergraduate subjects, a graduate degree program, and statewide educational television.

One of the most important facts about Jackson in the area of education though, is the average Jacksonian's general educational level. Based on the U.S. Census report of 1960 (these figures will be even higher when the 1970 Census figures are available), the average Jacksonian has completed 12.1 years of school. In cities of comparable population—100,000 to 250,000—this is the HIGHEST general educational level in the South, and 10th highest in the entire United States. In the important area of college education, 13.4 percent of all adults are college graduates, making Jackson 2nd HIGHEST in the South and 8th HIGHEST in the nation. These remarkable figures speak for themselves regarding the quality of education the average Jacksonian has received.

SENATE—*Wednesday, September 6, 1972*

The Senate met at 10 a.m. and was called to order by the President pro tempore (Mr. EASTLAND).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Dear Lord and Father of mankind, as we pause this day in Thy presence and share in the grief of all peoples before the horror of shattered young life which so sears the conscience of all men, teach us once more the hard lesson that hate begets hate, evil nourishes evil, and violence reproduces violence. Teach us the higher truth of the oneness of the race, that every man's suffering and sin is our suffering and sin, for we are all involved in humanity.

By some miracle of divine grace, may the innocent suffering of today atone for the sins of yesterday and bring cleansing and forgiveness to our broken world. May the shock of events drive a war-weary world to the ways of peace and concord. May there come over the world a renewal of the ideals of good sportsmanship and a resurrection of that spirit of universal good will and fraternity which endures all pain and abides all time.

Help us here to labor ceaselessly for that kingdom whose builder and maker is God. Amen.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12350) to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, September 5, 1972, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, on behalf of the distinguished Republican leader and myself, may I say it would be our hope that the policy will continue which was inaugurated before adjournment for the Republican National Convention, that committees would hold only necessary meetings, and that they will clear with us, if they would—and I use these words in their best sense—any meetings which they may be contemplating.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum briefly.

The PRESIDING OFFICER (Mr. GAMBRELL). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE TRAGEDY AT MUNICH—SENATE RESOLUTION 358, EXPRESSING THE SENSE OF THE SENATE ON THE TRAGIC KILLINGS OF ISRAELI OLYMPIC TEAM MEMBERS OF THE 20TH OLYMPIAD AT MUNICH

Mr. MANSFIELD. Mr. President, a resolution can express our sympathy to the families of the victims and to their homeland, but it can in no way diminish the tragedy of Munich. That tragedy points up the fact that the Olympic games have become a forum not for sports, primarily, but in specific instances, a means for political, ideological, social, and racial expressions of the most violent kind.

It seems to me that too much emphasis has been placed on gold, silver, and bronze medals, on commercialism, on nationalism. In these games, we tend to place stress above all else, on the superiority of nations.

What of equality among nations? What does superiority prove?

What has the tragedy at Munich accomplished, except to disturb the shaky and dangerous balance in the Middle East and to emphasize that violence in the end defeats its own ends?

In lending itself to displays of violence, of defections, of anarchy, of dispute and dissension, and even of madness, the arena of the Olympics has strayed far from its original concept of peace and unity among all men. There are individual triumphs and there are national triumphs; there are gold, silver, and bronze medals. But none of these can have any meaning when they are accompanied by what we have witnessed in Munich.

The tragedy of Munich should make us review our concept of these games and even ponder their ultimate worth. The nations of the world should address themselves to this grave question at once.

A fitting memorial for the dead demands no less.

Mr. President, for myself and on behalf of the distinguished Republican leader (Mr. SCOTT), Senator JAVITS, Senator RIBICOFF, Senator ALLEN, Senator ROBERT C. BYRD, Senator COOPER, Senator GAMBRELL, Senator BAKER, Senator SAXBE, Senator GRIFFIN, Senator EASTLAND, Senator MCGOVERN, Senator SPONG, Senator METCALF, Senator BROOKE, and Senator PERCY, I send to the desk a resolution and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. GAMBRELL). The resolution, with its preamble, will be stated.

The assistant legislative clerk read as follows:

> Whereas, with profound sorrow and deep alarm the Senate is informed of the events surrounding the killing of eleven members of the Israeli Olympic team participating in the Twentieth Olympiad at Munich, and
>
> Whereas, such actions are to be condemned as inimical to the interests and aspirations of the civilized world, be it hereby
>
> *Resolved,* That the United States joins with the world in mourning the loss of Israel's athletes and extends its deepest sympathy to the people of Israel and to the families of those so tragically lost and be it further
>
> *Resolved,* That all means be sought by which the civilized world may cut off from contact with civilized mankind any peoples or any nation giving sanctuary, support, sympathy, aid or comfort to acts of murder and barbarism such as those just witnessed at Munich and that the Secretary of the Senate be directed to communicate these sentiments and expressions to the Secretary of State for appropriate transmittal.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. SCOTT. Mr. President, there is a depth of irony in this tragedy, rarely reached, beyond the scope of the writer's pen. The reason for holding the games at Munich, 36 years after the bitter episode of the 1936 Olympic games where man's inhumanity to man was exemplified by the greatest beast in human form in this century and his behavior toward some of our athletes; it was the hope of the resurgent nation of West Germany that the memory of that inhumanity might be erased by the manner, the spirit, and the universality with which the games would be observed.

So here is the tragedy of what the Government of West Germany hoped to achieve and what happened in the outcome. Here is the tragedy involving the loss of life of youth caused by the madness of men blinded to all considerations save their misguided political impulses toward the vilest form of crime. These men ought to have no sanction anywhere in all the world. There should be no cave in which they can hide. And in all the reaches of our earth there ought to be no refuge for the mad murderer who kills for political purpose to evade the consequences of his crime.

I think of what Shakespeare wrote:

> How sour sweet music is,
> When time is broken and no proportion kept.
> So is it in the music of mankind.

Here is has been broken by the harsh discord and by the cacophony of these brutal murders.

I join in sadness with the distinguished majority leader in this resolution and in the hope that there will be found nowhere in the world a sanctuary for men of evil intent, of vile and murderous consummation, the totally unworthy perpetrators of contemptible misdeeds.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays to be taken at the end of the morning business.

The yeas and nays were ordered.

Mr. JAVITS. Mr. President, I think the gratitude of every Member of the Senate must go to the majority and minority leaders for the initiative they have taken at such a tragic hour. There was greater loss of life at the Lod Airport outside of Tel Aviv, also committed by terrorists. However, in that case it was committed by Japanese. However, this is not a quantum of loss of life. It is a symbol and it involves the feelings of outrage of all mankind when mankind is desecrated and when the lives of youthful athletes are snuffed out with such dreadful barbarism as demonstrated in this instance.

I think I know as much about the Israelis as many here. They are brave men. They have faced grave perils in order to make a state. And they have successfully made one, a state which our President has affirmed his commitment to help survive.

These young men will not be intimidated. They expect to abide for a purpose and to be honored in a morality and expect to continue doing as they tried to do in Germany. Their sacrifice and their deaths are meaningful.

The majority and minority leaders have put their fingers on the real issues here. What appalls the world is that any nation can give sanctuary to these terrorists, that they can issue press statements, and maintain sources of raising revenue and have the approval even of prime ministers for their acts of barbarism which should cut them off from any civilized contact with all nations of the world.

We are the leader of the free world. The Soviet Union is the leader of the Communist world. There must be no clearer duty for us than to lead with all our strength, all our influence, and all of our prestige if we are to preserve mankind and cut off from the rest of mankind any nation which, as the resolution so eloquently states, "gives sanctuary, support, sympathy, aid, or comfort to acts of murder and barbarism such as those just witnessed at Munich." This refers to acts of any kind or character committed by an enemy of all mankind, not just the Arabs.

This is the most complete act of anarchy we have witnessed in our history. We simply have to address it. We have the means. They cannot survive if they have no place to go. But they do have places to go to receive sympathy, aid, equipment, and training. Our assembled view that we desire to stop such acts in the future by our power and strength in the world, if implemented, will go a long way toward stopping them. This is a matter of morality. And I hope that this is the purpose which we will serve.

Mr. RIBICOFF. Mr. President, I commend our majority and minority leaders for introducing this resolution displaying their understanding of the sentiments of the U.S. Senate and all the people of this country.

Mr. President, it is not enough to merely express sorrow and deplore the tragedy in Munich. The shocking crimes perpetrated at the Olympics yesterday will be repeated elsewhere unless our Government takes resolute action—in concert with other nations—or unilaterally—against those Arab nations which still harbor and encourage these cold-blooded assassins. Permit me to be specific in this regard. The "Black September" terrorist gang that organized this carnage and acknowledges responsibility issued its official statements from Cairo. And it was Egypt that refused to agree to return the Israeli hostages if they were flown there.

Syrian and Iraqi newspapers are already glorifying the Munich assassins as martyrs and are endorsing their bloody work.

These Arab terrorists operate openly in Beirut and have bases elsewhere in southern Lebanon.

Libya and Algeria offer lavish financial aid and training to these criminals.

It is time our own country began to call a spade a spade and imposed sanctions against these countries. Either they stop aiding and abetting the wanton murder of innocent civilians or the United States should cut all ties—diplomatic, commercial and transportation with them—as this resolution offered today strongly recommends.

How ironic it was to read the newspaper yesterday and find that the efforts of the United States to protect commercial aviation by appropriate action against skyjackers and assassins were being torpedoed by protests from the Soviet Union, England, and France. The Soviet Union, England, France, and all civilized nations should join with the United States in imposing strict sanctions against those nations which harbor terrorists when they take over aircraft or seize hostages and spirit them to foreign countries.

The time has certainly come for realistic action and for all nations to join with the United States to make sure that we do away with the madness that is abroad in the world today.

Mr. ALLEN. Mr. President, the submission of the resolution which is to be voted on at the end of morning business is most appropriate. I am glad that there will be a yea-and-nay vote on the resolution to emphasize this matter and to show the unanimity that exists in the U.S. Senate with regard to this matter throughout the entire country in the condemnation of this dastartedly mass murder.

I appreciate very much the majority leader and the Republican leader allowing me to be one of the cosponsors of the resolution.

Mr. President, I rise to express the sense of shock and outrage of the people of Alabama over the insane attack yesterday upon the Israel Olympic team by Palestinian guerrillas.

Alabamians share with all other Americans the sickening feeling of revulsion that criminal minds have perpetrated the murders of these fine young men who were taking part in an international athletic event which is based on peaceful competition, not on politics and militant aggression and indiscriminate destruction.

The perpetrators of these mass murders must be punished and steps must be taken by the world community to assure that politics by assassination will not be tolerated. The people of Alabama grieve with the families of the victims and with the people of Israel who are struggling bravely for their existence as a nation and as a free people.

Mr. President, I yield the floor.

Mr. SPONG. Mr. President, I thank the majority leader and the minority leader for their submission of this resolution this morning. I am privileged to act as a cosponsor of the resolution.

I speak this morning as a former sports writer. I mourn for the dead; I mourn for the spirit of the Olympic games, which has been so desecrated; I mourn for the irony of a situation in which these savage crimes were committed in Munich, near Dachau, the scene of so much earlier horror.

We must condemn those who perpetrated these acts. The civilized world must act to condemn those who participated and those organizations that fostered and encouraged these acts. The United States must lead the way in this condemnation.

Again, I thank the majority leader and the Republican leader for the introduction of the resolution.

Mr. BAKER. Mr. President, I express my gratitude to the distinguished majority leader and the distinguished Republican leader for taking the initiative in offering this resolution this morning. I express my appreciation to my colleagues in the Senate who cosponsor this resolution with the distinguished leadership.

It seems to me that at this point it might be appropriate to realize what we cannot do, and to underscore what we can do, for although we cannot expect to change the hearts of men or the motives of terrorists bent on violence and destruction on future occasions, we can create an atmosphere in the public arena—not in the sports arena but in the international public arena—that serves notice that such barbaric conduct will not be tolerated by the world community, and that is what we are about today in this resolution offered by the leadership of the Senate. We are serving notice to those so inclined that barbaric, inhumane conduct of the type experienced in Munich will not be accepted by the world community. We are serving notice that the United States is a moral nation, we are strong, and we are outraged. We are serving notice we will not condone activity of this sort in the future.

Nothing can restore life to the Israeli participants in the Olympic games but we are going to do whatever may be within our power and grasp to prevent other athletes, other victims, and other people in other circumstances from suffering the same fate.

Mr. President, I enthusiastically support this urgent resolution.

Mr. COOPER. Mr. President, I join other Senators in expressing my shock and sadness over the events that have occurred in Munich. It is a tragedy that indicates a growing crisis in the history of mankind. It is sad to think that after all the years that have elapsed since the classic Greek civilization, since these Olympic games were founded, that we still have in the world the mentality which could devise and perpetrate the crimes we have witnessed.

It brings into question also the law of nations, the law and values of the civilized world, and whether nations, and ours among them, will be able to join together to find means to prevent as best we can these awful acts against human beings and against law itself.

I sympathize with the families whose children have been lost and I think also of the deterioration of civilization itself.

Mr. GAMBRELL. Mr. President, I was deeply shocked to learn of the senseless violence and the tragic murders initiated in Munich yesterday by Arab terrorists. The brutal attack up the Olympic village, where the long sought goal of international peace and brotherhood was being furthered, is an outrage to be deplored by the entire world community. I have asked that my name be added to the Mansfield-Scott resolution condemning these attacks.

This terrorism will not serve to add any credence to the claims and demands of these terrorist groups. As evidenced by the international representation at the Olympic stadium this morning at the memorial services for the dead, the world's sympathies are extended to the countrymen and the families of the dead. I, too, would extend my sympathies to the families and friends of these brave athletes who were only trying to represent their nation in a nonpolitical celebration of world cooperation.

The perverse political goals which spawned this senseless attack have been repudiated by myself and others on many occasions. I am sure that other Senators and people throughout the world share my own firm convictions that the Israeli position in the Middle East must be securely maintained and that the outrageous events in Munich will in no way alter those convictions.

Mr. SAXBE. Mr. President, the senior Senator from Oregon (Mr. HATFIELD) is in Oregon today. Late last night, he released his reaction to the killing of the Israeli athletes in Munich.

I ask unanimous consent that his comments appear at this point in the RECORD.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

HATFIELD REACTION TO MUNICH KILLINGS

Senator MARK HATFIELD called the killings in Munich a "reprehensible and outrageous act by demented men."

"Such senseless violence affects us all for it betrays the ideals of human dignity upon which our civilization is based."

Mr. ROTH. Mr. President, I am pleased to join with other Senators voting for this resolution. Frankly, I do not believe that words can adequately describe the shock and outrage which I personally feel as a result of this terrible incident. But perhaps this resolution, while it cannot help those who have already died, will make it clear to other would-be terrorists—wherever they may be and whoever they may be—that terrorism and senseless killing can never further a cause, however noble. Whatever the motivation, such senseless attacks as yesterday's can only cost the lives of the innocent and unprotected.

I wish there were something I could say or do to undo the events of the last 36 hours, but there is not. As I indicated yesterday, the acts of the guerrillas amount to senseless, brutal, and wanton murder. There is no question that the surviving Arabs should be tried and brought to the bar of justice to pay for their crimes. That will do little to console a grieved world, but perhaps it will deter others who might wish to attract support for a cause in this insane manner.

It should be emphasized, however, that the primary responsibility for curbing the reprehensible activities of these terrorists falls upon the Arab nations themselves, and particularly upon Lebanon and Syria who have failed to suppress the terrorist groups on their territories. The time is long past due when the leaders of these countries must take that act of political courage which King Hussein took when he jeopardized his throne to suppress the Arab terrorists in Jordan and again yesterday when he condemned the activities of the terrorists in Munich as an affront to the "Arabic name, image, moral heritage, and cause."

Mr. HUMPHREY. Mr. President, I know I speak the sense of the Senate when I express dismay and deep indignation at yesterday's tragic development at the Olympic games. The tragedy is not Israel's alone; it is the world's.

I support the resolution before this body. It is essential that our Government take the lead in urging the United Nations and, through it, the international family of nations to recognize that the demands of civilization require all nations to renounce the senselessness and horror of guerrilla terrorism so that those misled and deranged pariahs of mankind come to know that they stand denounced by all nations and groups of all religious and political persuasion.

There can be no asylum any place in the world for those who would engage in these brutal acts of inhumanity. Only with this uniform expression of outrage and commitment can we hope to end these acts of terror which shame us all.

I know that I speak for all Americans when I express my condolences to the Government and the people of Israel and most particularly to the families of those who were struck down yesterday.

Mr. BAYH. Mr. President, words are inadequate to express the outrage and horror which one feels regarding the tragedy in Munich. The attack by the Arab terrorists certainly has marred the Olympics.

But its real damage goes much further. It is a direct challenge by violent fanatics on civilized society. It reminds all the world of the constant danger which confronts Israel and its citizens, even as Israel seeks to live in peace with its neighbors. The murder of the Israeli athletes and their coaches is, quite simply, an unspeakable act representing the lowest possible form of human behavior.

There are several points that must be noted in this tragic incident.

Terrorism by certain Arab groups has been going on unremittingly since the 1967 war. Too often the world community has been blasé about the death and mayhem spread by these terrorists. This time the horror was enacted before the world community, on global television, and there must not be any minimizing of the dastardly attack on the Israelis.

Moreover, there must be a worldwide awareness that several Arab nations provide continuing refuge for such terrorists. The countries which provide a haven for persons unwelcome elsewhere cannot escape their share of guilt for this and other acts by the guerrillas who find sanctuary within their borders. The full weight of the world community must be brought to bear on those nations lest inaction be somehow interpreted as condoning the protection afforded the guerrillas.

This body and this country should join as forcefully as possible with the rest of the world community in condemning without qualification the murder of the Israelis and other repugnant acts by Arab terrorists. We must add to that a stern admonition to the nations where terrorists receive financial and moral support to stop sheltering such international outlaws.

Our sympathy goes out to the families of the victims of this tragedy and to all of Israel, for truly this is an assault on an entire nation of freedom-loving people who ask for only one thing—to live in peace—a peace has been denied to them for the quarter century of their nation's existence.

Mr. President, I join with Senators in the strongest possible expression of condemnation for an act which has cast a dark cloud across our entire globe.

Mr. MONDALE. Mr. President, in sorrow and anger I ask this body to approve Senate Joint Resolution 358, condemning the outrage in Munich and extending the sympathy of the U.S. Senate to the victims' families, to the surviving members of the Israeli Olympic team, and to the people and Government of Israel.

Yesterday's atrocity in Munich was the consumate expression of terrorist savagery, brutality, and cynicism. For the sake of principle, politics was dragged into the sports arena, and there it was transformed into cold-blooded murder. In the name of principle, the most basic principles—of international law, national sovereignty, and, above all, human decency—were violated with deliberate and unprecedented barbarism.

There are many familiar words to describe the Munich tragedy, and they come quickly to our lips. Yet even as we speak them—even as we call the massacre senseless and savage and appalling—we know they do not fully express the emotions that Members of this body and American citizens everywhere feel today.

I urge, therefore, the unanimous approval of this resolution.

Mr. BEALL. Mr. President, the tragic end to the terrorist raid at the Israeli compound in Olympic village brings great sorrow into the hearts of people the world over. I join with citizens everywhere in extending sympathy to the families and countrymen of the Israeli Olympians who lost their lives in this barbaric act.

This tragic event should serve as a grim reminder that terrorism is in no way an answer for a people's problems and cannot be condoned in any society.

The continuation of the Olympics will hopefully demonstrate that decent people will not be intimidated by violence and that the spirit of brotherly love and good will must prevail among the peoples of the world.

Mr. COOK. Mr. President, the senseless tragedy at Munich has dealt a crippling blow to the spirit of world harmony which the Olympic games had so ably promoted. The savage and barbaric slaughter which a small group of deranged men have perpetrated in Germany must sicken everyone who values human life.

The peoples of the world have almost unanimously condemned the wanton and ruthless murders committed by the Palestinian terrorists. This, I believe, is a display of the honest desires of all nations for a world of peace and brotherhood. But expressions of outrage do nothing to stop these aberrations on mankind.

The nations upon which terrorists rely for support and sanctuary must show their contempt for such acts by turning their backs on these violent creatures. Those nations must cooperate with the rest of the world in flushing out cancerous elements, and bringing them to justice before the peoples of the world.

I hope that our strong urge to strike out in retribution does not obscure our continuing efforts to bring worldwide peace, and to rid the world of the hatred which led to yesterday's tragic events. We mourn for those who have died so pointlessly; we mourn also that such abhorrent crimes still blight our civilization.

Mr. CASE. Mr. President, I am deeply grieved by the tragic loss of life in Munich. My condolences go out to the families of those who died and to the whole State of Israel at this awful moment.

The heinous conduct of the Palestinian terrorists must be universally condemned. Their mindless violence ranks with history's most despicable acts.

Mr. KENNEDY. Mr. President, all Americans and people throughout the world share sorrow and pain over the tragic loss of life in Munich. The senseless deaths of Israel's athletes is a crime against humanity and the reconciliation and brotherhood of the Olympic spirit.

We must deplore this depravity. But we must also be reminded that the world is wracked with the pain of senseless acts—which grossly violate common decency and human dignity, and paralyze constructive efforts to ameliorate tensions and solve problems and meet the aspirations of all people for peace and a better life.

We have been witnessing an extraordinary degree of political violence in recent times—in all parts of the world by individuals and governments alike. This condition cries out for more concern and action by responsible governments and the United Nations. Let us hope that constructive efforts for a better world can work their will in the months ahead.

Mr. BUCKLEY. Mr. President, the terrorist murders of Israeli athletes at the Olympic games site in Munich is a uniquely reprehensible act. It not only violates every norms of civilized behavior but does so in a place dedicated, ironically enough, to the noble concepts of peace and brotherhood. The whole world stands in pity and sorrow and anger before this monstrous act.

Our grief and our stunned acknowledgement of the enormity of this deed should serve as reminders that whenever terrorism is allowed to flourish, the whole fabric of civilization is endangered. The bloody logic of a particular kind of fanaticism and terrorism reached its ultimate conclusion in Munich. It achieved its end—violence and murder—partially because the inflamed rhetoric of some leaders had assured the terrorists that any crime they might commit would be absolved by history because of its being committed in the name of an allegedly higher cause. In the Olympic site we have seen the logical consequence of the condoning of terror. Yet all over the world, at this moment, apologists for terrorists with different causes, but the same methods, weave insidious arguments to justify their deeds.

In retrospect, the young Israelis are the victims of careless words as well as unspeakable deeds. For too many years, too many intelligent, articulate men and women have given to terrorism the intellectual and moral facade it needs to survive.

There will be those, inevitably, who will state that these and other murders are somehow or other justified because committed in pursuit of some holy cause. We have heard such sophistical arguments before and we will hear them again. But out of our sorrow at the wanton killings in Munich, out of our pity we must draw the strength to do what we can to insure that terrorism, wherever it appears, by whomever it is committed, and in whatever cause, will be condemned for what it is: a cowardly and monstrous act deserving nothing but the contempt of civilized men and women all over the world.

Let us resolve that whenever and wherever we can in our country and abroad we will challenge the rhetoric of violence and the sophistry of ideological arguments seeking to give to terrorism a cloak of respectability. No historical imperative, no noble cause, no greater end is served by the deliberate premeditated and cold-blooded terrorist murder of innocent human beings. During their lives the Israeli victims were living symbols of what man can accomplish when he turns his energy and his discipline and his desire for excellence to constructive ends. In their deaths they have become symbols of all of the innocent men, women, and children who have become victims of terrorists' fanaticism all over the world.

Mr. SCHWEIKER. Mr. President, I rise in support of Senate Resolution 358, a resolution expressing the sense of the Senate condemning the terrorist killings yesterday at the 20th Olympiad in Munich, Germany. I am joining as a cosponsor of this extremely timely resolution.

Mr. President, the tragedy at Munich yesterday has stunned the entire world, and has inflicted a heavy loss upon the entire world as well.

Today we mourn for those who were slain in the aftermath of this senseless, destructive terrorist raid on the Israeli athletes' dormitory.

We mourn with the people of Israel, united in tragedy as one family, as it grieves for its fallen athletes.

We mourn with the people of Germany, for whom this will always stand as a sad event in their history.

We mourn for the spirit of the Olympic games, stained by this brutal deed that made senseless conflict take the center stage away from the classic Olympic theme, cooperation among nations.

And we mourn for the loss of sanity in our world today, as terrorists can roam the world and commit such desperate, brutal acts against innocent victims.

Each time there is an airplane hijacking, or a bomb planted in a public place, or a massacre such as the recent one at Lod Airport in Israel, the authorities responsible for law and order face a difficult choice.

More stringent security measures can always be imposed. The right to travel itself can be more restricted. But a determined and clever terrorist can find ways to circumvent the tightest of security. And each time there are more restrictions imposed, the public pays a price for this added security in terms of individual liberty.

There are no easy answers, Mr. President, but when an incident like this occurs, in our own country or abroad, we have a responsibility to ponder the problem and consider what steps might be taken to help prevent such tragedies in the future. We must at the same time make it clear that terrorists who attempt such foul deeds in the future against perfectly innocent victims will have the full condemnation of the people of the United States and their Government.

Mr. JACKSON. Mr. President, the unspeakable act which we have just witnessed at Munich is the latest in an incredible series of atrocities committed by Arab terrorist groups and their recruits against innocent people at the indulgence of the international community. Unless we put an end to this indulgence for the terrorists and the nations which aid and abet them, it will not be the last.

I hesitate to call it the most awful yet, because it is impossible to make such an evaluation when the history of horrors perpetrated by these terrorists in recent years includes—and the list is by no means exhaustive—attacks on El Al planes in the airports of Athens, Zurich, and Munich; explosions in crowded Jerusalem marketplaces and in the Tel Aviv central bus terminal; the bombing of an El Al office in Athens; the bombing of a Jewish-owned department store in London; the assault on an Israeli school bus; the destruction in flight of a Swissair plane; the rocketing of an Israeli home for the aged; the recent massacre at Lod Airport; and all the hijackings and attempted hijackings. The death toll from this squalid war against civilians inside and outside Israel is staggering.

Mr. President, no Israeli, no friend of Israel, no one anywhere in the world who has any contact or connection with Israel will be safe from these terrorists until the international community makes it clear that it will not submit to their murderous blackmail. The only way to stop the terrorists is to hold responsible the nations which serve as their training and fueling grounds and which welcome them back after their exploits. Sovereign nations must no longer be permitted to avoid blame for the terrorist outrages made possible by their support. The international community, once and for all, must take steps to isolate the countries which protect those who commit crimes against humanity.

I believe that we should seriously explore avenues of restricting the participation of such states in normal international commerce and communications until such time as they bring under control the terrorists operating within their territory. I strongly support today's Senate resolution and I hope that it will encourage our Government to initiate appropriate proposals along these lines.

Mr. EAGLETON. Mr. President, yesterday at the 20th Olympiad in Munich, the nations of the world watched in horror as mindless terrorism took 16 lives. The victims of this outrage were not just the Israeli athletes, but all of us.

The achievement of political objectives by violent means can never be tolerated. Those who have perpetrated this crime have only contributed to the ultimate defeat of their movement. The resolve of those who are committed to a free and secure Israel will only be strengthened.

The Jewish people reached their promised land only after centuries of adversity and persecution. It was only seven Olympics ago that the nation of Israel was born. When the members of the Israeli Olympic team came to Munich, they felt great pride for their nation. But, when they died, they were not only citizens of Israel, they were Olympians—they belonged to the brotherhood of nations.

This weekend, Jews around the world will observe their High Holy Days. It is a time for reflection and a time for renewal. It will be diffcult this year, but despite the tragedy experienced in Munich, let us all seek renewal.

It is said that Jews seek God earnestly, not only to find Him, but to discover themselves. Perhaps as we share the grief of the Jewish people, we, too, can find the thread of faith in our fellow man—so difficult to see in the twilight of Munich—that will help us to rediscover ourselves.

MAYHEM AT MUNICH

Mr. MATHIAS. Mr. President, self-centered and irresponsible political forces have shattered the dream of the Olympics and have dealt a vicious blow to the hopefulness and enthusiasm of thousands of young men and women who came to Munich seeking no greater reward than the right to compete in peaceful athletic rivalry with their peers from all over the world.

It is important that the whole world condemn this resort to violence at a moment when mankind is expressing its aspirations for peace through participation in the Olympics. It is especially important, particularly within the Arab world, that there be no condonation, no sympathy, and above all no sanctuary for those who have perpetrated this crime.

I, of course, extend every possible condolence to the families of those who have died and to those who are suffering at this time, but I think the lesson for the world to learn is that there can be no compromise with violence and disorder of the kind that we have seen in Munich.

The Senate has properly condemned the Munich mayhem by unanimous resolution and I consider it a solemn responsibility to be a cosponsor of that measure.

TERRORISM AT THE OLYMPICS

Mr. GURNEY. Mr. President, for the past week, many of us have been following the progress of the summer Olympics in Munich with great interest and enthusiasm—interest in seeing who would win, enthusiasm in watching athletes of all nations compete in a spirit of goodwill among nations.

Coming on the heels of a relaxation of world tensions, the games were adding fuel to the hope that friendly competition within a framework of international peace and cooperation could finally become a reality. Perhaps nothing underscored this hope more than the fact that an Israeli team was competing a scant 30 miles from the site of an infamous concentration camp that, less than 30 years ago, was dedicated to the extermination of countless numbers of innocent people of the Jewish faith.

The tragic events of yesterday indicate that these fond hopes were premature. By wantonly killing 11 members of the Israeli Olympic team, eight Arab lunatics have shown themselves to be no less barbaric and no more considerate than those who gave the orders at places like Dachau.

The enormity of the crime becomes all the more unbelievable when one considers the consequences. The perpetrators of this atrocity could not have believed that their cause, or the cause of world peace, would be helped by such a futile display of blackmail and cold-blooded murder. If they wished to draw attention to their cause, they succeeded, but it will be the type of attention that one gives brigands of the very worst kind.

Peace between Arabs and Israelis can only come when such tactics are discarded and both parties sit down and negotiate face to face in the same spirit of cooperation envisioned by the Olympics.

This type of guerrilla action is totally repugnant to the spirit of the Olympics and to the conscience of the world. It defies words to condemn it; yet it must be condemned in the strongest possible terms. I am sure people around the world are as appalled as I am by this slaughter of part of the Israeli Olympic team. We can only hope that there is no repeat of this senseless bloodshed and that other would-be terrorists realize that there can be no profit from it. In my view, the best way to repudiate the terrorists and to honor the memories of those Israeli Olympic participants who have been killed, is to finish the games for which they trained so hard. That would be a fitting memorial to their dedication and to the ideal upon which the Olympics were founded.

Finally, I think I speak for all Americans in expressing the most profound sympathy to the families of those killed in this tragedy. In this time of sorrow, let us hope that the Olympic ideal, an ideal for which their loved ones died, is not allowed to be buried with them.

OLYMPIC SPIRIT BETRAYED

Mr. HARTKE. Mr. President, the cruel and wanton terrorist activity in Munich transgresses all humane instincts.

The spirit of the Olympic games, long a symbol of peace and brotherhood, has been irrevocably violated. This act of terrorism not only impugns the spirit of the Olympics but undermines the quest for peace among all people.

This senseless slaughter has made us painfully aware that violence and bloodshed pervades even the most peaceful international exchanges.

This killing reinforces our need to rededicate our lives and activity to securing world peace so that in the future young men and women cannot only go to the Olympics without fear of injury but so that all men and women can live without fear for their personal safety.

It is even more tragic that this incident occurs so close to the commemoration of the Jewish New Year, which is a time of deep thought and introspection. It is a time when part of the observance means that each man asks himself, "What did I do wrong by my fellow men and by my fellow man?"

It is time for the United States—and for the world—to reevaluate the depth of our actions to achieve peace. We must ask ourselves have we done all we can to secure peace for our fellowmen. We can never relent from our quest for world peace.

That all men shall live in peace and in a just and free world is not wishful thinking but must be an ongoing goal, renewed each day and reemphasized by positive action toward that goal.

MUNICH'S TERRIBLE TRAGEDY

Mr. CHURCH. Mr. President, the terrible tragedy that has occurred at the Olympic games in Munich horrifies the world. Yesterday's reign of terror perpetrated by Arab guerrillas will live in infamy. My sympathy goes out to the families of the victims and to Israel, the ultimate object of this awful act.

In the very midst of the international arena of peaceful, competitive sport, these Arab assassins did their bloody work; their obscenity can only tighten tensions in an already volatile Middle East, where pressures will now build for reprisal and revenge.

Before this black September recedes into history, an outraged world must insist upon the rooting out and suppression of the guerrilla organization responsible for the Munich murders. The Arab governments must come to grips with the escalating crimes being committed by Arab fanatics against the people of Israel. As the New York Times editorialized today:

> A central question behind yesterday's outrage is who backs the small handful of Arab fanatics immediately involved. Who encourages and finances them? Who offers them safe havens for plotting their murderous deeds and their escape? The answers are not far to seek. These criminals have much sympathy in Arab nations. Often in the past, responsible Arab officials in different countries have had only praise for particular acts of terrorism. It surprised no one that a communique of the Munich terrorists was clandestinely distributed in Cairo yesterday, for Egyptian officials have applauded similar outrages before, notably the massacre at Lod Airport a few weeks ago. The primary responsibility for ending these crimes is that of the Arab states. Never has that responsibility been more clear-cut . . . The fundamental issue is whether there can be effective common action against fanatics and criminals who recognize no boundaries or limits to their depredations. Any nation willing to tolerate or condone such outrages by word or deed deserves outlawry by the civilized world.

I ask unanimous consent that editorials from today's Washington Post and New York Times, plus articles on Arab-Palestinian guerrilla terrorists, be printed in the Record.

There being no objection, the items were ordered to be printed in the Record, as follows:

[From the Washington Post, Sept. 6, 1972]

An Olympic Tragedy

The moral depravity of the Palestinian terrorists at Munich is of a piece with their tactical and political clumsiness. Plainly, by invading the Israeli Olympic compound they thought to dazzle the world and secure the release of other Arab terrorists imprisoned in Israel. Instead, they brought near universal abloquy upon themselves and their methods and their motives, and failed to gain release of their comrades. But in this unspeakable tragedy, the Israeli hostages were apparently killed.

The Palestinians planned their operation better for publicity than success. They failed to consider that, on principle, Israel does not submit to terrorists' blackmail; for this reason alone, the operation could not have succeeded. Earlier, they further erred by killing two Israelis—who, characteristically, resisted—and thereby devalued their own hand: a dead hostage is worthless. The Palestinians further failed to consider how they would pass the files of marksmen which the Germans were sure to put in place. They did not understand that the special German purpose in hosting the 1972 Olympics—to atone for the 1936 "Nazi Olympics" in which Germans humiliated, among others, Jews—made it virtually certain that Chancellor Brandt would not countenance any faintly similar stain.

It was fitting that the Olympics were suspended while the tragedy unfolded. With gratifying courage, the head of the Egyptian Olympic team denounced the murder of the Israeli wrestling coach. The State Department, in an unusually unequivocal comment, went beyond simply deploring the violence to declare that all countries with "a stake in the international system" must deny such criminals the means—presumably meaning the sanctuary—which alone makes their acts possible.

Fortunately for the host of non-violent Palestinians, their welfare and political future do not depend on the deeds of the few psycopaths among them. In the last year or two, progress in Israeli-Palestinian peaceful coexistence has been widely remarked: the routine two-way commerce across the Jordan River and the summer visits of some 150,000 Palestinians to Israeli-occupied territories are conspicuous parts of it. Israelis' guilt for their own past mistreatment of Palestinians is another potent and positive factor: the current storm, over the Meir government's refusal to honor past pledges and let Arabs return to their old homes in the border villages of Berem and Ikrit, is a case in point.

It is terrible that bloodshed interrupted the Olympics in Munich, but less and less can such episodes clog the incipient flow of Jewish-Palestinian accommodation in the Mideast.

[From the New York Times, Sept. 6, 1972]

Murder in Munich

That Arab fanatics could engage in indiscriminate murder, kidnapping and aerial hijacking was proved long ago. But yesterday's murderous assault in Munich plumbed new depths of criminality. By choosing the Olympic Games as the occasion for their bloody foray, the Arab terrorists made it plain that their real target was civilized conduct among nations, not merely Israel or the Israeli athletes captured and killed yesterday. If the Olympic Games could provide a setting for release of their homicidal hatreds, then the same threat would hang over every United Nations meeting and all other international gatherings called to promote peace and friendship among nations.

The action of the West German authorities in refusing to let the terrorists fiy out with their hostages became a tragic necessity after Egypt had rejected an appeal from Chancellor Brandt for guarantees that captive athletes would be returned. The cost in casualties was horrendous, but the desperate gamble to free the Israelis and to make unthinkable any repetition of such outrages was undertaken only after the Germans offered ransom and substitute hostages to save the lives of the hapless captives.

The sympathy of the civilized world goes out to the families of the victims as well as to the nation that was the immediate object of this heinous plot. It was particularly ironic that this bizarre event in which Jewish lives were again sacrificed took place in West Germany, host to the first Olympic Games on German soil since Hitler presided over the 1936 competition in Berlin. In the wake of yesterday's mass tragedy, it would be a desecration of everything for which the games supposedly stand to continue the 1972 contests. The most fitting expression of global revulsion at the monstrous crime of the Arab terrorists would be cancellation of the rest of the schedule.

A central question behind yesterday's outrage is who backs the small handful of Arab fanatics immediately involved. Who encourages and finances them? Who offers them safe havens for plotting their murderous deeds and their escape? The answers are not far to seek. These criminals have much sympathy in Arab nations. Often in the past, responsible Arab officials in different countries have had only praise for particular acts of terrorism. It surprised no one that a communique of the Munich terrorists was clandestinely distributed in Cairo yesterday, for Egyptian officials have applauded similar outrages before, notably the massacre at Lod Airport a few weeks ago. The primary responsibility for ending these crimes is that of the Arab states. Never has that responsibility been more clear-cut.

In the Middle East itself, the dreadful attack on the Israelis at the Olympics must represent a further setback to the search for a negotiated settlement and a lasting peace, and certainly does irreparable harm to the cause of the Palestinians in whose name such atrocities are perpetrated.

The primary challenge of the Munich crimes is to the international community. The fundamental issue is whether there can be effective common action against fanatics and criminals who recognize no boundaries or limits to their depredations. Any nation willing to tolerate or condone such outrages by word or deed deserves outlawry by the civilized world.

Fedayeen Fulfill 1971 Vow by Major Raids Abroad

(By Eric Pace)

"We shall continue the struggle," a member of the Arab commando Central Committee declared a year ago in Amman, Jordan, and since then the commandos have staged a succession of major attacks outside Jordanian soil.

In their statements, the various guerrilla spokesmen have long been saying that they were using violence to dramatize their grievances and to harry Israel and her supporters.

The guerrillas' ultimate aim is to bring about the dismantling of Israel somehow. They argue that it was unjustly established on land that rightly belonged to the Palestinian Arabs.

Before the 1967 Arab-Israeli war, the fledgling Palestinian guerrilla movement went about its business largely behind Israeli lines. But since then, and since the Jordanian Army offensives against the commandos in 1970 and 1971, the guerrillas or fedayeen, have often found it more expeditious to mount their raids abroad.

It was the 1970 crackdown that gave rise to the name of the shadowy Black September organization. In a statement issued in Cairo yesterday, the group claimed responsibility for the attacks on the Israeli Olympic team in Munich.

In November, 1971, four Palestinians assassinated the Jordanian Premier, Wasfi Tal, at Cairo's most luxurious hotel, the Sheraton, and when they were arrested they said they were members of the Black September group. Last February, an Egyptian state security force freed them on bail of $2,300 each.

"SCORCHED EARTH"

At the time of the assassination, Arab informants in Beirut, Lebanon, reported that the organization had come into existence in July, 1971 and had issued a statement at the time saying it would mount a "scorched-earth" policy against the Jordanian regime of King Hussein.

But soon afterward, a Jordanian Government spokesman charged that Black September was really only "a mask used by Fatah to hide its treacherous schemes." Al Fatah is the main guerrilla organization.

But no Arab commando group claimed responsibility for the next major guerrilla incident, the hijacking of a Lufthansa jumbo jet to Aden, the desolate capital of Southern Yemen, last February.

The West German Government was reported to have paid a $5-million ransom to the Arab gunmen who took over the plane, which had carried more than 100 passengers including a son of the late Senator Robert F. Kennedy.

Guerrillas, in Cairo, Take Responsibility for Attack

Cairo, Sept. 5.—An Arab guerrilla organization called Black September claimed responsibility today for the attack on Israeli athletes' quarters at the Olympic Village in Munich.

The group, in a statement handed to foreign journalists, demanded the release of Arab guerrillas held by Israel and threatened to "liquidate" the Israelis held hostage in Munich if West Germans tried to storm their position in the Olympic quarters.

The organization's statement, on four mimeographed pages headed "Communique of the Operation in Munich," was distributed to news agency offices.

The statement said that "our revolutionary forces" were "taking over, right now, the Israeli house at the Olympic Village in Munich." It said, "All members of the Israeli delegation in the house are under armed arrest."

List of Demands

About six words were cut out of the paper at the beginning of the next sentence, which read, "We demand of the Israeli military authorities in occupied Palestine to comply strictly with the following."

A list of demands was then given, calling for the release of Arab guerrillas held in Israel.

The statement also warned against what it called "tricky maneuvers or delaying tactics of any sort." If the Israeli authorities used any, they "will pay then for their arrogance and their disregard for human rights and lives, as well," the statement added.

The second part of the statement termed Israel "an American client state" and said she posed a permanent threat to the people of the Middle East.

Method of Release Specified

Cairo, Sept. 5.—The document said to have been distributed by the Black September guerrilla organization said that the released prisoners were to board any non-Israeli plane and fly to any Arab capital other than Amman, Jordan, or Beirut, Lebanon.

After their safe arrival, it said, negotiations could begin with West German authorities for the release of the Israeli hostages and the departure of the Arab guerrillas. Black September will tolerate no compromise, it said.

No Surprise in Beirut

Beirut, Lebanon, Sept. 5.—The Black September guerrilla organization's claim of responsibility for the attack on Israeli athletes in Munich came as no surprise here.

Arabs have been expecting the radical group to retaliate for Israelis' storming of a hijacked Belgian Sabena jetliner to the Tel Aviv airport last May.

Black September guerrillas had hijacked the plane with 100 persons aboard to Tel Aviv and demanded the release of guerrillas held in Israeli prisons. Israeli soldiers disguised as airline servicemen attacked the plane, killed two male hijackers and captured the two Arab women helping them. Black September vowed vengeance.

Late in May, three Japanese terrorists acting on behalf of the Popular Front for the Liberation of Palestine, a Marxist group, attacked the Tel Aviv airport with machine guns, killing 28 persons and wounding 72.

The Black September organization is made up of about 200 young guerrillas who were members of Al Fatah, the main guerrilla organization. Some observers believe Black September is a secret Fatah arm, operated by Fatah's intelligence unit.

Black September was so named to symbolize the plight of the Palestinian guerrillas, suppressed by King Hussein of Jordan in September, 1970. The group first appeared last November when four of its men assassinated the Jordanian Premier, Wasfi Tal, in Cairo.

The group also claimed responsibility for an attempt on the life of a former Jordanian Ambassador in London, the sabotaging earlier this year of a factory in West Germany that manufactured electric generators for the Israeli Air Force, and the blowing up of the oil complex at Trieste, Italy, in August.

Black September's activities have evoked mixed Arab reactions—disapproval from most governments and support from some Palestinians and other Arabs.

Arabs appeared today to be stunned by the action in Munich. Their immediate reaction was dismay.

Lebanon indicated disapproval when the Government radio made no mention of the developments in Munich. Other Arab radios reported the attack without comment.

Lebanese wondered whether Israelis would find an excuse for an attack in Lebanon. They noted that the guerrillas here had kept their promise made in June to freeze all operations against Israel from Lebanon.

The Lebanon-Israeli border has been quiet since then. This followed Israeli land and air attacks on guerrilla bases and villages in southern Lebanon.

Guerrilla Denial Reported

Beirut, Sept. 5.—A Lebanese Government spokesman said tonight that the Palestine Liberation Organization, the over-all guerrilla group, had denied any connection with the guerrilla attack in Munich.

The spokesman said the Palestinian officials here had reported that the organization had nothing to do with Black September.

TRANSACTION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. Gambrell). Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 30 minutes with the statements made therein limited to 3 minutes each.

ORDER OF BUSINESS

Mr. JAVITS. Mr. President, may I be recognized for 3 minutes?

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized.

EQUAL EDUCATIONAL OPPORTUNITIES ACT OF 1972

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. Gambrell). The Senator will state it.

Mr. JAVITS. Mr. President, the Chair is about to lay before the Senate for a second reading a measure from the House, popularly known as the antibusing bill. My parliamentary inquiry is this: Is there any way under the rules by which at this time by motion or otherwise that bill can be referred to a committee?

The PRESIDING OFFICER. Under the practices and precedents of the Senate there is no way in which that can be done at this time.

Mr. JAVITS. I thank the Chair.

Mr. ALLEN. Mr. President, will the Senator yield for a moment?

Mr. JAVITS. I yield.

Mr. ALLEN. As a matter of fact, has not the Senator himself used this very same method in the past to get bills on the calendar without going to committee?

Mr. JAVITS. The Senator said that yesterday.

Mr. ALLEN. Yes. The Senator is not taken by surprise because he used this very same strategy 15 years ago, I believe.

Mr. JAVITS. There is no claim as to surprise, as the majority leader said yesterday, about the past; it is only as to the future.

Mr. ALLEN. I assure the distinguished Senator from New York there will be no element of surprise in the efforts of the Senator from Alabama to see that the Senate has an opportunity to vote on this most important issue, and he hopes most sincerely that the joint leadership will arrange to schedule this bill for early consideration by the Senate; and I believe that the leadership is going to do that. The Senator from Alabama is going to urge and plead, if necessary, with the joint leadership to set this matter down for consideration by the Senate. Only on failure to prevail on the leadership to bring the matter up will the Senator from Alabama resort to other methods to get a vote.

Mr. JAVITS. I know of few issues before us in which the views of the Senator from Alabama and the Senator from New York are as clear.

Mr. ALLEN. I thank the Senator

The PRESIDING OFFICER. The Chair now lays before the Senate H.R. 13915 for second reading. Under rule XIV each bill must be read three times on different days. This bill was received from the House on August 18 and was read the first time, at which time objection was heard to its second reading. It will now be read the second time.

The assistant legislative clerk read the bill by title, as follows:

> An act (H.R. 13915) to further the achievement of equal educational opportunity.

Mr. ALLEN. Mr. President——

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. I object to further proceedings at this time on the bill.

The PRESIDING OFFICER. Objection having been heard, the bill will be placed on the calendar under rule XIV.

Is there further morning business?

DR. GUILLERMO SEVILLA-SACASA

Mr. COOPER. Mr. President, 29 years ago, on July 30, 1943, Dr. Guillermo Sevilla-Sacasa, a great diplomat, jurist, politician, and parliamentarian, presented his Letters of Credence as Ambassador of Nicaragua to President Franklin Delano Roosevelt.

Since then, Ambassador Sevilla-Sacasa has represented eight Nicaraguan rulers before six Presidents of the United States of America, Presidents Roosevelt, Truman, Eisenhower, Kennedy, Johnson, and Nixon; and before nine Secretaries of State: Hull, Stettinius, Byrnes, Marshall, Acheson, Dulles, Herter, Rusk, and Rogers. He has dealt with 10 Chiefs of Protocol, Summerling: Woodward, Simmons, Buchanan, Duke, Hand, Abell, Symington, Mosbacher, and Smoak. It may be the only case in the history of universal diplomacy and particularly in representation in our country.

Ambassador Sevilla-Sacasa, a man of extraordinary talent and ability, has given honor to Nicaragua and its administrations along the years of his meritorious career. He was a judge at 21, member of the Chamber of Representatives at 25, speaker of the house at 27 and, in later years, he was also a Senator. It is a remarkable history in the life of a man and proves him to be one of the most valuable statesmen of his country and one of the true values of this continent.

As Delegate of Nicaragua, he signed the Charter of the United Nations at the San Francisco Conference in 1945 as well as the Charter of the Organization of American States in 1948. He has represented his country Nicaragua in more than a hundred international conferences, among them, in 1944, the historic Conference of Bretton Woods, from which have emerged the International Monetary Fund and the International Bank for Reconstruction and Development. At the present time he is Governor for Nicaragua of the Bank.

In 1946 he presided over the Council of the Organization of American States. In 1968, as Vice President, he headed several sessions of the General Assembly of the United Nations. On July of 1970 and on October of 1971, he also headed the Security Council. He has presided at international meetings, among them, the Inter-American Conference on Copyright, the 10th meeting of Consultation of Ministers of Foreign Affairs, the Inter-American Commission on Nuclear Energy, the Commission of the 21, peace commissions, fact-finding missions, and lately the special mission that the Security Council of the United Nations sent to Senegal to investigate serious charges by the Government of Senegal against Portugal and the authorities of Guinea—Bissau. His report, as is widely known, contained important conclusions and recommendations and was approved by the Security Council with its special commendation. The other members of the mission were the Ambassadors of Belgium, Burundi, Japan, Poland, and Syria.

It was my honor and pleasure to serve with Ambassador Sevilla-Sacasa in the General Assembly of the United Nations in Paris in 1951. I was a member of the delegation of the United States, and Ambassador Sevilla-Sacasa participated as chief of the Nicaraguan delegation. His interventions in the debates were always timely; he reasoned with wise judgment and magnificent eloquence.

In this Chamber we have also applauded him when, during many years, on the occasions of the joint sessions of Congress, when he has come to the House of Representatives, meeting with our House and Senate as dean heading the diplomatic corps. His personality, gentility and dignity have been greatly appreciated by all of us.

He is a family man. He and his distinguished wife, Mrs. Lillian Somoza de Sevilla-Sacasa, have had nine children, all of them born in this Capital, where they have studied and are still studying at the present time.

Of his career as Ambassador to our Government we have heard only praise. He is respected and esteemed as a capable statesman, diplomat, and friend.

I wish that my words be registered in the RECORD as a tribute to a man of worth at the initiation of his 30th year of effective diplomatic service. He has understood and been a friend of the United States, but he has always represented faithfully his country, Nicaragua; and these characteristics mark his excellence as the Ambassador of Nicaragua.

Mr. SAXBE. Mr. President, I join the Senator from Kentucky (Mr. COOPER) in recognizing the services to his country of Dr. Guillermo Sevilla-Sacasa. This gentleman has served his country extremely well, and the relationship between the United States and Nicaragua has profited thereby.

I had occasion to visit Nicaragua and to feel the warmth of their regard for the United States, and a great deal of that I attribute to the representation of his country here by Dr. Sacasa.

The 29 years that he has served as Ambassador to this country have been years in which the two countries have drawn closer together, and have not been thrust apart. The economic relationships between the United States and Nicaragua have been friendly and profitable to both countries, and I hope the feelings that exist will continue, and I know they will as long as Dr. Sacasa or men like him represent his government in the United States.

Mr. JAVITS. Mr. President, I wish to acknowledge the extraordinary and outstanding service of His Excellency Dr. Guillermo Sevilla-Sacasa, the Nicaraguan Ambassador to the United States for the past 29 years. Since July 1943, Ambassador Sevilla-Sacasa has proved himself outstanding in his role as dean of the Diplomatic Corps in the United States as Ambassador and as the Nicaraguan Representative to the United Nations and to the Council of the Organization of American States. Serving as the Dean of the Diplomatic Corps since January 1958, under four American Presidents, he is an exemplary elder statesman whose advice and leadership has been of inestimable benefit to the international organizations and offices where he has served and especially to his country.

Ambassador Sevilla-Sacasa is the recipient of over 30 honorary degrees from American and European nations, and he has served as the President of the Chamber of Deputies of Nicaragua. It is an honor to call to the attention of the Senate the fine service of this experienced statesman and to wish him a happy birthday, his 64th, this Friday, September 8.

Mr. CHURCH. Mr. President, I join my Senate colleagues today in saluting my friend, the doyen of the diplomatic corps, His Excellency Dr. Guillermo Sevilla-Sacasa, who recently began his 30th year of service in Washington, D.C.

Ambassador Sevilla-Sacasa has daily displayed his friendship and good will toward the American people. In the course of his professional work, he has been helpful to the U.S. Government time after time, arranging, mediating, and participating in critical diplomatic negotiatons. I, for one, hope that the Ambassador has kept a diary of his service in Washington, and will one day write his memoirs of what he saw and what he did.

During his long and distinguished tenure, the former parliamentarian and judge has represented his Government during years presided over by Presidents: Franklin Delano Roosevelt, Harry S. Truman, Dwight D. Eisenhower, John F. Kennedy, Lyndon B. Johnson and Richard M. Nixon . . . an extraordinary record.

Besides his numerous diplomatic duties in Washington, Ambassador Sevilla-Sacasa serves as Nicaragua's Representative at the United Nations General Assembly in New York City. He was an original signer of the U.N. Charter.

Mr. MANSFIELD. Mr. President, Ambassador Guillermo Sevilla-Sacasa completed, on July 30, his 29th year as Ambassador of Nicaragua to the United States. Before his service as Ambassador, he had served his country as a judge, a member of the chamber of representatives, and a senator.

During his tenure as Ambassador, he has served as his country's representative to the United Nations on numerous occasions, and I had the honor of serving with him in the General Assembly in Paris in 1950.

Ambassador Sevilla-Sacasa was a signer of the Charter of the United Nations, and has served as his country's representative in the Organization of American States.

He is now the dean of the diplomatic corps in Washington, and we have noted his dignity and courtesy to the diplomatic corps and to Members of Congress.

He is a devoted family man.

I join in congratulating Ambassador Sevilla-Sacasa and Mrs. Sevilla-Sacasa on his service to his country.

Mr. PASTORE. Mr. President, whenever this Senate of the United States meets in joint session with the House, it is an event of historical importance.

It is a time of pageantry, too, as the diplomatic corps representing the nations of the world parades to its place of honor.

The burst of applause is first of all for the head of that parade, the dean of the diplomatic corps. He is my good friend as he is the friend of all of us and friend of our country, the Ambassador of his own Nicaragua, the Honorable Guillermo Sevilla-Sacasa.

Ambassador Sacasa was already long established when I came to the Senate 22 years ago and it is to mark his 30th year in Washington that I speak today.

The gracious personality that I have enjoyed on numberless occasions was developed in an earlier Nicaraguan career that earned Dr. Sacasa laurels as a jurist, parliamentarian, and statesman.

As a youth of 21 years, he was already a judge. Four years later he was a member of the Nicaraguan House of Representatives and within 2 years its speaker—and then senator in his Government and now at Washington he can count eight Nicaraguan rulers he has represented here.

Six Presidents of the United States have received him since that July 30, 1943, when he was presented to Franklin Delano Roosevelt at the White House.

To cover the same span of years his friendship has included nine Secretaries of State, nine Chiefs of Protocol, and four Supreme Court Justices.

International affairs have commanded his talents—United Nations, the Organization of American States, the American Commission on Nuclear Energy, among them.

The rollcall of his responsibilities is most prestigious, but most of us count personally the years of our friendship with his genial personality, the delight of every gathering, a warm-hearted family man shared with his distinguished wife, Mrs. Lillian Somoza de Sevilla-Sacasa, the love of nine children, all born within the circle of this city of Washington.

So this is a tribute to personal and international friendship, hands and hearts across the American continent, and a grateful accolade to a great citizen of the world, Ambassador Guillermo Sevilla-Sacasa.

Mr. SPARKMAN. Mr. President, today I want to join some of my colleagues in congratulating Ambassador Sevilla-Sacasa of Nicaragua on the occasion of his completing 29 years as Ambassador to the United States. As everyone knows, he has for many years been the dean of the Ambassadors in Washington.

I had the privilege in 1950 of serving as a delegate in the General Assembly of the United Nations. He was there at that time. I enjoyed my association and my service with him. He has represented his country in the United Nations many times and is the member of the Organization of American States representing Nicaragua.

During his career, he has received many honorary degrees. He and his wife are the parents of nine children.

He has been a great representative of his country and a most popular Ambassador in Washington. He and his country have been our great friends. I congratulate his fine country for having had for these many years such an able and outstanding representative in the ambassadorial corps in Washington.

THE ANTIBUSING BILL

Mr. BAKER. Mr. President, I wonder if I might have the attention of the distinguished majority leader for a moment.

Mr. MANSFIELD. Yes.

Mr. BAKER. On yesterday I inquired of the distinguished majority leader what plans, if any, might be contemplated by the joint leadership on how soon we could expect action on the so-called antibusing bill. Today we have the bill going to the calendar on objection to its further consideration at this time. Since it is on the calendar, I wonder if the leadership today can give us any more information than we were able to get yesterday on when this bill might be placed before the Senate for consideration.

Mr. MANSFIELD. Mr. President, unfortunately, I am unable to reply affirmatively because, following my usual custom, it is my intention to discuss this matter with the distinguished Republican leader, and after that has been done, then the joint leadership may be in a better position to answer the question raised by the distinguished Senator from Tennessee.

Mr. BAKER. I thank the distinguished majority leader. I would simply say the Senator from Tennessee is most anxious for the Senate to proceed to the earliest possible consideration of this most important bill. I would strongly urge the joint leadership to give consideration to its earliest possible action. The schools of my State, and other States as well, having just opened, it is a matter of paramount importance, and I think it is important that the Senate consider it as early as possible.

Mr. MANSFIELD. I understand. The Senator's suggestion will be kept in mind.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON DEPARTMENT OF THE ARMY RESEARCH AND DEVELOPMENT CONTRACTS

A letter from the Deputy Assistant Secretary of the Army (R. & D.), transmitting, pursuant to law, a report on Department of the Army Research and Development Contracts, for the 6-month period ended June 30, 1972 (with an accompanying report); to the Committee on Armed Services.

PERMANENT RESIDENCE FOR CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered relating to permanent residence for certain aliens (with accompanying papers); to the Committee on the Judiciary.

FINANCIAL AUDIT OF THE MILITARY ORDER OF THE PURPLE HEART OF THE U.S.A., INC

A letter from the Adjutant General, Military Order of the Purple Heart, transmitting, pursuant to law, a financial audit of that order, for fiscal year 1972 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of Maryland; to the Committee on the Judiciary:

"HOUSE JOINT RESOLUTION No. 102

"House Joint Resolution ratifying a proposed amendment to the Constitution of the United States relative to equal rights for men and women

"Whereas, The 92nd Congress of the United States has passed a Joint Resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women.

"Whereas, This Joint Resolution passed the House of Representatives of the United States on October 12, 1971, passed the Senate of the United States on March 22, 1972, and now has been submitted to a vote of the states; and

"Whereas, The State of Maryland wishes to ratify this proposed amendment to the Constitution of the United States which, when ratified by the Legislatures of three-fourths of the several states, shall be valid to all intents and purposes as part of the Constitution of the United States, viz:

" 'ARTICLE

" 'SECTION 1. Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

" 'SEC. 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

" 'SEC. 3. This amendment shall take effect two years after the date of ratification.'

"*Resolved by the General Assembly of Maryland*, That the foregoing proposed amendment to the Constitution of the United States is ratified by the State of Maryland to all intents and purposes as a part of the Constitution of the United States; and be it further

"*Resolved*, That the Governor of the State of Maryland is requested to forward authenic copies of this Resolution, under the Great Seal of the State of Maryland, to the Secretary of State of the United States, to the presiding officer of the Senate of the United States, to the Speaker of the House of Representatives of the United States, and to the Administrator of General Services of the United States."

The petition of Matilda B. Snowberger, of Williamsburg, Pennsylvania, expressing opposition to the Genocide Treaty; to the Committee on Foreign Relations.

ENROLLED BILL SIGNED

The PRESIDENT pro tempore on today, September 6, 1972, signed the enrolled bill (H.R. 13089) to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes, which had previously been signed by the Speaker of the House of Representatives.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Public Welfare, with an amendment:

S. 2818. A bill to amend the Federal Food, Drug, and Cosmetic Act to prohibit the administration of the drug diethylstilbestrol (DES) to any animal intended to use as food, and for other purposes (Rept. No. 92-1088).

By Mr. BENTSEN, from the Committee on Armed Services, with an amendment:

S. 3905. A bill to amend chapter 73 of title 10, United States Code, to establish a survivor benefit plan, and for other purposes (Rept. No. 92–1089).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

S. 909. A bill for the relief of John C. Rogers (Rept. No. 92–1092);

S. 2714. A bill for the relief of M. Sgt. William C. Harpold, U.S. Marine Corps (retired) (Rept. No. 92–1093);

H.R. 1860. An act for the relief of David Capps (Rept. No. 92–1094);

H.R. 5299. An act for the relief of Maj. Henry C. Mitchell (retired) (Rept. No. 92–1095);

H.R. 5315. An act for the relief of Gary R. Uttech (Rept. No. 92–1096); and

H.R. 10635. An act for the relief of William E. Baker (Rept. No. 92–1097).

By Mr. EASTLAND, from the Committee on the Judiciary, with an amendment:

S. 995. A bill for the relief of Ronald K. Downie (Rept. No. 92–1090); and

S. 3257. A bill for the relief of Gary Wentworth, of Staples, Minn. (Rept. No. 92–1091).

COMMUNICABLE DISEASE CONTROL AMENDMENTS ACT OF 1972—REPORT OF A COMMITTEE (S. REPT. NO. 92–1087)

Mr. KENNEDY, from the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3442) to amend the Public Health Service Act to extend the authorization for grants for communicable disease control and vaccination assistance, and for other purposes, submitted a report thereon, which was ordered to be printed.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following favorable reports of nominations were submitted:

By Mr. WILLIAMS, from the Committee on Labor and Public Welfare:

Wesley G. Campbell, of California; T. Marshall Hahn, Jr., of Virginia; Anna J. Harrison, of Massachusetts; Hubert Heffner, of California; William H. Meckling of New York; William A. Nierenberg, of California; Russell D. O'Neal, of Michigan; and Joseph M. Reynolds, of Louisiana, to be members of the National Science Board, National Science Foundation.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. McINTYRE:

S. 3955. A bill to amend the Economic Stabilization Act of 1970 to provide for the pass through of extra costs reasonably attributable to an increase in the minimum wage. Referred to the Committee on Banking, Housing and Urban Affairs.

By Mr. PROXMIRE:

S. 3956. A bill for the relief of Kamal Antoine Chalaby. Referred to the Committee on the Judiciary.

By Mr. INOUYE:

S. 3957. A bill for the relief of Mr. Cacarias Gonzales Tagamolila. Referred to the Committee on the Judiciary.

By Mr. JACKSON (for himself and Mr. ALLOTT) (by request):

S. 3958. A bill to amend the Wild and Scenic Rivers Act; and

S. 3959. A bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain potential water resource developments. Referred to the Committee on Interior and Insular Affairs.

By Mr. THURMOND:

S. 3960. A bill for the relief of Mr. and Mrs. Karl Emil Christiansen. Referred to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McINTYRE:

S. 3955. A bill to amend the Economic Stabilization Act of 1970 to provide for the pass through of extra costs reasonably attributable to an increase in the minimum wage. Referred to the Committee on Banking, Housing and Urban Affairs.

FAIRNESS AMENDMENT TO THE ECONOMIC STABILIZATION ACT

Mr. McINTYRE. Mr. President, the Senate and the House of Representatives have both recently passed legislation providing for increased minimum wages.

It is anticipated that in the near future the Senate and House conferees will submit to Congress a conference report reconciling the differences in the bills passed by both Houses. In view of the fact that our economy is presently under wage and price controls, serious questions arise as to the effect and manner in which minimum wage increases will be implemented.

The Congress will create economic turmoil if it increases the minimum wage without appropriately amending the Economic Stabilization Act of 1970. The effects of a minimum wage increase on both employees and employers should be fully considered by the Congress simultaneously with a minimum wage increase.

Under Price Commission regulations, manufacturers are allowed to increase prices on their products to the extent that such price increases are necessitated by increased production costs. Included among the permissible allowed price increase elements are increased wages paid to employees. This, however, is not the case with retailers and wholesalers. While the Price Commission has exempted from price control small business firms with 60 or fewer employees, those retailers and wholesalers employing more than 60 persons are still allowed only those price increases directly attributable to increased cost of the products they sell.

When the new minimum wage legislation is passed, we will have a situation where manufacturers will be allowed to increase the cose of their products as related to increased wages but wholesalers and retailers will not.

On the employees side, the question of equity also arises in that employees at or near the minimum wage will be allowed up to a possible 25-percent increase in salary while workers earning somewhat more than minimum wage would be held to 5.5 percent guidelines established by the Pay Board.

Mr. President, fairness and good sense dictate that it should be made explicitly clear that the Pay Board is empowered to allow employers to raise beyond the 5.5-percent guidelines, wages of workers whose wages would normally be increased to reflect the customary differential existing among wage earners. The so-called economic phenomena identified as the "ripple effect" is no more than an affirmation of the fact that wages are relative. The current across-the-board 5.5-percent guidelines of the Pay Board would not permit, however, the operation of the "ripple effect" for wage earners above $2.75 an hour whose wages have customarily been related to wage earners directly affected by minimum wage levels under the Fair Labor Standards Act. This amendment will correct this inequity for employees.

On the employer's side, it is axiomatic that wage increases of up to 25-percent and increased wage-related fringe benefit costs will create greatly increased pay roll costs. Here again, fairness and good sense dictate legislation that would direct the Price Commission to permit those increased costs to be offset through higher prices as is presently permitted for manufacturers. If Government legislation requires increased costs, it should certainly allow those costs to be recouped in the only manner feasible, through increased prices. This is presently denied to wholesalers, retailers, and related commercial enterprises. This amendment will correct this inequity for these employers.

This amendment would permit all workers to seek and employers to pay increased wages to those employees whose wages bear a customary relationship to workers earning at or near minimum wage levels. Furthermore, this amendment would instruct the Price Commission to allow retailers and wholesaler employers to offset their increased costs occasioned by the increases in the minimum wage and wage-related fringe benefit costs—social security, unemployment compensation insurance, et cetera—by increasing prices accordingly.

I would like to make it clear, however, that this amendment precludes the employer from realizing increased profits as a result of increases in productivity gained through wage increases. The amendment clearly states that—

> To the extent that productivity gains would result in increased profits, such price increases shall be diminished proportionately.

The bill is simply designed to allow employees to receive increases in their wages and to maintain the same balance between wages and prices as was present before the passage of wage increases under the Fair Labor Standards Act.

Mr. President, I ask unanimous consent that this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 203(f)(1) of the Economic Stabilization Act of 1970 is amended by inserting immediately after "under such Act" the following: "nor to preclude or limit the payment of any increase in wages to employees whose wages have customarily been related to wages of employees directly affected by an increase in wages pursuant to the Fair Labor Standards Act of 1938 in an amount reasonably necessitated to maintain such customary relationship; and in the event of any increase in wages pursuant to the Fair Labor Standards Act of 1938 to employees directly affected by an increase in such wages as well as to employees whose wages have customarily been related to those of the directly affected employees, the employer paying such increases shall be permitted to increase his prices to the extent reasonably necessitated by such increase in wages and wage related fringe benefits payable to him. To the extent that productivity gains would result in increased profits, such price increases shall be diminished proportionately."

By Mr. JACKSON (for himself and Mr. ALLOTT) (by request):

S. 3958. A bill to amend the Wild and Scenic Rivers Act. Referred to the Committee on Interior and Insular Affairs.

Mr. JACKSON. Mr. President, on behalf of myself, and the ranking minority member of the Committee on Interior and Insular Affairs (Mr. ALLOTT), I introduce by request a bill to amend the Wild and Scenic Rivers Act of 1968—Public Law 90-542.

Section 7b of the act prohibits the Federal Power Commission from licensing any project on or directly affecting any of the 27 rivers listed for study as potential additions to the system. The prohibition is for a 5-year period following enactment of the act—until October 2, 1973—and for an additional period under certain circumstances.

The bill which I introduce today would extend the 5-year moratorium for an additional 5-year period from which time it is expected that studies would be completed on all of the 27 areas.

The bill would also amend section 16 of the act and increase the authorization for the acquisition of lands and interests in land for eight river areas in the initial system from $17 million to $36 million. It is estimated that an additional $19 million is needed to complete acquisitions at the river areas as follows:

Rio Grande River, New Mexico	$100,000
St. Croix River, Minnesota and Wisconsin	1,000,000
Rogue River, Oregon	8,800,000
Middle Fork Clearwater River, Idaho	2,100,000
Feather River, California	3,500,000
Middle Fork Salmon River, Idaho	1,000,000
Eleven Point River, Missouri	2,500,000
	19,000,000

By Mr. JACKSON (for himself and Mr. ALLOTT) (by request):

S. 3959. A bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain potential water resource developments. Referred to the Committee on Interior and Insular Affairs.

Mr. JACKSON. Mr. President, on behalf of the ranking minority member of the Committee on Interior and Insular Affairs (Mr. ALLOTT) and myself, I send to the desk for appropriate reference a bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain potential water resource developments.

Mr. President, this measure was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the executive communication accompanying the draft proposal be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., August, 10, 1972.

Hon. SPIRO T. AGNEW,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft of a proposed bill "To authorize the Secretary of the Interior to engage in feasibility investigations of certain potential water resource developments."

We recommend that the bill be referred to the appropriate Committee for consideration and that it be enacted.

The bill would authorize the Secretary of the Interior to engage in feasibility studies of six potential Reclamation projects. Reconnaissance studies (or comparable information) indicate preliminarily that the projects are economically desirable, financially justified, and enjoy good local support. Feasibility studies are warranted. Authorization of feasibility studies as proposed by this bill is required by section 8 of the Federal Water Project Recreation Act of July 9, 1965 (79 Stat. 217; 16 U.S.C. 4601-19).

Supplementary statements containing information on the six potential projects and justification for seeking feasibility study authority are enclosed.

The effects of the potential projects on water quality, recreation, fish and wildlife, historic, scenic, archeologic, aesthetic and other environmental values will be considered fully in the proposed feasibility studies.

The Office of Management and Budget has advised that there is no objection to the presentation of this proposed legislation from the standpoint of the Administration's program.

Sincerely yours,

JAMES R. SMITH,
Assistant Secretary of the Interior.

S. 3959

A bill to authorize the Secretary of the Interior to engage in feasibility investigations of certain potential water resource developments

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to engage in feasibility studies of the following potential water resource developments—

(1) Cache Creek Project in Comanche, Cotton, Tillman, Jackson, and Kiowa Counties in southwestern Oklahoma.

(2) Garrison Diversion Unit, M&I Water Facilities, Pick-Sloan Missouri Basin Program, in central North Dakota.

(3) Oahe Unit, M&I Water Facilities, Pick-Sloan Missouri Basin Program in east-central South Dakota.

(4) Three Forks Division, Pick-Sloan Missouri Basin Program, in Gallatin and Madison Counties, northwest Montana.

(5) Tucumcari Project in San Miguel County in east-central New Mexico.

(6) Uncompahgre Project Improvement and Extension in Montrose and Delta Counties in the vicinity of Montrose and Delta, Colorado.

CACHE CREEK PROJECT, OKLAHOMA

Location: The drainage basin of Cache Creek and its tributaries lying primarily in Comanche, Cotton, Tillman, Jackson, and Kiowa Counties in southwestern Oklahoma.

Project Data: Reconnaissance Report, April 1971, based on April 1970 prices and an interest rate of $5\frac{1}{8}$ percent.

Total construction cost[1]	$42,504,000
Adjustments	
Total allocation	42,504,000
Program goals	
M&I water (A.F./yr.)	27,000
Cost allocation	
M&I water (A.F./yr.)	39,820,000
Fish and wildlife	197,000
Recreation	2,487,000
Total	42,504,000
Benefit-cost ratio	1.25 to 1.00

[1] Based on one of several alternatives studied.

Description: The investigation will provide a feasibility appraisal of the water resources of the area and of potentialities for their development for municipal and industrial water supplies, pollution abatement, recreation, fish and wildlife, and flood control purposes.

The project as presented in the reconnaissance study would consist of the potential Cookietown dam and reservoir, which would regulate the flows of Deep Red Creek in southwestern Oklahoma, and an aqueduct system about 23 miles in length to deliver water supplies to Lawton, Oklahoma, including Fort Sill. It would also provide flood control, fish and wildlife, and recreational benefits. Water quality control releases would be made to Cache Creek below Lawton. The feasibility of providing municipal water to Altus, Oklahoma, would also be studied.

Status: A reconnaissance report was completed in April 1971.

Justification: A separate investigation now underway to develop an Oklahoma State Water Plan is scheduled for completion in fiscal year 1974. An interim appraisal was completed in fiscal year 1967. This appraisal included a tentative statewide physical plan which featured opportunities for the transfer of water from water surplus areas to meet the needs of water deficient areas in Oklahoma. The interim appraisal included consideration of a dam and reservoir site at the Cookietown site on Cache Creek.

Phenomenal population growth—92.5 percent from 1940 to 1950 and 77.5 percent from 1950 to 1960—taxed many of the necessary utilities and services of the Lawton area, especially municipal and industrial water supplies. This growth, together with the paucity of water supply sources in the area, caused local officials to become concerned with locating and developing additional water supplies. While it was recognized that the ability of the Cache Creek Basin to supply local needs would be a part of the Oklahoma State Water Plan, the progression of the State plan to individual project studies will likely require a period of several years. Because of this situation, an independent reconnaissance study of the Cache Creek potential was carried out by the Bureau.

The reconnaissance report completed in April 1971 on the "Cache Creek Project, Oklahoma" established that when needed, streamflows in the Cache Creek Basin constitute the most favorable surface water resource of significant volume and suitable quality available to Lawton, but that such supplies are not needed to meet Lawton's needs in the near future. However, other severe water shortages in southwestern Oklahoma appear to justify more immediate study and development of the water resources of the Cache Creek Basin. Southwestern Oklahoma is the most critical area in the State from the standpoint of the development of adequate quantities of suitable quality water to meet requirements. At the present time, there are two weather modification contracts in operation. The Cache Creek Basin is located in this area and is one of the few remaining water sources.

In recognition of the critical situation, the Oklahoma Water Resources Board has requested that investigations for the Oklahoma State Water Plan be confined to the southwestern part of Oklahoma and that a feasibility report be prepared that would evaluate the potentialities of making water deliveries to points of need outside the Cache Creek Basin, including the city of Altus, as well as meeting in-basin needs when they occur.

Local interest: The Oklahoma Water Resources Board is extremely interested in the completion of a feasibility report as this potential project appears to provide for local needs within the Cache Creek Basin as well as the most logical means of alleviating water shortages in the southwestern part of the State.

Feasibility investigation costs: $275,000, 3–4 year study.

GARRISON DIVERSION UNIT M. & I. WATER FACILITIES PICK-SLOAN MISSOURI BASIN PROGRAM, NORTH DAKOTA

Location: Central North Dakota in Bottineau, Eddy, La Moure, McHenry, McLean, Nelson, Renville, Sargent, Sheridan, and Wells Counties.

Project data: Reconnaissance studies of January 1972 (draft of reconnaissance report).

First Phase (cities of Lansford, Harvey, and Fessenden)

Total construction cost	$2,700,000
Adjustments (assignment from Garrison Diversion Unit)	1,370,000
Total to be allocated	4,070,000
Allocations:	
Municipal and industrial water (750 acre-feet per year)	1,270,000
Recreation, fish and wildlife	2,800,000
Total	4,070,000

Benefit-cost ratio at 5⅜ percent 1.2:1.0

Second Phase (11 or more cities and four industrial areas)

Total estimated investigation costs and construction costs to be determined prior to initiation of each investigation.

Description: The purpose of this investigation is to develop detailed plans for delivery of municipal and industrial water from Garrison Diversion Unit (under construction) to several municipalities and industrial areas that may need water from the Unit. Of the municipalities proposed for water service from the authorized initial stage of Garrison Diversion Unit, feasibility investigations have been completed only for the city of Minot. The initial stage of the Minot extension proposed as a result of that investigation has been authorized and is now under construction.

The *First Phase* of the study is concerned with three municipalities in the project service area: Lansford (population 296), Harvey (population 2,361), and Fessenden (population 815).

Under plans formulated during reconnaissance studies, water would be conveyed from canals of the Garrison Diversion Unit to multipurpose or single-purpose storage reservoirs to supply municipalities during peak water demand periods and during the winter when canals would not be operated. The multipurpose reservoirs would be developed for recreation and fishing uses if feasible.

Feasibility investigations will consider alternative plans for water service in more detail and evaluate the future demands for the communities as well as costs and benefits of the proposals.

The *Second Phase* of the study is concerned with other communities and possible industrial areas. In preliminary studies, the municipalities of Glenburn (population 381), Granville (population 282), and New Rockford (population 1,969) were identified as communities with a potential need for water in the near future. Eight additional communities (combined population 2,966) were identified as possibly needing water, but further studies would be required. Total water requirements for the communities in the Second Phase and possible industrial areas would total over 16,000 acre-feet.

Status: Reconnaissance studies were conducted during 1970–71 to reevaluate the need for municipal and industrial water deliveries from the authorized Garrison Diversion Unit. The three communities of Lansford, Harvey, and Fessenden were selected for initial feasibility investigations.

Justification: Lansford, Harvey, and Fessenden now obtain water from wells, which do not provide water of sufficient quantity or of desirable quality (present supply 1,000 to 2,600 p.p.m. TDS). A supply of better quality water is needed to meet demands of the present level of population and for future growth. Fessenden and Harvey are located in the central section of Garrison Diversion Unit near some of the principal supply features. The towns are not within the irrigation service areas of the initial stage of the Unit but are within a service area of about 60,000 acres proposed for future irrigation. The town of Lansford is near the 104,000-acre service area of the Souris section of the initial stage. Typical of many small agricultural towns, Lansford and Fessenden experienced population losses of about 15 percent during the last decade while Harvey showed no growth. Irrigation is expected to have an impact on all of these communities and, with a good water supply, total population is expected to increase from 3,472 in 1970 to 5,100 by year 2020. Multipurpose aspects of the water service plans could provide, with development of needed facilities, recreation and fishing use estimated at 180,000 days annually.

Similar needs for additional water of better quality exist at other communities, which would be studied in the Second Phase of the investigation.

Interest: The Garrison Diversion Conservancy District has urged, since initiation of construction of the Unit, that plans for providing water service to municipalities be completed in advance of availability of water from the Unit, now forecast for the late 1970's. This interest was reaffirmed by resolution dated October 1971. Lansford has expressed interest in studies of plans for water service by resolution dated December 1971. Fessenden has indicated by resolution an interest in obtaining water at a point closer to the town as well as an increased supply. Harvey has advised by letter its concern about future water supplies and its interest in study of plans to supply water from Garrison Diversion Unit.

As construction of Garrison Diversion Unit progresses, the communities in the Second Phase of the investigation are expected to evidence further interest in studies of methods of obtaining water from the Unit.

Feasibility investigation costs:

First Phase: $220,000, 2–3 year study.

Second Phase: Investigation costs will be determined prior to initiation of the studies.

OAHE UNIT M. & I. WATER FACILITIES, JAMES DIVISION PICK-SLOAN MISSOURI BASIN PROGRAM, SOUTH DAKOTA

Location: East-central South Dakota in Bon Homme, Brown, Davison, Faulk, Hand, Hanson, Hughes, Hutchinson and Spink Counties.

Project Data: A reconnaissance study dated January 1972 was prepared for service to the city of Redfield. This service would be considered to be the first phase of the project.

First phase (city of Redfield)

Total construction costs for service to Redfield	$930,000
Adjustments (assignment from Oahe Unit)	845,000
Total to be allocated	1,775,000
Allocations:	
Municipal and industrial water (2,580 acre-feet annually)	1,395,000
Recreation, fish and wildlife	380,000
	1,775,000
Benefit-Cost Ratio at 5⅜ percent	2.8:1.0

Second phase (sixteen or more cities)

Total estimated investigation costs and construction costs are to be determined prior to initiation of investigation.

Description: The purpose of this investigation is to study the feasibility of furnishing a municipal and industrial water supply of adequate quality and quantity to meet the current and future water needs of several municipalities that may need water from the Oaha Unit.

The First Phase of the investigation is concerned with furnishing municipal water to the city of Redfield, South Dakota (2,943 population in 1970 water service area), and provide an assured supply for a projected population of 11,500.

Under the plan being considered, a water supply would be obtained from the Redfield Canal, a proposed supply feature included in the initial stage of development of the Oahe Unit. The proposed M&I facilities would store and deliver the raw water to the city's existing facilities for treatment and distribution. The proposed features would include a canal turnout delivery structure, a terminal storage reservoir with 1,260 acre-feet capacity, a pumping plant, and a 2-mile transmission pipeline. The storage reservoir located northwest of Redfield, would store water for peak summer demands and for winter months when Redfield Canal would be inoperative.

Alternate plans of development, such as utilizing the flows in the James River, would also be studied.

The *Second Phase* of the study is concerned with other communities. In previous studies of Oahe Unit, 16 communities (combined population of 47,336) were identified as needing municipal water upon development of the Unit. The total water requirements would be over 20,000 acre-feet.

Status: A brief reconnaissance evaluation of the plan for the city of Redfield was completed in January 1972. Reconnaissance studies of other communities were made in the early 1960's as part of project-wide investigations for the Oahe Unit.

Justificaton and needs: Redfield's 1970 population of 2,943 is presently supplied with water obtained from two wells, exceeding 1,000 feet in depth. A quality comparison of the existing well-water supply with that which could be obtained from the proposed Redfield Canal of the Oahe Unit (supplying Missouri River water) is as follows:

SOURCE AND TOTAL DISSOLVED SOLIDS

Existing wells, 2,180 p.p.m.[1]

Missouri River water, 550 p.p.m.[2]

The existing ground-water source is also very high in sodium, sulphates, and chlorides and contains iron. This poor quality approaches and sometimes exceeds limits of recommended Public Health Service drinking water standards. The proposed Missouri River supply source would be greatly superior in quality to that of the existing wells.

Redfield is located immediately adjacent to the proposed Oahe Unit lands in the West

---

[1] Average TDS of both wells—South Dakota Public Water Supply Data—1971.

[2] Projected quality with full upstream development of Missouri River.

Lake Plain Area. It is anticipated that this municipality will grow as a result of the economic and social impacts it will experience from over 50,000 acres of nearby irrigation development under the Oahe Unit. There is also a need for increased water recreation near the city, which could be met by a storage reservoir.

The benefits of an improved water supply quality will enhance living standards and conditions in the community to provide a better standard of living. The increased water supply will enable Redfield to prepare itself for the expanded community development which is anticipated to occur from irrigation development to adjacent rural areas.

Water is anticipated to be available from works of the Oahe Unit in the late 1970's, and early completion of feasibility investigations of the M&I water supply for Redfield would permit construction to be completed by that time.

Similar needs for additional water of better quality exist at other communities, which would be studied in the Second Phase of the investigation.

Interest: The Oahe Conservancy Sub-District has urged that feasibility investigations be initiated for municipalities which may receive water from the Unit early enough that plans can be completed in advance of availability of water. In the authorized plan for the Oahe Unit, canal-side water service was anticipated for 17 communities. Need developed since the earlier studies for water service to an additional community, the city of Redfield, which would be one of the first areas to receive water from the Unit. Therefore, the conservancy sub-district has urged that a feasibility investigation be made for a water supply for the city of Redfield, with studies of other communities to follow as the need is demonstrated by continuing studies of the Oahe Unit. The conservancy subdistrict is also interested in the possibilities of including sufficient water in planned systems to serve nearby small towns and the rural communities.

The city of Redfield formally advised the Bureau of interest in feasibility studies of its water needs in January 1972 and is interested in Federal construction of the conveyance and storage system because of long-term financing needs and possibilities of including needed recreation and fish and wildlife in a multipurpose plan.

The city of Miller, which would be in the Second Phase of the investigation, advised of its need for water in March 1972 and requested that the Bureau of Reclamation make a feasibility investigation.

Feasibility investigation costs:

First Phase: $100,000, 2-3 year study.

Second Phase: Investigation costs will be determined prior to initiation of the studies.

THREE FORKS DIVISION, PICK-SLOAN MISSOURI BASIN PROGRAM, MONTANA-WYOMING

Location: In drainage basin of Madison River in Madison and Gallatin Counties, southwestern Montana, and in Yellowstone Park, northwestern Wyoming.

Project data: Reconnaissance study of November 1971.[1]

Total construction cost	$1,128,000
Adjustments	----------
Total to be allocated	1,128,000
Allocations:	
Recreation and sport fishing	910,000
Flood control (not evaluated)	----------
Externalities	218,000
Total	1,128,000
Benefit-cost Ration (7% discount rate)	3 to 1

[1] Based on National Economic Development alternative. Allocations exclude $34,000 reimbursable interest during construction.

Description: The purpose of this investigation is to evaluate in more detail alternative plans for management and development of the Madison River Basin. Madison River rises in Yellowstone Park and flows in a northerly direction through Gallatin and Madison Counties to join with the Gallatin and Jefferson Rivers at Three Forks, Montana, forming the Missouri River. The basin has a drainage area of 2,240 square miles.

The detailed studies will involve multiobjective planning of Federal and State agencies; local planning groups and individuals; and private recreation and other companies concerned with future development of the Madison River Basin.

Alternative resource management and/or development plans will be formulated to maximize or emphasize the national economic development, regional development, and environmental quality objectives. A selected plan may evolve from these alternatives or a compromise alternative plan may be formulated and recommended.

Status: An advance multiobjective planning study was made in November 1971 under the Western United States Water Plan to test new planning guidelines for evaluating water and land resource projects, at that time being proposed by the Water Resources Council. Existing information was used for the study, as supplemented by a brief investigation by participating agencies.

Justification: Agriculture is probably the most important enterprise in the basin. The agricultural economy of the basin ranges from an integrated livestock-cash crop type of agriculture in the lower basin to extensive livestock ranching in the upper basin. Because of low annual rainfall, irrigation is required for stabilized crop production and has been practiced in part of the area for over 80 years.

Next in importance are recreation and sport fishing, which provide a large portion of the economic activity in summer months. The Madison River is widely known as a "blue ribbon" trout stream, and enjoys a favorable position in respect to western travel routes to nearby Yellowstone Park.

The area is one of declining population (Madison County population, 5,014) with low per capita income levels and general underemployment.

The development of more irrigation would require additional diversions of water from Madison River, which without additional regulation might adversely affect the fishery. Additional regulation could enhance the fishery. The Madison River from Hebgen Lake to Ennis Lake is being considered as an addition to the Wild and Scenic Rivers System, requiring special consideration for any type of development. Emphasis of the recreational aspects of the basin may preclude private uses of the lands, adversely affecting the present agriculturally-oriented economy. Additional river management may be the best solution to these problems. Solution of such problems requires a detailed feasibility study.

Interest: Federal, State, and local planning agencies are interested in a complete evaluation of the Madison River Basin, not only from development possibilities but from a management standpoint. As more and more lands are devoted to private uses, the possibilities for exchange of public lands for lands along the river becomes more difficult. Inclusion of the river as a possible recreational river under the Wild and Scenic Rivers Act also becomes more difficult.

Feasibility investigation costs: $100,000, 2-3 year study.

TUCUCMARI PROJECT, NEW MEXICO

Location: In San Miguel County in east-central New Mexico.

Project data: Reconnaissance Report, October 1971 based on April 1971 price levels and an interest rate of 5⅝ percent.

Total construction cost	$1,329,000
Adjustments	72,000
Total allocation	1,411,000
Allocations:	
Irrigation [1]	705,500
Fish and wildlife [2]	646,300
Recreation [2]	59,200
Total	1,411,000
Benefit-Cost Ratio	2.4:1.0

[1] Fully reimbursable

[2] Nonreimbursable

Description: The investigations are directed to means for improving the water supply for the Tucumcari Project. The project, operated by the Arch Hurley Conservancy District, has experienced increased irrigation water shortages because of sediment encroachment in Conchas Reservoir and long extended drought conditions. One method of increasing the water supply would be by installing crest gates on Conchas Dam to improve the quantity of water supply and extend the life of the project by providing additional storage capacity to offset sediment accumulations. When Conchas Dam was constructed, provisions were made for the future installation of drum gates. The five drum gates would be 9 feet high and 60 feet long and would operate automatically to control the reservoir level to a maximum elevation of 4210 above sea level.

Status: A reconnaissance report was completed in October 1971.

Justification: Drought conditions in New Mexico during recent years prompted officials of the Arch Hurley Conservancy District through their Congressional representative to request studies of water development possibilities to improve the long range water situation of the District. In addition, sediment enroachment in Conchas Reservoir is gradually depleting irrigation storage capacity. At times, the district has found it necessary to deliver water to the irrigation canals when the reservoir level dropped below the level of gravity flow.

Local interest: Interest has been evidenced by the requests for the study of means for possible improvement in the water supply situation from Arch Hurley Conservancy officials who represent the irrigators of the District. State water officials are anxious to utilize all possible water supplies of the area and are giving full support to the investigations. City of Tucumcari officials are also supporting the water conservation studies and the improvement program.

Remarks: Rehabilitation and betterment programs have been successful in conserving water for the Tucumcari Project but extreme shortages have still resulted during recent dry years because of insufficient regulation of the surface runoff.

Feasibility investigation costs: $50,000, 1-2 year study.

APRIL 1972.

UNCOMPAHGRE PROJECT IMPROVEMENT AND EXTENSION, COLORADO

Location: Gunnison River Basin in Montrose and Delta Counties in west-central Colorado in the vicinity of the towns of Montrose and Delta.

Project data: Special Report on the Need for Improvement and Extension, Uncompahgre Project, January 1972.

The following three plans were evaluated at an interest rate of 5⅝ percent.

[In dollars]

	Improvement plan	Extension plan	Improvement and extension plan
Total construction cost	43,000,000	45,200,000	88,200,000
Adjustments	500,000	3,900,000	4,400,000
Total allocation	43,500,000	49,100,000	92,600,000
B/C ratios	1.2:1	1.9:1	1.6:1

IMPROVEMENT AND EXTENSION PLAN

Program Goals	Allocation
Irrigation (ac) Supplementary 83,800	$17,110,000
M&I Water (af/yr) 20,000	26,940,000
Salinity Control	9,580,000
Flood Control	200,000
Recreation	34,790,000
Fish and Wildlife	1,780,000
Residential Improvement	2,200,000
Total	92,600,000

Description: The Uncompahgre Project is one of the oldest Federal Reclamation projects, having been one of the first five projects authorized for construction following passage of the Reclamation Act of 1902.

The project presently provides approximately 356,000 acre-feet of water annually from the Gunnison and Uncompahgre Rivers for irrigation of about 83,800 acres of land along both sides of the Uncompahgre River. The original project facilities included the Gunnison Tunnel, diversion structures, and conveyance and distribution systems which were started in 1904 and substantialy completed in 1922. The Taylor Park Reservoir, with a capacity of 106,200 acre-feet, was completed in 1937.

Early construction by the Bureau utilized the available natural resources of earth and timber. Canal and lateral sections were unlined and diversion works, drops, chutes, bridges, etc., were nearly all of timber construction. Over the years the Uncompahgre Valley Water Users Association has had to replace or line many of the original structures because of high leakage, rotten timber, or flood waters. The replacement of these structures has added to the operation, maintenance, and replacement costs of the project. Current payments under contract will reach $120,000 annually by 1978 and operation, maintenance, and replacement costs in 1968 totaled about $405,000. As operation, maintenance, and replacement and construction costs continue to increase, the irrigator's financial burden will also increase. Corrective action is needed to reduce OM&R costs.

Feasibility investigations are needed to find solutions to these problems through improving project facilities; reducing the high operation, maintenance, and replacement costs; improving service to the area; and by enhancing the multiple-use of project facilities by including recreation, fish and wildlife, stream regulation, water quality improvement, flood control, power generation, and municipal and industrial water uses.

The improvement plan would include modifications and additions to the existing project facilities and operational procedures to increase the project water supply, reduce project operation and maintenance costs, provide flood protection, improve the general appearance of the area, and reduce salinity contributions from the area. New facilities would include a 10,000 acre-foot Coal Creek Reservoir for regulation of irrigation supplies and a flood protection channel. The plan would provide for lining of canals and laterals of replacement with pipe, improving land drains, and replacing various diversion dams, canal and lateral structures.

The extension plan of the Uncompahgre Project would involve construction of the Dominguez Dam which would form an essentially nonfluctuating lake in the Gunnison River with a capacity of 298,000 acre-feet, and associated facilities for recreational development. The recreational facilities which are in great demand would be provided at the lake formed by Dominguez Dam.

The extension plan would also provide municipal and industrial water, lake fishery and waterfowl habitat, and control for water quality and sediment. The plan would be adaptable to power at the dam and to stage development of pump storage hydroelectric power facilities as the need for such facilities is demonstrated.

Status: Reconnaissance investigations were initiated in FY 1971 and a "Special Report on Need for Improvement and Extension, Uncompahgre Project." has been prepared.

Justification: The Uncompahgre and Lower Gunnison areas contribute a substantial quantity of salts to the Colorado River system. Improvements in irrigation systems and in efficiency of use of water on farms will aid in reducing salinity, which will be a major purpose of this investigation.

Officials of the Uncompahgre Valley Water Users Association are concerned with the need for replacing antiquated structures, lining canals, and improving the distribution system. The project provides the major source of income for this area and loss of the supply of water by failure of conveyance systems or features could have serious adverse effects upon the economy of the area. Many of the farmers need more reliable water sources to improve their economic status.

Local needs and interest: Replacement of deteriorated structures and placement of lining in canals, laterals, and drains would result in water savings, improve the general appearance and safety, reduce O&M costs, reduce seepage losses and the resultant salinity contribution to the river system, and increase the utility of various areas—particularly those being converted to residential use.

The Uncompahgre Valley Water Users Association has urged the Bureau of Reclamation to make a complete study of the project at the earliest opportunity to find a means of stabilizing the economic condition of the area. The following organizations have passed resolutions supporting the investigations: Colorado Water Conservation Board, Colorado River Water Conservation District, City of Grand Junction, and the Grand Junction Chamber of Commerce.

Feasibility investigation costs: $800,000; 4–5 year study.

Mr. ALLOTT. Mr. President, the bill sent to the desk for appropriate reference authorizes six feasibility studies. One of the feasibility studies is in connection with improvements and extension of the Uncompahgre project in Montrose and Delta Counties, Colo.

The Uncompahgre project is one of the oldest Federal reclamation projects in the Nation, having been authorized in 1903. As the reconnaissance report shows, many of the features of the project are in dire need of modernization. The Uncompahgre Water Users Association, the operating entity, has done a commendable job of maintaining and modernizing major features. But, within its limited resources, the full modernization of the entire system would extend over a period of several decades. If the feasibility study shows the project to be feasible, Federal assistance in this project could compress that modernization to a fraction of the time necessary otherwise, thereby allowing the greater efficiencies and the conservation of precious water supplies to be realized at a much earlier date.

There is another factor involved which adds to the urgency of the completion of the proposed feasibility study, and that is a question of salinity in the Colorado River. Only a very small part of the 565 miles of canals and laterals are concrete lined, and losses amount to nearly a third of the water. Those transmission losses percolate through the underlying saline Mancos shale and thereby substantially add to the salt load of the Gunnison River, a tributary of the Colorado River. It is estimated that an average of about 393,000 tons of soluble salts are derived annually from the project area.

As Senators know, the salinity question of the Colorado River has become a thorny problem, both nationally and internationally. All those interested are anxious to see that the salt content of the Colorado be stabilized and ultimately reduced, and the lining of the canals in the Uncompahgre Valley can make a significant contribution to the solution of that problem. Canal lining, and piping through urban areas is contemplated by the reconnaissance report.

In the project area the agricultural crops produced are approximately 10 percent of fruit production, 10 percent of dairying, and the remaining 80 percent of a combination cash crop—such as malting barley, sugar beets, and onions—and livestock production. There are also contemplated benefits for municipal and industrial water and substantial recreation and fish and wildlife benefits.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS

S. 2818

At the request of Mr. Proxmire, the Senator from Massachusetts (Mr. Kennedy) was added as a cosponsor of S. 2818, a bill to ban the use of diethylstilbestrol (DES) in fattening livestock.

S. 3614

At the request of Mr. Williams, the Senator from Texas (Mr. Bentsen) and the Senator from South Carolina (Mr. Hollings) were added as cosponsors of S. 3614, the Education for All Handicapped Children Act.

S. 3634

At the request of Mr. Mondale, the Senator from Maryland (Mr. Mathias) was added as a cosponsor of S. 3634, a bill to provide continued rail transportation in rural America.

S. 3758

At the request of Mr. Nelson, the Senator from Connecticut (Mr. Ribicoff), the Senator from California (Mr. Tunney), the Senator from Arkansas (Mr. Fulbright), and the Senator from Kansas (Mr. Pearson) were added as cosponsors of S. 3758, a bill to encourage and support the dissemination of news, opinion, scientific, cultural, and educational matter through the mails.

S. 3792

At the request of Mr. Jackson, the Senator from Indiana (Mr. Bayh) was added as a cosponsor of S. 3792, a bill to further the purposes of the Wilderness Act of 1964 by designating certain lands for inclusion in the National Wilderness Preservation System, and for other purposes.

S. 3846

Mr. TOWER. Mr. President, I am pleased today to cosponsor S. 3846, the Narcotic Addict Treatment Act of 1972, which would establish necessary registration and security requirements for physicians and hospitals which use narcotic drugs, such as methadone, in drug abuse treatment and detoxification programs.

During the past 2 years, we have been waging an ever-escalating battle to control the spread of drug abuse. The administration is to be commended on its international initiatives to curtail the flow of heroin into this country and in its domestic law enforcement efforts, such as the drug abuse law enforcement program, which is designed to get the drug pusher off the streets and out of our communities.

We have also begun to wage another battle—the battle of treating and rehabilitating an estimated 500,000 heroin addicts so that they can rejoin society and lead normal, useful, and productive lives.

Unfortunately, we know very little about treating drug abuse. Basically, there are two approaches—one is methadone and the other is the therapeutic community. Hopefully, in the near future, we will be able to develop more effective and successful methods. In the meantime, we need appropriate legislation to ensure that methadone does not become a drug abuse problem in its own right.

Methadone is a synthetic drug invented by the Germans in World War II as a painkiller. Today, it is used by many drug treatment programs because it relieves the addict's craving for heroin without giving the addict a sense of euphoria. Although methadone is as addictive as heroin, a person on methadone maintenance can continue to function in a normal manner. However, it is highly dangerous. A normal adult dosage is almost certainly fatal to a child or to any person who does not use heroin or methadone.

In 1968, there were fewer than 400 patients enrolled in methadone treatment programs in the entire Nation. Today, various estimates place the number of persons in methadone programs as high as 60,000. In 1964, the Bureau of Narcotics and Dangerous Drugs established a production quota of methadone for medical purposes at 900 pounds. The production quota for 1972 is slightly over 5,700 pounds. Because of methadone's rapid rise as an acceptable mode of treatment, and consequently, its rapidly increasing use, the opportunity for diversion for illicit purposes has increased.

In the first 9 months of last year, the Bureau of Narcotics and Dangerous Drugs, through undercover agents, purchased or seized 138,181 dosages of methadone from various illicit sources. To cite one example, methadone overdoses resulting from the illicit diversion of the drug were responsible for 14 percent of the narcotic-related deaths in Washington, D.C., in 1971. Such overdoses have been responsible for nearly 40 percent of the recorded deaths this year. The Narcotic Addict Treatment Act of 1972 is essential if we are going to prevent this potentially useful drug, an ally in the fight against drug abuse, from becoming another drug enemy.

S. 3846 provides that all practitioners who utilize narcotic drugs in the treatment of narcotic addiction must register separately with the Attorney General. In order for the registration to be approved, an applicant must show that he is qualified to engage in the type of addict treatment for which registration is sought in accordance with the medical standards determined by the Secretary of Health, Education, and Welfare. Second, this act establishes standards regarding the security of the narcotic drug stock and requires the compilation of records which indicate the full chain of receipt and distribution of these narcotic drugs. In view of the desire to make meaningful medical treatment available to as many narcotic addicts as possible, it is necessary to establish these realistic controls as soon as possible.

I would like to note that hearings have been tentatively scheduled. I am hopeful that Congress will act quickly on this measure before methadone's potential for treatment is undermined by its potential for abuse.

S. 3881

At the request of Mr. CHILES, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 3881, a bill to provide that meetings of Government agencies and of congressional committees shall be open to the public.

S. 3905

At the request of Mr. BENTSEN, the Senator from Mississippi (Mr. STENNIS), the Senator from Virginia (Mr. SPONG), the Senator from Georgia (Mr. TALMADGE), the Senator from Texas (Mr. TOWER), the Senator from Louisiana (Mr. LONG), the Senator from Alabama (Mr. SPARKMAN), the Senator from Florida (Mr. CHILES), the Senator from Arkansas (Mr. McCLELALN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Tennessee (Mr. BROCK), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Maine (Mrs. SMITH), the Senator from Maryland (Mr. BEALL), the Senator from Arizona (Mr. FANNIN), the Senator from South Carolina (Mr. THURMOND), the Senator from Montana (Mr. MANSFIELD), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from New Mexico (Mr. MONTOYA), the Senator from Rhode Island (Mr. PASTORE), the Senator from New Hampshire (Mr. McINTYRE), the Senator from Michigan (Mr. HART), the Senator from Missouri (Mr. SYMINGTON), the Senator from Wisconsin (Mr. NELSON), the Senator from Colorado (Mr. DOMINICK), the Senator from Ohio (Mr. SAXBE), the Senator from Nevada (Mr. CANNON), the Senator from South Carolina (Mr. ERVIN), the Senator from Maine (Mr. MUSKIE), and the Senator from Illinois (Mr. STEVENSON) were added as cosponsors of S. 3905, a bill to establish a survivor benefit plan for members of the Armed Forces in retirement, and for other purposes.

ADDITIONAL COSPONSORS OF A CONCURRENT RESOLUTION

SENATE CONCURRENT RESOLUTION 89

At the request of Mr. THURMOND, the Senator from Nevada (Mr. CANNON), the Senator from Colorado (Mr. ALLOTT), the Senator from Rhode Island (Mr. PELL), the Senator from Oklahoma (Mr. HARRIS), the Senator from Maryland (Mr. MATHIAS), the Senator from Nevada (Mr. BIBLE), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from North Dakota (Mr. BURDICK), the Senator from Michigan (Mr. GRIFFIN), and the Senator from New York (Mr. BUCKLEY) were added as cosponsors of Senate Concurrent Resolution 89, on behalf of the prisoners of war and missing in action.

SENATE RESOLUTION 359—SUBMISSION OF A RESOLUTION CONCERNING THE PRINTING OF CERTAIN LEGISLATIVE PROCEEDINGS RELATING TO THE DEATH OF FORMER SENATOR HICKENLOOPER

(Referred to the Committee on Rules and Administration.)

Mr. MILLER submitted the following resolution:

S. RES. 359

Resolved, That the legislative proceedings of the Congress relating to the death of the former Senator from Iowa, Mr. Hickenlooper, be printed as a Senate document. That document shall be prepared, printed, bound, and distributed, except to the extent otherwise provided by the Joint Committee on Printing under chapter 1 of title 44, United States Code, in the same manner and under the same conditions as memorial addresses, on behalf of Members of Congress dying in office, are printed under sections 723 and 724 of such title.

FEDERAL REVENUE-SHARING ACT—AMENDMENTS

AMENDMENTS NOS. 1473, 1474, AND 1475

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY (for himself and Mr. HARRIS) submitted three amendments intended to be proposed by them jointly to the bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

AMENDMENTS NOS. 1476 AND 1477

(Ordered to be printed and to lie on the table.)

Mr. HUMPHREY (for himself, Mr. STEVENSON, and Mr. HARRIS) submitted two amendments intended to be proposed by them jointly to the bill (H.R. 14370), supra.

AMENDMENT NO. 1478

(Ordered to be printed and to lie on the table.)

Mr. ROTH submitted an amendment intended to be proposed by him to the bill (H.R. 14370), supra.

AMENDMENT NO. 1479

(Ordered to be printed and to lie on the table.)

TAX REFORM

Mr. KENNEDY. Mr. President, on behalf of myself and Senators HART, PROXMIRE, and RIBICOFF, I send to the desk an amendment to H.R. 14370, the revenue-sharing legislation, and I ask that it may lie on the table and be printed.

The purpose of the amendment is to require the administration to submit a comprehensive program of tax reform for consideration by Congress at the earliest possible opportunity. The amendment contains two simple provisions. The first would require the President to submit a preliminary tax reform plan to Congress no later than October 31, 1972. The second would require the President to submit a final plan by March 31, 1973.

Above and beyond the purpose of the amendment, however, is the overriding goal that the American people should be informed before election day of where the administration stands on the critical issue of tax reform. For months, a tide has been rising across the country for such reform. Millions of ordinary men and women want reform, and it is long past time that they knew where their leaders stand.

We know where GEORGE MCGOVERN stands. In a major address last week in New York City, he discussed in detail his plans for comprehensive tax reform, and laid the groundwork for a thoughtful and constructive debate in the weeks ahead.

But we do not know where President Nixon stands. Indeed, if he stands where we think he stands, he is for no reform at all, but simply a perpetuation of the existing tax system—a system that flouts the basic principle of our progressive income tax and turns it instead into a Swiss cheese of loopholes, incentives, shelters, and safe harbors for the special interests and the few who have the wealth and expertise to profit from such provisions.

The amendment we are offering is an entirely appropriate addition to the pending revenue sharing legislation. At a time when the Federal Government is about to embark on a major, long-awaited, bipartisan program of distributing large amounts of Federal income tax revenues for use by State and local governments, it is especially important that those tax revenues be collected fairly from all the people. With this legislation, new demands of the order of tens of billions of dollars are being imposed on the Federal Treasury. To me, there could be no more outrageous or unfair distortion of the principle of revenue sharing than to maintain the many flagrant inequities that now exist in the way our tax laws operate.

Often before, as in the surtax debates of 1968 and 1969, the goal of tax reform has been effectively coupled to major Federal revenue legislation. We can do no less today, at a time when the need for reform is now more urgent than ever before.

In a sense, the amendment we propose is a token of good faith. Let the debate on tax reform go on, but let it go on in an informed and evenhanded way, so that when the 93d Congress convenes in January 1973, we can begin to write tax laws that fairly reflect a mandate of our citizens. Only then will we have a revenue code that represents the real interests of all the people.

Mr. President, I ask unanimous consent that the amendment may be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 73, after line 3, insert the following new section:

"SEC. 144. SUBMISSION OF PROPOSALS FOR TAX REFORM.

"(a) Not later than October 31, 1972, the President shall submit to the Congress preliminary proposals for a comprehensive reform of the Internal Revenue Code of 1954.

"(b) Not later than March 31, 1973, the President shall submit to the Congress final proposals for a comprehensive reform of the Internal Revenue Code of 1954."

AMENDMENT NO. 1480

(Ordered to be printed and to lie on the table.)

VOTER REGISTRATION

Mr. KENNEDY. Mr. President, on behalf of the Senator from Alaska (Mr. STEVENS) and myself, I send to the desk an amendment to H.R. 14370, the pending revenue sharing legislation, and I ask that it may lie on the table and be printed. The purpose of the amendment is to provide a voluntary program of Federal financial assistance to State and local governments to carry out programs of voter registration.

The issues surrounding this proposal are well known to every Member of the Senate. Of all the democratic nations of the Western World, the United States ranks among the lowest in voter turnout. In large part, the problem is caused by our antiquated system of voter registration, which makes the path to the polls an obstacle course for the voter instead of the easy process it ought to be.

We know that many States and many local governments are anxious to improve their voter registration procedures, but simply do not have the funds to do so. The amendment we are proposing is an appropriate answer to the problem, and its principal provisions have already received extensive consideration by the Senate earlier in this Congress. The amendment is an entirely fitting addition to the revenue sharing bill, since it is designed to help State and local governments pay for the cost of expanding the most basic right in our democratic society, the right to vote. If we are to act in time to provide any assistance at all this year, then we must act now.

Mr. President, I hope that the amendment will be accepted by the Senate, and I ask unanimous consent that it may be printed in the RECORD, together with a brief summary of its provisions.

There being no objection, the amendment and summary were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 1480

At the end of the bill, insert the following new title:

TITLE IV—VOTER REGISTRATION

SEC. 401. This title may be cited as the "Voter Registration Act of 1972."

SEC. 402. (a) Title 13, United States Code, is amended by adding at the end thereof the following new chapter:

"CHAPTER II—VOTER REGISTRATION

"Sec.
"401. Definitions
"402. Establishment of Voter Registration Administration
"403. Functions of the Administration
"404. Grants to defray costs of voter registration
"405. Grants to increase voter registration activities
"406. Grants to modernize voter registration
"407. Grants for voter registration by mail
"408. Technical assistance and fraud prevention
"409. Applications for grants
"410. Regulations
"411. Authorization of Appropriations

"§ 401. DEFINITIONS.

"As used in this chapter—

"(1) 'Administration' means the Voter Registration Administration;

"(2) 'State' means each state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States; and

"(3) 'grant' means grant, contract, or other appropriate financial arrangement.

"§ 402. ESTABLISHMENT OF VOTER REGISTRATION ADMINISTRATION.

"(a) There is established within the Bureau of the Census, Department of Commerce, the Voter Registration Administration, hereafter referred to in this chapter as 'Administration.'

"(b) The Administration shall consist of an Administrator and two Associate Administrators, who shall be appointed by the President, by and with the advice and consent of the Senate. The Administrator and Associate Administrators shall serve for terms of four years each, and may continue in office until a successor is qualified. An individual appointed to fill a vacancy shall serve the remainder of the term to which his predecessor was appointed. The Associate Administrators shall not be members of the same political party.

"(c) Except as otherwise provided, the Director of the Bureau of the Census, until such time as the members of the Administration are appointed, is authorized to exercise the duties and powers of the Administration created and established by this chapter.

"§ 403. FUNCTIONS OF THE ADMINISTRATION.

"(a) The Administration shall—

"(1) make grants, in accord with the provisions of this chapter, upon the request of State and local officials, to States and political subdivisions thereof to carry out programs of voter registration;

"(2) collect, analyze, and arrange for the publication and sale by the Government Printing Office of information concerning elections in the United States;

"(3) obtain such facilities and supplies, and appoint and fix the pay of such officers and employees, as may be necessary to carry out the purpose of this chapter;

"(4) prepare and submit to the President and the Congress on March 31 following each biennial general Federal election a report on the activities of the Administration and on voter registration procedures in the States and political subdivisions thereof, including recommendations for such additional legislation as may be appropriate; and

"(5) take such other actions as it deems necessary and proper to carry out its functions under this chapter.

"(b) The Administration shall not publish or disclose any information which permits the identification of individual voters.

"§ 405. GRANTS TO INCREASE VOTER REGISTRATION.

"(a) The Administration is authorized to make grants to any State or political subdivision thereof to establish and carry out programs to increase the number of registered voters. Such a program may include—

"(1) expanded registration hours and locations;

"(2) mobile registration facilities;

"(3) employment of deputy registrars;

"(4) door-to-door canvass procedures;

"(5) absentee registration procedures;

"(6) re-registration programs;

"(7) public information activities; and

"(8) other activities designed to increase voter registration and approved by the Administration.

"(b) A grant made under this subsection shall be equal to 50 percent of the fair and reasonable cost, as determined by the Administration, of establishing and carrying out such a program. A grant made under this section shall not be in excess of 10 cents for each eligible voter in the State or political subdivision receiving the grant.

"§ 406. Grants To Modernize Voter Registration.

The Administration is authorized to make grants to any State or political subdivision thereof for planning, evaluating, and designing the use of electronic data processing or other appropriate procedures to modernize voter registration. A grant made under this section shall not be in excess of one-half sent for each eligible voter in the State or subdivision receiving the grant, or $15,000, whichever is greater.

"§ 407. Grants for Voter Registration by Mail.

The Administration is authorized to make grants to any State or political subdivision thereof to carry out a program of voter registration by mail. A grant made under this section shall be equal to the fair and reasonable cost, as determined by the Administration, of establishing and operating a registration-by-mail system. Forms available for registration by mail shall conform to such regulations as the Administration may prescribe, including the use of bilingual forms where appropriate. Such forms shall be widely available for distribution in post offices and other public locations and for distribution by private individuals and organizations.

"§ 408. Technical Assistance and Fraud Prevention.

"The Administation is authorized to provide technical assistance, including assistance in developing programs for the prevention and control of fraud, to any State or political subdivision thereof for improving voter registration and voter participation. Such assistance shall be made available at the request of States and political subdivisions thereof, to the extent practicable and consistent with the provisions of this chapter.

"§ 409. Applications for Grants

"Grants authorized by section 404, 405, 406, or 407 of this chapter may be made only upon application to the Administration at such time or times and containing such information as the Administration may prescribe. The Administration shall provide an explanation of the grant programs authorized by this chapter to State or local election officials, and shall offer to prepare, upon request, applications for such grants. No application shall be approved unless it—

"(a) demonstrates, to the satisfaction of the Administration, that the applicant has primary responsibility for registering voters within its jurisdiction;

"(b) sets forth the authority for the grant under this chapter;

"(c) provides such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this chapter, and provides for making available to the Administration, for purposes of audit and examination, books, documents, papers, and records related to any funds received under this chapter; and

"(d) provides for making such reports, in such form and containing such information, as the Administration may reasonably require to carry out its functions under this chapter, for keeping such records, and for affording such access thereto as the Administration may find necessary to assure the correctness and verification of such reports.

"§ 410. Regulations.

"The Administration is authorized to issue such rules and regulations as may be necessary or appropriate to carry out the provisions of this chapter.

"§ 411. Authorization of Appropriations.

"For the purpose of carrying out the provisions of this chapter, there is authorized to be appropriated the sum of $45,000,000 for the fiscal year ending June 30, 1973, and for each of the two succeeding fiscal years.".

(b) The table of chapters of title 13, United States Code, is amended by adding at the end thereof the following:

"11 Voter Registration................ 401".

Sec. 403. Section 5316 of title 5, United States Code, is amended by adding at the end thereof the following:

"(132) Administrator and Associate Administrators (2), Voter Registration Administration, Bureau of the Census.".

Summary of Kennedy-Stevens Voter Registration Amendment

1. Principle.—a voluntary, not mandatory, program of Federal financial assistance to State and local jurisdictions to defray the cost of carrying out voter registration programs.

2. *Grants available to State and local governments:*

10 cents per eligible voter to defray the cost of existing registration programs.

50% of the cost of new programs to expand registration, such as deputy registrars, mobile registrars, and extended hours for registration. Maximum grant of 10 cents per eligible voter.

Grants to plan computerized registration systems. Maximum grant of one-half cent per eligible voter or $15,000, whichever is greater.

Grants to pay full cost of registration-by-mail programs.

3. Administration of program.—by a bipartisan Voter Registration Administration created in the Census Bureau. The Director of the Census is authorized to carry out the program until the new Administration is appointed.

4. Fraud prevention.—the new Administration is specifically authorized to provide technical assistance to State and local governments for the prevention and control of fraud.

5. Authorization.—$45,000,000 a year for each of the fiscal years 1973, 1974, and 1975.

AMENDMENT NO. 1481

(Ordered to be printed and to lie on the table.)

Mr. HARTKE submitted an amendment intended to be proposed by him to the bill (H.R. 14370), supra.

AMENDMENT NO. 1483

(Ordered to be printed and to lie on the table.)

Mr. CURTIS submitted an amendment intended to be proposed by him to the bill (H.R. 14370), supra.

AMENDMENT NO. 1484

(Ordered to be printed and to lie on the table.)

Mr. BUCKLEY submitted an amendment intended to be proposed by him to the bill (H.R. 14370), supra.

AMENDMENT NO. 1485

(Ordered to be printed and to lie on the table.)

Mr. GURNEY. Mr. President, I am today submitting an amendment to the Revenue Sharing Act of 1972 which would provide for badly needed reforms in our Nation's local property taxes.

One of the most persuasive arguments for general revenue sharing has been that it would reform our local property taxes and alleviate the heavy burden placed on this tax resource by growing demands for local government services. This legislation, as reported by the Finance Committee, would indeed mitigate these problems by providing badly needed funds for our local governments. However, it does not address itself to the equally important problem of vast inequities and disparities in local assessing practices.

We all know of situations where local assessment rolls are distorted and inaccurate. Assessments in more than one State range from less than 40 percent of market value in one jurisdiction to over 80 percent in other jurisdictions of the same State. It is no wonder that we see a loss of faith and credibility in local governments. It is no wonder that citizens of such areas question the fairness and honesty of our tax systems and governments.

My amendment would require that each tax assessment jurisdiction come within 15 percent of the statewide assessment level of its respective State. It would not dictate to the States what level or method of taxation any State is to use; it would merely insure that whatever assessment standard is used in a State is applied uniformly throughout that State.

The amendment provides for a simply applied and administered reform of local property tax assessments. The only reports required are standard ones that should be available for any tax assessment jurisdiction, and they are to be filed with the Secretary of the Treasury, who is elsewhere required by this legislation to maintain similar records for each unit of local government participating in revenue sharing. Each assessment jurisdiction is given until the end of 1974 to bring its assessments into line with its own State's standards before any penalty is imposed. This is a simple and reasonable reform which could have very far-reaching effects on the public confidence in the fairness and equity of one of our most visible and well-known systems of taxation.

Hearings before the Intergovernmental Relations Subcommittee of the Committee on Government Operations and studies by the Advisory Committee on Intergovernmental Relations together with protests from all over the country have emphasized the growing unrest in our Nation over unfair and in some cases dishonest tax assessment practices. There are growing appeals for Federal action to correct the situation.

I feel that such action is needed and will inevitably come, but I would hope to see it come soon, and without undue interference with the right of a State's people to tax themselves as they see fit.

My amendment accomplishes this by leaving for State and local determination the methods and levels of taxation, but still requiring that whatever method is selected by law be applied uniformly and fairly throughout each State.

Certainly the Federal Government should not allocate billions of dollars for the relief of local tax systems without provisions to insure a meaningful reform of badly abused local property tax assessments.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the Record at this point.

There being no objection, the amendment was ordered to be printed in the Record, as follows:

AMENDMENT No. 1485

On page 73, following line 3, insert the following:

SUBTITLE D—LOCAL PROPERTY TAX REFORM

DETERMINATION OF THE PROPERTY TAX FAIRNESS FACTOR

SEC. 151. (a) Prior to December 31 of every even numbered year beginning with 1974 the chief executive officer of each Local Assessment Authority receiving funds under this Title shall report to the Secretary the Local Assessment Ratio, the Projected Property Market Value, and the sum of all real property tax assessments for his Local Assessment Authority.

(b) The Secretary shall determine and publish the Property Tax Fairness Factor for each Local Assessment Authority.

SEC. 152. If the Secretary determines that the Property Tax Fairness Factor for any Local Assessment Authority is less than .85, or if he determines that any Local Assessment Authority has failed to comply substantially with any provision of this subtitle, he shall notify the chief executive officer of that Local Assessment Authority that if it fails to take corrective action within 90 days from the date of receipt of such notification further payments to it shall be withheld for the remainder of the entitlement period and for any subsequent entitlement period until such time as the Secretary is satisfied that appropriate corrective action has been taken and that there will no longer be any failure to comply. Until he is satisfied, the Secretary shall make no further payments of such amounts.

DEFINITIONS

SEC. 153. (a) For purposes of this subtitle, the term "Local Assessment Authority" means any unit of local government which is legally responsible for assessing real property for tax purposes.

(b) For purposes of this subtitle, the term "Local Property Sales Sample" means the sum of the fair market values, as determined by a qualified appraiser, of a representative sample of real properties within the jurisdiction of a Local Assessment Authority.

(c) For the purposes of this subtitle, the term "Local Property Assessment Sample" means the sum of the assessed values recorded by a Local Assessment Authority for the properties included in a corresponding Local Property Sales Sample.

(d) For the purposes of this subtitle, the term "Local Assessment Ratio" means the ratio determined by dividing a Local Assessment Sample by the corresponding Local Property Sales Sample.

(e) For the purposes of this subtitle, the term "Projected Property Market Value" means the result obtained by dividing the sum of all real property tax assessments for a Local Assessment Authority by the Local Assessment Ratio for the same Local Assessment Authority.

(f) For the purposes of this subtitle, the term "State Assessment Ratio" means the ratio determined by dividing the sum of all real property assessments reported to the Secretary by the Local Assessment Authorities within a state by the sum of the Projected Property Market Values for the corresponding Local Assessment Authorities.

(g) For the purposes of this subtitle, the term "Property Tax Fairness Factor" means the result obtained by dividing the Local Assessment Ratio of a Local Assessment Authority by the State Assessment Ratio for its respective State.

HIGHWAY CONSTRUCTION AUTHORIZATIONS—AMENDMENT

AMENDMENT NO. 1482

(Ordered to be printed and referred to the Committee on Banking, Housing and Urban Affairs.)

Mr. KENNEDY (for himself and Mr. WEICKER) submitted an amendment intended to be proposed by them jointly to the bill (S. 3939) to authorize appropriations for the construction of certain highways.

ADDITIONAL COSPONSORS OF AMENDMENTS

AMENDMENT NO. 1462

At the request of Mr. HARTKE, the Senator from Connecticut (Mr. RIBICOFF) and the Senator from California (Mr. CRANSTON) were added as cosponsors of Amendment No. 1462, intended to be proposed to the bill H.R. 14370) to provide payments to localities for high-priority expenditures to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

AMENDMENT NO. 1465

At the request of Mr. JAVITS, the Senator from California (Mr. TUNNEY) was added as a cosponsor of Amendment No. 1465, intended to be proposed to the bill (H.R. 14370) to provide payment to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

ADDITIONAL STATEMENTS

ACCOMPLISHMENTS OF PRESIDENT NIXON'S FOREIGN POLICY

Mr. SCOTT. Mr. President, a column by C. L. Sulzberger, published in the New York Times of August 18, presents some interesting and noteworthy comments on the accomplishments of President's Nixon's foreign policy.

I ask unanimous consent that the column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FIRST NIXON, THEN SHRIVER

(By C. L. Sulzberger)

BELGRADE, YUGOSLAVIA.—From the standpoint of the American international position I believe the very best outcome of this year's U.S. election would be the renewal of Richard Nixon's mandate for another four years in a campaign which allowed Sargent Shriver to gain a national stature sufficient to enable him to run as the principal Democratic candidate in 1976.

Mr. Shriver has not yet made his mark but, an energetic, intelligent and compassionate man, he is in some respects the best endowed of any of the Kennedy clan for the highest office in the United States, even though he has yet to persuade the public. He is running as Number 2 this time on a ticket hampered by some strange concepts of how diplomatic and defense policy should be elaborated, but he now has a chance for widespread exposure.

Mr. Shriver's eventual prospects are, however, of less present importance than the immediate prospects of Mr. Nixon and most Americans would be astonished at the alarm occasioned in a broad spectrum of opinion overseas at the longshot chance that George McGovern might win the November vote and proceed to honor some of the promises he has made.

This opinion is by no means limited to right-wing governments as in Spain or Greece or to Asian states with which we are linked such as South Vietnam or Thailand. It is fervently held in NATO; it is a matter of utmost concern in Israel; and it is endorsed in many left-wing circles which fear the global power balance might be disastrously tilted should anything approaching McGovern's foreign and defense pledges become the basis for American policy.

As but one example I cite the opinion of Milovan Djilas, former second man in Communist Yugoslavia's hierarchy who is now on the outs with Marshal Tito but who is a profound thinker on political matters and with much experience abroad, Djilas told me:

"President Nixon's trips to Peking and Moscow represented a very impressive historical act. They showed that Nixon understands what Communism is. President Johnson played on the conflict between the Russians and the Chinese. That is a classical kind of policy. But Nixon saw that it would be better to have good relations with both of them—while at the same time remaining strong. He knows you can't afford to be weak."

The big event of the past four years, according to Djilas, is that the Americans have demonstrably proven they won the Cold War and this has altered the entire world picture. He doesn't like the Vietnam conflict and confesses he has never felt a personal sympathy for Mr. Nixon, based on what he has read of him, but he thinks Mr. Nixon fully understands foreign policy requirements.

"The United States won the Cold War," he reasons, "because of the internal disintegration of Communism. Because you remained strong you were able to accelerate this inevitable process. Nixon's Peking and Moscow trips were a result. But the U.S. should neither overestimate nor underestimate that victory. You won because you are a nonideological country and thus were able to avoid a stalemate like that which prevailed between Christianity and Islam after their wars, a victory for neither side.

"The New Left and those influenced by it think the U.S. is racked by crisis but the so-called crisis in American society is largely imaginary. Race and class and generation gaps do exist but there is no fundamental crisis. The crises you have are aspects of the difficulty of adjusting to the electronic and technological revolutions of our time.

"But you have emerged stronger on the world scene because the Communist world divided into factions while, at the same time, the United States succeeded in enlarging some of the basic democratic ideas—like individual human rights—thus helping to erode the Communist system.

"And economically you succeeded in pressing the Marxist world into collaboration with you. You proved the truth of your theory that no economic system can develop isolated from others. And you stayed strong enough."

It is interesting that, although this analysis comes from a Marxist heretic, it resembles similar statements I have heard in various Western European countries, often from foreign observers who habitually preferred Democratic Presidents in the United States.

They feel Mr. Nixon is in line with the traditional postwar American outlook and they are scared of what Mr. McGovern might be tempted to do because of verbal commitments already made.

VETERANS EDUCATION AND TRAINING ACT AMENDMENTS OF 1972

Mr. TOWER. Mr. President, our institutions of higher learning will very soon be opening their doors to begin the new school year. Among those returning to college and university campuses, or beginning their college educations, will be up to 50,000 Texans who are Vietnam era veterans.

Since World War II, the United States has assisted its veterans in their efforts to obtain postsecondary schooling, either at colleges and universities, or at any of a wide variety of vocational institutions. These benefits serve as an expression of the Nation's gratitude for the sacrifices made by its veterans. Further, these benefits encourage and often enable the veteran to pursue his education, thereby improving his opportunities for employment. This education and training is often the key to the veteran's successful transition to civilian society where he can contribute to the welfare of his Nation.

Over the years, Congress has attempted to increase the educational benefits offered to veterans in order to keep pace with rising educational and living costs. The program was never envisioned as a way to pay the entire costs of a veteran's education; but it was designed to encourage him to pursue his education. The benefits, together with private resources or a part-time job, should be sufficient to enable the veteran to attain the education he seeks.

This is not the case today. The average yearly cost of a college education in 1952 was $968. The monthly allowance offered to a single veteran full-time student at that time was $110. Today, the average annual cost for college tuition, books, and fees is about $1,940—more than twice the 1952 cost; yet, the monthy education allowance presently offered our veterans is only $175.

Congress has been moving to rectify this situation, but not rapidly enough. More than a year ago, I cosponsored S. 2161, the Senate version of the Veterans Education and Training Act amendments. This bill would bring the educational allowance for veterans more in line with increasing educational costs. Last February, the House of Representatives passed a version of this proposed legislation which would increase the monthly allowance for a single full-time veteran to $200. On August 3, more than a month ago, the Senate passed another version of this legislation, which I supported, to raise that figure to $250 a month. Shortly after Senate passage, I had a discussion with Assistant Deputy Veterans' Administrator Richard Roudebush to insure that the Veterans' Administration would be prepared to implement the new legislation in time for the opening of school this fall. He assured me that the VA was ready and could implement the increase after an agreement on the bill by a joint House-Senate conference committee.

Unfortunately, even though the congressional leadership had 11 working days to call that conference before Congress recessed, the conference was not called, and now we cannot expect an increase in veterans educational benefits to be implemented by the beginning of the school year. This is indeed regrettable. No doubt some of our Vietnam veterans who need and desire additional education and training, especially with the high unemployment rate for Vietnam era veterans, have been forced to forgo their educational plans because they cannot afford to under the present programs.

It is exceedingly difficult for me to understand why the leadership of the two bodies could not convene a conference and pass final legislation in time to take effect this month; but the fact is that they did not. I am confident that a final Veterans Education and Training Act will be forthcoming from this Congress. It would take effect immediately upon enactment by the President and I know that the VA will act to implement the benefit increases rapidly.

The Veterans Education and Training Act is good legislation and it is needed legislation. It should have been passed already. I urge Senators to work together—and as expeditiously as possible—to resolve any legislative differences for the sake of our Vietnam era veterans.

PUBLIC SAFETY OFFICERS BENEFITS ACT OF 1972

Mr. TALMADGE. Mr. President, the Senate acted yesterday to install what I believe to be a long overdue program. The Senate voted funds to provide for direct payments to beneficiaries of law enforcement officers or firemen killed in the line of duty, or compensation to these men themselves in the event of the loss of a limb.

In so doing, the Senate gave recognition to men whom I have long regarded as unsung heroes in our society—particularly in recent years. These men, in the final analysis, are the average citizen's frontline of defense against lawless elements that have pervaded our society and against mayhem and destruction that have already cost untold millions upon millions of dollars in public and private property damage.

I was proud to support this bill. I am glad to see this expression of concern for public safety officers and firefighters at a time when there seems to be so much handwringing over the unfortunate condition of criminals. Policemen and firemen have a hard row to hoe in this day and time, when law and order are virtually falling apart and when constituted authorities are held up to scorn, ridicule, and physical abuse. It is unfortunate, indeed, that we have seen so many instances of law enforcement officers being attacked or subjected to criticism while criminal and lawless elements are permitted to go about their business as usual. The sad fact is, it is not uncommon at all to read of citizens on the street attacking policemen trying to arrest a criminal suspect, or throwing bricks at firemen and fire trucks at the scene of a major conflagration, which often was the result of arson or rioting. In this kind of work, endeavoring to maintain the peace or salvage valuable property from utter destruction, I for one do not believe policemen or firemen could be overcompensated or their creditable performances overemphasized.

The act passed by the Senate yesterday calls for the payment of $50,000 for death or multiple dismemberment, and $25,000 for a single dismemberment. Of course, neither the Senate nor anyone else can totally make up for the loss of a policeman's or fireman's life in the line of duty, or his tragic disability, but this legislation constitutes at least an important step in the right direction.

A CALL FOR A WHITE HOUSE CONFERENCE ON THE HANDICAPPED

Mr. TOWER. Mr. President, a few years ago, the refrain of a popular song asked the listener to "walk a mile in my shoes." Perhaps every American should take a few moments out of their busy lives to consider what it would be like to be a handicapped person. Let us put ourselves in their "shoes."

If we were confined to wheelchairs, we would discover the difficulty of locating housing with doorways wide enough to pass through and with ramps instead of stairs. If we found a job, we might not be able to take it because the round trip taxicab fare might be more than we would earn and there are no other modes of public transportation which can accomodate wheelchairs.

If we could stand in the shoes of a deaf child, we would live in a world full of sound but only know silence. A fire siren or a ringing telephone would convey no meaning. We would need special training in order to be able to learn to participate in society, to communicate with our family and friends, and to learn the skills necessary to gain employment. But, the special school in our community might already be handling twice as many children as it can serve effectively, and we might be placed on a waiting list already containing the names of hundreds of other deaf children.

If we were elderly and our eyesight was failing, we might soon begin to withdraw from active participation in our community. If we lived in a rural community, we would be far removed from expert medical advice and from any agency capable of helping us adjust to our handicap. We would begin to have difficulty taking care of our personal needs. Because of our failing eyesight, we might easily fall on the stairs and break a hip or a limb. Within a few short months, we might regress from an independent active person to one who requires the full-time care and assistance of others. That might mean a nursing home and leaving our friends behind.

Handicapped people are not hypothetical people. They are real people who live in every large and small community in our Nation. With only a minimum of effort, we can realize at least some of their limitations, their difficulties, frustrations, and disappointments.

The American people have come a significant distance toward full recognition of the special needs of the handicapped. We have made great strides toward providing special education for handicapped children. Greater efforts are being made to remove architectural barriers and to increase the accessibility and utility of public transportation systems. The handicapped are gaining recognition as competent and reliable employees.

On August 18, the day of our recent recess, the Senate passed Senate Joint Resolution 202, which authorizes and requests the President to call a White House Conference on the Handicapped. I cosponsored that legislation and I hope that the House of Representatives will act with the dispatch in approving this measure.

A White House Conference on the Handicapped could provide a focal point on the needs of all of the Handicapped. It could review our past efforts to meet these needs; it could evaluate our present efforts; most importantly, it could tell us what we must do in the future. It would provide a forum from which the handicapped themselves could inform the American people of their needs so that the doors of opportunity could be opened and so that every handicapped person could be able to participate in our society—his society—to the best of his ability.

OFFICE OF TELECOMMUNICATIONS POLICY

Mr. ALLOTT. Mr. President, the Office of Telecommunications Policy of the Executive Office of the President will be 2 years old this September. As Director since its inception, Clay T. Whitehead has instilled life into an organization about which many persons were dubious.

When President Nixon sent his Reorganization Plan No. 1 to Congress in February 1970, I and many other Senators shared some apprehensions about the effectiveness and the propriety of the OTP. However, the President's message convinced me of the necessity of an effective policy group such as OTP has become. The fact that the OTP has become so effective is a tribute to its young and dynamic Director, Clay Whitehead.

Mr. President, OTP has made its presence felt throughout the entire communications industry and here on Capitol Hill. It has not infringed upon the FCC. Where the FCC and the industry needed assistance, as in the recent cable compromise which Mr. Whitehead effected, OTP has provided such assistance. The FCC domestic satellite decision, though not final, was close to OTP's proposal of open entry to competitors. In addition, the Office has brought about the reduction of the amount of spectrum space used exclusively by the Government from 46 to 26 percent. Mr. Whitehead has tackled the politically sensitive public broadcasting issue. It is now apparent, despite the initial protests, that some of the public broadcasting people realize that balance and objectivity are essential elements in the broadcasting world.

But what of the future? Mr. Whitehead is attentive to the complex issues which concern the Congress and the industry. As Chairman of the President's Committee on Cable, Mr. Whitehead will bring forward constructive guidelines for substantive discussion in the Congress. In addition, a number of other issues—such as license renewal, access demand, the Fairness Doctrine, copyright legislation, and counteradvertising—are on his agenda. OTP has provided and will continue to provide valuable service to the Congress and the American people.

Mr. President, I ask unanimous consent that a deserved tribute to Mr. Whitehead and the OTP, an article from the July 10 issue of Television/Radio Age, be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

Inside the FCC—In 1 Year, Whitehead Has Turned the OTP Into a Dynamo

Just about a year ago, many Washington communications experts—both in and out of government—maintained vigorously that Clay T. Whitehead, director of the Office of Telecommunications Policy and adviser to the President, had no political clout and that his ideas would get nowhere. They scoffed at his claim of speaking for the President on communications matters; they predicted his proposals on domestic satellites, transatlantic cables and various aspects of broadcasting would be ignored by the FCC.

"Nobody has tried to blow him out of the water because he hasn't *done* anything yet," one government lawyer said then. A year later, Whitehead has demonstrated that his ideas are heeded at the White House. His proposals, with slight modifications, have been accepted by the FCC. And in the process, he has made some powerful enemies.

Rep. Tobert McDonald (D-Mass.), chairman of the House Communications Subcommittee, attempted to persuade the House to cut OTP's appropriation for next year for $3 million to $1 million. He accused Whitehead of meddling, exceeding his authority and generally wasting public funds. Whitehead felt the ensuing floor debate was "constructive, clearing the air," and that it resulted in "a vote of confidence in the institution" when the House voted to approve the $3 million budget. OTP has a staff of 65.

SOME CONGRESSMEN FEEL HE'S OFF BASE

"Some members of Congress have priorities they feel we should devote our attentions to that are different from ours and the President's," Whitehead feels, but generally his relationship with Congress is okay.

President Nixon held an informal meeting with broadcasters recently (with Whitehead present) where he gave his support to ideas expressed in previous Whitehead speeches, such as the need for stability in license renewal and the dangers of government interfering with broadcasters' editorial judgement in choosing subjects of importance.

We talked with Whitehead about his office's projects and accomplishments just prior to his departure on a three-week tour of the Far East where he will discuss international communications policies with top authorities in the Philippines, Japan, Australia.

His office is drafting legislation on license renewal for consideration by Congress. He stressed that OTP strives to present bills "not in sweeping terms but targeted legislation that has a good chance of passage—"that's what makes us different from a think tank." Whitehead formerly was with the Rand Corporation.

He is also taking a thorough look at the Fairness Doctrine. "We're hopeful that the FCC will be able to correct some of the problems they have studied in hearings. But there is a chance that the courts won't let them. We're considering what kind of legislation makes sense, if legislation is really necessary," he says.

CHAIRMAN OF COMMITTEE STUDYING CABLE TV

Whitehead is chairman of a cabinet-level committee studying the future of cable television, now drafting its final report. He feels the FCC rules on expansion of cable, importation of distant signals and copyright exclusively are not the final word. He adds that the agreement he helped engineer between cable, copyright and broadcast interests was legitimate in that it helped cable develop at a time "that emotional arguments were being made on fairly narrow economic grounds." He thinks an election year is not a good time for a big legislative fight on what cable should be permitted to do and that the compromise averted inaction or chaos.

One subject likely to be covered is the extent of the FCC's authority over cable. A narrowly divided Supreme Court recently upheld the FCC's right to require cable operators to originate programs. Whitehead feels the 5–4 split and the confusion in both dissenting and concurring opinions reflect "the complexity and many-dimensional nature of this problem." He agree with Chief Justice Warren Burger (who joined the majority in the 5–4 vote with some seeming reluctance) that if the FCC is to have such broad powers, they should be specifically granted by Congress. Otherwise, Whitehead suggests, what would prevent the FCC's passing on the content of motion pictures on grounds that the great majority are later shown on television? He questions whether the FCC should be able to compel operators who went into the business of retransmitting signals to become program producers.

FAVORS LESS, RATHER THAN MORE, REGULATION

Whitehead consistently favors the side of less—rather than more—government regulation, a proclivity that has not endeared him to many bureaucrats. The FCC's recent decision of ownership and operation of domestic satellites was close to OTP's "open entry" proposal. The Commission went further than Whitehead would have in requiring a financial showing by applicants. "Although we are basically in agreement with the FCC's decision, we have some problem with the restrictions placed on AT&T and Comsat. It may make it harder for these companies to serve the public and that may be counterproductive," he points out. OTP had recommended that the FCC grant all applications for domestic satellites without financial restrictions in essence.

Among the office's accomplishments is reduction of the amount of spectrum space used exclusively by the government from 46 per cent of the spectrum to 26 per cent. Since government agencies have always been jealous of that space assigned to them, this is an impressive achievement. OTP's responsibilities with regard to the governmental spectrum are similar to those of the FCC in relation to broadcasting and land mobile and safety and special radio allocations. The office has also been instrumental in a revision of the emergency broadcasting system, Whitehead adds.

FEELS UNDERSTANDING, SOLVING PROBLEMS HIS JOB

He has spent the majority of his time in getting OTP "reasonably well-established, developing a philosophy and understanding of the problems," he feels. Next comes "finding solutions and getting them implemented—through FCC rules, legislation and the other ways the government operates."

One of Rep. McDonald's criticisms of Whitehead was his speechmaking before industry groups. Whitehead feels it is an important function of his office to "call attention to the seriousness to the country of the instability we're witnessing in the broadcast business."

License challenges and access demands "go beyond the broadcasters' economic interests—although those are perfectly legitimate—and beyond the political interests of challenging groups, although they, too, are often legitimate, to a major question of how we are going to handle mass media in this country."

Another point of controversy between McDonald and Whitehead is the financing of public broadcasting. Whitehead believes the issue had become too politically emotional to push for settlement this year. "There was sufficient question about structure that we thought it would be more constructive to consider permanent financing at another time." The congressman charged that Whitehead, on behalf of the Administration, was attempting to bring television under his thumb and stifle its news programming.

AREA OF WORK IS IMPORTANT BUT NOT WELL-PUBLICIZED

Whitehead points out that much of OTP's work is in fields that get great emphasis "but not much press." Proposed amendments to the Communications Act in the common carrier field are being drafted. Whitehead's trip will be concentrated on international agreements. "The FCC, being an independent agency, cannot represent the President; the State Department does not have the manpower or expertise."

Perhaps Whitehead's clearest accomplishment is changing the tune of those who had said he wasn't doing enough to a complaint that he is doing altogether too much.—Mal Oettinger.

INTERVIEW WITH ATTORNEY GENERAL RICHARD KLEINDIENST

Mr. HRUSKA. Mr. President, in the latest issue of U.S. News & World Report the editors have published a wide-ranging interview with Attorney General Richard Kleindienst. In it the Attorney General discusses the work of the Department of Justice in the fields of civil rights, crime, antitrust, electronic surveillance, drugs, and a number of additional subjects. I believe that this interview serves as a very good and constructive window on the work of this Department and the policies of the Nixon administration.

In order that Senators may have an opportunity to read Mr. Kleindienst's words, I ask unanimous consent that the complete text of the interview be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

INTERVIEW WITH ATTORNEY GENERAL KLEINDIENST

What are the major problems in law enforcement? Are business mergers a cause for worry? How would Nixon proposals curb school busing?

Official answers to such questions are given by the nation's chief legal officer, who came to the conference room of "U.S. News & World Report" for this exclusive interview.

Q. Mr. Attorney General, what do you see as the main task—the No. 1 priority—of the Justice Department at this time?

A. For the next several years, our priorities would be as follows, and not ranked in any particular order: a continuation of a vigorous enforcement of antitrust laws, civil-rights laws and laws against organized crime and narcotics, and a continuation of our support to State and local agencies in their fight against street crime. Prison reform also should be included.

If we can maintain through the next Nixon Administration the momentum that we've established in the last 3½ years, then I think many of the problems that seemed almost insoluble four years ago will be reduced to what I like to refer to as just normal irritants in any free society.

Q. In the field of civil rights, what is your main problem now? Schools? Jobs? Voting rights? Housing?

A. Let me start out with a general statement:

This Administration has felt that racism and discrimination exist in all parts of our country. We have not, for short-run political expediency, singled out any particular section of the country with respect to enforcing civil rights. Our efforts have been on a nationwide basis, and I think that lends validity to the enforcement and acceptance of the enforcement of these laws.

Our main emphasis, in relative terms, has been on two areas: the so-called *de jure* segregation in schools in the South, and on discrimination in employment.

One of the facts that I don't think we have been able to get across to the public—or some parts of the news media have been unwilling to report—has been the almost miraculous achievement of the Nixon Administration with respect to the school-segregation problem in our Southern States.

When we came into office in 1969—15 years after the Supreme Court's ruling against school segregation—we found that, in spite of all the breast-beating and the rhetoric, only about 5 per cent of Southern school districts had desegregated to become what the courts call a unitary school system.

Two and a half years after President Nixon was elected, almost 90 per cent of the school districts in the South had been converted to a unitary system. I think that argues very well for the techniques and the manner in which President Nixon approached this task, as compared with the manner in which the two preceding Administrations approached it.

Q. How did the Nixon Administration do it?

A. What President Nixon did that was different was that he persuaded citizens of the South—black and white—to come together, acknowledge the obligation imposed by law and work it out, without making it an inflammatory local or parochial political matter.

I think the mistake that had been made in the past, particularly in the 1960s, was that in order to get some temporary political advantage in Northern cities, the preceding Administrations had an overemphasis on sending outsiders into the South to do this.

But, regardless of the techniques, the fact is that President Nixon had created a situation where now, in most Southern cities and communities, there is more integration, more mixing of black and white youngsters in the public schools, than you would find in such Northern cities as Detroit, Philadelphia, Cleveland, Chicago and New York.

This leads us to one of the predicates for the President's proposed school legislation. Having substantially eliminated *de jure* segregation in the South, we now find ourselves at the point where we should have a national standard to achieve two things: quality education for all children, and the elimination of racial or discriminatory practices everywhere.

That was the basis of the President's proposal to the Congress last March. I hope that when this election is over and Congress gets itself back to the serious business of national issue, it will take up what the President has offered and come out—for the first time—with a national standard for the education of our children.

Q. What is the Justice Department doing about discrimination in employment?

A. To me, any form of racial discrimination is wrong, and I hesitate to put one form of discrimination above any other. But in terms of giving our minority groups the wherewithal to participate fully in our society, I think certainly one of the most important places to start is employment.

There are many practices of many labor unions—practices that were legal when they grew up, just as segregated schools were once legal in the South—which as a result of job-protection clauses and seniority systems now operate either to exclude minority people or make it very difficult for them to enter the unions.

One of the most dramatic situations we had in 1969 was in the motion-picture industry on the West Coast. They have many very highly specialized guilds in that profession and, because of the economic changes in that industry as a result of television, many of those guilds found themselves not seeking new members. Through long, hard negotiations, we were able to obtain very substantial changes that opened up that field to minority groups.

Through the so-called Philadelphia Plan that was enunciated by this Administration, and through the many suits that we have filed on an industry-wide basis, we have opened doors in the building-construction trades.

We've also gone into white-collar employment where large companies, though hiring blacks in some lower-level managerial positions, were laggard in promoting them. Through the filing of carefully selected court cases, we have broken down those attitudes.

Q. Are you getting a growing number of complaints about discrimination against women?

A. Yes, we are.

Q. Is this likely to become a serious problem?

A. I don't think it's going to be a too severe problem. I think the American woman is really rather privileged, because in an enlightened society she has more choices available to her than the male does. She can decide whether to be a housewife and mother, a part-time housewife and part-time careerist, or devote herself entirely to a professional career.

But, of course, we do not have as much equality of opportunity for women as there should be. Many women complain that they are paid less than men for doing equivalent tasks, that they are not treated equally in advancement, or that they are not hired in the first place.

Q. What is the situation in housing? Are complaints of discrimination still rising?

A. Until we have eliminated racism from our society, I think we're going to have continued pressure with respect to violations of the law in this area. But, at least from the standpoint of national policy, we've turned the corner, and I think that the gains each year hereafter are going to be on a progressive scale.

Q. Can you explain why some groups of civil-rights lawyers have resigned from the Justice Department, complaining that its enforcement of the laws is not vigorous enough?

A. We've only had one group who actually resigned—and the next day they announced their support of Senator George McGovern's candidacy for President. So I interpret their action as political.

Previously, in 1969, we had a rather awkward situation in Mississippi involving a school-desegregation case. We had one lawyer resign then and one that we had to discharge. But other than these cases, in some 3½ years of normal turnover of lawyers, I would say we've had fewer resign from the Civil Rights Division than in the previous Administration.

Q. Why do you think so many black leaders are critical of the Nixon Administration's civil-rights record?

A. I think there's a very simple explanation. Black leaders in this country are predominantly Democratic, and they realize that if just a rather modest percentage of black persons started voting Republican, they would probably not win a national election. So I think that for just rather short-range political reasons they have not been fair about recognizing our efforts in this area.

I might add that this is not good for the civil-rights movement in this country. I think it has operated, in some respects, to detract from the desire of many people to end racial discrimination in America.

Q. How large is the Civil Rights Division of your Department, and how does it compare with those in previous Administrations?

A. We have about 140 lawyers in the Civil Rights Division now, and when the former Attorney General, John Mitchell, and I came into the Department, there were only about 100. We have requested authorization for 198 for the next fiscal year.

Q. In the civil-rights field, right now the big dispute seems to be about busing pupils for school integration. Congress has passed some measures intended to curb busing. What effect do you think those measures will have?

A. Congress has not yet addressed itself to the real busing problem, quite frankly. They passed a so-called moratorium, but they avoided the real issue. They have left it up to federal district judges—some 400 of them all over the United States—to legislate on an individual, case-by-case basis.

So you have a federal district judge in Detroit coming up with one solution; another judge in Richmond, Va., with another solution; in Nashville, another and in Denver, yet another.

I think that has been one of the reasons why the busing problem has become so inflammatory.

What we really need is a national policy. The comprehensive legislation that the President offered last March after many months of diligent study is the only responsible approach to this problem.

Q. What would the President's proposals do that the congressional measures do not?

A. President Nixon's approach takes into account these three things:

No. 1, as a result of our effective enforcement, we now have substantially eliminated the dual school system in the South, so that the South is either equal to or ahead of the North in desegregation. Therefore, we can now treat the problem on a national basis.

No. 2 is the desire to provide quality education for all our children.

No. 3 is to have a uniform standard with respect to what you do to eliminate racial segregation.

AIM IS TO UPLIFT POOR SCHOOLS

Q. How would the Nixon measures curb busing?

A. The President's proposal says that, consistent with the Supreme Court's latest ruling, busing may be used where necessary as a last resort—but only as the last arrow in your bow.

It also says—as the Supreme Court suggested—that you do not bus very young children long distances and into a strange environment.

The aim is to uplift poor schools with monetary support to provide equality of education for all.

Then there is the President's moratorium bill which says there will be no more busing orders—no new busing—until next July 1, until Congress has time to pass subtantive legislation to lay down new rules.

Q. Congress has passed a moratorium on busing—

A. But the language of the congressional moratorium is really so vague that no one can determine with certainty its applicability. In the Detroit case, for instance, there is a very serious situation where a federal judge, in effect, wiped out long-established city, county and school-district boundaries to compel busing of pupils between city and suburban districts. That also was the effect of the ruling in Richmond. This raises a real question as to whether a federal judge has the constitutional power to change the basic political-subdivision lines.

Q. Would the President's measures bar such orders as those in Richmond and Detroit?

A. Yes. The decisions in the Detroit and Richmond cases would not be consistent with the President's legislation.

Q. Would you favor a constitutional amendment to limit busing, as some people have proposed?

A. Well, you might eventually have to get to that point. But I believe the President—and I know that I as a citizen—would much prefer to have it done by thoughtful, responsible legislation enacted by the representatives of the people in Congress.

Q. Turning to the subject of crime: Are you making any real progress in curbing crime?

A. I think we have made dramatic progress. To begin with, I think there has been a change in concept and attitude with respect to crime, under this Administration.

By way of preface, let me say this:

I believe that crime derives from several general causes. No. 1 is the natural imperfection of the human being. As long as you have imperfect human beings, you're going to have crime.

Crime also derives from ignorance, poverty, lack of training and bad environment. That's why in this Administration we applaud and support those long-range programs of our Federal Government—some 67 billion dollars' worth of them last year—which, over a long period of time, are calculated to uplift and improve our general society; eliminate poverty, ignorance and racism.

In the meantime, however, we—unlike some of our predecessors—feel that there has to be enforcement of the law. So we in the Department of Justice have concerned ourselves with the specific of enforcing the law. The evidence of how well we've done that is rather compelling.

One example is Washington, D.C., the nation's capital. When this Administration took over in January, 1969, this city was fast getting the reputation as being the crime center of America. And this is a federal city, under control of the Federal Government.

President Nixon quickly presented to Congress a program calculated to improve the whole system of criminal justice in Washington. Today, it has the fastest decreasing crime rate of any major metropolitan area in the U.S.

Q. What caused this change in Washington's crime rate?

A. It came about much the same way that it is coming about in some other areas.

When this Administration began, Washington had 13 federal judges who could try felony cases. They tried 2,000 felonies in 1952 and they tried 2,000 felony cases in 1968—and yet the number of felonies reported had mushroomed to 16,000. Today, there are 55 federal judges in the District of Columbia who can try felonies.

When we got here, the police force numbered about 2,900 officers—only 10 or 15 per cent of whom were black in a city that is more than 70 per cent black. Today, Washington has 5,200 police officers, and about 35 or 40 per cent of them are black. It has the best program of police-community relations in the country. We have more than doubled the number of prosecutors and of defense attorneys.

So what we have done here in 3½ years is to bring the whole system of criminal justice in the District of Columbia up to date.

Q. How about crime in other cities?

A. Through the efforts of the Law Enforcement Assistance Administration, the same thing—on a much slower basis—is going to occur all over the United States. Witness the figures that were recently reported for the first quarter of this year, in which the increase in crime nationwide was only 1 per cent. In the first quarter of the year before the increase was 6 per cent, and it was 13 per cent in the year before that.

An important factor has been the hundreds of millions of dollars that the Nixon Administration has provided State and local agencies through the Law Enforcement Assistance Administration.

This is a revenue-sharing project which enables States and cities to do essentially what the District of Columbia has done. When we got here, the LEAA appropriation was about 63 million dollars. Our first year it was bumped up to 268 million, the next year to 529 million, last year to 699 million—and next year it will be about 850 million dollars.

This federal money is going back to the States on a block-grant basis to give them the police, the courts, the judges, the penitentiaries and the prosecutors to bring law enforcement up to date.

And I would like to say this about block grants:

There was great debate in Congress in 1968 over whether these LEAA monies should be administered as usual by some bureaucrat in Washington, or whether they should be administered by the States through their own planning agencies, with just general supervision from Washington.

I think the manner in which Congress decided that question—and which has been supported by the President—is the best approach, because what Mississippi needs to curb crime might be different from what is needed in New York. I believe the revenue-sharing concept of President Nixon is best illustrated by the block-grant program of LEAA.

Q. There have been charges that some of these LEAA funds have been misspent. Are you looking into those charges?

A. We have been aware of them and have taken the initiative with respect to correcting any misuses. With so much money and so many people involved, it should be no surprise that some misspending has occurred. But the amount of misspending has been very small, and in each case where it has been found, the Department of Justice has gone in with investigative and corrective measures.

CRACKDOWN ON LEADERS IN CRIME

Q. How is the Justice Department doing with its fight against organized crime?

A. I'm glad you asked that question. There isn't a politician, Democrat or Republican, who wouldn't willingly say, "I'm against organized crime." The question is, what do you do about it?

In 1968, Congress debated whether to pass a law giving the Justice Department the right to institute electronic suveillances of organized-crime figures under the supervision and control of a federal judge.

The Attorney General at the time, Ramsey Clark, said if Congress passed that law he would not encorce it. Congress passed the law, and he wouldn't enforce it.

John Mitchell, when he became Attorney General, said he would enforce that law. And in the last 3½ years we have done so. We've instituted some 600 electronic surveillances against organized-crime figures, pursuant to a court order and under court supervision.

The results have been about 2,400 arrests and about 1,600 indictments of organized-crime figures—including what we regard as at least one half of the so-called leadership of the crime organizations.

We have built up our strike forces against organized crime from seven to nearly 20. We have effective co-operation now between all branches of the Government. And the President created the National Council on Organized Crime to plan the strategy to eliminate this menace.

I predict that if President Nixon is given another four years in office, the scourge of organized crime will be reduced to manageable proportions.

Q. There was a recent court ruling against wiretapping—

A. One U.S. district judge held the congressional act authorizing wiretapping to be unconstitutional.

Q. Are you still using wiretaps?

A. Yes, and that ruling is being appealed. I would not expect it to be upheld, particularly in view of the Supreme Court's latest ruling on wiretapping. The Court ruled we could not wiretap without a court order in investigations involving purely domestic subversion. But for even domestic organizations that have a substantial link with foreign governments, the President still has the power to institute wiretaps without a court warrant.

Q. Before the Supreme Court ruling, how many wiretaps were you using in domestic-security cases?

A. When that Supreme Court decision came down, I think we had to discontinue six surveillances which I felt were barred under that decision. All told, including those six, I think we had a total of only 29 security-case surveillances in operation at that time.

We have gone as high as 50 or 55 wiretaps in security cases at a particular period of time. But that is substantially less than the number under previous Administrations. I think the greatest number was under the Kennedy Administration, when there were more than 100 in operation.

Q. Are you able to use wiretap evidence in court in criminal cases?

A. Sure, if you make a proper application and a judge issues an order and you do the wiretapping for the period specified by the judge. The virtue of the law is that it provides evidence you couldn't get otherwise.

Q. How important is the wiretap weapon to a prosecutor?

A. It's indispensable against organized crime. In such cases, witnesses lie under oath or they are intimidated not to testify, or sometimes they are killed. So wiretapping can get us the evidence we need to convict these syndicate members.

Q. L. Patrick Gray, the acting Director of the Federal Bureau of Investigation, said recently that he favors the licensing and registration of all privately held firearms. Do you agree with him?

A. No, I do not.

Q. Why not?

A. In the first place, you can't apply such a rule uniformly in a complex society like ours. To apply that rule to a farmer or a rancher or a sportsman, let's say, out West on the same basis that you would in New York City, just doesn't argue for an understanding of the kind of country we live in.

Secondly, I think enforcement of such a law would be practically impossible. New York for many years has had a law against possessing firearms without a permit. Yet it is estimated there are some 700,000 illegally possessed firearms in New York City.

The end result, I think, would be that your honest, law-abiding citizen would register his gun, but the criminal type—with access to millions of guns—would not. If you take New York City as an example, I don't think a mere law requiring registration of firearms would cause any appreciable diminution in deaths caused by guns.

Q. You mentioned penal reform as one major task for your Department. What is wrong with our penal system, and how serious is the problem?

A. I think the social problem emanating from the prisons in this country is one of the most serious we have.

When you look at the fact that 75 per cent of those persons who are convicted of felonies are rearrested within four years of their release from prison, then—whether you look at it from a humanitarian standpoint or as a matter of just strictly dollars and cents—you've got to say to yourself that we are doing something wrong in our penitentiaries.

Instead of sending offenders to institutions of rehabilitation, so that when they come out they have a better chance of being a useful part of society, what you're really doing is sending them to places that almost guarantee they will be worse when they come out than they were when they went in.

Q. Are federal prisons as bad as State prisons?

A. No. The federal penitentiary system is a model, comparatively. But it still has a long, long way to go.

There is no rational justification, in my opinion, for putting 2,000 men or women in big fortresses like our prisons at Atlanta, Ga.; Leavenworth, Kans., or Lewisburg, Pa., that do not carefully dichotomize the inmates according to their age, background, education and the severity of their crimes, and then divide them into groups with programs calculated to reconstruct and rehabilitate human beings.

The President, long before the revolt at the Attica, N.Y., prison, presented to Congress the country's first long-range, comprehensive program for reforming penitentiaries. Congress has provided the wherewithal to do a part of this program, but has not really addressed itself to the problem. And this is going to be one of the great challenges for the next four or five years. This is a matter I've had an interest in for many years.

Q. Recently, we've had a rash of uprisings in which prisoners demand that Governors or other public officials come to negotiate with them while they are holding hostages at the point of a gun—

A. I don't approve of that kind of thing. I don't believe you can solve the penal problem by being intimidated by inmates to do things not consistent with good prison management. That is not the answer.

Q. Should a Governor refuse to bargain with prisoners under such conditions?

A. It all depends on what the prisoners' demands are. If there are legitimate grievances, I think a Governor or a State legislature has a duty to look into them and make proper corrections. But there is no duty on any public official to acquiesce to unreasonable demands of prisoners—many of whom have become politicized in the last several years.

CURBS ON DRUGS: "DRAMATIC"

Q. Is the use of narcotics a serious and growing problem for your department?

A. It's a serious problem—but it's not growing. I think it would have grown had it not been for President Nixon's aggressive programs. The success of those programs has been dramatic. It's an across-the-board effort—internally, externally, in medicine, education, research, enforcement, customs controls and foreign relations.

I believe that with the continuation of these programs, four or five years from now the drug problem can be reduced to an ordinary irritant.

Q. Moving into the antitrust field, what is the policy now in dealing with big companies that are merging, first into one line of business and then into another—the so-called conglomerates?

A. The Johnson Administration took the view that Congress should enact a new law to deal with that type of merger and, therefore, did nothing to stop conglomerates.

We felt that existing statutes, combined with the rulings that have been handed down by the Supreme Court, gave the Government the power it needed.

I signed the complaints against the International Telephone & Telegraph Company when it acquired the Hartford Fire Insurance Company, Canteen Corporation of America and Grinnell [Grinnell Company, Inc.]. We filed many other complaints against large conglomerates.

Our approach is this:

We feel that it is a violation of the law if the acquisition of a company by one of these conglomerates will interfere with competition from other companies that have been competing with the acquired firm, whether that results from reciprocal buying arrangements that can be used by the conglomerate, or just from the nature of the industry involved.

Q. Does that policy still stand?

A. It certainly does.

Q. Why did you take that position?

A. It was estimated, when President Nixon was elected, that if the wave of mergers continued, within six or seven years about 80 per cent of the productive capacity of this country was going to be in the hands of about 100 corporations. And that doesn't argue well for a relatively dynamic, free, competitive economic society.

I don't think it would be fair to say that the approach we instituted was the sole reason why conglomerate acquisitions have subsided. But I would say it was one of the important reasons.

Q. Have the courts sustained you in your approach?

A. We have not had a Supreme Court ruling, because we've been able to get the companies to accept consent decrees and settlements of that kind. However, some cases still are in the process of litigation.

Q. Are you worried about the fact that mergers seem once again to be increasing?

A. We have no objection to mergers per se. What we say is: If you are going to merge or acquire another company, we want to look at the merging companies in terms of their relative positions in the market and what that market would be like after the acquisition. If it's a highly diversified field, the merging and acquiring companies together might not have a pre-eminent position, and we will let them go ahead.

But if, as in the ITT-Hartford Fire case, you are acquiring the world's largest fire insurance underwriter and, at the same time, you're taking over one of the largest manufacturers of fire-safety equipment, if you own the Sheraton hotel chain and the Avis car-rental system—if all these businesses are large and have a strong position in their markets, that's an entirely different matter. Then we look at the probable economic impact, and we have guidelines that we apply.

Q. Are these the same guidelines that were laid down by the Johnson Administration which, in effect, barred any large company from taking over another firm in the same line of business or of any supplier or customer?

A. Our guidelines are more strict.

Q. How so?

A. I mean that they are being enforced, and I think there's a lot of difference in that respect. This Administration has been more vigorous—and that is generally true of Republican Administrations—in the enforcement of the antitrust laws than the Democrats.

Q. Have you filed more antitrust complaints?

A. We have filed more complaints than any of the past five Administrations. You have to go back to 1942 to find a greater number of antitrust suits brought during a year's time.

Q. You brought up the ITT case. Why did you decide not to press for a Supreme Court decision on that case?

A. We had appealed in the ITT-Grinnell merger case and were contemplating possible appeal in the other ITT cases, involving acquisitions of Hartford and Canteen, in the event we were to lose those cases in the lower courts.

On the one hand, we had very adverse findings by the federal district court in the Grinnell case, which also adversely affected the Hartford case.

Ultimate success on the facts of those two cases, was thus seriously in doubt.

On the other hand, we were advised that there were significant problems in terms of the effects on the shareholders and possibly on the economy of a Hartford divestiture.

Judge Richard McLaren, who formerly headed the Antitrust Division, recommended to me, and I approved, a settlement which would eliminate all the anticompetitive effects we saw in those cases and, at the same time, avoid the problem of a possible loss in the Supreme Court.

This settlement, amounting to a divestiture involving a billion dollars in annual sales, as well as a bar on significant future acquisitions by ITT, is the largest divestiture in modern history. As such, it serves as a stern warning to those who believe that a conglomerate can operate outside the antitrust laws.

PROBLEMS OF U.S. FIRMS ABROAD

Q. Do American companies need more leeway under the antitrust laws in their operations overseas?

A. I think that is a legitimate area of study and inquiry.

Q. Why do you think that?

A. An American company is subject to our antitrust laws on its activities here in the United States. When that company goes abroad to do business, its activities overseas are still subject to the U.S. laws, but its foreign competitors are covered by different laws which tend to be less restrictive. They may be able to work in cartels, to carve up the market, and our companies can't enter into arrangements of that kind.

You also have to consider that our companies already are at a disadvantage because of higher labor costs.

It seems to me that we've got to look at the problem carefully to see whether we can't make it possible for them to be more competitive and less inhibited.

Q. Can't you just say that a company is O.K. if it obeys the U.S. law while operating in this country, and obeys the foreign antitrust laws when operating abroad?

A. It isn't that simple, but that is the essence of the problem.

Q. Mr. Kleindienst, there have been reports in recent weeks that some militant groups of young voters are planning multiple voting on a wide scale in the November elections—with each young person voting in several different precincts or communities. One method reported is for a college student to vote in the town where he attends college and also cast an absentee ballot in his home town. Is there any way the Justice Department can prevent this?

A. If such plans were carried out on a very wide scale, there wouldn't be adequate facilities or resources in the Federal Government to deal with it. But if any voter violates the law, he can be prosecuted. And if there is substantial abuse, we will certainly pursue it.

Q. How large is the Justice Department?

A. We have about 47,000 employes in 17 divisions.

Q. How many of these are lawyers?

A. I would say about 3,000. We're the biggest law firm in the world.

INDUCTION OF EIGHT OUTSTANDING ATHLETES INTO BASEBALL HALL OF FAME

Mr. TAFT. Mr. President, the height of success, in any field of endeavor, is recognition by one's colleagues. Success can best be measured by others in the same field, others who have had the same goals, and those who know the real challenges of the profession.

On August 7, 1972, eight men were so honored in Cooperstown, N.Y. Eight outstanding athletes were inducted into the National Baseball Hall of Fame. Induction into this society not only recognizes the prowess and talent of the individuals on the baseball diamond, but also acknowledges their dedication and high integrity.

Baseball has long been considered the national sport. It implies so much more than athletic ability; it implies teamwork, self-imposed disciplines, character, and devotion. It carries a responsibility as well. These men have excelled in their sport, and they have excelled in the watchful eyes of youngsters playing in sandlots. They have proven themselves to be worthy of the attention and admiration of these youngsters. They have proven themselves to be men of outstanding character, men for the boys to revere.

Perhaps the best way to understand these men is to read their acceptance speeches. The speeches reflect the pride of accomplishment, and the true reward for dedication to one's profession.

I ask unanimous consent that their induction speeches be printed in the RECORD, with the hope that youngsters across the country will realize that dedication and integrity are the rewards of those who merit them.

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

ACCEPTANCE SPEECHES BY INDUCTEES, AUGUST 7, 1972

Yogi Berra.—I have to put on my glasses . . . Thank you Commissioner. I guess the first thing I should do is thank everybody who made this day necessary. But since this is the most important day of my life I want to get it right, so that's why I'm gonna read it. I'm really happy to be here today. Thank God I made it. I always loved the game of baseball. I gave it everything I had. I'm glad I had a chance to play as long as I did. I hope my being here will be an inspiration for every boy in America. I can't begin to thank everyone who helped me achieve this goal—scouts, teammates, managers, broadcasters, and photographers. But I have to mention Bill Dickey who gave me some pointers on catching that put me on the right track and of course Casey for having enough faith in me to play me in the lineup every day, and also George Weiss, who gave me my first contract with the New York Yankees. Being with them was a dream come true. And now the Hall of Fame. But I couldn't have made it without the cooperation of my family. Carmen is a perfect baseball wife. She planned our entire lives around the game. And Larry, Timmy, and Dale always knew it was the right way. I wish they would stand up. My only regrets are for those who didn't live to see this day—my mother, my father, who died several years ago, my brother John, and Gil Hodges who died this year. I want to thank the Yankees and the Mets the only two organizations in baseball I worked for. I would like to thank all of my loyal fans who supported me all these years. I hope they are proud of me today; also my friends who came to share this day with me. I want to congratulate all the men who are being inducted here today. And last of all I want to thank baseball. It has given me more than I could ever hope for, and I hope that when I am through with this game I will put something back. Thank you very much.

Joshua Gibson.—His son Josh, Jr.: Mr. Commissioner, baseball inductees, and Hall of Famers. It's a great thrill and honor today to accept baseball's highest award for my father Josh Gibson, Sr. I would like to thank the Hall of Fame Committee for recognizing such a great talent. The whole Gibson family and the city of Pittsburgh is very proud of this award. And before I leave here, which I'll finish up in a few minutes, I would like to say something personal to my father. "Wake up, Dad. You just made it in."

Vernon Louis Gomez.—Thank you, Mr. Commissioner, members of the Hall of Fame Committee, old timers who voted me in, the new inductees and others who are here. This is indeed the greatest pleasure I've ever had in my life and batting so high in the line up, third, I'm not used to this and so I really don't know what to say but I know that there is nobody up here any happier than I am today; and I also, like Yogi, want to thank the New York Yankees for giving me the chance, and my teammates who scored so many runs and helped me and Joe DiMaggio who ran down all my mistakes and certainly last, but not least, the late Johnny Murphy, who the last couple of years that I pitched, if it wasn't for John I wouldn't be here either, believe me; and to my wonderful family, sitting out there—my wife, June, my son, Dutane, my son-in-law, Steve, my daughter Sharon—I've got the first three rows—and my son-in-law, Dr. Banas, my two grandsons, John and Andy, and my daughter Vernona—I wish you'd stand, please—and some more Gomez' at home that couldn't make it. Again, thank you so much. I only hope that I can live up to the expectations of so many wonderful and great players who have gone into the Hall of Fame before me. Thank you very much.

William Harridge.—Will's grandson, William Harridge, III.: Thank you very much, Mr. Commissioner. I'm very pleased that my mother is sitting down in the front row and myself to be here in Cooperstown today to receive this plaque. I'm sure that my grandfather would have liked to have been here for it. Thank you.

Sanford (Sandy) Koufax.—Thank you, Mr. Commissioner and distinguished members of the Hall of Fame. I don't really have any speech to make today, only a great deal of thanks to a lot of people, so many of them that I don't think I can thank them all by name. There are some I would like to thank. My career started in 1955 in Brooklyn and a very inglorious career it started as, and I think the first group of people I would like to thank are those who had enough faith in me that I'd be standing here some day, a lot more faith than I did, to be honest, and I had times I would possibly be tempted to go look for a job somewhere for those first six years. One man, a pitching coach that we had, that was with the Dodgers for ten years, Joe Becker, pushed me, shoved me, embarrassed me and made me work; and thank God for him. Being a pitcher, I feel that it is sometimes a very solitary, very lonely, sort of thing. Baseball players are wont to say pitchers are a different breed. I think sometimes you're all alone and you feel like, well, everybody on the other team is against you, and they are. The only other one that seems to be close, the only friend you have, is the catcher; and I'd like to thank every catcher who ever caught in any ball game I was ever in—two in particular: Roy Campanella, who is here today and caught the very first one, and John Roseboro, who caught most of the others. I'd like to thank all the other players that I ever played with for their help, their support. I'd like to thank the Dodger organization, Mr. O'Malley, his son Peter is here today—the only organization I ever played with. I'd like to thank Walter Alston, also, the only manager I ever played for. There's so many others to thank, I think right now I must thank my parents and my wife, not for what they've done for me, but for what they are. I'd also like to take this opportunity to thank all you people here, both inside the fence and outside the fence, for how good you've been to me and tell you just how much I appreciate being here today and how lucky I feel to be in such distinguished company. Thank you.

Walter Buck Leonard.—First I'd like to thank all of the various committees and the Commissioner for selecting me as a candidate for the Baseball Hall of Fame. It was something that I'd never dreamed about, something I'd never think would happen, for we in the Negro Leagues weren't eligible to even take part in the Hall of Fame ceremonies. In our leagues we played mostly for the fun of it and a little money. The reason why it was so far from us, first we had to get into the major leagues and also play ten years in the major leagues and qualify—that is, to receive enough votes from the committees to be eligible to be selected for the Baseball Hall of

Fame. That was so far from us in the Negro Leagues until we just would read about the Hall of Fame, and that's all. Sometimes we used to criticize the Hall of Fame for selecting various players for the Hall, and we made our selections for the Hall of Fame. However, we had fun and we enjoyed doing that. The greatest moment until the present time of my life was in February, in New York City. Monte Irvin, who works in the Commissioner's office, called and asked would I come from North Carolina to New York to select an all-star Negro team from the old Negro Leagues. I told him yes, I would be happy to. I arrived in New York on a Monday afternoon, called, and he came over and said "stay here and I'll pick you up in the morning, we're going to the meeting." He came over on a Tuesday morning and we went across the hall to the Americana Hotel to the meeting, and we saw the Commissioner standing over there. I asked Monte: "What's he doing over here?" He said, "Well, he wants to sit in on the meeting." Then they opened the door and there was all those cameras, men, lights; and I asked Monte, I said, "What they gonna do now?" and he said, "They're going to name Josh Gibson for the Baseball Hall of Fame." So they were arranging the platform, and after they got everything arranged—the Commissioner, Campanella, Larry Doby, Irvin on the platform—they said "Come up here Buck we want you to sit on the platform" I said "For what?" "They're going to ask you some questions about Josh Gibson. You played with him nine years and you ought to know quite a few things about him," I went up and sat on the rostrum, and the Commissioner began to talk. He said—these might not be the exact words, but something like this—He said, we have met here today to make an announcement," he said "The committee has seen fit to elect Josh Gibson to the Baseball Hall of Fame." Well, everybody clapped. "The Committee has also seen fit"—and I started sweatin'. Sweat was meetin' right under there and fallin' down on my new suit. So then he said they have also seen fit to select Buck Leonard for the Hall of Fame. I was speechless. All the cameras started clinking, and lights went on, and I was already sweatin'. So they said, "Say something." I said, "I don't have anything to say. Somebody ask me a question. Maybe I can answer that." So they began to ask questions—"How do you feel?" It was the greatest moment of my life, being at that time selected for the Baseball Hall of Fame. Now, we in the Negro Leagues felt like we were contributing something to baseball too, when we were playing. We played with a round ball and we played with a round bat. And we wore baseball shoes and wore baseball uniforms, and we thought that we were making a contribution to baseball. We loved the game, and we liked to play it. If we didn't, we wouldn't have played, because there wasn't any money in it. But we thought that we should have and could have made the major leagues, and all of us would have desired to play in the major leagues because we felt and we knew that that was the greatest game. Sometimes we baseball players think our greatest thrill comes from something that we do on the baseball field, but my greatest thrill did not come from a home run that I hit nor a catch that I made or stealing a base. I ought not to have said that, maybe, but anyway my greatest thrill came from what somebody did for me, and that was select me for the Baseball Hall of Fame. I will do everything in my power to honor and uphold the integrity of baseball. I will do everything in my power to try to take care of this selection and this induction into the Baseball Hall of Fame. Again I want to say this: It is nice to receive praise and honor from men, but the greatest praise and honor comes from our Lord and Saviour Jesus Christ. Thank you.

Early Wynn.—Thank you, Mr. Commissioner, distinguished guests, ladies and gentlemen. I don't know how come my hands are so wet and my throat so dry. That Buck is a tough guy to follow. I don't believe the words are within me to express my gratitude for being elected into the Hall of Fame. But a little unlike Yogi, I was trying to figure out for the past few days who made this necessary. And it goes back a long ways. My mother and father. My mother for wanting me to stop football; my father for playing catch with me so often, being associated with people like Mr. Clark, the Old Fox, Griffith—Calvin Griffith—Ossie Bluege, and so many in those twenty three years in the majors and five years in the minors that I cannot remember. I just wish that I could have been better than I was. And I think of the players today. I wish I had felt like this, that every time I played a game I was wanting to be an All-Star, play in the World Series, and be elected to the Hall of Fame. And I have. Thank you.

Ross Middlebrook Pep Youngs. His daughter, Mrs. Caroline Thompson.—Mr. Commissioner, guests; on behalf of my mother and myself I want to thank you so very much for paying this great honor to my father. I want particularly to thank the sports writers for remembering him such a long, long time. Thank you.

END SEEN FOR SHIRLEY HIGHWAY BUS LANE—OR "WHO'S BEING TAKEN FOR A RIDE?"

Mr. ALLOTT. Mr. President, in a continuing effort to inform the Senate on important developments concerning the Interstate 95 bus operation in the Washington, D.C., area, I ask unanimous consent that two items be printed in the Record. The first is an article from the Washington Post of Sunday, September 3; the second is the relevant portion of the transcript of my weekly radio report which deals with the busway project.

There being no objection, the items were ordered to be printed in the Record, as follows:

End Seen for Virginia Bus Lane

(By Jack Eisen)

The Virginia Highway Department plans to abandon the reserved express bus lane on Shirley Highway when reconstruction of the road is completed in 1975, requiring buses to mix with automobiles and trucks in rush-hour traffic.

The plan, disclosed in a letter recently written by State Highway Commissioner Douglas H. Fugate, already has caused anxiety among backers of the bus project, which is nationally cited as an example of how buses can provide efficient rapid transit service in urban areas.

The express bus experiment, funded in part by the federal government, has become so popular that recent statistics show more people riding buses during the rush hours than using automobiles on Shirley Highway. From its initial start of less than 2,000 passengers in 1969, the buses have now attracted 18,420 riders a day.

Fugate's letter has prompted the steering committee of Washington area officials that arranged the express bus project to call for a special meeting with Virginia highway officials early in October.

Kenneth M. Wilkinson, transportation planning engineer for the Virginia department, said his agency always has regarded the reserved bus lane as an expedient during the Shirley reconstruction and has made no secret of its eventual plan to abandon it.

As now used, the busway is a single lane in the median of Shirley. It will be replaced by two reversible lanes carrying traffic toward Washington in the morning and toward the Virginia suburbs in the evening.

George A. Avery, former chairman of the Washington Commission who headed the original Shirley steering committee, recalled yesterday that a consultant on the widening recommended that buses be given permanent preference over automobiles in its two middle lanes.

Under the proposal, the entry of traffic into those lanes would be metered, with buses permitted to use them at all times but automobiles barred when the lanes reached near capacity.

"If you know a bus is going to get stuck in any jam that does occur," Avery said, "the incentive to get on the bus will be lost."

Wilkinson said the highway department feels that the newly widened Shirley Highway, eight lanes for most of its length including the two middle lanes, will provide enough capacity for all traffic to move swiftly.

He said the department will install closed-circuit television to provide surveillance of traffic conditions, but has no plans for metering.

Experience in many metropolitan areas has shown that motorists will crowd a freeway with as many cars as it can hold. Some cities, such as Chicago, have tried metering to prevent jams.

Fugate's decision to abandon the bus priority system was disclosed in a letter written Aug. 15 to Evelyn Kitay, a staff member of the Motor Vehicle Manufacturers Association in Washington. A copy of the letter was obtained from another source.

In the letter, Fugate declared:

"It is the department's intention at the present time to use the reversible lane for mixed traffic when these lanes have been completed to the Potomac River (in 1975).

"According to the last report dated July of this year of the AB&W Transit Co. (which operates the Shirley express buses), there were less than 200 buses using the exclusive lanes during the 2½-hour (rush-hour) period the lanes are open to them . . .

"This means that there would be less than three buses each two minutes per mile on two lanes of highway during the peak conditions.

"The reversible lanes are so critically needed for the inbound and outbound peaks (that it does not appear to be reasonable for the lanes to be reserved for the exclusive use of buses.

"Commuting habits of people could change over the year," Fugate concluded, "and if such a change resulted in extensive use of rubber-tired mass transit vehicles, the department, I am sure, would be glad to reexamine its position."

Statistics compiled by the Northern Virginia Transportation Commission (NVTC) and the Metropolitan Washington Council of Governments have shown that since the busway was opened in 1969, bus patronage has continued to increase month by month.

Initially, Avery recalled, fewer than 2,000 bus pasengers were traveling on Shirley. By mid-1971, just before the first new federally financed buses were purchased for the project, 10,371 pasengers were riding the buses in and out each day. Last month, the total reached 18,420.

However, federal funds from the Department of Transportation that are underwriting the Shirley express bus project will expire in December, 1974, several months before the extension of the widened highway to the river is slated to open.

Rail transit service is not planned by the Metro system through the Shirley Highway corridor. By 1979, however, Metro service is scheduled for Springfield and Franconia, with the trains operating through Alexandria.

Weekly Radio Report

Paul Weyrich. Turning to another topic, Senator Allott, an active member of the Transportation Appropriations Subcommittee, had this observation on the plans to close the Interstate 95 bus only lanes:

Senator ALLOTT. Of course, the Interstate 95 bus-only lanes applies to the Washington, D.C., area. Here we have, in practical terms, a fine example of what I have been talking about for several years. The Virginia Department of Highways and the Federal Highway Administration permitted two lanes to be used for buses only during rush hours. In a recent Senate speech I said the experiment was a qualified success, even though it is no substitute for rail rapid transit. Now the Virginia Highway department says that 18,000 passengers is not enough to justify the lanes being used for buses only. It says it will have to open the lanes to general traffic when the highway is completed. I think every city which chooses the "trojan bus" approach offered by the highway people to solve its mass transit problem can find itself in the same predicament. After it builds bus lanes, the highway people can dictate that there is insufficient traffic to justify buses alone, so the lanes have to be used for other purposes.

PAUL WEYRICH. Senator Allott says he has been skeptical of the highway department's interest in mass transit for just this reason.

Senator ALLOTT. On the surface some of the highway people seem to be genuinely interested in mass transit, even if they do limit their interest to buses only. Underneath, however, some of these highway people probably see the "bus lane" approach as a clever way to build more highways under the cover of mass transit. I believe that transit authorities and city planners had better take a long hard look at the kind of technology they choose to solve their transit problems. They might find that they have elected to operate buses on exclusive lanes, only to later learn that the buses must be mingled with cars and trucks and they are right back where they started from.

PAUL WEYRICH. This has been news from Senator Gordon Allott. This program came to you from our studios in the United States Senate, Nation's Capitol in Washington.

CALL TO FEAR

Mr. CHURCH. Mr. President, the presidential nominating conventions have been held, the most recent being the Republican Party's convention. The proceedings, particularly President Nixon's speech of acceptance of his renomination, have generated considerable comment in the newspapers.

Two such comments appeared in the New York Times during August—one an editorial entitled "Call to Fear," published on August 29, 1972, the second, an article entitled "The Making of the President," written by Tom Wicker, and published on August 24, 1972. Both editorialized comments point out that, although certain initiatives by the President in foreign policy could have been prominent elements in a constructive acceptance speech, the President inexplicably chose, in the words of the New York Times's editorial, to devote "most of his energies to calling upon the electorate to fear Senator McGOVERN and the Democrats." This, concluded the New York Times editorial, "is no happy augury for a reasoned and responsible discussion of the Nation's serious problems."

I ask unanimous consent that both articles be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

CALL TO FEAR

President Nixon's acceptance speech to the Republican National Convention was an extraordinary address for an incumbent to deliver. Instead of expounding the accomplishments of his own Administration and explaining how he plans to extend and improve upon them in the next four years, Mr. Nixon devoted most of his energies to calling upon the electorate to fear Senator McGovern and the Democrats.

"In asking for your support, I shall not dwell on the record of our Administration which has been praised, perhaps too generously, by others at this convention," he said. Coming early in the speech this sentence sounded like a bit of engaging modesty, until it became evident that it was, in fact, a line concocted to enable him to pivot away from his own record and make a savage, partisan attack on the opposition.

Except for a concluding "upsweep" section on the hope for peace, the thrust of the speech was overwhelmingly negative. It was as if Mr. Nixon has not been President at all but is still the office-seeker and partisan sharpshooter, ever on the attack. It was also an intellectually tired and empty speech—one that fell back on old material and barely reworked "cheer lines" from previous campaigns.

Thus, the quote from Lincoln about America being on God's side was lifted from the last paragraph of the first Nixon acceptance speech in 1960. The passage about Tanya, the Russian girl, was the same one that he used in his address to the Russian people earlier this year. "Peace is too important for partisanship," is a slight variation of the line Mr. Nixon used in the last campaign to avoid any discussion of how he intended to "end the war and win the peace" in Vietnam.

Indeed, Wednesday night's speech had the same purpose as the carefully crafted "basic speech" which he repeated over and over again in 1968 and—with some different phrases—in 1960. That purpose is not to engage in the democratic process of debate, of argument and counter-argument, of explaining problems to the people and trying to guide them in the direction a leader thinks they should move. Mr. Nixon seeks the opposite. He seeks to obscure the hard choices, to package issues in ways that sound pleasing to listeners but actually commit him to nothing, and thereby to evade a leader's responsibility rather than to exercise it.

There can be little doubt that Mr. Nixon's performance was effective in partisan terms. With the skills he has relied upon in a quarter-century of campaigning, he set up straw men and bravely struck them down. He placed the well-calculated innuendo; he deployed the usual dubious or unprovable statistics; he made complex issues pivot like dancing bears and leap through rhetorical hoops; he stirred fear and then came down firmly on behalf of convictions shared by everybody.

"I believe in the American system." And who in this campaign does not?

"We have launched an all-out offensive against . . . permissiveness in our country." What does it actually mean, if anything, to launch an attack on permissiveness?

Dusting off an applause line from his 1968 standard speech, Mr. Nixon said, "I want the peace officers across America to know that they have the total backing of their President in their fight against crime." Does that mean they did not have the backing of President Kennedy or President Johnson? Or that Senator McGovern in pro-crime?

"Let us be generous to those who can't work without increasing the tax burden of those who do work," Mr. Nixon said. No one can be generous and thrifty at the same time; the President's own welfare reform plan would involve substantial additional Federal expenditures. In like vein, the President denounced the local property tax but said nothing about the broad-based tax that would have to be imposed to take its place.

The taint of demagoguery sadly infected even the President's discussion of the Vietnam tragedy and also of his initiative toward China and Russia, where his critics would readily concede his constructive efforts. Mr. Nixon laid down three unexamined but applause-provoking criteria for a Vietnam peace. He promised never to abandon American prisoners of war, but did not say how endless bombing would get them back. He promised never to impose a Communist government on South Vietnam, but did not explain how he would end a war in which the political future of South Vietnam is the central issue. He promised never to "'stain the honor of the United States of America," but did not say why it is honorable to rain bombs on the Vietnamese people because they are Communists at the same time that he is making friendly overtures to far more powerful Communist nations.

If he keeps to the pattern of his past campaigns, President Nixon will reiterate endlessly between now and November what he said on Wednesday evening. Sections of the speech may be omitted or their order of delivery shuffled on other occasions, but this is probably "the speech" for the Nixon campaign. If so, it is no happy augury for a reasoned and responsible discussion of the nation's serious problems.

THE MAKING OF THE PRESIDENT

(By Tom Wicker)

MIAMI BEACH, Aug. 23.—You understand, of course, if you've been watching television from Miami Beach, that President Nixon has put an end to the war in Vietnam—"so bloody, so costly, so bitterly divisive," says the Republican platform, when Mr. Nixon came to power.

But then you also understand—surely you do—that anyone who wants us to get out of Vietnam on any terms other than Mr. Nixon's is "bemused with surrender." In fact, although Mr. Nixon already has ended the war in the prologue of the platform, in the very same prologue the Republicans declare that the nation's choice this year is one between "negotiating or begging with adversary nations."

You really have to hand it to Mr. Nixon and the Republicans. Here at Miami Beach they have shown themselves past masters of some of the finest political arts—having it both ways, turning black into white, and making something out of nothing. These techniques are in the finest American political tradition, Democratic as well as Republican, and can only be admired by connoisseurs.

With what matchless cool, for instance, the platform deplores the undeniable fact that before Mr. Nixon zoomed off to Peking, "the isolation of the People's Republic of China, with one-fourth of the world's population, went endlessly on." No voter could suspect from such chiseled prose that either the Republicans or Mr. Nixon ever had anything to do with that wicked isolation, and that is what politics is all about.

Moreover, this is the "open door convention" of the "open door party." Every convention speaker has managed to suggest what a splendid contrast this makes to the rigidly controlled Democratic convention of last month. Nothing is said, naturally, of actual results in the admission of young people, women, blacks; who need to know the facts?

The "open door" does not, naturally, extend to Republican convention headquarters at the Doral Beach Hotel. There, a prominent sign proclaims "this hotel is closed to the public" and the security men, some with menacing bulges under their jackets, others with Graustarkian jackets and caps, swarm like the Nixon Youth that are bused from rally to rally here. But this fortress mentality and Mr. Nixon is not even in residence at the Doral does not surface in the righteous "open door" rhetoric; the people aren't entitled to know everything.

Speaker after speaker warns here of the profound threat to the free enterprise system posed by the extremists said to have stolen the Democratic party from rightful heirs the Republicans seem to consider remarkably virtuous. These speakers do not say who imposed wage and price controls on the economy, or whose policy failures made those controls more or less necessary. But let us not ask too much of fallible human beings.

Let us not inquire, for instance, how the Republicans can defiantly declare their flat opposition to "programs or policies which embrace the principle of a Government-guaranteed income," when only three years ago Mr. Nixon became the first American President to propose a program embracing precisely that principle—his once-vaunted Family Assistance Plan. Pat Moynihan, rest in peace.

And it is reassuring, isn't it, that the open-door party also vowed to "continue to defend the citizen's right to privacy in our increasingly interdependent society"? It may, of course, be unfortunately true that the Nixon Administration has heretofore boasted of its wiretapping and bugging policies, which ultimately had to be curbed by the Supreme Court, but perhaps this is nit-picking. Watch what we say, not what we do, or vice versa in some cases.

And what fair-minded man would try to make a connection between the Democrats' troubles with organized labor and the fact that this year's Republican platform promises a continued search for "realistic and fair solutions to emergency labor disputes"—in sharp contrast to the 1968 plank on which Mr. Nixon was elected, which said emergency strike legislation was "imperative"? Everybody is entitled, after all, to grow and mature in office; no politics in that.

Of course, the open-door party and its President are "irrevocably opposed to busing for racial balance." And though it may seem superficially contradictory, they also "strongly oppose the use of housing or community development programs to impose arbitrary housing patterns on unwilling communities." But, really, nothing could be more logical, because if you don't want to bus black kids into white neighborhoods, you certainly don't want their black families moving in next door.

It's that kind of thing that makes the Republicans and Mr. Nixon what they are. Come to think of it, it's that kind of thing that makes American politics.

EQUALITY FOR THE DISABLED

Mr. DOLE. Mr. President, millions of Americans face discrimination literally every hour of their lives because they suffer from some physical or mental handicap. The following article describes this discrimination with surprising accuracy. Entitled "The Disabled Speak," the article appeared in the International Rehabilitation Review, second quarter 1972, and presents the results of a survey conducted with the assistance of the United Handicapped Groups of Ontario, Canada, under the guidance of Mr. Wilfred Race. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE DISABLED SPEAK

(Note.—The following article presents the results of a survey conducted with the assistance of the United Handicapped Groups of Ontario, Canada under the guidance of Mr. Wilfred Race. It was undertaken as a part of a larger study by Dr. Keith Armstrong, Executive Director of the Canadian Rehabilitation Council for the Disabled and Rehabilitation International National Secretary. Dr. Armstrong is also Chairman of the Rehabilitation International Social Commission.)

There are three basic approaches to an examination of the needs of the disabled. The first is through the eyes of the professional—doctor, teacher, therapist, psychologist or social worker. Unfortunately, because of the degree of specialization demanded by present day accumulations of knowledge, the professional person gains expertise in a comparatively narrow area of the individual's total needs.

The second is through the eyes of the institution, either the government or a structure within the private sector of society. Together they represent the attitudes of society towards the disabled, and the privileges or limitations which society imposes upon the disabled person, but do not necessarily reflect the real needs of the disabled.

The third approach, and the one which will be emphasized throughout the present study, is the viewpoint of the disabled person himself—which will very likely be in conflict with the needs as defined by the professional, or made possible through the institution.

THE DISABLED IN TODAY'S SOCIETY

The average handicapped person (in Ontario) today is confronted by an environment which severely restricts his function as a member of society. The environment is fraught with barriers of both a physical and social nature, frequently combining to produce a lifestyle of fear, frustration, failure and even despair. The root of much of the emotional distress of the handicapped adult lies in a public which does not understand his strengths and, instead, judges him solely in terms of the debilitating effect of his disability.

THE SOCIAL REVOLUTION

The social revolution of the past quarter century has had a profound effect upon how disabled people see themselves. Disablement has been, until recently, seen as a personal tragedy afflicting the life of the victim and, possibly, his immediate family, but of inconsiderable concern to society. The democratic conventional wisdom of the day dictated the accommodation of the majority as the first duty of state, and those whose circumstances did not conform to the norm may have been regarded with compassion, but not understanding.

Apparently, the disabled accepted these conditions and did not feel the social and physical infrastructure of society should adapt to their particular requirements. They saw their plight as an act of the gods. Those determined to overcome their limitations usually found sympathetic response, but the initiative lay entirely with the disabled themselves. The disabled had not yet discovered the strength inherent in their own numbers.

Gradually, more enlightened thinkers realized that disabled people could be trained to perform certain useful functions, and to the limited extent that this was done, vocational training programs touched the lives of a few disabled people. The vast majority were left to fall back on their own limited resources.

The majority of those given access to special training had sustained a disabling condition at a later stage in life, after having demonstrated their usefulness to society as non-disabled persons. This kind of program assuaged the public conscience, by compensating those who had become disabled while engaged in some form of socially accepted activity. Society did not feel particularly responsible for those suffering from congenital conditions of the debilitating effect of disease.

Disabled people, therefore, became the object of many charitably minded individuals and organizations who ascribed to them an inferior status and self-assumed the responsibility of determining what was best for them.

The liberalization of social thought and the shift in emphasis of the democratic philosophy to a greater respect for the rights of minorities have had a remarkable and salutory effect on the way minority groups regard themselves. These developments have manifested themselves in a variety of movements such as tenants' associations, poor people's conferences and women's liberation. In keeping with other minority groups, the disabled have come to realize that they too have a right to the better life, and that if the structure of society and accepted social values must be altered to achieve this, then we should get on with the job.

THE NEEDS OF THE DISABLED AS EXPRESSED BY THE DISABLED THEMSELVES

The following observations are those of a representative sampling of disabled adults living in Ontario. The information was obtained by holding group meetings and individual interviews with persons having a wide variety of physical disabilities, representing all age groups between 18 and 65 and reflecting experience within a broad socio-economic milieu. Factual information quoted from the interviews were not in all cases verified by the interviewers. They represent, however, circumstances as they are understood by the disabled, and this in itself can be highly significant.

Architectural barriers are undoubtedly the most universal complaint voiced by disabled persons because they severely hinder those affected by a broad spectrum of disabling conditions. They limit all kinds of everyday activities, from the weekly grocery shopping or going for a beer at the local pub to job-hunting or taking a vacation.

The question of architectural barriers extends far beyond access to public buildings—it embraces as well public washrooms and telephones, revolving and excessively heavy doors, turnstiles and rubber skid mats at shopping center entrances and high friction carpeting. Even the vertical alignment of elevator buttons can pose a serious problem to a person in a wheelchair. Difficulties are also caused by roadways and sidewalks needing repair and by curbs at crossings, which are particularly dangerous when icy.

Housing.—There is probably no issue facing disabled persons which produces more genuine anxiety than the lack of appropriate living accommodations. Parents of disabled persons living at home are apprehensive as to what will happen when they can no longer provide care and it is equally a source of fear to the disabled person who can foresee only a bleak future of institutionalization. Disabled married couples often cannot find housing at a price they can afford and suited to their limitations.

Many disabled persons requiring only a minimal degree of personal assistance are placed in hospitals for the chronically ill and in old persons' nursing homes. A case in point is a woman of about 40 years of age in a Northern Ontario community who shares a room in a nursing home with four women all over the age of 75. This young woman has never experienced any peace and quiet or privacy.

Many disabled people distinctly prefer their own private residence. In many cases, financial obstacles are the only deterrent to this. Several people therefore felt that financial assistance should be available for those on limited incomes to help cover the cost of maintenance or a down payment on a home.

Transportation.—Lack of inexpensive transportation constitutes a major obstacle to the mobility of many physically disabled people, which is essential if one is to join society. Many handicapped people are reluctant to ask friends and relatives to meet their local transportation requirements. There is, therefore, a very widespread feeling that a local transportation allowance or subsidy should be provided. Several instances were cited in which a disabled adult could not attend a workshop because he could not find transportation.

Many taxi drivers will not accept the responsibility or burden of picking up a handicapped fare. As one woman put it, "it is remarkable how many taxi drivers develop heart conditions whenever they see a handicapped client."

The blind are regarded with envy by some people with other disabilities because of special transportation arrangements made for them in many cities.

Large metropolitan areas present even greater problems for the physically handicapped—the inaccessibility of public subway systems has been well documented. Proposed bans of vehicular traffic in the cores of downtown areas would place the disabled in an even more disadvantageous position.

Recreation and leisure time activity has probably received less attention than any other facet of the life of a disabled person. This is rather surprising, since most handicapped people have more time on their hands than does the average individual. Service clubs in some centers sponsor picnics and holiday parties for the disabled, but this doesn't begin to provide the answer and often carries overtones of philanthropy.

The highly beneficial effect of sports and recreation programs has been demonstrated by numerous severely handicapped people who have gone on to obtain employment as a result of recognizing their capabilities through such programs.

Employment.—The search for competitive employment can be an agonizing experience for the physically disabled. Restricted qualifications, prejudiced employers and a general lack of public understanding all militate against his success.

A lot of criticism has been levelled at employment agencies, which many felt only pay lip service to the desirability of hiring them. One young interviewee claims to have considerable skill in operating film projectors, but upon answering an advertisement for a projectionist at a local theater was rejected because the manager felt he would not be able to properly operate a fire extinguisher.

A handicapped girl in her twenties, a public school teacher prior to the onset of her disability, was unable to get a job in a local bank because she had "too much education." She is now working as a receptionist for a local medical doctor.

A young cerebral palsied man, given the "brush-off" whenever job-hunting, was refused employment as a mail sorter in the post office and told he was too handicapped to handle the work. This same man was denied a government disability pension on the grounds he was not sufficiently handicapped.

As to the degree of accommodation that an employer should be expected to make for a minor deficiency in employee performance, there is a difference of opinion. The majority interviewed thought that an employer should demand as much of a disabled employee as from any other, believing that if a handicapped worker is coddled he will slacken off. Others feel that if special consideration is made, the disabled worker will feel obligated to produce at his maximum. Some also maintain that governments should subsidize employers of disabled workers to the extent that their output falls short of established production standards. It should be noted, however, that this latter approach has the support of only a small percentage of those interviewed.

Appliances.—Most complaints concerning appliances dealt with the high cost and general lack of information as to availability. Some of the respondents had asked their doctors for information on equipment to assist the disabled and discovered even they were largely unaware of what was available and where it could be obtained.

Workshops.—The majority of criticism aimed at workshops was directed at the low rate of pay and unsuitability of tasks for the marginally disabled. The workshops, for the most part, are not required by law to pay the minimum wage, which has led to charges of exploitation.

Pensions and income security.—The current system of disability allowances came in for a lot of criticism on two major fronts: the difficulty of securing a pension and its inadequacy once secured. Many people find it hard to accept that children of well-to-do parents qualify for the disability pension, whereas a disabled housewife whose husband works does not. One young man unsuccessfully applied for a pension for 10 years and finally succeeded the tenth year by changing his doctor.

The present system of allowing earnings of only $25 a month (or $75 averaged over three months) was described as "degrading," "encouraging cheating," and "lacking in all incentive to improve one's position."

Case workers.—Closely related to the subject of disability pension is the attitude adopted by many case workers in this field. Disparaging epithets were often used in referring to such personnel, largely by those who felt humiliated by them. In all fairness to the caseworker, it is felt that the system is more often to blame than its representatives. Quite a large number of people felt that social workers dealing with the disabled should be given special training or orientation to obtain a greater understanding of their problems.

Public understanding.—Many were concerned with finding ways and means of promoting a better public understanding of the needs of the disabled. Opinions varied as to the extent that society now recognizes the disabled as equals, and these opinions can often be correlated to the severity of the handicap afflicting the individual. The more severely disabled describe public attitudes in terms of "being treated like a child," "patronizing," and even "rude."

Television programs and films projecting a positive attitude towards the disabled were mentioned as highly valuable. However, the overwhelming majority of disabled people were of the opinion that the onus rests with the disabled themselves to secure a favorable public image by their own example.

Institutionalization.—A major danger of lengthy hospitalization is the dependency which may be developed on the institutional environment itself. A case in point is that of Pete, aged 22, a paraplegic as a result of a motorcycle accident. At the time of the accident Pete had a large circle of friends, including his fiancee. After a year of confinement he eventually lost contact with all old friends, including his fiancee. Pete has now reached the stage where the hospital is his world, confiding to the interviewer that the possibility of discharge fills him with dread. He stated that he deliberately pretends to be making no progress in physiotherapy treatments in the hope he will be retained at the hospital.

The interviewers were told this case was not unusual and that this was one of the dangers inherent in making the rehabilitation environment so pleasant that it becomes a substitute for the real world.

ANNIVERSARY OF SOVIET INVASION OF CZECHOSLOVAKIA

Mr. ALLOTT. Mr. President, the Senate was in recess on a grim and instructive anniversary—the August 21 anniversary of the 1968 Soviet invasion of Czechoslovakia. It is especially important that we not forget to commemorate this date this year.

The news from Czechoslovakia continues to be both grim and predictable. The puppet Czechoslovakian Government—a pliable instrument of the Soviet regime whose bayonets and tanks installed it—is continuing the customary mixture of purges and repressions by which Socialist governments secure themselves.

August 21 will mark another "Soviet Day of Shame." It is a special pity that the Soviet Government cannot content itself tormenting its own poor subjects. Surely the Soviet Union could more profitably export something besides armored divisions.

The most unfortunate thing is that the Soviet Union may feel the need to try to impose its will on Czechoslovakia for as long as the spirit of liberty is alive in the brave and long-suffering Czechoslovakian people. That will be a long, long time.

THE NEEDS OF NURSING HOME PATIENTS

Mr. CHURCH. Mr. President, as chairman of the Senate Committee on Aging I have taken a special interest in the welfare of the nearly 1 million residents in our 23,000 nursing homes.

To be sure, nursing homes are still very much a subject of controversy. And I believe there is a growing and unfortunate trend to criticize all nursing homes under a blanket indictment.

There are, I want to emphasize, some very fine nursing homes across the country, and I can state categorically that there has been great improvement in the last 10 years.

At the same time, there are serious problems. Our study and preoccupation with these problems, I am afraid, sometimes adds to the impression that there is nothing positive in the nursing home field.

For example, I do not believe most Americans realize the full extent of the needs of nursing home patients. It takes long hours and devotion to provide nursing home residents with the kind of care that we would like to see given our loved ones.

In this regard, the Idaho Health Facilities Association recently held a meeting in Coeur d'Alene, Idaho—bringing together some of the Nation's leading experts to discuss these problems. A paper presented at this meeting by Dr. Elsie A. Giorgi, associate professor of medicine at the University of California at Irvine, is so insightful that I bring it to the attention of the Senate. It provides a good account of the fundamental requirements for a good nursing home.

It is clear to me that what is needed immediately is a crash program to provide in-service training to nursing home personnel. Only with proper training can these personnel, no matter how dedicated, come to grips with the problems of the infirm elderly.

Mr. President, I ask unanimous con-

sent to have Dr. Giorgi's paper, entitled "Extended Care Facilities: Educational Course-Medical Aspects," printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

EXTENDED CARE FACILITIES EDUCATIONAL COURSE—MEDICAL COURSE

(By Elsie A. Giorgi, M.D.)

INTRODUCTION

The values of a society are determined not so much by its scientific achievements as it is by the way it cares for its people, especially those who cannot care for themselves. This challenge is particularly pertinent to those involved in health care, both professional and non-professional. The doctor (both physician and dentist) is the most fortunate member of this confraternity. By virtue of his education and training, he is predominantly involved with the diagnosis and biologic cure of acute illness, relatively clearly defined and even at times glamorous. Unfortunately, too often this is accomplished to the point of virtual neglect and even lack of awareness of the physical restorative and psycho-social and economic resocialization aspects.

It is quite obvious that the medical profession in this country has opted for technical and technologic excellence often to the point of detriment to common, every-day care of people. Such things as epidemiology, immunizations, antibiotics, superbly skillful surgical procedures, and incredibly proficient gadgetry have combined to prolong the average life span—unfortunately without sweetening it appreciably. The result is obvious and at times devastating. We are now left with a predominance of serious chronic illness applicable to about 45% of our people—requiring over 70% of all health care services. Thus, the doctors' role must of necessity change. Unfortunately, he (or she) is quite reluctant to acknowledge this and even more unwilling to relinquish centrality to the other health disciplines much more adept at managing the care of the chronically ill.

Our greatest challenge is to redefine the entire gamut of health care services towards a more sensible approach to the true needs of people with a common goal—rapid and optimum functional restoration of that patient—placing him central to our efforts. Levels of care must be based on levels of need, and we must strive for quality care for all rather than luxury care for a few. Essential to these goals is the redefinition of the roles of each member of the team. In this configuration—especially in view of the preponderance of chronic illness—the Extended Care Facility—its personnel, equipment, and philosophies—emerges as a very significant component. Regulations as well as moral implications demand of the E.C.F. much more than the past concept of a place where people go to die or to be discarded and segregated from the mainstream of living.

Pursuant to these introductory remarks, I have divided this presentation into three parts to include discussion of: (1) the various phases of illness and the salient features of each, particularly as associated with a clearer definition of roles; (2) the biologic and psycho-social aspects of chronic illness and aging; and (3) the implications of all three for the Extended Care Facility.

PHASES AND SALIENT FEATURES OF ILLNESS AS SEEN IN E.C.F.

All phases of illness are seen in the E.C.F.—chronic, sub-acute, and acute. Chronic illness is of course predominant. The definition of chronic illness is quite vague to many of us. To some, it means illness of low-grade severity. It once meant an illness that lasted more than thirty days, which made the time element important. A more pertinent concept is that defined by the World Health Organization which states that . . . chronic illness is one for which there is no cure and the patient is still alive. The implications are obvious and grim. In the first place, if there is no cure, the physician's role—predominantly diagnostic and curative—is certainly less significant. Secondly, the problems are mainly functionally restorative and psycho-socially supportive with grave economic implications—all of which requires great skill and patience.

Under these conditions, it is easy to see that the roles of the nurse, the social worker, the physical and occupational therapist, and allied professions and para-professions assume prime significance. The administrator is equally important. He must be aware of each of their functions and must be supportive of them from every aspect.

In sub-acute illness, particularly, the nurses' role emerges as central to care. It requires predominantly a "laying on of the hands" with frequent discussion with the physician as contrasted with chronic illness which involves all disciplines in a conjoint effort and with relatively infrequent discussion with and fewer visits by the physician. In the chronic phase, very frequently the social worker emerges as the most central discipline, especially when psycho-social worker emerges as the most central discipline, especially when psycho-social and economic factors predominate. Acute interval illness can and does occur in the Extended Care Facility. All must be alerted to the associated signs and symptoms and must be quick to act if disaster is to be served.

Thus, it is obvious, that at various phases, the various disciplines are central to management of care with the other disciplines used previously as consultants. At all times, however, for optimum management of the patient's problems, we must be guided by his or her needs rather than spurious, self-centered and self-serving professional roles. Thus, in reality, the patient becomes central to all care.

No longer can we consider the role of the para-medical or ancillary professions as one of "handmaiden" to the physician or that of the para-professional as the "scut-worker." Each must contribute to the best of his ability and confer frequently with each other in a conjoint effort based on the patient's needs at any one time. This is the essence of a true team approach.

BIOLOGIC AND PSYCHOSOCIAL ASPECTS OF AGING AND CHRONIC ILLNESS

Figures I and II appended to this paper describe the scope of the problem with relation to chronic illness (Slide I–II) as well as comparison of incidence of degenerative or chronic disease with other large categories. It is very obvious that chronic or degenerative illness predominates. Since it is also obvious that the elderly are most frequently involved, it makes good sense to describe the biologic aspects of aging as a framework.

It has been said that the relationship between aging and disease has thus far generated more heat than light. I certainly agree. Perhaps the most significant point to make about the biologic aspects of aging is that aging, of itself, is not synonymous with illness and disability. The basic cause of these is always some disease process which *can* be dealt with in terms of preventive, curative, and rehabilitative services. By and large, then, we can and should dispense with the well-known cliche—"What do you expect at your age?"—hurled in answer to complaints made by anyone approaching old age—which nowadays, I'm told, is over thirty-five. There is a vast difference between senescence, which is physiologic, and senility, which is pathologic.

Taken in its broader sense, as part of the continuum of human growth and development, aging can be defined as that period during which growth and development have ceased, but change is still taking place. Barring catastrophic illness, which takes place at any age, those changes should be gradual, permitting adjustment and adaptation towards homeostatic maintenance. There is a general slowing up—but the demands for energy and speed are also less. The reason for this is as yet obscure. The real challenge is to maintain optimum balance between these two. Unfortunately, this cannot be achieved in aging if it has been neglected prior to then.

If it were possible to ever make a simple statement about any period of man's life span—we might sum up the characteristics of aging with the observation that there is less elasticity and latitude and more rigidity and limitation. This applies not only to the biologic, but to the psycho-social as well. The elderly are a very conservative crowd—they like what they're used to—a fact which must be kept in mind at all times in programming for their health needs.

In this discussion, I would like to review the biologic aspects of aging under two headings, as follows: A. The more frequently occurring changes and their associated health problems; and B. The health care needs of the elderly.

A. *Biologic changes and associated health problems*

1. More Frequently Occurring Physical and Physiologic Changes

Loss of elastic tissue producing such conditions as pulmonary emphysema, skin changes, loss of dentition and hair.

Decreased tolerance for temperature and other weather.

Decreased tolerance for certain foods, especially carbohydrates and fats.

Decrease in immunity.

Changes in vision and hearing.

Altered sensorium—memory for recent events impaired and memory for past increased.

Demineralization of bone—osteoporosis.

Destructive changes in joints—osteoarthritis.

Decreased gastro-intestinal mobility.

Diminished endocrine function.

Increased rigidity of the circulatory system and associated decreased capacity for adequate circulation.

Decreased muscle mass and tone.

Decreased energy and tolerance for exercise.

Decreased sexual capacity.

In general, then, degenerative conditions predominate and the mechanisms for balance (homeostasis) are less effective. There is increased vulnerability with slow response to illness and with slow recuperation after disruption or illness. All of this has been beautifully summed up in one concise phrase by the poet, W. H. Auden: "So children run high fevers on slight provocation while the organs of the old suffer in silence."

By and large, the common denominators for all of these changes are: decreased blood supply through athero and arteriosclerosis; decreased endocrine secretion—also very likely a function of the former; and actual wear and tear through use, trauma, and neglect.

2. There Are Also Some General Principles Which Should Be Kept In Mind

We do not abruptly become old. The whole process of human growth and development is a continuum and there is a biologic and psychosocial cumulative effect. Thus, neglect in the pre-geriatric years takes its toll in later years.

There are individual differences. It is very true that "getting" old is universal, but how we "grow" old is very personal.

There are class, cultural, and economic factors involved with attitude towards health. Health has different meaning for different people. To the poor, it may mean the absence of illness or even just the absence of pain. They may present for care only when it hurts—too often when the condition is irreversible. The life styles of people must be understood if we are to be of real help.

3. Associated Health Problems

Some of the health problems of special concern in aging are those which are mainly responsible for transformation of the well aged into the sick and disabled aged. These are:

Cancer.—Older patients are more likely to have cancer than younger ones. For example, lung cancer is becoming or is now the most frequent malignancy; carcinoma of the breast is particularly important in women; prostate cancer is very frequent in men; involvement of the gastrointestinal tract is important in all older people.

Generally, the malignancy seen in older patients is the result of pathologic states that may have been active for as long as 20 years, and a program for early detection of malignancy must be encouraged beginning in the pre-geriatric years.

Cardiovascular diseases

Essential Hypertension.—This is characterized by increased peripheral resistance and elevation of both the diastolic and systolic blood pressure, and it is a dangerous concomitant of the tendency to hyperreaction—to tensions. However, drug therapy is sometimes effective, with special care given to reducing the pressure gradually so as to prevent insufficiency in the central nervous system or renal blood flow. Also, there is a great need for programming life styles towards decrease of tension states.

Diastolic Hypertension.—This must be distinguished from the more common arteriosclerotic hypertension (systolic hypertension) which is less amenable to anti-spasmodic treatment, which should not be used.

Atherosclerosis and Arteriosclerosis.—This is perhaps the most significant condition in the aging because of its progressive action in the arteries of the heart and brain, and because it is seen most frequently. Progress in diagnosis and treatment of this condition will make a great dent in general morbidity and mortality rates among the aged. However, arteriosclerosis is neither inevitable nor irreversible, and some of it is preventable. Proper medical supervision and responsibility by the patient for activity and diet patterns are the inter-related and indispensable foundations for effective medical management in the prevention and treatment of this condition.

Cerebral Thrombosis.—The discovery of the prophylaxis for this vascular condition is one of the major objectives of medical research. If we cannot do too much at this point in the way of prevention, at least when it strikes we can avoid many of its disabilities by aggressive treatment during the acute condition and a vigorous rehabilitation program.

Peripheral Vascular Disease.—It is generally recommended that individuals with this condition eliminate smoking. Also, that they be particularly careful about proper hygiene and care of extremities.

Diseases of the Endocrine Glands.—These glands may function inadequately, but the patient can live with the condition as long as they do not fail completely. However, endocrine function has a significant effect on other conditions, and has a great impact on normal functioning and every-day activities. Consider, for example, the effects of thyroid or adreno-cortical insufficiency, the problems following menopause, or diabetes. All of these—including the menopause—can be treated. Replacement hormone therapy in women is now conceded by most authorities to be of proven value.

Obesity.—The patient should be aware of the harmful consequences of overweight. He should be helped in any necessary readjustment of caloric intake and food habits. Where necessary, there should be instituted a weight reduction program, which in the case of the aged must be rigorous, although not drastic, to achieve significant weight loss.

Musculoskeletal Disease.—Muscular insufficiency causes very common disabilities which are usually preventable and which can be corrected. Generally speaking, insufficient attention is given by both physician and patient to the patient's potential for physical training and postural exercise. Too often both practitioner and patient underestimate the elderly patient's capacity and need for regulated, but regular, exercise. The effect on bone is particularly important. Endocrine changes cause a deficiency in the protein matrix which leads to inadequate incorporation of calcium and phosphorous. This condition is known as osteoporosis. Lack of exercise further complicates this condition since inactivity contributes to loss of calcium in the bones.

B. Some specific health care service requirements of the elderly and chronically ill

Accident Prevention.—The risk of accidents among the elderly is increased by such general physical changes as impaired vision and hearing, loss of sense of smell, and slower reflexes. Older persons should be aware of those changes. They should be conscious of their possible effects and be aware of their own specific limitations. Healthy older adults need not limit their activities because of the higher incidence of accidents among the aged. Nevertheless, knowledge as to how and where accidents occur and awareness of one's physical and emotional state can cut down the incidence and dangers of accidents.

Prevention of Exposure to Excesses in Climate.—Extreme heat (which upsets normal fluid and mineral balance); extreme cold (which causes narrowing of blood vessels and may therefore put a greater strain on the heart); extreme dampness (with its higher incidence of upper respiratory infections); over-exposure to sun, heavy winds or any other extreme of weather.

Maintenance of Good Appearance.—Good appearance can boost and maintain one's morale and self-image. Therefore, the elderly should be encouraged to take pride in their dress and appearance.

Mobility.—Whether it takes the form of walking, driving, or the use of public transportation, mobility—the ability to get about—is basically important to the older adult's independence and feelings of self-esteem, and it has a very direct bearing on his physical health. Mobility is essential to the business of daily living—shopping, visiting a clinic, or one's physician, taking care of one's business and other activities. Mobility is essential to maintaining one's relationships with family and friends. Mobility makes possible new interests and activities and therefore adds zest to living.

Drugs and Medicines.—Careful instructions as to use. Avoid self-diagnosis, self-medication, and cross-medicine. (The elderly often prescribe for themselves and for each other.)

Discard old medicines.

Clear labeling of all medicines.

The health practitioner (all disciplines) must be aware of the side effects of medication.

Housing.—The familiar surrounding is important to the elderly. Too often we insist they move to be near married children. This often results in their leaving home and friends to live in single room furnished apartments which result in depression and disengagement. This is a very individual thing, and the wishes of the elderly must be respected. Too often we treat ourselves, rather than them.

Maintenance of Family Role.—This is a major factor in emotional well-being of the aging. Every effort should be made to promote a meaningful relationship with children and grandchildren, especially with the loss of spouse.

Food, Nutrition and Eating.—If food habits have been basically sound, little change is necessary except an understanding that digestive processes slow down and meal size and spacing must be adjusted. Caloric intake should be cut down to a level consistent with the degree of activity. Fasting or drastic dieting is very poor. Some of the foods difficult to digest are those that are fried, highly seasoned, contain large amounts of fats and carbohydrates, gravies and heavy sauces, and some raw fruits and vegetables. A sudden and persistent loss of appetite should receive prompt and complete medical attention. Eating alone should be avoided. Every effort should be made to maintain eating as a social occasion.

Complete Health Insurance Coverage.—It has been estimated that Medicare Plan A covers only about 40% of health care bills; and Plan A plus Plan B, only about 60%. There is great need for supplemental and catastrophic illness coverage. It is unfortunate that income is at its lowest at a time when health care needs are greatest and most costly.

Maintenance of Work Role.—This was beautifully expressed by Ethel Shanas as follows: "In our society a man's employment is not only a means of making a living, his occupation in itself is a social role, and employment in and of itself can assure his social status." In general, people are happiest in our work oriented society if they are able to continue at their jobs as long as possible. Here, I would like to introduce the concept of a "second job" after retirement. Why not train for this in the pre-retirement years? The aging could very easily be trained as aides in the human services, especially in health and education—the seriously undermanned fields. Here, also, we must recognize the need for some changes in our retirement rules. It is senseless to preserve the concept of enforced retirement at 65 in the presence of an increasing life span. Man is living more and more of his years in retirement—suffering from "retirement rot"—often unnecessary. This, too, is very individual and personal. There are some who prefer leisure and the rocking chair. Their choice should be respected.

Programming for Leisure.—Satisfying and constructive use of leisure time is a key factor in the morals and self-image of the aging individual. Where such use of leisure time also involves some sports activity and exercise, it becomes an important contributory factor to promoting and maintaining physical health. In general, there is a very strong relationship between good health and active living which should carry over from one's working days to retirement; the meaningful and satisfying use of leisure is the means by which this carry-over can be achieved.

Mental Hygiene.—The first rule of mental hygiene is to keep open the channels of communication with one's surroundings. However, some reminiscing is also necessary. The pattern of "life review" and reminiscence is prevalent among the aging and should not be construed as abnormal. It is necessary for the attainment of candor, serenity, and wisdom.

Encourage Good Personal Health Habits

Eye Hygiene.—Regular eye examinations; prompt medical attention to eye injuries and inflammations; good light for reading and working.

Care of the Feet.—Too often, neglected foot problems can cause the aging to become homebound prematurely and unnecessarily.

Hearing.—Should be checked in annual examinations. Hearing aids should be encouraged when needed. Deafness tends to isolate the elderly.

Physical Activity and Exercise.—Should be maintained and encouraged. It contributes to general muscle tone, including the heart and circulation. Insofar as possible, continuation of accustomed physical activities should be encouraged with some modification of pace and quantity.

Sleep.—The amount required varies greatly. In general, it is carried over from the middle years. It is a mistaken notion that the elderly require less sleep.

Care of Teeth.—Teeth can remain in good condition throughout life if they receive proper care. Certainly inadequate teeth should be corrected. They are vital to good nutrition.

Sexual Needs.—Sexual needs and desires do not undergo an abrupt change with advancing years. The sex organs change more than does the individual's sexual needs. The capacity for reproduction ebbs more rapidly than does the strength of the sexual desire; and when the latter does change abruptly, it is generally symptomatic of some psychological factors in the individual. Erich Fromm's statement should be remembered here. He intimated that sexual desires and prowess take origin "from the head up."

Society, including the aged themselves, lack general understanding of the sexual urges, capacities, and expression in older people. Social conditioning is a particularly important factor in the sexual attitudes and practices of older persons—with women, more than men—dominated by social custom and restraints in early and later life. However, here again, the individual's history largely conditions his sexual pattern and attitudes. Those who have not undergone any particular complication or difficulty in a life of sexual and other relationships do not experience new problems in aging.

According to Kinsey, 80%–85% of married couples between 60 and 65, and 70% of those between 65 and 70 years of age engage in sexual intercourse. Fifty per cent of men retain their potency after 70. There is also, according to Kinsey, little decrease in sexual desire by women after menopause. Removal of the uterus and ovaries does not decrease the sexual desire and capabilities.

Sexual activity has little or no effect on the general health of average aged individuals. It may involve greater exertion for the male than for the female, since it is more of a strain on the heart and arteries of the male, though not dangerous for the healthy person.

Protective Services.—Too often, the aging are the victims of schemers who take advantage of their anxieties and diminished capability for understanding. They need an advocate—one whom they can consult before signing agreements and contracts.

All of these health care requirements are to be kept in mind with relation to the E.C.F. patient. All may not be pertinent during the patient's stay in the E.C.F., but they become applicable on discharge and should be considered in designing the treatment and discharge plan.

FURTHER IMPLICATIONS FOR THE EXTENDED CARE FACILITY

These come chiefly under five headings: (1) recognition of effect of decreased tolerance and homeostatic potential; (2) awareness of individuality; (3) the patient's need for a role if we are to avoid disengagement; (4) need for clearer definition of central and team roles of personnel; and (5) need for an ongoing treatment and referral plan.

(1) Decreased Tolerance and Homeostatic Potential: This is particularly significant when acute interval illness occurs. The elderly may not react with fever or even elevated white blood count. A change in his appearance or attitude should be sufficient to alert the staff to investigate thoroughly. Intolerance for changes in temperature and for carbohydrate and fat must be of prime consideration.

(2) Awareness of Individuality: This is of prime importance in programing. There are no blueprints for this. No one type of occupation or recreation can be applied generally. Life styles must be considered. These include racial, ethnic, and individual considerations. It is most important to remember that the elderly dislike change. They like what they're used to. The mere fact of inclusion of some of their personal belongings—pictures, favorite chairs, small tables, etc.—can spell the difference between success and failure in therapy.

(3) Need for a Role: The disengagement of the patient can become pronounced and extremely pathologic once he is confined to an extended care facility. He should be encouraged to take as active a part as possible in his own management and the management of others. His contacts with those outside must also be promoted.

A therapeutic community approach is very helpful. Self-governing committees are of proven value in this respect. Assignment of chores for self-management is also very good. All of this requires imagination and enthusiasm on the part of the staff.

I have often felt how good it would be if we could arrange for vocational programs—such things as bring in "homework" for compensation. There are many in-house assistance programs which the elderly and chronically ill can accomplish. All of these should be encouraged.

How good it would be if an area of the E.C.F. could be set aside as a day child care center using the patients in the role of custodians and even teachers and recreationists. There is a very definite compatibility between the child and the grandparent figure. This would help the child, the busy mother, and the chronically ill not only from the standpoint of role and validation through labor, but also as a source of income.

(4) Definition of Central and Team Roles: This must be accorded much more than lip service. There should be frequent discussion promoting these concepts as policy. The administrator is the most likely member to undertake this function. He cannot and must not be isolated in his office cubicle. Too often his chief concerns are related to business and fiscal managerial problems. He must lead in designing programs of value to all.

(5) On-going Treatment and Referral Plan: The care of the patient does not begin with entrance into the E.C.F. Neither does it end with discharge from the facility. Of prime importance is the establishment of basic requirements prior to transfer into the E.C.F. A complete description of the patient's status including historical, physiologic, and biochemical aspects as well as other diagnostic and treatment reports should accompany him. To often the patient is relegated to the role of chronic illness without proper evaluation. We should be particularly suspicious of the term "chronic brain syndrome" and should insist that this be followed by the words "secondary to —." Too often there is a totally or relatively curable condition underlying this such as congestive heart failure, pernicious anemia, surgically amenable partially occluded vessels, medication abuse (iatrogenic), and even brain tumor. There are many more, to be sure. I am certain you also recall instances of this type. A very productive and simple approach would be to refer to the P.D.R. or the A.M.A. Manual of Pharmaceuticals, reviewing the side effect of the medications the patient is on—especially if and when his condition changes or he is exhibiting bizarre behavior or is out of contact.

There should be frequent discussion by the team of an on-going treatment and referral plan to include discharge plans. The latter particularly should not be considered precipitously and hurriedly at the last moment. The physician should be included in these. If he cannot be present, a conference telephone is a good method to insure his participation. He can be telephoned at his office when his patient is being discussed. The patient and his family or surrogate family members responsible for him must also be brought into the picture. The ultimate goal should be restoration and resocialization. Figure 111 describes this process graphically (slide).

These are some of the chief and minimal requirements for a good E.C.F. program. Far from "pie in the sky," they can certainly be achieved. It merely requires a little less emphasis on the patients' health insurance latitudes and limitations and a little more on what are his needs towards optimum restoration and resocialization.

Although it is very true that there are obstacles to achievement of a good program, it is equally true that if we continue to complacently accept the status quo, we are guilty of "hiding behind the institution and the regulations"—which is nothing more than an evasion of responsibility. Many improvements are possible, even under the present structure. We simply must do better all around. We must identify unmet needs and do everything possible to change the provisions or inadequacies which interfere with addressing those needs. This is our true challenge as health professionals and practitioners. In this context, later this afternoon we will consider the deterrents and then attempt some recommendations to overcome those deterrents.

LOCAL TRANSIT COMPANIES AND SCHOOL BUS SAFETY

Mr. ALLOTT. Mr. President, for sometime I have expressed concern that the Department of Transportation was not realistically evaluating the problems of local transit companies, which transport schoolchildren, as regulations concerning schoolbus safety are propounded.

I have received copies of letters by George F. Pellissier, general manager of Holyoke Street Railway Co., in Holyoke, Mass., to Mr. Herbert J. Scheuer, of the American Transit Association, and to Secretary of Transportation John Volpe. Also included is a letter from Amalgamated Transit Union, division 537, to John Volpe. These letters set out, in specific terms, the case I attempted to make in behalf of those transportation operators in the school transportation business. They are most impressive and I believe they should be read by all Department of Transportation officials concerned with the problem. For that reason, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

HOLYOKE STREET RAILWAY CO.,
Holyoke, Mass., August 7, 1972.

Mr. HERBERT J. SCHEUER,
American Transit Association,
Washington, D.C.

DEAR MR. SCHEUER: In reference to the Highway Safety Program Standard No. 17, it appears that Transit Companies will become the victims of discrimination if the uniform standard is adopted for state highway programs. The experts, in order to add greater emphasis, use phrases such as "precious cargo" when referring to the transportation of school children. The transit companies feel that all individuals transported including the driver fall under this same description and our goal is always the same—no accidents—therefore no deaths nor injuries. To reach a fair and honest appraisal in formulating safety standards the following criteria should be considered:

That transit type buses, regardless of age, are structurally stronger; heavier in weight and have wider aisles than the "Yellow School Buses",—thus they withstand shock from impact better and with less damage to the vehicle which in turn means less serious injuries to the occupants. With wider aisles the occupants can be evacuated from the vehicle more quickly. This fact is very important when fire engulfs the vehicle after a collision. Transit buses operate on the more safe Diesel fuel.

Transit Companies maintain shop facilities so that repairs, maintenance, and inspections of vehicles are done in a more systematic manner.

Most transit vehicles are garaged in heated buildings, consequently they are in better operating condition in the winter months than vehicles stored outside.

Transit type buses provide better vision for the driver in the area immediately in front of the bus as the engine is in the rear. This feature of design also adds greater protection if and when the vehicle is struck in the rear.

Transit Companies conduct safety meetings periodically to provide the operator with the best available information concerning highway safety and to review the driving records of all personnel. These meetings tend to serve as a reminder that there can be no relaxing in providing safe transportation.

Regarding the request for comments concerning Standard 17, the following factual information should be considered by all interested parties when promulgating ideas and standards relative to school bus transportation:

School bus transportation is the safest mode of transportation in the United States based on the number of persons transported daily. Proportionately, more children are killed or injured while walking to and from school.

About sixty percent of the fatalities charged to school busing occur outside the vehicles and not related to the actual operation of the school bus. It is in this area that a concerted effort should be made to reduce accidents.

Color of the vehicle has not been the cause of more accidents involving school bus transportation as indicated by the Safety Record compiled by transit companies while performing this service. Their vehicles are generally driven by full time experienced operators who earn their livelihood by providing safe transportation. Good driving habits are acquired by the hours spent in operating over the streets and highways with all the hazards that traffic presents.

Buses transporting school children should be designed with aisles as wide as transit buses to permit safer and faster ingress and egress. It would also provide more comfort for the older children by eliminating the practice that allows three to a seat based on the antiquated rule of thirteen inches of seating space per pupil.

During the school year commencing September 1971 and ending June 1972, the Holyoke Street Railway Company transported approximately eight thousand school children daily, to and from school, using fifty seven buses and operating about fifty percent along franchised routes. The cost performing this service amounted to an average of about three dollars per student. Reimbursement to the cities involved amounted to about seventy-five percent, as State Statute provides that additional reimbursement will be granted to the cities if a common carrier performs the service. This law was placed in effect to help maintain public transportation.

Over fifty percent of the gross revenue of our company is attributed to providing school bus transportation. Without this source of revenue, we would be unable to continue operations.

During the school year, three students reported minor injuries and the total of the claims amounted to less than seventy five dollars.

Attached to this letter are copies of letters sent to the Honorable John A. Volpe last year asking his consideration in allowing transit carriers to be exempt from part of Standard 17 requirements.

I hope that all of this information will be of some help in preventing the acceptance of the arbitrary sections that this Standard 17 contains. I am sending copies to Senator Gordon Allott of Colorado, as he appears to favor transit companies in this issue.

Very truly yours,

GEORGE F. PELLISSIER,
General Manager.

HOLYOKE STREET RAILWAY CO.,
Holyoke, Mass., August 23, 1971.

Hon. JOHN A. VOLPE,
Secretary of Transportation,
Washington, D.C.

DEAR SIR: The Holyoke Street Railway Company, a common carrier in the Commonwealth of Massachusetts, and doing business as a local transit company for more than eighty years, desires to state its objections to the recommendations in the Highway Safety Program Standard No. 17 that would eliminate the transit industry from the school bus business.

The Transit Industry has and will continue to perform the various segments of transportation which include school busing efficiently, safely and at a lower cost through consolidation rather than by division of the services. We are equipped to handle the demands of transportation without additional costs as we are able to use our equipment more effectively.

Transit buses are considered safer because of their better construction, wider aisles for ease in ingress and egress and must operate with a more safe diesel fuel. They are maintained by full time qualified mechanics and are operated by full time drivers, many of whom have more than twenty years of experience for which there is no substitute. We operate generally on city streets at relatively lower speeds and not on State and Federal Highways where higher speeds have to be maintained because of the faster moving traffic with its resulting hazards. It is for this reason alone that we contend that operating standards should not be country or state wide, but rather for given areas because of the differences in operating conditions. In fact, local school boards have the power to determine the requirements necessary for safe transportation and the decision should be left to them.

As a former Governor of the Commonwealth, you are familiar with the Transportation Act of 1964 whereby Section 7–B of Chapter 71, as amended, provides for additional reimbursement to cities and towns using the local common carrier in their school bus transportation. This was done to help maintain local transit by private carriers who were having financial problems. The siutation has worsened over the past seven years because of higher costs and today school bus transportation accounts for over fifty percent of our gross revenues. The promulgation of Standard #17 would force companies like ours out of business and bring about the institution of more Transit Authorities which is not, as has been proven, a satisfactory substitute for private enterprise. Most Transit Authorities, including the Massachusetts Bay Transit Authority, are deficit ridden operations with most cities and towns seeking through legislation to withdraw because of the high costs involved. I ask that you and your committee members do not cause this to happen in our area, as it is not a satisfactory substiute for the services that we are rendering at the present time.

I believe that school bus transportation is the safest form of transportation in the United States. I believe also that the statistics on injuries and fatalities include the accidents of school buses while doing camp work; buses used in charter service; and children injured or killed while waiting at school bus stop, or crossing the street on the way to the school bus stop; and others injured or killed outside of school buses. These types of accidents have no bearing on the school bus itself, or its specifications or equipment, and its deletion from the accident records would greatly improve the image of school busing and its safety record.

In conclusion, Mr. Secretary, we and the Transit Industry, ask that your final decision be based on sound and honest judgment with safety, as well as economic factors considered. We ask that opinions of school bus manufacturers and Educators be weighed and considered in their proper prospective; that the same treatment be afforded the views of Transit Companies so that a decision can be rendered that will not be arbitrary and force companies to close their doors with the resultant loss of employment for many dedicated union members.

Respectfully yours,

GEORGE F. PELLISSIER,
General Manager.

DIVISION 537,
AMALGAMATED TRANSIT UNION,
Holyoke, Mass., August 10, 1972.

Hon. JOHN A. VOLPE,
Secretary of Transportation,
Washington, D.C.

DEAR SIR: In reference to the recommendations of the United States Department of Transportation concerning the color of school buses, Division No. 537 of the Amalgamated Transit Union wishes to state its objections to the proposed legislation.

The most important reason for objecting to these proposals is that of our job security. Because our Company obtains approximately sixty percent of its gross revenues from school bus transportation, the loss of this source of revenue would force the Company out of business with the resulting loss of our employment.

Our membership has been providing drivers and mechanics in the operation of school transportation for over forty years. We are competent drivers who have served both regular passengers and school children in a safe and reliable manner. More than one third of our membership have been in the employ of the Holyoke Street Railway Company for ten or more years. We have enjoyed steady employment during these years and have had an excellent relationship with the Management.

We believe that driving buses is an occupation and not a hobby. It is a full time job with our men which requires a high degree of skill acquired only by the experience gained through hours of operating time. The Department of Transportation desires safety in all forms of transportation, so we, therefore feel that professional drivers best meet their standards and priority should be given transit companies.

The membership of Division No. 537 respectfully requests that you vote against any recommendations that would bar transit companies from the opportunity of providing school bus transportation, thus preserving our jobs and keeping local transit operation.

Very truly yours,

E. H. DEDRICK, *President.*

NATIONAL ENVIRONMENTAL RESEARCH CENTER, CINCINNATI, OHIO

Mr. TAFT. Mr. President, on June 28 ground was broken for the new National Environmental Research Center in Cincinnati, Ohio. I had planned to attend that ceremony along with other members of the Ohio delegation, but the press of business and several votes on the floor of the Senate prevented me from doing so.

On that occasion, Bill Ruckelshaus, Administrator of the Environmental Protection Agency, delivered the principal address, and he was most favorably re-

ceived by the people in attendance. I think his remarks at Cincinnati that day deserve wider circulation than they have received. So that Senators may have the benefit of reading them, I ask unanimous consent that they be printed in the Record.

There being no objection, the remarks were ordered to be printed in the Record, as follows:

Dedication of National Environmental Research Center, Cincinnati, Ohio, June 28, 1972

(By William D. Ruckelshaus)

The most characteristic activity of 20th Century man has been his relentless drive to master the natural world. We have begun the conquest of time and space; we have provided unprecedented comforts and stabilized our food supply. We have extended life spans and opened up opportunity for millions, and we can even see the dawn of genetic and behavioral engineering in the distance.

We Americans have taken justifiable pride in these accomplishments. But as a nation hell-bent on progress and the good life, we are something like the little boy who came home everyday with skinned knees. His mother asked: "Why do you fall down all the time?" The boy answered: "Because I always run faster than I can."

The movement to protect and preserve our natural environment reflects a widespread, grassroots realization that though we learned to run fast, we may have been running faster than we should. In the process we have fouled the air, the water and the earth, and discovered that even the oceans are not too big to be contaminated.

President Nixon determined when he came to office that this ruination of our common environment had to stop. He asked that we stringently enforce the water pollution laws and we in EPA have done so. He asked us to set rigorous air quality standards under the Clean Air Amendments of 1970 and we have done that too.

But perhaps most important of all for the long run is our scientific activity. One of the major EPA functions mandated by the President's Reorganization Plan No. 3 is to monitor pollution, research its adverse effects and devise new methods and equipment to control it.

This fiscal year EPA is budgeting about $160 million for research and monitoring. About 40 percent of this goes for work in our own laboratories, 40 percent to universities and other non-government institutions, and 20 percent by transfer of funds to other federal agencies.

The facility we are starting here today will be a vital component of this endless search for new knowledge that can be put to practical use for the benefit of mankind. It will pull together all our research activity in the Cincinnati area into one efficient complex of laboratories. It will encourage the further development of environmental sciences here at the University of Cincinnati and it is bound indirectly to foster the growth of control equipment industries in this part of the midwest region.

We are expecting much of this facility based on the excellent work done so far at the Center.

I think this nation is well on its way to a new era of environmental stewardship. We are beginning to realize that the earth itself, the whole biosphere, is an environment from which we cannot insulate ourselves. If we alter that environment we must also protect it and correct the abuses of the past. We must learn to foresee the full effects of our actions on the world of the future, so that human beings and the whole panoply of natural resources stay in balance.

The National Environmental Policy Act, signed by President Nixon on the first day of the nineteen seventies, expressed this objective very succinctly: "to encourage productive and enjoyable harmony between man and his environment." So we have made a firm commitment to maintain the life-support system of spacecraft earth and all systems must remain "A-okay."

Our success will depend utterly on the dedicated scientist. Every age has its symbols and its heroes. The white-coated researcher locked in his laboratory, unravelling the secrets of nature with great effort and repeated applications of midnight oil, freely giving his findings to the world for whatever use can be made of them, has been a childhood hero to many of us. And he may yet save the world if we use his findings with restraint.

The prime goal of modern society has been knowledge because knowledge meant progress. But knowledge, as Adam discovered, is not an unmixed blessing. With knowledge must come responsibility.

Applied science is changing from a period of extraordinary and unquestioned growth and innovation to a time of caution. Until recently, it seemed there was nothing we could not do. Now, we are repeatedly and most cogently reminded that we depend on living processes for survival—processes we only dimly understand and cannot control or supplant.

The conclusion is inescapable that from now on our applications of technology will be monitored, subjected to critical review, and modified in advance to meet social requirements. This does not mean we should discontinue or slow the development of new technology, rather that we need to better understand the human and environmental impact of its ultimate use. In the long run, this will be less expensive than having to undo our mistakes after the fact.

Scientists will have to be more active in the public forum, laying out the facts and helping to formulate and clarify issues. When complex questions confound the layman there is no subtitute for solid evidence and informed advice. I am not saying that any opinion, expert or otherwise, can expect to dominate the formation of policy but merely that sound policy making is impossible without a full exposition of all relevant data.

The image of the disinterested scientist breaking down the barriers of ignorance, wiping out misconceptions, discovering new facts, laying the foundation for knowledge, progress and peace—this image has been enormously influential as an ideal of humanitarianism and public service.

It will continue to be, if we treat technology as a means, and never as a goal in itself.

When historians of the future look back on this period, they will say it was an age of enlightenment when man first understood that his limitless capacity to innovate always takes place within nature, not outside it, and that preserving the life systems of the earth is our most sacred task.

With science integrated into the total culture of mankind, I have no fear for the future. Man will not only survive, but prosper, and advance in wisdom as a guardian of the Earth.

ACTION DUE ON GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, we are now in the final home stretch of the 92d Congress. Congress will adjourn sine die—we hope—by the end of this month, or certainly by the middle of October. Little time remains to act on the significant issues pending before this Congress.

One of the significant issues pending is the Genocide Convention. The Convention was approved by the Foreign Relations Committee in May of 1971 by a vote of 10 to 4. It has been awaiting floor action since then. In fact, it has been awaiting action much longer than that—the Genocide Convention was originally submitted for ratification in 1950, by President Truman, and for 21 years the Convention was on the agenda of the Foreign Relations Committee.

Mr. President, the Genocide Convention deserves consideration. Seventy-six nations have ratified it. Its merits have been debated exhaustively, and every objection to the Convention has been considered and dismissed. The Convention has the backing of the Attorney General and the Secretary of State—the two administration officials with jurisdiction over the Convention. There is no reason for the Senate to postpone action on this issue.

Mr. President, I urge that we proceed to consider this matter without further delay.

TRIBUTE TO ADMIRAL STARK

Mr. SCOTT. Mr. President, a native of Wilkes-Barre, who gave his all to the United States of America in her time of need during World War II, passed away recently. Adm. Harold Raynsford Stark was a loyal American, a respected Pennsylvanian, and a courageous commander.

I ask unanimous consent that an article published in the Wilkes-Barre Times Leader of August 21, 1972, be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

Admiral Harold Stark, Who Built Navy Before Pearl Harbor, Dies at 91

Admiral Harold Raynsford Stark, chief of naval operations from August 1939 to March 1942, and commander of United States Naval Forces in Europe prior to and during the Allied invasion of Normany, died at the age of 91 on Sunday morning at Washington, D.C. following a long illness.

Admiral Stark went to Washington to become chief of naval operations at a time of great world tension. In September 1939, only a month after his arrival, Hitler invaded Poland and general hostilities erupted in Europe. Admiral Stark foresaw the possibility of American involvement and in the face of existing strong isolationist public opinion he was able to convince Congress of the need for naval strength that could control both the Atlantic and Pacific Oceans. Under his guidance, a strong Navy, including all of the necessary supporting vessels and bases, was planned and actual construction was initiated. When this country was eventually drawn into the war by the Japanese attack on Pearl Harbor, the Navy had achieved a vastly improved state of readiness.

For his accomplishments while chief of naval operations. Admiral Stark was awarded the Navy's Distinguished Service Medal. The citation noted his "responsibility for building and administering the largest peacetime Navy in the history of the country," and stated that "Due to his exceptional qualities of leadership and his outstanding ability full reliance was placed upon his advice and counsel by the Secretary of the Navy, by the Congress and by the President of the United States as evidenced by the executive measures adopted for the Naval service to effect a high state of training for war and the building of a 'two-ocean navy'."

DECORATED BY EISENHOWER

In March of 1942 the duties of the chief of naval operations were combined with those of the commander in chief of the United States Fleet by executive order of President Roosevelt. Admiral Stark was then sent to command all United States Naval Forces in Europe, a post he held until August 1945. The command embraced all United States Naval forces assigned to the invasion of Normandy. He was awarded the Army's Distinguished Service Medal by General Eisenhower because of the major role he played in the naval phase of the liberation of Europe. The citation stated—

"Admiral Stark was responsible for the planning, preparation and coordination of the United States Naval aspects of the launching of the campaign for the liberation of Europe. Through keen foresight and exceptional administrative ability Admiral Stark was able to plan for and meet the necessary personnel and material requirements for this enormous operation. Only through his untiring efforts was the accomplishment of this successful invasion completed."

He was also awarded the Navy's Distinguished Service Medal for his work during this period. The citation read in part:

"Serving as Naval Advisor to the United States Member of the European Advisory Commission in addition to his duty as senior United States Naval representative in Europe, Admiral Stark rendered distinguished service not only as a Naval administrator but also as a highly skilled and diplomatic emissary in his relations with Allied authorities, contributing vitally to the success of the Normandy invasion and the post-invasion operations leading to the victorious termination of the war in Europe. His performance of this exacting and important assignment was characterized by exceptional tact, intelligence, professional integrity and gallant devotion to duty, reflecting the highest credit upon himself, the United States Naval Service and his country.

AFRICA IN 1917 WAR

In 1917, when the United States was drawn into World War I, Admiral Stark, then a commander, was in command of the Torpedo Flotilla, Asiatic Fleet. He led a squadron of small and old destroyers, hurriedly fitted out in the Philippines, to the Mediterranean at a season when the southwest monsoon was at its height; the squadron thereafter took an active and efficient part in the antisubmarine campaign in the Mediterranean. For this extraordinary service, he was awarded the Navy's Distinguished Service Medal and the Order of the Crown of Italy.

During the years prior to World War I, Admiral Stark participated in the "around the world" cruise with the U.S. Battle Fleet in a "show of the Flag" under President Theodore Roosevelt. He commanded the destroyers Porter, Stringham, Lamson, Patterson and served in the Cruiser Brooklyn.

Prior to World War II, Admiral Stark served as chief of the bureau of ordinance from November 2, 1934 until August 27, 1937 and in May 1938 he was given command of cruisers, battle force with his flag in the light cruiser USS Honolulu. Other post World War I duties included those in the USS North Dakota, USS West Virginia, USS Nitro, Naval Proving Ground at Dahlgren, Virginia, and Naval Powder Factory at Indian Head, Maryland.

Because he had been chief of naval operations when the Japanese attacked Pearl Harbor, he was an interested party when the Navy in 1944 convened its Court of Inquiry into the circumstances surrounding the Japanese attack on Pearl Harbor. He was later a witness before the congressional inquiry into the attack.

DECORATED BY OTHER NATIONS

In addition to the Distinguished Service Medals already mentioned; Admiral Stark was awarded the following foreign decorations for World War II service: British Honorary Knight Grand Cross of the Military Order of the British Empire; the French Legion of Honor, rank of commander; the French Croix de Guerre with Palm; the Brazilian Grand Master of the National Order of the Southern Cross; the Norwegian Order of St. Olaf; Chevalier of the Order of Polonia Restitute, First Class from Poland; the Knight Grand Cross of the Order of Orange-Nassau with Swords from the Netherlands Government; and Grand Officer of the Croix de Guerre (1940) with Palm, from Belgium.

BORN IN WILKES-BARRE

Admiral Stark was born in Wilkes-Barre on November 12, 1880. He was graduated from the Naval Academy with the class of 1903. He made his home in Washington, D.C. at 4900 Glenbrook Road since his retirement in April 1946.

Admiral Stark is survived by two daughters, Mary (Mrs. Edwin W. Semans) and Katharine Rhoads (Mrs. Harold P. Gillespie), both of Washington, D.C., three grandchildren and two great grandchildren. His wife, the former Miss Katherine Adele Rhoads of Wilkes-Barre, predeceased him.

He was a member of the Westmoreland Club in Wilkes-Barre, the Army and Navy Club of Washington, D.C.; Army and Navy Country Club, Arlington, Va.; the Chevy Chase (Maryland) Club; and the New York Yacht Club.

He held life memberships in the Navy League of the United States, the United States Naval Academy Alumni Association, the Navy-Marine Residence Foundation, the Retired Officers Association, and was an Honorary Vice President of the Naval Historical Foundation.

Active on behalf of the Navy Relief Society during both his active duty and retirement years, he was president of the society during his term of office of chief of naval operations.

JOB TRAINING PILOT PROJECTS IN FEDERAL PRISONS

Mr. BROCK. Mr. President, on August 15 the Senator from Illinois (Mr. Percy) introduced S. 3922 to establish job-training pilot projects in Federal prisons. I was delighted to have the opportunity to join him in sponsoring this legislation and want to add my comments and encourage the support of my colleagues.

Hearings on the conditions of our prisons before the Subcommittee on Penitentiaries convince me the phrase "prison reform" needs to be understood in carefully defined terms.

For many it is a sort of conversation piece. Everyone professes to be in favor of prison reform, just as they are against sin. But when one asks what should be done, the answers range from making cells more homelike, to improving the manners of the guards.

Senator Percy's proposal establishes the type of practical, down-to-earth program which could make prison reform a reality. For it would combat the two great problems associated with imprisonment: Boredom and recidivism.

Mr. President, "boredom" is a word that sounds harmless enough, but as someone remarked, boredom can be one of the most destructive forces in society.

He was talking about society in its normal free sense. I would assure him that in prisons boredom is endemic and can result in the most brutal or perverted type rising to dominance over an apathetic herd of men or women inmates.

Genuine job training, related to the real, outside world, rather than the present make-work or mere prison maintenance work, would offer the most effective antidote to boredom of which I can conceive.

The second problem, recidivism, is closely related to the lack of constructive activity in most prisons today. During the subcommittee hearings, testimony was submitted by many closely associated with our prison system, including attorneys, corrections officials, and former convicts.

They all agreed on the difficulty in reestablishing one's credentials in order to obtain a job with any future in it, if one had served time.

It seems clear to me, however, that if a former convict could produce evidence as to having received job training while in prison in terms of what our manufacturing or service industries look for today, he would find many more employment doors opening up for him. He would then be far less likely to revert to crime as a way of living.

The human and material savings resulting from this program seem so promising that I intend to work as closely as possible with Senator Percy to persuade Congress to agree to its enactment.

RAYMOND GIVENS

Mr. CHURCH. Mr. President, recently, retired Idaho Supreme Court Justice Raymond Givens died in a Boise hospital. Today I pay tribute to him.

Judge Givens was a dedicated public servant, a man whose life encompassed the entire history of Idaho since statehood, yet who looked to the future as one of the authors of a proposed new State constitution.

Perry Swisher, an Idaho columnist, summed up the essence of Judge Givens' career, I believe, in a recent article in the Intermountain Observer of Boise. He wrote:

> He was born six years before Idaho's constitution was written. He practiced law, served as a prosecutor, an assistant attorney general, a legislator, a district judge and then for nearly 30 years as a supreme court justice. Yet . . . this tells you almost nothing. What matters is that Judge Givens summoned all that experience into holding up to the light every phrase of our basic governing documents. More important, he used his years and energy to show others how to do it. And how to do it carefully, critically, and dispassionately that we do not thoughtlessly accept—or reject—the way we rule and are ruled and how we got this far.

Mr. President, I ask unanimous consent that Mr. Swisher's column be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

Judge Raymond Givens

(By Perry Swisher)

A death is what prompts the obituary, but a life is its subject.

The cost accounting in today's chain newspapers usually relegates death notices to the lower-paid and therefore greener reporters. So what you learn about the way a man lived may be confined to some unedited mortuary epitaph describing the widow's burden: "He was an ardent sportsman" or "Mr. Johnson was fond of horses."

Other men's lives instruct our own. Or

should. And as this past decade of assassinations drives home, we are most open to what a man was and what he did at the moment his mortality and our own touches us—at his death.

Last weekend Judge Raymond Givens died in a Boise hospital. I didn't know it when I left the state Sunday morning. It was a shock to come home on Thursday morning to word that he was gone and the funeral was already over.

The substance of Judge Givens' life can't be dismissed by a cost-accounted obituary. Nevertheless, the contrast between the power of his spirit and the poverty of the obit frames my intended subject well: The quality of the offering of public service in this particular primary is out of all proportion to the attention the people have so far invested.

The central fact about Judge Givens' 88 years of life is that he became a public man, stayed that way, and then by the most remarkable self discipline I have seen first hand, made sure that his public service became a public asset.

He was 81 when Robert Smylie, then governor, appointed the judge as chairman of the Idaho constitutional revision commission. I wasn't alone in this: In spite of my respect I wondered why Smylie chose such a frail old man for such heavy duty.

Near the end of the commission's six-year labor on the constitution, we were scheduled into a hearing on the top floor of the Idaho State University student union building. By then Judge Givens was walking with the aid of an aluminum frame. I told him I was sorry but the building had no elevator. "Well, damn it then, carry me up," he said, and while we did I thought, as I do now, how much of the public effort comprising Idaho's history had been gathered into and expressed from one frail body.

He was born six years before Idaho's constitution was written. He practiced law, served as a prosecutor, an assistant attorney general, a legislator, a district judge and then for nearly 30 years as a supreme court justice. Yet, like his obituary, this tells you almost nothing. What matters is that Judge Givens summoned all that experience into holding up to the light every phrase of our basic governing documents. More important, he used his years and energy to show others how to do it. And how to do it so carefully, critically and dispassionately that we do not thoughtlessly accept—or reject—the way we rule and are ruled and how we got this far.

Using this column to remark on him takes away space but adds meaning to what I'd wanted to write about. We are well served, our society enriched, when public life draws talents on the scale displayed by the present contest for U.S. senator.

Robert Smylie has been identifying and sharpening the issues. ISU President-on-leave William E. Davis is finding new warmth and concern in himself by responding to the so-called ordinary people who take the measure of a campaigner. The talents of Lawyer-Dr. Glen Wegner—couldn't we simply hire him without this election fuss? Rose Marie Bowman is giving a newly attractive meaning to being gutsy.

The woman as citizen is, in this campaign, injecting vitality when it is needed. The wives of Rep. Jim McClure and former Rep. George Hansen were secret and not-so-secret (in that order) major assets. Now we meet Polly Davis, Lynn Wegner, Byron Johnson's lustrous Marie. They are more than decorations.

They appeal because their heads and hearts work without being plugged into a kitchen outlet. It is part—and welcome!—of the new politics, even if it is also as old as Abigail Adams and Dolly Madison.

The 1972 field of candidates and their partners represents a commitment that will still be bearing fruit long after my obituary—"he liked trees," probably—has been proofread. Remembering Judge Givens, I celebrate that.

BANGLADESH EMERGES

Mr. CHURCH. Mr. President, the August issue of Harper's magazine contains a graphic and detailed report of the early days of the new nation of Bangladesh. Mr. Lawrence Leamer, a former Peace Corps volunteer in that area of the world, has written a vivid account of the atmospherics in Bangladesh following its successful fight for independence.

With Bangladesh's application for United Nations membership currently being held up, and with Career Officer Hermann Eilts being nominated as America's first Ambassador to Dacca, it is timely to recall the anguish and joys Bangladesh recently experienced.

I call, then, this special report, "Bangladesh in Mourning," to the attention of the Senate, and ask unanimous consent that it be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

[From Harper's magazine, August 1972]

Bangladesh in Mourning—A New Nation Emerges From a Terrible Darkness

(By Laurence Leamer)

On the night Bhutto announced that he would free the Sheik, the young men who had fought the war and the young men who wished they had fought the war and the poor men of Dacca came out into the streets. Soon the small groups of men, men lithe by race and lithe by diet, and swathed in lungis, the long cotton skirt of Southeast Asia, merged into a mass that surged through the dusty, smoky haze of the evening streets. "Joi Bangla, Joi Bangla, Sheik Mujib, Sheik Mujib," they shouted; and when a television movie camera approached they drew to it, moths to fire, and jumped before the camera, thousands of brown hands flashing up into the klieg lights.

The Mukti Bahini guerrillas fired their Sten guns into the air, for they had no other instruments of celebration, but some refused, knowingly, saying it was best to conserve ammunition. Many of the young men looked up at the great orange moon that had just risen over the cement and clay bamboo walls of the city, and stood awed, scarcely believing, for the mountains of the moon were formed into the shape of Bangladesh. There were some few who realized that their country had no distinct shape and in that alone it mirrored the mountains of the moon, but most took it as the most wondrous of signs.

Even before dawn they began arriving. They traveled by launch and dugout on the rivers that are the arteries of Bangladesh, the water mud-brown and thick as blood, and full of katla and hilsa and the other large fish that jump up into the air so that the water below seems as thickly populated as the land above. They traveled by steamer on the two great rivers, the Ganges and the Brahmaputra, passing across the grayish-blue water that faded into the grayish-blue sky, moving among square-masted fishing noaykas, keeping far from the narrow strips of shore that give way to more water, more boats. They traveled by bus and truck and car across this land they call their mother, across the vast flatness of the land, past burned villages, fallow fields.

They traveled on trains, the cinders and smoke passing along the body of the train and out into the yellowish-brown landscape that stretched out, relieved only by occasional villages of bamboo and mud clustered among palm and banana trees, and then further back another village, and another, back beyond the eye, beyond the horizon. They traveled by foot, walking along the narrow paved roads into the city, into Dacca that now on the tenth of January was full of the dryness and dust of the winter season. They came carrying flags that tailors had stitched together, sewing red circles onto the green backgrounds, and then out of golden cloth cutting outline maps of Bangladesh—each one a crazy patchwork of indentations—and affixing them onto the red circles. In their hands they cradled malas of marigolds and roses, and they walked with banners and posters of exaltation and joy.

Soon the streets filled with the rhythmic chatter of Bengali, with layer upon layer of emotion and anticipation, with tens and tens and tens of thousands of Bengalis hurrying toward the racecourse or the airport or the road between.

Today the Sheik would return, return to them after nine months in prison, after horror beyond horror, after . . . there was no reason any longer to think about it. Today he would return, know how they loved him, know how he embodied them and they him; now it would be all right.

Sheik Mujib had become Bangladesh. The Bengalis are a race of talkers, and words and ideas mesmerize them, have a life of their own that often makes their implementation seem almost irrelevant. But Sheik Mujib could take the most extravagant and dramatic rhetoric and charge it with reality, with the reality of his own struggle and his own sense of the Bengali people. For almost a quarter of a century he had fought for the Awami League, the middle-class Bengali party that sought to wrest control over East Pakistan from the dominant West Pakistanis. The government realized the potential of this Bengali nationalism, and they imprisoned Sheik Mujib for a total of ten and one half years. They kept him in solitary confinement. They tortured him. They denied him books and writing material. And each jail term only further tightened Sheik Mujib's grip on the Awami League and his leadership of this movement for provincial autonomy.

In the December 1970 election, the first free election in Pakistani history, the Awami League won 160 of the 162 seats allotted to East Pakistan. President Yahya Khan postponed the meeting of the National Assembly and began negotiating with Sheik Mujib. Bengali Army officers and political leaders warned Sheik Mujib that Yahya was merely stalling until he had reinforced the Pakistan Army in East Pakistan, but Sheik Mujib would not listen.

On the evening of March 25, 1971, the tanks and half-tracks rolled out of the cantonment and fanned out across Dacca, to crush the Bengalis. At one-thirty in the morning the Pak soldiers went to the home of Sheik Mujib. Some hours before, the Sheik had learned what was to come and the students and politicians had pleaded with him to leave, to go underground, but he had refused. He knew full well if he were to escape, if for his failures he were to suffer less than others, then he would break his covenant with the Bengali people. He was a brave man surely. He sent his friends away, and he waited until they came and took him away to prison in West Pakistan.

He would be returning now, his covenant sanctified anew. The lands stood barren, corpses still unburied, factories silent, bridges demolished, the people hungry, but now they would begin again. He was more than a great leader to them, the father of their country. He was *Bangabandhu*, the friend of Bengal. He had a power that entered into the realm of the spirit. To see him, to touch him, was to receive what the Hindus called *darshana*, Sanskrit for "holy audience."

In the upstairs back room of the city Awami League office, Aftab Uddin Ahamed, a seller of trinkets and baubles, lay on a wooden cot, his lips as dry as the last leaf of autumn, his hair matted and snarled, his face unshaven. The week before he had promised Allah that he would take no food or water until Sheik Mujib returned. Not far from Dacca Airport, in a bamboo hut near the brown swamp at the outer edge of the poor community of Nakhalpapra, Kumila Khatoo rested on a mat on the mud floor. A week before when she had heard that Bhutto, the new president of Pakistan, would release the Sheik, she had begun to fast and say her prayers, and she lay there in her cotton sari and her single bracelet, waiting.

The return of Sheik Mujib symbolized victory not only over the West Pakistanis but over centuries of oppressors. The Aryans, the Moguls, the British all had dominated Bengal; and to all, the Bengalis had proved a treacherous and volatile race. At times they might pour their emotions into poetry and song. At times they might seem obsequious and fawning, even more so than a subject people need be, and then once again they would rise in violent revolt. With the creation of Pakistan in 1947, the Muslims of East Bengal had rid themselves of the Hindus who had dominated the commerce in the major cities and owned most of the large land holdings. But they had merely exchanged overlords. West Pakistan remained a semi-feudal land dominated by a few dozen families, and this oligarchy soon expanded its hegemony over land to commerce and industry as well, and to East Pakistan as well as to West.* Only now, with this independent Bangladesh, would the Bengalis rule their own land.

At the airport they waited, then, on this fine warm morning, the bureaucrats, ministers, officials, officers, diplomats, journalists, Mukti leaders, and student leaders. The Bangladesh Army, Navy, and Air Force units stood at attention in their new uniforms, standing as tall as if they thought that their caps could touch the sun.

Peons had already laid out two red carpets, one to grace Sheik Mujib's path as he met Bengali dignitaries, and a second for greeting the diplomatic community; both carpets were shiny and pink, covered with black marks and purple water stains. Here they stood, then, the elite of Bangladesh. Even stripped of their garments they would appear a race apart from those who waited outside the airport gates. In South Asia the prosperous wear some of their wealth on their bellies, their jowls, their thighs. Syed Nazrul Islam, the acting President, a plump man, full of sensuous well-being, stood swathed in white flowing pants and shirt and sleeveless "Mujib" vest that covered his fleshy, moist skin. Tajuddin Ahmed, the acting Prime Minister, wore green pants and shirt and sandals; and he too had a cherubic face, a stomach like the Chinese god of wealth, and a neck ringed with fat.

These cabinet ministers had fled to India when the Pak repression had begun, and they had formed a government-in-exile. They had spent much of their time feasting and drinking in Calcutta, and the struggle in Bangladesh had grown far beyond them. They had squandered their time. They had formulated no real plans. They had returned to Dacca five days after the end of the war, escorted by the Indian Army, armed only with their rhetoric and their devotion to Sheik Mujib. The Awami League really had no ideas. The party lived solely on the fervor of its nationalism and the belief that life in Bangladesh would have to change.

The student leaders, too, stood near the apex of this hierarchy of fervor. Unlike the common people they loved *their* Sheik Mujib. "Whatever is done by the people of Bangladesh is not beyond the knowledge of Sheik Mujibur Rahman," Nura Alam Siddique, president of the pro-Awami League Student League would say, and his three colleagues would nod in approval. At the airport the four student leaders and the ministers came together touching, holding hands, hugging. The ministers were not pandering to the student leaders, for the universities, the colleges, the schools had provided most of the boys and young men who joined the Mukti Bahini and fought the Pak Army. These students generally did not join for ideological reasons or out of loyalty to the Awami League. They fought out of outrage and idealism. They fought, too, many of them, because they had little choice, because the Pakistanis were hunting down Bengali youth, because the Pakistanis considered a fresh face or a youthful body proof enough of treachery.

The four student leaders were not masters of this movement, and they trafficked mainly in symbol, speech, and rhetoric. In this, however, they had few peers. They had given Bangladesh its flag, and they would give this day its perfect symbol. The Sheik was to have ridden from the airport to the racecourse in a black Mercedes, but the night before the students had said no, that would not do. And they had brought an old blue open truck to the airport, a truck decorated with red-and-blue bunting, with tires as smooth as glass, and a front windshield shattered by a bullet, and they said that the Sheik would sit here on a brown sofa in the back of the truck, that here he should greet his people.

PESTILENCE

The student leaders and the cabinet ministers would stand beside the Sheik, and directly behind in a jeep would come some of the Mukti force. Here Sheik Helal Uddin, a twelve-year-old cousin of Sheik Mujib's, decided he would ride. He sat now in the airport café at a table by himself wearing his olive-green uniform, stuffing unbuttered bread into his mouth. The café was crowded with journalists and officials hurriedly having tea and bread, and Sheik Helal Uddin sat there, the only child in the room, alone at his table. He was small, small even for his age, well under five feet, and sinewy, so shy that he seemed to have a perpetual blush on his face. Yet he had a certain pride and confidence that allowed him to sit there alone, untroubled by those who wanted a seat.

On the night of March 25, when the repression began, Helal Uddin had realized something was wrong, though he did not know what it might be. He had run away from his family in Khulna and gone to Faridpur, his uncle's home district. There he stayed with his grandparents. One night they learned the Pak Army was coming, and they fled across the river. As he looked back, he could see his house on fire. A week later they returned and found the village burned to the ground and corpses lying with their throats cut open. The Pak soldiers had machine-gunned or bayoneted the men to death, and they had raped the women and burned the houses and the fields, and now the boys who were still alive were going to join the Mukti Bahini.

Helal Uddin went with them to the village of Kaliganj in Khulna district. The Mukti captain told Helal Uddin that he was too young, he could not even lift a rifle. But, finally, the captain let him stay. He learned to put magazines in the machine guns, though he could never quite manage to take one out. They traveled by night and slept by day, and only after liberation in December did they come out in the open. It was then that they found the men huddled in the hold of a boat. The men were afraid, and when the guerrillas found arms in the boat, they admitted that they were Razakars, members of the Pak paramilitia. The Razakars led them to their camp where the Mukti found still more Razakars, until they had 204 in all. The guerrillas took their prisoners to the village where the Razakars said they had stayed. The village had been burned down, and the people who were still alive said that the Razakars had done it, had taken their rice and looted their homes and killed their men; and now even the Mukti captain, who at first had wanted merely to imprison the Razakars, agreed that they should be killed. And so they killed them, and Sheik Helal Uddin drove his bayonet into the bellies of six of them.

The liberation struggle aged such boys far beyond what usually passes for manhood and maturity. There had been rites of passage, of horror and heroism, beyond words, beyond comprehension. At first to the Bengali people themselves the Pakistani oppression had remained just another pestilence, along with floods, money-lenders, disease, famine. Then in November 1970 a great cyclone came raging up out of the Bay of Bengal. Half a million died, and those who keep records of such things called the cyclone the greatest natural disaster in human history. The Pakistani government did almost nothing to relieve the suffering, to feed the starving, to bury the rotting, bloated bodies of the drowned. This conscious disdain aroused the dormant, passive feelings of the Bengali people and drove them to a peak of fury.

In March 1971, when Sheik Mujib called for a noncooperation movement to force Yahya Khan to grant East Pakistan provincial autonomy, all across East Bengal the shops, the offices, the factories, the mills closed, and even those who had known Gandhi and his movement stood awed at the discipline and will of the Bengali people.

On the evening of the twenty-fifth, when the Awami League office in the great port city of Chittagong received the telephone call saying that the Pakistani tanks were moving through Dacca, the party workers spread out across the city shouting the news. The Bengalis came out in the streets in the dark hours of the early morning. They yelled "*Joi Bangla*" (Victory to Bengal), and they walked and ran toward the army cantonment where the Pakistanis were killing hundreds of Bengali recruits in their sleep. The Bengalis carried spears, rifles, shotguns, bows and arrows, and *daos*, the curved knife of Bengal, and they took up positions in the hills and trees and roads that surround the great cantonment area stretching for miles on the edge of the city. Some of the Bengalis were so fierce in their fury, so outraged, that they could not be held back, and they ran forward into the cantonment until they were cut down by machine-gun bursts, a few of them rising again to throw their spears arching up into the sky.

That night the East Bengal Regiment (EBR) of the Pak Army revolted. In the early morning hours, Major Zia Rahman led a contingent of the 8th EBR out of the cantonment to regroup in the Kalurghat area. There he met Captain Harun of the East Pakistan Rifles (EPR), the Bengali border patrol, and they formed what was the first Bangladesh liberation army. Shopkeepers opened their gun shops, the police their armory, the gun clubs their arsenals, sportsmen their gun cases. Merchants gave rice and cloth and cigarettes and medicine. The women of the city prepared food and the people donated money—rickshaw drivers a few annas, rich men thousands of rupees.

For several days the Bengalis held out, keeping the Pak Army penned up in the cantonment, undaunted by the shelling from the PNS *Babur* in the harbor and the sniping from Pak soldiers holding fortified positions in the city. When the Pakistani soldiers first came out of the cantonment they deceived the Bengalis by dressing as civilians, carrying the flag of Bangladesh, and shouting *"Joi Bangla."* When the first four tanks came out of the cantonment soon afterward, it is said that some of the students decided they would have to be stopped. The people of the city would need more time to escape. Already, on March 26, the Bengalis had dug trenches in front of the K-Rahman Ice Cream factory along the route where the tanks would have to come. The plan was for some of the students to fire guns at the tanks, to attract them so that they would come rumbling over the ditches where other boys would lie crouched with mines. The boys who were to divert the tanks could not afford to fail, so they stood up openly and fired their guns, and they were killed by machine-gun bullets. The boys in the ditches could not afford to fail either, so they pressed the mines up against the bottoms of the tanks without setting the timers, and they died in the explosions.

---

* Twenty families controlled 66 percent of the industrial capital and over 80 percent of the banking. The GNP grew at over 5 percent a year, but by 1970 the vast majority of the people were either no better or not substantially better off than they had been two decades before, and 15 to 20 percent may have been worse off. Between 1950 and 1960 the average daily consumption of food declined from 2,010 to 1,970 calories, and the intake of protein was less than half that of inmates in German concentration camps during the last days of the second world war. Whatever the poor of the West suffered, those in the East suffered tenfold. Back in 1951–52, per capita income in the East had been 85 percent of the West's, but by 1967–68 it had fallen to 62 percent.

TERROR

When the first Mukti Bahini guerrilla units entered Bangladesh in late April and May, they began to eliminate collaborators from the villages. In the Chittagong area, as all across Bangladesh, these Mukti Bahini were mainly students from homes of prosperous or moderate circumstances. Now they were terrorists. They went into villages, and when they knew they could trust the villagers, they would tell them that they were Mukti and then ask them if any collaborators or Razakars lived there.

By the summer months the Mukti had killed most of the collaborators who lived in isolated villages, and the Pakistani Army was growing less assured, venturing out of its barracks and cantonments into the countryside only in strong numbers and only by day. The soldiers were Punjabis, Afghans, Kashmiris, Sindhis, and Baluchis—martial peoples, manly races. They looked toward the Middle East for their culture, and often to the past for their dreams, to the Mogul rule. What could they think of these Bengalis, then, these soft brown little men in skirts, prone to gasps of emotion, to tears even, so proud of their Bengali culture, a culture as much Hindu as Muslim, a people more South Asian than "true" Pakistani? These Bengalis were kafir, nonbelievers, or so the West Pakistanis thought, and they hated them and their land, this land that had nothing of the austere grandeur of the desert, this land that now in the monsoon had become an immense and frightening expanse of water.

There had been no more sleek and pampered army in all of Asia, a proud force that twice had fought the Indians with awesome courage. Now, though, they were slowly turning into a rabble masquerading in the uniforms of an army; lieutenants and NCOs raped the same women; officers and men shared the same loot. They were growing bloated, prowling the land for booty and women, burning villages. They had no intention of risking their lives when they did not have to.

By August the Mukti could begin to attack police stations in the countryside and cut off communications. The Pakistanis placed bamboo spikes along the rail line between Dacca and Chittagong to prevent the guerrillas from creeping in to attack passing trains. They doubled their guard on major buildings and strategic areas, and they began talking nervously about the role Indian infiltrators were playing in the guerrilla activities. That was the basis of their propaganda, but they simply could not believe these Bengali boys could be harassing them so.

The first major operation in Chittagong took place on the evening of August 15. Thirty-three Mukti commandos dropped into the water of the port. They wore swimming trunks and flippers. They swam on their backs with only the tips of their noses above water. In their arms they cradled eight-pound chemical mines. Sentries fired out across the water, emptying their rifles at shadows. The commandos attached their mines to eleven ships, including merchant ships and patrol boats, and as they swam back across the river the explosions rocked the port; the youths, all of them, escaped into the night.

PLAGUE

They had such pride in their victory, this victory of the Bengali people. None would ever mock their courage again. None would call them a race of poets and women. If only that pride, that joy, could transform their horrors into mere memories, the horrors that mocked them, mocked their liberation, mocked their pride, mocked their joy.

Some at least could pretend to forget, but what about men such as Mohammed Ul Haque? Before the troubles Haque had been doing well enough. He was a truck driver, but he had managed to save enough to start a little shop selling cigarettes and *pan,* the betel nut that South Asians love to chew. He took too much *pan* himself so that the indentations between his teeth had turned black, matching the color of his hair and bristly moustache. He was usually on time at the garage where he picked up the fifteen-ton refuse truck that he drove through Chittagong while two workers dumped garbage and dead animals into the back.

Early in April Haque's employer, Asgar Hussain, who leased vehicles to the municipality, came to him and said that from now on he would have to carry dead bodies. The army sent a supervisor and six outcaste sweepers, who before had worked in the hospitals handling dead bodies and cutting up corpses for postmortems.

From morning to night they worked, trip after trip, only twenty or twenty-five bodies at a time so that they could cover the loads with tarps. They drove to the municipal garbage dump and buried the bodies in great trenches. Haque would drive to the Wireless Colony where the Biharis, the Urdu-speaking refugees from Bihar and Uttar Pradesh, lived, and they would empty corpses from rooms in the high school piled full of bodies. He would drive to the tannery, and they would remove the bodies of women who had bled to death from the way they had been raped. He would drive along K.C. Dey Road, the Hindu quarter, where building after building had been razed, and the pink inner walls of the houses stood open to the air like flesh, and the putrid stench led them to the rotting corpses.

Even for the sweepers, the lowest of the low, it was sometimes too much. They were paid extra rupees. They could take any money found on the bodies and pull off rings and jewelry. But some of them refused to put severed heads into the truck or pick up arms and legs. After two months or so the work let up, to six trips or less a day, and in the fall the Army took over the work completely. Yet even now, at times, it seems as if the stench of those bodies is on Haque, as if when he talks about those days he becomes touched with death itself.

And what has it all done to A.K.S. Afsaruddin? What is there in that face now, as he sits at his desk in the East Pakistan Railway office in Chittagong, that thin ascetic *Mullah's* face, the lips as thin as coins, the eyes so close together there is scarcely room for his high narrow nose, the sparse white beard, the teeth the color of old ivory? It is not the eyes—there are forty-two-year-old men with watery eyes; no, it is the voice, the shudder, the shriek that stays in the voice even when he whispers.

He went back to Faiz Lake at the end of January. He saw the skulls, thirty or more, lying there in a neat geometric pile. He could smell the rotting flesh. He found the scarf of the *Mullah,* the priest of Punjabi Lane, lying in the grass along with bits and pieces of saris and shirts, and it drove him near mad.

Afsaruddin had gone to the mosque that morning of November 10 to say his prayers. When he and the priest and the three other good Muslims who came there each morning left the mosque at about 5:30 A.M., they met a Bihari from the Wireless Colony nearby. "You'll have a bad time today," the Bihari reported. "You Bengalis have killed four of our people."

The Bengalis knew what this might mean. The Biharis were the most loyal Pakistanis of them all. Most of them lived in their own communities, and the Pakistan government rewarded their fidelity with middling positions and minor economic privilege. In Chittagong over a hundred Biharis had died in two days of communal rioting in early March; more had died in the uprising at the end of March when they had sheltered Pak soldiers and sided with the Army. Since then the Biharis had been taking their revenge. They had expanded their grievances so much that their stories passed beyond the mere realm of mere exaggeration to one of pure deceit.

Most of the Bengalis who lived in Punjabi Lane, and the Biharis in the Wireless Colony next door, worked for the East Pakistan Railway. In letter, threat, and whispered gossip the Biharis had been questioning the patriotism of all ranking Bengali railway personnel, and they had seen to it that most of them were killed.

"Where did this happen that you are threatening us?" Afsaruddin asked.

"Up the road."

The five religious Muslims walked along the road into a wooded area past the furthest outskirts of the community. As they turned the bend in the road where the four bodies lay in the dust, they came upon a thousand or so Biharis armed with lathis, swords, iron rods, shotguns, rifles, daggers, and kukris. They ran down the road. They ran screaming through Punjabi Lane warning people to flee, and Afsaruddin and Akbar Hossain, one of the other morning worshippers, ran onward to get help from the police.

Afsaruddin was a good Muslim, for years a strong believer in Pakistan, and he still had faith, some faith, in the authority of the state. He begged the police to come; he pleaded, he even went to the two superintendents of police, a Bengali and a West Pakistani. "These are minor matters," the West Pakistani said. "We'll take care of it." The Bengali at last agreed to send a detachment of police, but they got only as far as Pahartali station in the Wireless Colony.

"Nothing is happening," the Bihari officer in charge told them, and they returned to their Chittagong headquarters. Afsaruddin learned that just outside the railway station at the Wireless Colony, the Biharis had stopped the trains that brought the Bengali workers into the railway shops and offices. They stopped the 7:30 A.M. train, and they stopped the 8:10 as well. They had rifles and daggers and Sten guns, and they herded the people together and took them somewhere. But where? Reports of missing people were coming into the police station now, and there was near panic, and still Afsaruddin could find nothing; no proof, no bodies. Not until that evening did he go to the Pahartali bazaar, where he met Gofron Bhuyia, a twenty-eight-year-old shopkeeper with small eyes and a thin face, its triangular shape accentuated by a trim beard.

"Why are you running around like this!" Bhuyia asked. "Why are you running around like this! Looking for bodies! They are on the other side of the hill!"

Bhuyia had been up early sorting out merchandise in his little shop next to the mosque in Punjabi Lane when the Biharis surrounded the community. They forced him to go with them up the road toward an inlet of Faiz Lake, a man-made reservoir surrounded by thickly foliaged hills, and one of the most popular scenic places in all of East Pakistan. He could hear voices ahead pleading, begging for mercy. They pushed him up off the road onto a field drenched with blood. He saw headless bodies, their hands still tied behind their backs. He fell to his knees. They began tying his hands behind his back. He flailed out with his one free hand and lunged forward, running toward the inlet, plunging into the water, swimming away under a shower of bricks and rifle fire.

He swam to the far side of the inlet where a small hill rose up out of the water, a hill covered with brambles and vines. He had lost his shirt and *lungi* and sandals, and he tore his way through the foliage, clawing a path part way up the hill where he stumbled exhausted into a thicket of thorns. The Biharis walked around the inlet. Some of them came within a few feet of him, but finally they went away.

After lying there a half hour or so, Bhuyia cleared a tiny open spot for himself and looked out across the inlet . . . stunned . . . he could not move . . . think . . . only look . . . hour after hour. They tied their arms and legs together. Those who resisted they stuck with daggers, chopped off their heads and threw the bodies into a ditch. The rest they pushed forward toward the lake where they cut off their heads with great butcher knives. They had drums of acid they would pour on the corpses to disfigure them beyond recognition. Women . . . men . . . children . . . for hours he lay there before he crawled away.

The Biharis still were keeping the road blocked off so Afsaruddin and three other Bengalis crept through the woods until they reached the inlet. The moon had risen. It was like the feeding grounds of some race of ancient predators. There could not be so many bodies. In his horror Afsaruddin counted. He wanted a record of it. That was what he must do. Five hundred bodies lying there. Five hundred. How many more, legs and arms showing in the ditches, half-covered by dirt, who knew; but five hundred, he had counted, he knew. He had lost all reason, all rationality; he did not care for his life. This would not go unnoticed, five hundred bodies.

The next day Afsaruddin went to the military authorities and begged them to bury the bodies properly, to bury them as Muslims and not just leave them there naked, their private parts showing. He called up the Circuit House, the army headquarters. They told him to shut up and asked his name. He hung up and that evening went back to Pahartali bazaar.

There he met the glass cutter who said he had seen more bodies in the narrow valley across Faiz Lake. Afsaruddin was the chronicler of the horror now, the witness, and he would go there, yes, he would go there and see those bodies too and count them. And so they went—Afsaruddin, the glass cutter, and a third man—to the other side of the lake up the hill to where the Pak Army had dumped the trucks, bodies, decomposing bodies, strewn there, women, girls, young, twenty, thirty, some could scarcely be fifteen, lovely girls, girls of good family, their light skin alive in the moonlight, and their bellies swollen, so many of them, they were pregnant, three or four months pregnant, and their abdomens had been cut with a cross, he did not fear now, he did not fear, he did not fear, 1,082 he counted, 1,082, they must have been kept at the cantonment, 1,082, he did not fear, the third man fainted and they dragged him down to the lake and doused his head in water until he came to, and then they returned to Chittagong.

He would go to the press, he would go to the world, he would tell. He knew the Daily Azadi, the Chittagong newspaper, and he went there the next day, but they said they could not write anything. He telephoned Dacca and talked to a high Bengali official. He tried to get a plane ticket to Dacca to tell him, but he could not. He went to the Superintendent of Police's office, time and time again he went, and because of him and because of Bhuyia's complaints as well, the police agreed to look into the matter. And then a Bengali intelligence officer came up to him and told him that his name had been leaked out. If he did not leave he would be killed. And so he fled, wearing a lungi instead of his usual flowing white pants and shirt.

He has returned to the railway office now, but still it is with him. At times he is quiet, and then it wells up in him again, he remembers, and he will sob and sob, again and again, until he is scolded or shamed into being quiet.

There is nowhere Afsaruddin can go to forget. There is nowhere any Bengali can go. Even at the airport waiting for the Sheik there are boys who had to suck the penises of Pakistani jawans. At the end of the runway in the bunkers there are bras and pieces of saris, and the cantonment is near where they found girls wearing only shorts, their hair clipped, so they could not hang themselves with their saris or the tresses of their hair. That stench, that death is on everyone, on everyone but the Sheik; the Sheik was not here. He has suffered, but he has not been here; there is a purity to him and to his suffering, and he alone can purge this land of all this, can bring them peace, can bring them peace, can bring them peace.

THE BELOVED

The Royal Air Force Comet comes out of the eastern sky and passes across Dacca, and then, turning slowly, drops to earth. As the great silver and blue plane touches down, trailing a spume of dust, a single gasp surges through the Bengalis waiting on the tarmac. "Our beloved leader is here. Our beloved leader is here," a voice, a voice on the precipice of hysteria, announces over the public address system. "He is back after ten months. All the friends and soldiers and workers, we appeal to you to be disciplined. Our beloved leader is here."

The people begin sliding past the cordon of soldiers, and these youths of sixteen or seventeen are themselves so awed, so overcome, that they turn dumfounded toward the plane. He is there. He is there in the doorway. *"We appeal to you to be disciplined."* Hundreds of Bengalis rush through the cordon. They must touch him. They must get to him, touch him. *"Do not rush.* Do not rush. We appeal to you to be *disciplined."* The ministers and high officials leave their places along the red carpet and push toward the gangplank. *". . . to be disciplined. Our beloved . . ."* They must touch him. The ministers hurry up the staircase and garland Sheik Mujib. For a moment he cries, and then he controls himself and walks down to the ground and is engulfed in his welcomers.

The fifty-one-year-old Sheik is tall, almost six feet tall, far taller than most Bengalis, and his head and shoulders move above the crowd, a face transfigured, beyond mere emotion, the gray hair and moustache and full features quintessentially Bengali. The Bengali soldiers are trying to forge a pathway for him, screaming, begging, beseeching people to move, to get back, give *Bangabandhu* some room, don't let him be trampled. *". . . rush. Do not rush . . ."* He is a presence above them, above the day, greeting his troops and the diplomats and then, still walking slowly, moving to the truck. Students and cameramen and onlookers, who have no business there, are climbing onto the truck, jumping on the hood, and the student leaders push them off, bending their fingers and arms until they drop to the ground.

The Sheik and the ministers and the student leaders are on the truck, and the motorcade moves past the cement walls of the airport, and now finally the Sheik sees his people. They are all Bangladesh has, all that Bangladesh can give him, and his face begins to come alive. The two-and-one-half mile route from the airport to the racecourse is a narrow tunnel through rickshaw wallahs, farmers, mill workers, peddlers, business people; students and young people line the route, this their last certain act of devotion. Sheik Mujib merges with the thirty others in the truck, and the truck merges with the soldiers who walk beside and the youths who clap and dance their way down the road, and the procession merges with the people who fall in behind, until the Sheik and the truck and the procession and the people all are one organism.

"Joi Bangla. Joi Bangla. Joi Bangla." Victory to Bengal. Victory to Bengal. Victory to Bengal. *"Sheik Mujib Zindabad. Sheik Mujib Zindabad."* Long live Sheik Mujib. Long live Sheik Mujib. Thousands and thousands of young brown faces, thousands of them. Behind the procession a gigantic plume of dust rises up off the road, a hundred feet up into the air, diffusing into a grayish mist. The people throw garlands and white pigeons and rose petals, and the hood of the truck is soon a mass of flowers, a nest for the pigeons. Each moment the Sheik's face becomes more vivid, more graced with the emotions of the day, and the people stand there crying with their joy. They want nothing, these people, these hundreds and thousands of people. Give them work to earn enough for rice and a little fish twice a day; that is enough, that is everything, that is all they ask of their Sheik.

Even now they shield him, their bodies shield him. He cannot see that the *bustees*, the crude bamboo huts that once lay along the road, are no longer there, burned down by the Pakistanis. He cannot see the gray MPA hostel that the Pakistanis used as a prison and torturing center, or the private house behind where they slaughtered Bengalis and no one dares venture even now.

Adur Rahman stands along the road, his tears turning to laughter, his laughter again to tears. During the troubles the Pakistanis picked him up and took him to the MPA hostel. They stripped him naked, hung him from the ceiling, and beat him with a rubber hose and cane until blood came from his nose. They tortured him in ways he will not talk about. For long afterward he thought it better far to be dead than to have such memories. But today it is all gone; he is filled with joy.

The crowd presses around the truck like fish swirling in a net, and their joy, their emotion, becomes almost a physical presence. For two and one half hours the truck has passed along the road, through the people, and now, turning into the great open field at the racecourse—no, it is not possible, people, people, back into the haze of the afternoon sun, the earth is nothing but people, they hang off trees, the fruit of the trees, pressing toward him, a million people pressing toward him. Sheik Mujib cries. He takes his white handkerchief from his pocket, and he stands there, the tears washing down his face, smiling and crying, the tears streaming down.

The truck inches onto the field. They are no longer simply a crowd. There are currents, waves, ripples that pass through them, and in the distance they are like an immense field of jute swaying in the warm winter sun. The truck cannot move quite up to the speaker's platform, and the Sheik must get down and walk the last few yards. They had seemed so gentle, so tranquil in their movements, so like a field of jute, but now that mass is pressing upon him, trying to touch him, grabbing at him. They thrust and shove toward him; he appears half dazed, he is jostled and elbowed and pushed; if he should stumble, God knows what would happen. His protectors claw and pummel a path for him, dragging people off the staircase, and half lift the Sheik up to the speaker's platform.

He stands before them now. They have been waiting, many of them for eight hours or more sitting in the sun without food or drink, and they cheer, they shout *"Joi Bangla, Joi Bangla"*; shouts beyond exaltation, deep groaning shouts that burst out of them as if they were ridding themselves of tumors. The shouts, the *Joi Banglas,* surge forward, from behind him, to the sides, rolling up to the platform and beyond. He stands wiping his tears with his fine long hand, scarcely moving, scarcely able to move. While he stands there many of the dignitaries surround a young woman volunteer who has brought a thermos of ice water. They squabble, fighting for a cup of water, two, three cups more, before they walk away, satiated.

"Brothers and sisters of Bangladesh," he begins. "On this auspicious day I remember at the outset those farmers, laborers, students, and intellectuals who embraced martyrdom in the hands of the barbarous Pakistani Army during the last nine months." His voice is an elemental force, like a tidal wave or an earth tremor; a voice that comes not from him but up from the ground; a voice that embodies all the pain, the anguish, the joy; a voice that has claws to it, his every word tearing at the air. "I pray for the salvation of their departed souls. My lifelong desire is fulfilled today. My Golden Bengal is today an independent and sovereign state."

He is speaking extemporaneously but each sentence, each thought, has rhythm and pace, the emotions of each phrase, each idea, rising above what he said before, its excesses, its emotions made tolerable only by what has come before. The young Awami League leaders stand behind Sheik Mujib, and although they are preventing thousands of Bengalis from seeing their leader, they refuse to move. They stand proudly, arms folded, finally sitting down when the speech is more than half over.

"We will not cry anymore," Sheik Mujib says, and as he speaks he is crying. "'Oh my Golden Bengal I love thee,' Kabiguru Rabindranath Tagore once said, 'Oh mother Bengal you have created seventy million Bengalis but you have not allowed them to grow to manhood.' But this is no longer true of the people of Bangladesh. The people of Bangladesh have proved to the world that they are a nation of heroes."

He carries his people far beyond their troubles; he charges the whole struggle with meaning, and as he takes his people from emotion to emotion, memory to memory, hope to hope, he says what has to be said. He has been in prison during nine months of the most momentous changes a nation could go through, and yet he is able to speak as if he had never left the country, as if he had led the liberation struggle with his language and a gun. He does not have to ask his advisers what to say this day. He knows. He quiets the hatred against the Biharis by asking the non-Bengalis to become true Bengalis. He knows his country needs massive aid from abroad and he calls for that aid with pride.

The afternoon is ending in a purple haze, and the setting sun turns his face golden. The people are quieting now, swaying to the rhythms of his words, and now his speech crescendoes. He drives his emotions, his language, up to the edge of uncontrol.

"The new Bengal will grow up. The people of Bangladesh will be jubilant, happy, free, and will have enough to eat. That is the goal of my life. Today I appeal to Allah to give me that blessing.

"My dear brothers, there are still 400,000 Bengalis in West Pakistan.

"My dear brothers, I know the conspiracy has not yet ended.

"Bengalis, be vigilant against conspiracy.

"I cannot speak anymore. Let me pray."

Sheik Mujib leads the people in prayer, and then he shouts, "Joi Bangla."

"Joi Bangla."

"Joi Bangla."

"Joi Bangla."

"Joi Bangla."

"Joi Bangla."

"Bangladesh omor." Bangladesh is immortal.

"Hoi. Hoi." It is. It is.

"Bangladesh omor."

"Hoi. Hoi."

"Bangladesh omor."

"Hoi. Hoi."

"Shaheed smriti." To the memory of the martyrs.

"Omor Hoak." Let it be immortal.

"Shaheed smriti."

"Omor hoak."

"Shaheed smriti."

"Omor hoak."

Sheik Mujib sits down on the floor of the platform and his friends come and surround him and look at him with great love. They fan him with their hands. "Oh my God, oh my God, oh my God," he cries. All the emotion has drained out of him and out of the day, and as the sun sets behind a distant mosque, the people pass from the racecourse, pass quietly away, fading into the dust.

II

There would be no more days like that one. There would be speeches and ceremonies, many of them, but they would not be the same. Two days later Sheik Mujib took office as Prime Minister. He arrived at Banga Bhavan, Bengal House, wearing the same traditional costume of wide white pants, billowing shirt, and sleeveless vest that he had worn on his return to Bangladesh. On this day, however, he traveled not in an open truck but in a closed black Mercedes. As he walked into the main lounge, an elegant room rich with chandeliers, he passed among diplomats, high officials and their brilliantly dressed wives. Awami League leaders, army officers, and an occasional petty bureaucrat. The audience applauded with the appropriate mixture of fervor and restraint, and the dignitaries, understanding the substance of power and the rituals of its celebration, listened with rapt attention as Sheik Mujib took his oath.

The new Prime Minister and his government confronted problems of almost unprecedented magnitude. The conflict had so thoroughly devastated Bangladesh that it would take two to three billion dollars just to repair the damage, the largest job of rehabilitation since the days of the Marshall Plan after World War II. Relief ships could not even come into the port of Chittagong because mines and sunken ships still blocked the harbor. The rail line between Chittagong and Dacca, the great passageway for goods and materials, was not yet open. The farmers needed seed to plant their annual crop of wet rice if the people of Bangladesh were not to be dependent on relief food for another year. Before the monsoon, five months away, there would have to be permanent bridges on the roads; the temporary structures would wash away, leaving Bangladesh a chain of isolated islands. Tons and tons of food had to be stored in warehouses across the country by then, or the people would go hungry.

Sheik Mujib counted on help from the developed world as well as on the nearly unanimous support of the Bengali people. The millions of refugees who had fled across the border or to remote villages did not wait for promises of sustenance or seed before they began returning home, and the roads and rivers were full of people. When the villagers reached their homes, as often as not they found that the Pakistanis had burned them and the monsoon rains had melted down the mud walls.

The villages had almost no seed or bullock or money, and when a rumor spread across Bangladesh that all those who had filled out the green application cards at the Labor Exchange would be given work, the people left their villages by the tens of thousands. The officials at the various Labor Exchanges told them that there was no work, but the villagers did not believe them, and they came, five, six, then ten thousand a day, to Dacca alone. Their *lungis* and bewildered faces set them apart from the people of the city, and once they had their green cards, they hurried out of Dacca.

The government seemed almost paralyzed. East Pakistan had been a provincial government. Now, with the West Pakistani bureaucrats gone, with many of the Bengali officers dead and those who remained alive suspect for remaining alive, and with Bihari clerks and minor officials afraid to come to their offices, this same provincial government was required to administer the affairs of what had become the world's eighth largest nation. Those administrators who had remained in the country during the liberation struggle were not willing to risk their positions by making decisions. They merely shuffled papers and passed memos up to the highest levels of government. The cabinet ministers ended up dealing with matters that clerks should have handled. They worried about questions of visas and protocol. They named a national flower, a national bird, and a national marching song. They simply had no idea, no sense of the size of Bangladesh's problems. At the present rate, the population would double in twenty-three years, growing from 75 million to 150 million in what was already one of the world's most densely populated countries. Zahur Ahmed Chowdhury, then Minister of Labor, Health and Family Planning, was said to have three wives and twenty-two children. When the government announced its first list of priorities, birth control ranked twentieth.

Favor seekers besieged the government. The poor of the countryside and of the cities asked very little, but many Bengalis thought they should be able to cash in their anguish for businesses belonging to Biharis and West Pakistanis, for import licenses, for teaching posts, for government sinecures. A great many administrative vacancies did exist, and Awami Leaguers began acquiring them. Some of them were grasping men, puffed up with their new importance. There would be money now, bridge contracts, road contracts, positions managing the industries the government would be taking over, and they and their friends were available. They would do favors, certainly, but for a price. Many of these bureaucrats did not even come to work regularly, and Sheik Mujib had to begin making spot checks on offices to see just which officials were at their desks.

The Prime Minister worked from early morning until after ten at night, but he spent hours of his time more like a *sirdar,* a village chieftain, than the Prime Minister of a great country. He loved his people. He felt a great need to greet delegation after delegation of students, soldiers, villagers, anyone who did not have anything critical to say. He listened to politicians and business people and bureaucrats, listened as they asked for favors or proffered advice, listened because he thought himself the physical embodiment of the nation, listened because it was his job to listen. His decisions often depended on who had talked to him last, and that was much the way the Pakistanis had run the government.

Sheik Mujib still could charge the symbols and rhetoric of the liberation struggle with meaning and intensity, and that was the function he preferred above all others. He flew to Calcutta, 150 miles from Dacca, and the people came out to see him by the millions. Sheik Mujib had become a symbol of *their* identity as Bengalis; West Bengali intellectuals had, in fact, begun to accuse India of exploiting West Bengal, just as a decade before the Bengalis of the East had accused the Pakistanis.

Sheik Mujib flew to Moscow. Here he signed trade agreements that saddled Bangladesh with further economic burdens. He had little choice because the Western countries were not sending anywhere near the amount of aid he had expected, and the Western voluntary agencies were merely dabbling in relief. They had come, Uncle Erik's Children Help, the Red Cross, Save the Children Fund, the United Nations, OXFAM, Ramakrishna, Seventh-Day Adventists, Mennonites, CARE, fifty some organizations in all. Over seventy Red Cross workers stayed in the Intercontinental hotel, a spendid high-rise with $20 rooms, cheeseburgers, and French cuisine. Traveling from famine to famine, holocaust to holocaust, from Peru to Biafra to Bangladesh, these relief workers were not that much different from diplomats or foreign correspondents. They brought in all the wrong things: 250,000 sets of long underwear from Germany, baby food, canned herring, heavy blankets, used Western clothing.

Bangladesh needed bulldozers, trucks, bridgebuilding equipment, boats. Bangladesh needed money, money to pay workers to unload goods or to repair roads, money to buy what they needed as they needed it.

The government was doing almost nothing to repair the damaged roads and bridges, and the villagers were trying to fix them with their bare hands. Even by March work had still not begun clearing the Chittagong harbor, and across Bangladesh the soldiers and Mukti Bahini were doing almost no rehabilitation work. The soldiers themselves, particularly the younger officers, had begun to speak openly against the Indian Army that in December had defeated the Pak forces and freed Bangladesh. Since then Mrs. Gandhi had proven extremely generous in her aid. But the soldiers knew by now that the Indian Army had carried the Pakistani arms back over the border, leaving the Bangladesh Army as little more than a police force. The Indians sent truckload after truckload of mill equipment back over the border too, and much of the jute crop as well.

In many areas the Mukti Bahini were maintaining law and order, but in other areas guerrillas merely roamed the countryside. They had nothing really to tell the villagers—no guidance, no direction—but the villagers deferred to them nonetheless. In certain districts the Mukti went out at night hunting down leftist revolutionaries who believed in an ideology similar to that of the pro-Maoist Naxalites of West Bengal. Some of these groups had sided with the Pakistanis during the struggle, but some of them had fought for the liberation of Bangladesh, and often the Mukti Bahini did not make a distinction between the two. The Maoists gathered arms and waited. They believed that soon the people would turn to them. A few of the Mukti Bahini did join with the Maoists, but only a few. Most could find nothing for their idealism and joy and dedication to build on. Their hatreds, their youthful arrogance did build day by day. The worst were those who had done the least during the time of trouble, and the worst lived in Dacca. The only direction they had was the direction of their hatred, and that was toward the Biharis in their communities of Mirpur and Mohammedpur on the outskirts of Dacca.

At the end of January major fighting broke out in Mirpur, and the grayish smoke of shelling hovered over the city. The government began moving out busloads of Biharis, sending them off with no more than a bundle of belongings, taking the women and children to refugee camps, the men to prison. Relief workers and journalists were not allowed to enter Mirpur because the government said that in certain sections the Biharis had built bunkers and other fortifications and were planning a final resistance. Several journalists did manage, finally, to get into the city, and they found that this was not true. The Biharis had given up their weapons. They were afraid, and they had little food or water.

It was not the Bengali people, the mourners, the stricken, who were treating the Biharis so, but the highest authority of the state. The *jawans* and police must have understood this, accepted it as their license, for the EBR officers and police officials lost control of their men. In Mirpur and Mohammedpur they could not stop them from looting; they could threaten and command, but the looting did not stop.

The people of the cities were growing fearful again. Before they had feared the Pak Army; now they were not sure just what they had to fear. They did fear the bands of *dacoits*, who before had robbed with daggers and *daos*, and now entered homes carrying submachine guns and automatic rifles. They did fear those Mukti Bahini who were hijacking cars at will. Most of all, though, they feared the unknown, the future. Many of those who had been the most critical of the Awami League government had now grown quiet, and those who at first had been euphoric now expressed doubts.

By spring the people were coming, thousands of them a day, to live in Dacca, and their crude shacks spread across the landscape, along railway tracks and roads, wherever they could find a bit of space. They were always there waiting in front of Sheik Mujib's house in Dhanmandi: villagers waiting bullock and seed standing around smoking the tiny cigars called *bidis*; distant relatives and friends more distant still from the Sheik's home district of Faridpur ready to ask one favor or another; students with petitions and poems for *Bangagandhu;* union delegations demanding higher wages. When Sheik Mujib left his house he might say a few words to them and they would shout, "*Joi Bangla.*" Then he would step into the back seat of the Mercedes, and the car would rush into the city, past the ornamental lake near Dhanmandi where every day more of the homeless built their *bustees* until soon it seemed their bamboo shacks would cover the very road on which the Prime Minister traveled.* At the gate to President's House, across the street from a field where trenches full of human bone had been found, the chauffeur would nudge the car through a crowd of laborers, rickshaw drivers, Indian *jawans*, and villagers. Once inside the compound, Sheik Mujib would get out and hurry into his office.

Outside the curtained, glass doors to the Prime Minister's office, the petitioners waited, ten, fifteen, twenty of them. They all had what they considered reasons of the utmost urgency why they should see the Prime Minister, and they whispered their requests into the ears of the men who controlled Sheik Mujib's schedule. These men who surrounded the Sheik were the sort who always gravitate toward power, *Mosahab* they are called in Bengali, yes-men, their hands as smooth as satin, their language as smooth as their hands. They were just where they wanted to be, and they were marvelously adept at turning away those petitioners whom they did not want the Prime Minister to see.

One afternoon after Sheik Mujib had been Prime Minister for a month, he sat on a white couch in his long, high-ceilinged office talking to a journalist. "Oh, yes, my boy," he said, "my people have fought empty-handed against the mighty forces of Pakistan." He spoke scarcely above a whisper, the words sighing out of him:

"My people are a brave people, brave not only now but brave for hundreds of years. My people know how to die."

Sheik Mujib lived on pure and perfect emotion. He drew his listener into him, into his Bangladesh, and by fiat, by his mere presence in the room, the listener became a part of Sheik Mujib's Bangladesh. To discuss the realities of the country would be to sully the emotion, and the journalist continued talking in tones of reverence and awe.

"What amazes me," the journalist said, "is that when you came back, you had been in prison for nine months, and yet you knew exactly what to say."

"I know them. They know me. I love them. I love my people and my people love me. And I know their minds and I know their courage. And I know their sincerity, and they know my sincerity. And whatever I say the people will do. There is absolutely no question about it."

His every word embraced his people, and he insisted on their embrace. His feelings went beyond arrogance or pride. This was a vision, a vision that sustained and hurt him, and he was true to it, for he carried his emotion out before him like an open wound.

"What about the situation now? the journalist asked finally. "I see the Labor Exchange. Every day there are more people coming, people by the thousands looking for work."

"It's a serious problem, the unemployment problem," Sheik Mujib said. "Our factories aren't working. I have to arrange it. I can make new industries."

"But some of your most dedicated workers are growing pessimistic," the journalist said. "They say that opportunists are coming in and taking positions. They say that enough is not being done."

"Nothing of the kind. Nobody is coming in," Sheik Mujib answered in a voice touched with irritation. He could brook no criticism. It hurt him so. "I have my own program I am following. I am a clear-cut man. I believe in a secular state. I believe in socialism. The whole problem is that all the workers, all the students have lost something."

"Then it's just a normal reaction?"

"No reaction. No reaction. Don't say it's a reaction. One or two persons may say things. But there are so many people here in Bangladesh who joined with Yahya Khan, the Razakars. These people might talk, but the people who have sacrificed, the people who have suffered, they know how they have achieved their independence. And they love me, no doubt."

Sheik Mujib ended the interview abruptly. There were some students among those waiting to see the Prime Minister, but many of the young people were growing weary of Sheik Mujib and his rhetoric, and they had begun to doubt him. Sheik Mujib embodied Bangladesh and Bengal and the Bengalis, and to doubt him was to doubt themselves, their whole struggle, and to be filled with self-loathing and despair.

Despite them and despite Sheik Mujib and his government, though, the life of Bangladesh, the life of the countryside, was reasserting itself. The villagers were rebuilding their homes and planting their fields. In the summer the great rains of the monsoon fell upon the land, covering the parched and fissioned earth, covering the crumbling bunkers of the Pak Army, covering what remained of the skeletons and the tank tracks and the other rubbish of war, covering all with a blanket of water, and, as it always did this time of year, *Sonar Bangla*, golden Bengal, appeared luxuriant and fertile and rich with promise.

APPALLING RISE IN MEDICAL CARE EXPENDITURES

Mr. BROCK. Mr. President, the appalling rise in medical care expenditures in the United States has drawn much attention in this session of Congress—Americans now spend close to $70 million per year, or some 7 percent of the gross national product, on health and health care. This is a larger commitment to health than is made by any other nation on earth. And, yet, far too many incidents are cited to illustrate that we are not doing enough to provide quality health care for all Americans.

---

* At the end of March, government trucks moved the 5,000 or so squatters from the park near Sheik Mujib's home to empty lots five miles from Dacca.

Several of the current proposals in the Senate to rectify this situation approach this problem with a monolithic, totally Government-controlled program which would dismember the third largest industry in the country and could leave the health consumer in a far worse position than he faces today. In shaping new Federal programs we must make every effort to preserve the benefits which come from a pluralistic, competitive approach to modern health care.

Even without all-inclusive legislation now before Congress, the health care industry is making significant strides to improve health delivery and reduce the cost of care to the consumer. While certainly much remains to be done, I invite to the attention of Senators to the July announcement by the Hospital Corp. of America of Nashville, Tenn. HCA announced major reductions in room rates at the North Shore Hospital in Miami, Fla. The reduction will amount to an across the board cut for room and board of 10 percent and is coupled with new plans for a $3 million modernization program to further improve patient care and operating efficiency at the North Shore facility.

Mr. President, I believe this reduction serves notice that America's health care industry can be competitive while preserving quality care. We in Congress must stimulate such competition by urging the use of such cost-cutting techniques as a centralized purchasing, better coordination, specialized facilities among hospitals within the same community, and more efficient utilization of professional staffs and facilities.

I congratulate the Hospital Corp. for this reduction. I hope that other hospitals will follow its lead.

Mr. President, I ask unanimous consent that the text of the reduction announcement be printed in the Record.

There being no objection, the announcement was ordered to be printed in the Record, as follows:

Announcement

Miami, Fla., July 26.—North Shore Hospital, a non-profit 270-bed facility managed by Hospital Corporation of America, today announced major reductions in room rates that will save patients an aggregate of approximately a half-million dollars annually.

Officials said the reductions would cut some room rates by as much as $11 per day. and would reduce total room and board costs to the patient by approximately 10 per cent.

Dr. Fred Gunion, president of the North Shore Board of Trustees, said the reductions resulted from the greater economies and improved service achieved under Hospital Corporation management of the facility and were accomplished "despite the nationwide trend toward spiralling health care costs."

The health care industry drew special attention in the Phase II Economic Program because costs to the consumer were rising at a rate substantially greater than the overall rate of inflation.

HCA began operating the Miami facility under a management contract one year ago, reorganized its operation, and extensively expanded its services.

HCA President John A. Hill said, "We know of no other major hospitals that are even considering reductions in charges, and most are seeking approval for increases. This just illustrates what can be done about the rising cost of hospitalization in this country." Hill serves as a member of President Nixon's Health Care Advisory Committee.

It was also announced today that HCA would begin immediately a $3 million modernization program at the Miami hospital that will further improve patient care and operating efficiency.

Hill said, "It normally takes two years for us to turn around the operations of a hospital we acquire or manage, and to fully realize the benefits of our management systems. What we are announcing here today is the result of only one year of management of this hospital."

Reductions range from $11 on highest price private rooms, from $75 per day to $64 per day, to $6 on four-bed rooms, cut from $42 to $36. Compared with figures in a recent Miami Herald Survey of area hospital charges, North Shore is one of the lowest in total patient daily room rates, even before these reductions.

HCA did not increase rates when it assumed responsibility for managing the facility last year. Slightly adjusted radiology and physical therapy charges were the only pricing change instituted by the corporation, and these are more than offset by the room rate reductions announced today. Hill said that no charges are being increased.

Gunion explained that "patient room rates are the part of the hospital bill which most patients pay out of their own pockets. Most other hospital charges are fully covered by some form of insurance or other reimbursement program, so we selected room rates as the area for reduction most beneficial to the average patient."

Hill said that virtually all of the Company's 40 hospitals have rates "at least competitive with other hospitals in their areas."

"We are constantly seeking ways to reduce operating costs while improving patient care," Hill said, "and to pass these savings along to our patients."

HCA owns most of its hospitals and has built 14 of them, with 12 more under construction now. The firm is the largest in its field, with more than 6,000 beds in operation in 12 states. Hill said the Company manages the other hospitals for other owners, and is actively seeking more such situations.

"We believe this achievement proves what we have been saying all along." Hill continued, "that our company can manage hospitals effectively, can reduce the rate of inflation at least in our own operations, while still producing a reasonable profit margin."

Major cost savings were achieved at North Shore through improvements in food service operations, business office operations, and housekeeping, developing better cost and billing controls in several departments, and in general management of the facility which resulted in major reductions in personnel costs.

In addition to these changes, which also improved patient care and services, North Shore Hospital arranged for 24-hour professional coverage of the emergency room, instituted pharmacy procedures including a unit-dose system and patient profile system, negotiated contractual arrangements for anesthesia, installed telemetry systems for cardiac patients permitting constant monitoring at a central nurses' station, added new, specialized X-ray equipment, developed operating manuals for all departments, installed an EEG department, and established a program to improve the effectiveness of regular emergency procedures drills.

North Shore Board President Gunion gave full credit for the cost reductions to "HCA administration and systems." Gunion said. "It is really amazing that we are able to cut rates when most American hospitals, including several in Miami, are increasing charges to patients."

Members of the Board attended a press conference here today at which the rate reductions and expansion program were announced. Others present include Dr. Thomas F. First, Vice Chairman and Chief Medical Officer of HCA, Robert P. Brueck, Senior Vice President, Robert Crosby, Regional Vice President and former administrator of the hospital, and E. A. Goodwin, administrator of North Shore. A special guest was Dr. Norman West, President of the Federation of American Hospitals.

Members of the Board of Trustees of North Shore Hospital are: Dr. Fred A. Gunion. President, Dr. Robert N. Lee, Vice President, Dr. George L. Richards, Secretary. Dr. P. J. Hanson, Dr. Harris E. Cuckku, Dr. Ludwig Ungaro, Dr. H. Macil, White, Dr. John R. Hilsenbeck, Dr. Charles Biggane, Dr. C. L. Wilson, and Dr. James H. Stage, President of the medical staff.

Included in the planned modernization and expansion of the hospital announced today are completion of one floor for an additional 89 beds, 38 of which will be available in November, central air conditioning enlarging, complete carpeting of the facility, enlarging obstetrical unit, enlarging pharmacy and adding doctors' lounge and other new areas; plus general renovation of the entire building. Planned by the Nashville architectural firm of Gresham and Smith, the construction program is scheduled in such a way that a minimum of 270 beds will be maintained in operation throughout the building process.

The project involved $2.8 million in construction and $300,000 in new equipment.

HCA is headquartered in Nashville, Tenn., where it was formed less than four years ago. Its stock is listed on the New York Stock Exchange.

SUCCESS FOR METHADONE PROGRAM

Mr. JAVITS. Mr. President, as the author of the "Drug Addict Treatment and Rehabilitation Act of 1971" (S. 2840), a bill designed to promote the establishment of comprehensive State and local methadone maintenance programs, I am pleased to commend to the attention of Senators the editorial entitled "Cutting Addict Crime," published in today's New York Times.

The Senate yesterday passed an admirable bill on this subject, H.R. 9323, I have long urged the establishment of more methadone maintenance programs, a proven treatment modality, in order to combat the scourge of heroin abuse which is a plague on our society. The editorial cites a New York City report which gives encouraging evidence that voluntary entrance into New York City's methadone maintenance program materially reduces drug addict crime. For those drug addicts in treatment for 13 months or more, patients who had at least two arrests in the year prior to their admission into the program, there was a 96-percent decrease in arrests.

I ask unanimous consent that the editorial be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Cutting Addict Crime

Encouraging evidence that voluntary entrance into the city's methadone maintenance program by drug addicts materially cuts their tendency to commit crimes is provided in a report to Mayor Lindsay and his Narcotic Control Council from Health Services Administrator Gordon Chase.

While the study of criminal arrest rates is based on random sampling of the nearly 10,000 addicts in the city's methadone program, Mr. Chase considers it "one of the largest documented arrest studies ever conducted by an addict treatment program." Made in cooperation with the Police Department, the study shows a dramatic decline in the arrest rates of addicts. An accompanying graph depicts the figures for male patients who had had two or more arrests in the year prior to their admission into the city's methadone program. Those in treatment for thirteen months or more, a sizable group, showed an astonishing 96 per cent decrease in arrests. For those newer in the program, the drop in arrests is less spectacular but still very substantial. (Graph not printed in the Record.)

The relationship between arrests and crimes has to be considered simple and direct; thus, the study's revelation that addicts in methadone treatment commit far fewer crimes strongly implies that to expand methadone treatment programs is to make the city safer still.

Unquestionably, there is need for some caution. Methadone blocks an addict's craving for heroin and generally enables him to function productively in society, but it is nonetheless a potentially lethal drug that must be carefully administered by competent medical personnel. Sloppily run programs conducted by unscrupulous private physicians have resulted in an inexcusable diversion of methadone and turned it into a destructive article of illegal commerce on the streets.

The substitution of one addictive drug for another, methadone for heroin, can hardly be considered a wholly satisfactory response to the city's drug problem. Work must go forward, as it is, on the development of improved methadone and other narcotic antagonists less lethal to uninitiated users. Even more important is the task of weaning methadone addicts from this substitute drug and returning them to an altogether drug-free status.

But what the city's study of police records shows is a salutary impact for the existing methadone program. Society has an interest both in reclaiming its addict population, estimated at perhaps 150,000 persons in this city alone. It also has an interest in reducing the risk of criminal attack by drug-crazed addicts desperate for the next fix. The city's study of arrest rates for addicts in its methadone program argues strongly for that program's rapid expansion to include the thousands of addicts now on waiting lists and actively seeking help.

DENVER METRO TRANSIT—EXCITING THINGS HAVE BEEN HAPPENING

Mr. ALLOTT. Mr. President, since Denver Metro Transit took over the operation of the Denver Tramway Co., exciting things have been happening. Service has been improved. Ridership has sharply increased—which is just the opposite of what is happening in most American cities.

A concise, but interesting and factual story of the success of Denver Metro Transit is told in the August 1972, issue of Colorado Municipalities. The article is authored by Ed Ruetz, who, since he came to Colorado 12 years ago, has been in the forefront of the campaign to improve the transportation picture in Denver. Reutz is now director of Information Services of Denver Metro Transit. I commend this article to the Senate. It tells what can be done by efficient, effective transportation management.

Mr. President, I ask unanimous consent that Mr. Ruetz' article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DENVER METRO TRANSIT: SERVING 16.6 MILLION PASSENGERS ITS FIRST YEAR

(By Ed Ruetz)

"Denver Tramway says it may not be able to continue operations if transit union demands are too high," read headlines in the Denver Post and Rocky Mountain News in the winter of 1971. Indeed the Tramway, like many other privately-owned systems, found that hauling passengers for profit in a city that was fast becoming one of the most auto-oriented in the United States did not work. The company, in an attempt to conserve resources and maintain service on the more heavily-patronized lines, was caught in the classic transit industry spiral of decreasing service on marginal or unprofitable lines, reducing frequency and hours of service, outright abandonment of some lines, and raising fares. Each round of fare increases brought a mathematically-predictable decline in ridership.

Denver's Mayor and Council had been watching the situation in public transportation with great interest since early 1970. Also watching were the Department of Transportation's Urban Mass Transit Administration, the local news media and the more than 50,000 daily riders of the Tramway.

While the city and others were watching the decline of the public transit system, there was also a growing awareness in and out of government that transportation played a major role in the quality of the life-style of the community. The public transportation system, if properly exploited for its ability to move great numbers of people to and from the city center and to outlying locations, could have a major impact on such problems as air pollution and the inordinate amount of land that is turned over to the movement and storage of automobiles. These considerations as well as those involving the desirability of providing transportation for those citizens, who, for whatever reason, did not have an automobile, went into the decision by the city to approach the Tramway Company about a sale of the system to the city.

A bond election for $4 million to provide the city's share of funds for a purchase of the system was first defeated in September of 1970, but by November, when resubmitted to the voters, it won overwhelming approval with 76 percent voting in favor of city ownership.

In a recent speech, Mayor William McNichols recounted the events leading up to the city acquisition of the system. He described the first meeting with officials of the Tramway as "very short". It has become apparent that condemnation proceedings would be needed to determine a price for the 214 buses and facilities at 350 South Santa Fe Drive in Denver. With condemnation proceedings launched, April 18, 1971 was set as the date for the takeover of the system. It was in this takeover that Denver met a problem now confronting many other cities faced with the necessity of keeping the transit system in operation—who is going to manage and operate it? A Cincinnati-based firm, ATE Management & Services, which had gained expertise in the operation of publicly-owned transit systems, was chosen from among four competitors. The Mayor and the Council reached a consensus that if the city was to run the system, it would be run well and not on a bare-bones, crisis basis. ATE sent Houston P. Ishmael to Denver to operate what had been the Denver Tramway. Ishmael brought with him a staff dedicated to the proposition that the advantages of the transit system must be sold to the community, and in order to do that, the city must have a system that is a source of pride.

In the time that ATE has been responsible for the operation of public transportation in Denver, a significant change has taken place. What had a 15 percent annual decline in patronage on the Tramway had become a 20 percent gain on Denver Metro Transit. Coaches were now operating to more locations, in and out of Denver. The public was asked to pick a new color scheme for the coaches and suggestions on service improvements were earnestly solicited from the public. Attractive new "Board Here" signs with the Transit system's phone number included replaced the rather sterile "Bus Stop" signs which had dotted locations in the city since 1928.

Service in suburban communities was expanded on a contract basis since the Denver City Charter prohibits the extension of city services to outlying communities unless contracted for. The formula worked out by ATE provides credits to the suburban communities for fares originated in those communities. In the first round of adjustments for the suburban service, Denver Metro Transit refunded some $40,000 to the suburbs because of the higher-than-expected patronage coming from them.

The improvements in the Denver system have drawn national attention. While most transit systems are attempting to halt the decline in usage, the passenger gains in Denver appear dramatic. While some of the initial success of city operation of the system has been credited to Coloradans who believe public transit is a major tool in solving many environmental problems, the gains of the past year must also be credited to a city and transit system that are trying hard to respond to the needs of the citizens of the community. This first year of city operation saw 16.6 million passengers use Denver Metro Transit, that's more than 1.1 million over the previous year. ATE is far from satisfied however, Marketing Director Peter C. Weiglin says, "We've managed to get the easy ones, now we're after the hard ones, those who must be shown that we do offer an attractive alternative to the automobile."

OIL COMPANIES PAID 6.7 PERCENT IN INCOME TAXES IN 1971

Mr. PROXMIRE. Mr. President, according to official records at the Securities and Exchange Commission, the 18 largest oil companies paid a grand total of 6.7 percent of their net income in Federal income taxes. This is significantly less than they paid in 1970 or in the few years prior to the passage of the 1969 Tax Reform Act. In 1970, after restating their income, these companies paid 9.1 percent of their income in Federal income taxes. In terms of actual money paid to the Federal Treasury, this means these 18 oil companies paid $114,672,000 less in 1971 than they did in 1970.

If the public cry for tax reform means anything, it means that situations like this cannot continue to exist. When companies earning over $10 billion a year pay only 6.7 percent of their actual net income in Federal income taxes and individuals earning just over $10,000 a year who file a joint return have to pay 32 percent, it is clear that our tax code is not equitable.

I realize that the petroleum industry's

standard defense is "Yes, admittedly, we pay less in Federal income taxes, but we pay more in foreign and local taxes." That is no reason why the Federal taxpayers should have to subsidize exploration in the Middle East. Why should the American taxpayer have to subsidize exploration for cheap Middle Eastern crude which is too insecure, according to the Government, for him to use? And even if we add the foreign and State and Federal taxes together, the total is still less than many companies have to pay just for Federal income taxes.

Mr. President, these figures are a clear example of the need for tax reform. I ask unanimous consent that the analysis and table from U.S. Oil Week be printed in the RECORD.

There being no objection, the analysis and table were ordered to be printed in the RECORD, as follows:

MAJOR OIL COMPANY FEDERAL INCOME TAXES FALL

Despite the small cut in the oil depletion allowance, the percentage of federal income taxes paid by major oil companies fell last year.

A survey of federal taxes, buried in the annals of the Securities and Exchange Commission, showed 18 top companies paid these amounts and the percentage of their net income they represent:

	Tax	Percent
Standard (New Jersey)	$211,542,000	7.7
Texaco	30,000,000	2.3
Gulf	31,062,000	2.3
Mobil	85,700,000	7.4
Standard (California)	14,000,000	1.6
Standard (Indiana)	63,462,000	14.5
Shell	43,738,000	14.9
Arco	11,115,000	3.8
Phillips	32,734,000	15.0
Sun	41,081,000	17.4
Union (California)	11,750	7.9
Amerada Hess	22,552,000	9.3
Getty	31,585,000	15.1
Conoco	6,240,000	2.1
Cities Service	9,934,000	8.4
Marathon	14,000	6.1
Standard (Ohio)	1,245,000	2.0
Ashland	23,954,000	46.3

Not only the percentage paid but the actual tax was lower than in 1970 in many cases.

A table showing profit and taxes for the past five years begins on page 3.

Figures for previous years have been radically revised from earlier figures given SEC possibly because of audits or changes in accounting provisions and methods.

Figures in this issue update substantially numbers in the Oct. 25, 1971 table published in U.S. Oil Week. But the October table shows tax and profit reports going back to 1962 that may have been revised.

Annual reports published for shareholders by many large oil companies show income taxes as vastly higher than the federal tax paid to the U.S.

The SEC allows refiners to lump together federal, state and foreign taxes along with sums set aside to pay taxes at a later date.

Thus the "provision for income tax" in annual reports can be totaled by refiner and other trade associations to give the impression the large companies are paying a high federal income tax.

But in the 10K reports filed at the SEC, the federal, foreign and state taxes are broken out.

Some companies don't even break out these figures in the 10K reports making it extremely difficult to come up with the figures in this table.

Often, companies with the lowest federal income taxes are the hardest to get the figure from.

SEC rules require publicly held firms to report their federal income taxes, but many resist.

U.S. Oil Week publishes these figures annually because of the significance given by marketers to low federal taxes of refining companies as compared with marketers not involved in crude oil production.

This year the figures taken on a new significance as federal tax avoidance becomes a national issue.

WHAT FIGURES SHOW

Curiously the figures show in many cases that the larger the company the smaller the tax percentage.

That's because the larger firms are involved abroad where royalties may sometimes be treated as federal income taxes paid to foreign governments thus becoming a tax credit against federal tax owed Uncle Sam.

Some of these revisions from previous years show important trends. Earlier after-tax figures showed Ashland Oil & Refining's after tax net growing in recent years, while revised figures show a steady drop.

By keeping concentrating on marketing and avoiding the spending to find and produce crude oil, especially abroad. Ashland has burdened itself with the highest tax percentages among large oil companies.

Ashland's poor performance is especially important to marketers because of its policy of supplying independent brand gasoline marketers.

Since Ashland has an unusually small branded marketing program, its name is not widely known across the nation.

But through supply or ownership Ashland has been the company with enough private label representation nationally to rank it high.

What fate lies ahead for Ashland now as it branded refiner competitors move quickly into the low-priced gasoline field?

Marathon, another big supplier of private branders, unlike Ashland has kept its federal income tax to an unusually low figure by investing heavily in crude oil production, particularly abroad.

But Marathon and Continental have suffered, the figures show, from north African governments taking a bigger bite out of crude oil profits abroad.

This bigger bite is called foreign income tax and thus keeps Marathon and Conoco domestic taxes low . . . and 2.1% respectively.

Another price conscious marketer, Amerada Hess, now benefits from the outstanding tax advantages of crude oil production at home and abroad.

Figures given to SEC show Hess 15.1% federal income tax, a much lower percentage than Hess Oil & Chemical paid before it was merged with the crude oil heavy Amerada Petroleum.

Ohio Standard's federal taxes were so low in 1970 that the after-tax profit was higher than before-tax profit.

Despite a net income of $65,848,000 that year, Sohio won a $6,918,000 credit from the Treasury Department.

One important consequence of federal oil tax policy is its effect on the alleged energy crisis.

Tax treatment of income earned abroad has encouraged the search for oil abroad at the expense of drilling at home.

The API last week said drilling to find oil and gas has fallen more than 50% in the past 15 years.

It may be that oil producers think the prospects for finding big pools of oil in the U.S. have waned.

If so it would strengthen marketer claims that more oil be imported from abroad where oil is plentiful instead of using up dwindling crude oil supplies at home.

THE TRAGEDY OF THE NATION'S CORRECTIONAL SYSTEM

Mr. BELLMON. Mr. President, September 9 marks the first anniversary of a recent great American tragedy. One year ago Saturday the inmates at New York's Attica Prison rioted and 43 people were killed, including 11 guards. The tragedy lies not just with Attica but with this Nation's correctional system.

As shocking as that incident was, the conditions that prevailed then in that prison and others still prevail today, despite the existence of several legislative proposals for penal reform.

Ben Bagdikian, of the Washington Post, observed that 8,000 Americans are sent to prisons and jails every day. Ninety-seven percent of them eventually return to society, and from 40 to 70 percent of them commit new crimes. He concluded that:

> If theirs is an average experience, they will, in addition to any genuine justice received, be forced into programs of psychological destruction; if they serve a sentence most of it will not be by decision of a judge acting under the Constitution but by a casual bureaucrat acting under no rules whatever; they will undergo a significant probability of forced homosexuality, and they will emerge from this experience a greater threat to society than when they went in.

Norman Carlson, the Director of the U.S. Bureau of Prisons, is of the opinion that—

> Anyone not a criminal will be one when he gets out of jail.

President Nixon has stated:

> No institution within our society has a record which presents such a conclusive case of failure as does our prison system.

Before Attica, on January 28, 1971, Senator SAXBE introduced S. 400, a bill which would establish a Criminal Justice Reform Administration in order to provide assistance to encourage States and localities to undertake comprehensive criminal justice reform. This bill, the Model Criminal Justice Reform Act, is still sitting in the Government Operations Committee.

My own bill, S. 662, introduced to the Senate on February 8, 1971, which would assist States and Federal institutions "in improving their penal and post adjudicatory programs," is still sitting in the Judiciary Committee.

Other significant penal reform measures were introduced after the Attica tragedy.

On October 20, 1971, Senator BURDICK introduced the "Offender Rehabilitation Act," S. 2732. Although this bill did not concern itself directly with prisons, it is concerned with allowing the ex-offender to rehabilitate himself. Specifically, any first offender—except murderers, rapists, and the like—who keeps himself within the law for a number of years after his release from the penitentiary will be able to ask for the nullification of his criminal record. This bill, if it becomes law, would become an important part of the rehabilitation process. A man's old record would not follow him around like a ghost. He will be able to get a job, vote, and serve on a jury just like any other citizen. The Subcommittee on National Penitentiaries has completed one series of hearings and revisions in the 11 months since this bill was introduced for our consideration.

Senator BAYH introduced the "Omnibus Correctional Reform Act" on November 22, 1971. His bill, S. 2894, would, "provide financal assistance for State and local small community-based correctional facilities; for the creation of innovative programs of vocational training, job placement, and on-the-job counseling to develop specialized curriculums; the training of educational personnel and the funding of research and demonstration projects, to provde financial assistance to encourage the States to adopt special protection services; to establish a Federal Corrections Institute." His bill still resides in the Subcommittee on National Penitentiaries.

Senator McCLELLAN sponsored S. 2939, on November 29, 1971, the "National Commission on Corrections," a bill which would review and study Federal, State, and local correctional systems, institutions, and programs for personnel qualifications, facilities, health, safety, employment training and counseling, meals, living conditions, family life, recreation, cultural and religious activities. This bill is still in the Subcommittee on National Penitentiaries.

Senator JAVITS proposed S. 3049, the "National Correctional Standards Act," on January 24 of this year. His bill would, "provide minimum standards in correction with certain Federal financial assistance to State and local correctional, penal and pretrial institutions and facilities." Hearings have begun in the Subcommittee on National Penitentiaries.

Senator PERCY sponsored S. 3185, the "Federal Corrections Reorganization Act," which would promote "more effective operations and management of the Federal corrections system by reorganizing certain functions and creating new organizations." The Subcommittee on Criminal Laws and Procedures.

In addition, there have been a host of other bills covering specialized areas of criminal justice, such as drugs, pretrial detention, and correctional staff training.

A year ago, I told this body that

> Prison riots are a blot on the fabric of our society . . . our prisons are severely lacking in the kind of activities to keep a prisoner suitably occupied. Training programs are inadequate and are not geared to real-life situations in business or industry. The term "corrections system" is a misnomer, because there is neither a system nor much correction.

A year has passed and still no legislation has been passed. Even the bills presently before the various subcommittees offer little more than "bandages" to modify or improve our present prison system. And even these bandages have not been made available for use.

A year ago, I told this body that,

> The Federal Government has both the resources and the responsibility to develop and support a correctional system that corrects instead of aggravating crime.

And I called for action "to correct the mistakes of the past and to lay the ground work for a better system of truly correcting those who are imprisoned for breaking the law."

Mr. President, I am sorry to say that these 12 months have been largely nonproductive so far as new legislation is concerned. Despite Attica and continuing similar incidents in our State and Federal prisons, prison reform still seems to have a very low priority with Congress. There have been no significant changes in prisons across the country. And only a very few experimental programs have come forth which try to achieve success in ways that are different from our old patterns of failure. Let me tell you about three such experimental programs.

First. The "Pennsylvania Project," funded by the Department of Labor, takes a randomly selected group of offenders and places them in an unlocked group living situation, and puts them through labor union training. During this period of time they earn full wages, pay taxes, pay for their room and board, and support their families.

Second. Under the California Probation Subsidy, the State gives the local units of government a certain amount of money for every offender placed on probation rather than in an institution. That money, in turn, is used for a program of intensive probation. This program saves California money, as well as providing the offender with a truly effective means of rehabilitation. This program is one of the programs California has instituted to save the State's taxpayers $200,000,000. California prisons and juvenile institutions are emptying, and crime has gone down.

Third. In Massachusetts, the director of juvenile corrections has dismantled all State juvenile institutions and has substituted group homes, intensive probation, and private treatment programs.

These three programs among others represent the direction corrections may take in order to stem the rising tide of crime. In the United States as a whole, crime is still high, many of these crimes being committed by bitter, unrehabilitated ex-convicts.

America gets back the people it sends to prison. We are not doing enough to assure that they are better citizens after prison than before.

Mr. President, I make no claim to be an authority as to the direction correctional reform must take. Based upon my experience as Governor, my reading of the crime statistics, and my observations as a Member of the Senate, I am convinced that Congress is not demonstrating proper concern. We simply are not acting in a timely way to prevent future Atticas. How many more riots must occur and how many more percentage points must our crime rate increase to motivate the Congress into action?

A new session of Congress will begin soon. As responsible representatives of the people of this Nation, I feel we cannot afford to waste another year as we have wasted a year since Attica. Correctional reform should be at the top of all priority lists for next year—perhaps there is still time to avoid future Atticas if we act without further delay.

ARMY SURVEILLANCE

Mr. NELSON. Mr. President, last week the Senator from North Carolina (Mr. ERVIN) released a staff report of the Constitutional Rights Subcommittee entitled "Army Surveillance—A Documentary Analysis." This report publicly reveals for the first time the shocking and extensive degree to which the U.S. Army has monitored the activities of ordinary citizens and civilian organizations and filed ths raw information away in thousands of files, dossiers, and computer data banks. Analyzing only a portion of the military's actual intelligence-gathering efforts and their data files, this report documents the Army's overzealous and dangerous invasion of first amendment rights of speech, assembly, religion, press, and petition, and the danger which these activities pose to the privacy and freedom of all citizens.

The report concluded that the Army's snooping was useful for "no legitimate—or even illegitimate—military purpose" in controlling civil disturbances. Still there appears to have been over 350 separate Army record centers containing files on over 100,000 civilians. Furthermore, these files contained raw data on the intimate private lives of law-abiding citizens gathered by a variety of dubious and covert means.

In the September 5, 1972, issue of the Evening Star and Daily News, James J. Kilpatrick summarized the staff report's analysis of the Army's civilian surveillance activities and raised the specter of George Orwell's 1984. More important, Mr. Kilpatrick framed a question and an answer which anyone concerned with maintaining individual liberties in this country must carefully ponder:

> How did this outrageous invasion of constitutional rights get started? It was for the best of motives: The Army wanted to prepare itself for the threat of internal revolution and major civil disorders. Then the cancer of bureaucracy went to work. People had to appear to be "doing something." Vast quantities of useless material piled up, and the technological wonders of computerized data processing did the rest.

The warning that erosions of individual liberties often begin in the most innocuous of ways has been sounded many times previously. Perhaps one of the more eloquent statements was made by Mr. Justice Sutherland in a dissenting opinion in the case of Associated Press against Labor Board, decided in 1937:

> Do the people of this land—in the providence of God, favored, as they sometimes boast, above all others in the plenitude of their liberties—desire to preserve those so carefully protected by the First Amendment: liberty of religious worship, freedom of speech and of the press, and the right as freemen peaceably to assemble and petition their government for a redress of grievances? If so, let them withstand all *beginnings* of encroachment. For the saddest epitaph which can be carved in memory of a vanished liberty is that it was lost because its possessors failed to stretch forth a saving hand while yet there was time.

The Constitutional Rights Subcommittee's staff report on Army surveillance of civilians and James J. Kilpatrick's column eloquently call attention to a most flagrant beginning of constitutional encroachment, I ask unanimous consent that the column entitled "Surveillance Report Has Orwellian Parallels," which was published in the Washington Evening Star and Daily News, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Evening Star and Daily News, Sept. 5, 1972]

SURVEILLANCE REPORT HAS ORWELLIAN PARALLELS

(By James J. Kilpatrick)

If it has been some time since you read "1984", let me recommend a return to George Orwell's classic; and then read a supplement to it. The supplement, published only a few days ago, is titled, "Army Surveillance of Civilians: A Documentary Analysis." We are not far from Orwell's bright cold day in April, when the clocks were striking thirteen.

This is a bone-chilling report, prepared for the Senate Subcommittee on Constitutional Rights under the direction of Chief Counsel L. Baskir. The document achieves dramatic impact by not being dramatic; it sounds a thundering warning without raising its voice. For many years, politically active Americans have been wondering: Were they suffering a kind of paranoia, or was Big Brother really watching them? Answer: He was watching.

The report covers some familiar ground, already traversed in hearings before Sen. Sam Ervin's subcommittee, but it contains much that is new. It transpired through the hearings last year that over a period of decades, going back at least to the time of Franklin Delano Roosevelt, the Army had been systematically gathering intelligence on civilians who might cause trouble. In the ensuing uproar, thousands of files and dossiers were destroyed, or so it was said, and orders went out to halt the surveillance.

Were the dossiers in fact destroyed? Has the surveillance ceased? Baskir leaves the questions unresolved. "It is unlikely," he says, "that we will ever know the extent to which the monitoring and the data banks have been cut back."

Baskir's report stops at Dec. 31, 1970. At that time, by his estimate, Army Intelligence "had reasonably current files on the political activities of at least 100,000 civilians unaffiliated with the armed forces." The Army then was maintaining more than 350 separate records centers. Some of these were enormous: Fourth Army Headquarters at Fort Sam Houston, Tex., had the equivalent of 120,000 file cards on "personalities of interest." At Fort McPherson, Ga., the Third Army had dossiers on 4,672 persons and 2,220 organizations.

Some of the most elaborately computerized files were maintained by the Continental Army Command, known as CONARC. At the press of a button, the computer could search through "2,269 pages of detailed summaries of the political beliefs and activities of nearly 5,500 persons." The information was known as "plink," computer shorthand for "personality link."

The plink on Subject No. 000001641, married female, Massachusetts, contained this derog info: "Has written a number of letters to U.S. Government officials, civil defense officials, and to newspapers. The letters are generally very critical of federal and local government because what she considers the futility of a civil defense program and refusal of countries to disarm."

The Army's dossiers, many of them drawn, like the foregoing plink, from FBI records, covered the whole landscape of political activity. The National Committee for a Sane Nuclear Policy, in one coding system, had Dossier No. ZA 00 90 26. The National States Rights Party was nearby: Dossier No. ZA 00 90 97.

Baskir's somber observation, in a concluding statement, evokes the Orwellian nightmare: "What separates military intelligence in the United States from its counterparts in totalitarian states," he says, "is not its capabilities, but its intentions." And he adds: "This may not wholly reassure many Americans."

How did this outrageous invasion of constitutional rights get started? It was for the best of motives: The Army wanted to prepare itself for the threat of internal revolution and major civil disorders. Then the cancer of bureaucracy went to work. People had to appear to be "doing something." Vast quantities of useless material piled up, and the technological wonders of computerized data processing did the rest.

Assuming that most of the dossiers have indeed been shredded, and most of the tapes wiped out, what is to prevent a recurrence of such surveillance in the future? That practical question, says Baskir, "remains to be considered." Thus ends his report, and we are left to wonder, to go back to Orwell, when our clocks will start striking.

PROTECTION OF SURVIVORS OF PUBLIC SAFETY OFFICERS

Mr. MONDALE. Mr. President, I am pleased that the Senate has now taken action on legislation to provide a $50,000 death benefit to the survivors of public safety officers killed as a result of criminal actions. We still have some unfinished business in the form of other legislation to provide them life insurance coverage. This is equally necessary to protect their survivors against financial hardship which may result from deaths of such officers not suffered in the line of duty.

Last year, a tragic series of police officers' killings took place in New York City and in Washington, D.C. A few weeks ago, a police officer was killed during a bank robbery in Roseville, Minn.

The Nation's conscience has been shocked by the rise in violence in our society. Public safety officers have borne an unfair share of this burden. In a 1970 survey it was revealed that 18 States still provide no financial assistance to the immediate survivors of law enforcement officers. Many small cities and towns similarly provide no such benefits. The situation with respect to other public safety officers is even worse.

We owe these brave men, and their families, the best law enforcement systems that we can devise. Substantial help, under the Law Enforcement Assistance Act, has been provided to make this possible. But, in the best of circumstances, death and serious injury will still threaten public safety officers. We must, therefore, assure that their families will not be left helpless if they meet an untimely death in seeking to protect us.

Last year, I introduced legislation to provide a national program for the compensation of all victims of violent crime. It included a special provision for a $50,000 death benefit for public safety officers. It it is very gratifying that the Senate has now taken action along these lines.

I am especially pleased that the bill which the Senate has passed was extended to cover firefighters and other public safety officers, as in my own bill. The original bill, in accordance with recommendations of the administration, was limited to policemen. I think that firefighters, correctional officers, national guardsmen, and sheriffs deserve the same protection.

I am also pleased that the bill covers part-time and volunteer officers.

A significant amount of our public safety protection, especially in firefighting, is provided by such personnel. We must assure them and their survivors the same protection as full-time and paid officers.

The bill also provides benefits in the event of dismemberment suffered by a public safety officer. It would offer $25,000 for single dismemberment and $50,000 for multiple dismemberment.

Another important feature of this legislation is that the benefits would not be subject to Federal income taxes. We have been advised that the payments would be regarded in the same fashion as workmen's compensation and, hence, would not be taxed.

The bill would cover deaths or dismemberment of public safety officers occurring as a result of criminal action on and after January 1, 1967. This date would cover the period during which we have experienced a shocking increase in felonious attacks on public safety officers.

In the 6 years from 1961 through 1966, about 50 killings per year, on the average, were reported for police officers in the United States. During the next 5 years, the average number of felonious police killings had risen to 80 or almost double the earlier figure.

Mr. President, we can never adequately express our appreciation to the gallant men and women who daily risk their lives as public safety officers. There is no way that we can repay their survivors if they are killed in line of duty. But we can spare them the severe financial hardship which they often suffer. I hope that the Congress will speedily complete action on this bill.

As I have indicated, the bill deals with only a part of the problem. Public safety officers frequently have difficulty purchasing life insurance protection—either individually or in groups. All too often, their on-the-job risks are regarded as too high for insurance companies to accept.

But it is hard to believe that they often cannot purchase life insurance to protect their families against the normal risks of death not connected with their jobs. Or such insurance may be available only at very high, or even prohibitive, rates. It is clear that Federal action is needed here, too.

I am pleased to be a cosponsor of two bills which would provide Federal assistance for the establishment of group life insurance programs for public safety officers. These bills—S. 2994, introduced by the Senator from Arkansas (Mr. McCLELLAN), and S. 2995, introduced by the Senator from Massachusetts (Mr. KENNEDY)—are pending in the Judiciary Committee.

I have been advised that the committee plans to consider them soon. I hope that the Senate will be able to act on them at an early date.

When a public safety officer is killed in line of duty, whether by criminal action or otherwise, the conscience of the community is shocked. Indeed the traumatic experience for his family may be more acute than that suffered from a death through natural or accidental causes. However, the financial plight of the family will be equally serious. Thus, we must fill the gap in insurance protection offered to public safety officers.

The Federal Government recognizes its special responsibilities in this regard for its employees. It provides for Federal contributions to group life insurance protection for its personnel. The Federal Government has now recognized its interest in improved law enforcement and public safety programs. It is not fair to call upon members of our community to serve as public safety officers and to expose their families to the unreasonable financial hazards which are created by the absence of satisfactory life insurance programs.

The two bills which I have cosponsored would provide for employee contributions to the cost of life insurance. A Federal contribution would be authorized to assure that a program would be available to all officers and that the costs would not be prohibitive.

Mr. President, I commend the efforts that have been put forth in support of these bills to help protect the survivors of public safety officers. I urge that the earliest possible action be scheduled by the Judiciary Committee and by the Senate on the life insurance legislation. I will do everything I can to assist in enacting this vital measure.

U.S. RECOGNITION OF CUBA

Mr. GURNEY. Mr. President, a July 14, 1972, editorial published in the Miami newspaper, the Voice, makes some excellent points concerning whether this country ought to recognize Fidel Castro's Communist regime. In light of recent reports concerning the boasts of Cuban Air Force Minister Roual Castro, younger brother of Fidel Castro, over the increased numbers of Soviet missile-launching boats obtained by Cuba this year, it would seem to be especially appropriate to place this article in the Record.

I ask unanimous consent that the editorial, entitled "Why Should the Castro Regime Be Recognized?" be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

Why Should the Castro Regime Be Recognized?

(By George H. Monahan)

Should the United States at this time resume normal relations with Castro's Cuba?

This is the question brought before both political parties by the Latin American Division of the U.S. Catholic Conference. On page one of this issue, The Voice reprints a column by Dale Francis, who lived in Cuba for two years where he was Director of the Defense of the Faith in the Matanzas diocese. Mr. Francis is well appraised of the political situation on the Communist-controlled island and spells out his opposition to relaxation of the American blockade at this time.

About one month ago, when the Latin American Division's director, Father Frederick McGuire, C.M., suggested the change in the U.S. relationship with Cuba, he stressed that the statement reflected only the opinion of his agency. He said the 10-year-old embargo can in no way be justified today because it imposes "needless hardship and suffering on the most directly affected . . . the poor, the sick, the aged, and the very young."

It should be pointed out that the embargo was initially imposed by President John F. Kennedy as an immediate result of the Cuban missile crisis and was designed to prevent the importation of arms and other strategic materials. Later, Castro himself imposed restrictions upon packages received by mail from the U.S. containing food, medicines and other goods of humanitarian value sent to the people of Cuba. The dictator claimed exiles in this country had secreted a bomb in a parcel which exploded in the Havana Post Office. Parcels coming from the U.S. that had been stored in the Cuban Customs for many months then were confiscated and never delivered to the designated recipients. The Red dictator also emphasized that no other packages from the U.S. would be accepted and he said American medicines and food were not wanted.

Actually, today hundreds of tons of medicines and food are being sent to Cuba from people in the U.S. through Spain, Canada and Mexico.

The editors of this newspaper feel a number of major points must be considered before a normalization of relationship between the two countries can be considered.

First, a profound revision in Cuba's policies toward its neighbors in Latin America must take place.

Despite the fact that Chile, which has been flirting with the left since it elected a Communist president, has recently normalized its relations with Cuba, other Latin nations opposed any change at this time. And, their opposition is justifiable as long as Castro continues to train and support armed revolutionary bands in these countries. Cuba, in this circumstance deserves to be excluded from recognition by the rest of the hemisphere.

Second, the U.S. has patiently but apprehensively stood by while Castro has continued a protracted campaign of harrassment and infiltration in this country. The director of Cuba's fishing fleet, who defected to the U.S. a few months ago, testified before congressional hearings that Castro's fishing boats were being used to smuggle U.S. students and left wing sympathizers in and out of Cuba in order to receive instruction in communist ideology, as well as basic training in sabotage and guerrilla warfare. Also, he said, tons of narcotics are being smuggled into this country by these same ships.

Third, as long as Cuba continues to serve as a base for Soviet nuclear submarines and warships, we feel there can be little hope for amity between America and Cuba.

As long as the U.S. allows food and medicines to continue to pass through the blockade, we can see little complaint about inhumane treatment. Of course, we feel that peace and harmony should prevail among nations but in this case, it seems that some first moves toward this direction rest squarely on the shoulders of Fidel Castro—not on the government of the United States.

DEMONSTRATIONS DURING 1972 REPUBLICAN NATIONAL CONVENTION

Mr. GURNEY. Mr. President, 2 weeks ago in Miami Beach, Fla., the second of this country's major party conventions occurred. I had the privilege of attending as a delegate and the distinct honor of participating in the proceedings. However, I would like to address my remarks here today to the actions of some of those who sought to divert attention from the proceedings inside the convention hall and to the streets outside. While on the whole things functioned fairly smoothly, a determined group of 2,000 to 3,000 individuals attempted disruptions of the delegates to the convention and of the citizens of Miami Beach.

The major reason why the problems were not worse than they were was that the radical movement was unable to assemble the kinds of numbers that they are accustomed to acquiring in their efforts to paralyze the Nation. However, there were numerous instances of extensive property damage and physical abuse to delegates and others who were proceeding on their own business.

The situation is best summed up by Mr. Paul M. Brunn, the distinguished publisher of the Miami Beach Sun Reporter, in two columns published in the August 2 and 25, 1972, issues of the Daily Sun Reporter. I ask unanimous consent that the articles be printed in the Record.

There being no objection, the articles were ordered to be printed in the Record, as follows:

Another "Horror Show"

(By Paul M. Bruun)

Following the conclusion of the Democratic Convention in July, I—along with many others to be sure—was reassured because conditions had remained calm in Miami Beach. I had hoped that perhaps our visiting non-delegates in Flamingo Park had awakened to a number of important realizations—not out of resignation, but from a new wisdom gleaned from the non-productiveness of the stormy "horrow shows" staged in the past.

For it is true that the various targets of the radical movement have not "caught fire," as was expected, and there has been increasing disgust and disenchantment evidenced among high school students and young working people with political radicalism, even in the strongholds of the counterculture.

However, my hopes were to be dashed to the winds, for once again we are witnesses to the spectacle of the "borderline nuts" putting themselves above the interests of the majority of Americans and engaging in another mindless orgy of the ugliest kind—in the name of democracy—because of their so-called political convictions.

My emotions are clearly taxed and I am deeply distressed by these events. (Of course, if I were a strategist in the Soviet Union, I would be delighted by America's lowered and flabby image in the eyes of the rest of the world.)

What is this country coming to when individuals select the laws they will or will not obey? Is this mayhem and horror to be a permanent part of the fabric of our lives? Do these people really believe they are doing the nation a public service?

How can we function as a free and open society and live sanely when the rights of honorable, law-abiding citizens are recklessly and flagrantly trampled upon by irresponsible mobs who are obviously protesting to gain attention for political power?

What is so incredible to me is that these acts have been perpetrated by those who claim to have formulas for reforming our society. However, their fantasies have no relationship to the real world.

No one is more vehemently against the Vietnam War or any war than I. Yet, I am "turned off" more than words can describe by those who, in the name of peace, engage in such actions. In their view, apparently every one of them has the inalienable right to engage in volatile behavior if they are angered by another person or persons.

I've tried hard to understand the motives and meaning behind this kind of mindless destructiveness, but it is unbelievable to me that this small minority of people want the right to be heard and yet, by their acts, deny those of opposing view the same freedom of speech. Indeed, reasoned argument is thrown to the winds and replaced by insults, accusations and vehement condemnations. However, political activism and freedom of dissent does not justify this kind of interference with the rights of others, any more than respect for law and order justifies oppression . . .

The American people are fed up with and deplore this shabby performance. But it is not enough to merely believe in law and order. Each of us must Speak out in not uncertain terms and demand that law and order be preserved, for by silence we are in essence granting, approval to their acts. We must all join together in calling for a return to mutual respect and civility and the right to be free from this plague of political violence on the part of these misguided few.

With this kind of levelheaded attitude, our young people will in fact arrive much faster into fuller partnership with the so-called "establishment" and find it responding to their hopes and aspirations. Indeed—as evidenced by passage of the 18-year-old vote—their vigor, energies, intelligence, compassion, idealism—their innovative and fresh concepts—traits we all admire—are needed in the political process and in the urgent work ahead of us in building America. But only when they are prepared for that trust can they serve as a vital force in our society.

I must state that, quite frankly, I have been completely nauseated and "turned off" by the behavior of the young radicals I encountered over the past week. They exhibited the most appalling lack of self-discipline and disrespect for authority I have ever witnessed.

These were apparently pampered, coddled youngsters whose parents undoubtedly failed to paddle their ——— when they deserved it for fear of "spoiling their personalities." As a result, they are "children", both in temperament and discretion, who delight in pulling the wool over the eyes of their elders, and are apparently incapable of looking after their own interests, to say nothing of the interests of our country.

Are these the kind of people who are truly dedicated to the task of making this a better world in which to live? I think not.

On the other hand, it was a distinct pleasure for me to be in the company of neat, clean shaven young Republican supporters and workers during the course of the Convention whose warmth and friendliness rekindled my faith in the generation that will follow us.

It was obvious to me that the traits of integrity, courtesy, self-discipline, reliability, and a desire to do a good job, had been properly instilled in these youngsters, and these qualities will, as a result, stay with them the rest of their lives.

In my judgment, these young people have the kind of character and well-trained minds that will permit them to respond to the vagaries of life, and hence they are qualified for future leadership roles. Moreover, they recognize that the world without differences in view would indeed make for a very dull existence, but that the civilized approach is to talk—not fight—about these differences.

One essential ingredient in achieving social reforms is patience—a virtue which is markedly absent in all young people.

But the human spirit, their spirit, has been set free in America, and fate has thereby granted this Nation a great gift and a great destiny for which we should all be thankful.

Our young generation must, therefore, turn from strategies of "escape" to those of a "genuine commitment". With this type of approach I have every confidence that they will be eminently successful in bringing us to the fulfillment of that destiny.

WHAT DO YOU SAY WHEN YOU ARE PROVEN WRONG?

(By Paul M. Bruun)

Yes: What can you say when you've said you're sorry? I watched ice picks being stuck into the tires of private cars, buses and trucks in disbelief. I saw the covers of rear-engined buses opened and the ignitions wrecked, which stalled our buses on our streets. Windows were smashed, much damage, all unwarranted, was done. This newspaper suffered tremendous damage because many of our vending machines were completely wrecked.

Such havoc was the traffic on Wednesday that I was late to a deposition in an attorney's office. Returning, I spent 60 minutes moving two blocks on 17th Street. I finally gave up, left my car in the front yard of our personal friends, the Dr. Herman A. Phillips, and walked to my office. The bridge at Alton and Dade was closed to northbound traffic, thus inconveniencing thousands of hometown, law-abiding citizens who deserved better.

For many years, a liberal attitude has prevailed in Miami Beach. Today it has proven to be the wrong way. The darlings of the hippies, etc., and those who were the darlings of the Yippies, etc., fed them chicken soup and contributed to the begging of these bums with as much as $45 per day per beggar. But they now know that those of us who protested long, loud and strong, against providing a haven for the unclean trash that does not want to work, were right, and that Miami Beach's Mayor Chuck Hall—who marched with them and who "vouched" for them—and for their behavior, as did many more well-meaning and impractical people—were wrong.

Again I have to congratulate Councilmen Herbert Magnes, Leonard Weinstein and Harold Rosen—who were not suckered in as was I—on their opposition to the position that only by providing Flamingo Park could the rebels-without-a-cause be controlled.

I succumbed to the pressure of law enforcement officials who told me that without Flamingo Park, the entire cause was hopeless. Many still say that without Flamingo Park, things would have been worse.

If any of the destructive scum of this earth, wearing the false guise of being sincere protesters, had been injured, hurt, or become ill, the full facilities of our great south Florida would have been instantly placed at their disposal.

Now those of us who have suffered considerable financial losses and had our time and schedules aborted, have to pay for our individual losses. The non-delegates on the other hand, go on their merry way unharmed to further their useless existence, preying on those who will sympathize with whatever becomes their next "cause".

Every day in every way liberalism is proving that our laws and our courts are for the lawless. Does the average citizen, caught in the clutches of our law enforcement officers, have the instant justice that the lawless scum who had gone mad were provided?

Admittedly our police officers "kept their cool," which is magnificent. The heads of those wreaking destruction, however, should have been cracked open. I would register no protests had our emergency wards been filled with cracked heads instead of our jails filled with smirking, sneering, uncontrollable animals gone mad.

Perhaps the nation, and unfortunately the entire world, have been treated to a practical lesson in just how democracy doesn't work, a disgraceful happening. I can't but help think the disorderly actions and law-breaking of those who had placed at their disposal our hospital facilities, have gained for President Richard Nixon millions of votes. Hopefully, their bastardly behavior has served to awaken those mad for McGovern that if this is his "youth corps," then God help us if McGovern is elected.

I talked to some of these rebels-without-a-cause. One had the guts to tell me that "if it rains tomorrow, you have to get up and go to work, but if it rains, I don't have to get up and go to work." For this parasite, the hard-working fools of this nation—decent citizens such as you and me with jobs—pay and pay and pay. Yes, the non-delegate leaders who promised us such safety have surely proven that their word is useless, that they are damn liars, not fit to associate with decent people.

I wonder what those pious religious leaders who provided some of them with a place to bed down think today. There can be no compromise with the lawlessness. Our nation and the world were treated to a brand of lawlessness that surpasses that of the North Vietnam invasion of South Vietnam about which they were protesting.

For the appeasement that I was suckered into, I apologize. I did what the experts, the professionals told me to do, saying that I had no other choice. Now, I'm sorry.

RETIREMENT OF GORDON F. HARRISON

Mr. STENNIS. Mr. President, the staff director of the Committee on Rules and Administration, Mr. Gordon F. Harrison, retired recently after long and distinguished service in that capacity. I wish to pay a tribute to this outstanding member of the Senate staff.

For more than 17 years, Gordon Harrison demonstrated the highest standards of professional competence. His knowledge and energetic cooperation have been at the disposition of all Members of the Senate, and the assistance he has given them in a very wide variety of problems has been extremely valuable.

His personal characteristics made him particularly effective in the performance of his difficult duties. His judgment and integrity lead him to sound conclusions and recommendations, and his quick intelligence, tact, and ability to get along with others enabled him to carry out decisions with minimum delay or disruption. He has found the time to hear and give full consideration to all the staff members who consulted him over the years. The office of every Senator is indebted to him.

After a very long career of public service, including service in the Navy in World War II, as a lawyer in the Department of Justice, and many years with the Senate staff, this fine gentleman has accepted a well-earned retirement. I congratulate him on his accomplishments and extend to him my very best wishes for the future.

NAMING OF CHARLESTON NAVAL STATION ENLISTED CLUB FOR J. ELLIOTT WILLIAMS

Mr. THURMOND. Mr. President, the Navy recently honored Medal of Honor Winner J. Elliott Williams by naming the Charleston Naval Station enlisted club for him. I think it is highly appropriate that the outstanding service of this courageous American be recognized in this way.

Mr. Williams was awarded the Medal of Honor for action in the Mekong Delta on October 31, 1966, when two Navy river patrol boats under his command sank 65 enemy craft. Mr. Williams was a superior leader. The men serving under him during his 11 months in Vietnam won 131 combat decorations and 80 purple hearts. Only one of his men died in combat.

Retiring from active duty in 1967 as a boatswain's mate first class, Mr. Williams has continued to serve his fellow citizens as U.S. marshal in South Carolina.

He has set a high example of patriotism, dedication, and conduct for others to emulate. As long as the United States can produce men like J. Elliott Williams, we will remain strong and free.

Mr. President, I ask unanimous consent that the accounts of the ceremonies honoring J. Elliott Williams at the Charleston Naval Station be printed in the RECORD.

There being no objection, the accounts were ordered to be printed in the RECORD, as follows:

BOATSWAIN'S MATE FIRST CLASS JAMES E. WILLIAMS (RETIRED)

Petty Officer Williams received the Medal of Honor in 1968. The citation reads:

For conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty as a member of River Section 531 during combat operations on the Mekong River in the Republic of Vietnam. On 31 October 1966, Petty Officer Williams was serving as Boat Captain and Patrol Officer aboard River Patrol Boat (PBR) 105 accompanied by another patrol boat when the patrol was suddenly taken under fire by two enemy sampans. Petty Officer Williams immediately ordered the fire returned, killing the crew of one enemy boat and causing the other sampan to take refuge in a nearby river inlet.

Pursuing the fleeing sampan, the U.S. patrol encountered a heavy volume of small arms fire from enemy forces, at close range, occupying well-concealed positions along the river bank. Maneuvering through this fire, the patrol confronted a numerically superior enemy force aboard two enemy junks and eight sampans augmented by heavy automatic weapons fire from ashore. In the savage batle that ensued, Petty Officer Williams, with utter disregard for his own safety, exposed himself to the withering hail of enemy fire to direct counterfire and inspire the actions of his patrol. Recognizing the overwhelming strength of the enemy force, Petty Officer Williams deployed his patrol to await the arrival of armed helicopters.

In the course of this movement he discovered an even larger concentration of enemy boats. Not waiting for the arrival of the armed helicopters, he displayed great initiative and boldly led the patrol through the intense enemy fire and damaged or destroyed fifty enemy sampans and seven junks. This phase of the action completed, and with the arrival of the armed helicopters, Petty Officer Williams directed the attack on the remaining enemy force. Now virtually dark, and although Petty Officer Williams was aware that his boats would become even better targets, he ordered patrol boats' search lights turned on to better illuminate the area and moved the patrol perilously close to shore to press the attack. Despite a waning supply of ammunition the patrol successfully engaged the enemy ashore and completed the rout of the enemy force.

Under the leadership of Petty Officer Williams, who demonstrated unusual professional skill and indomitable courage throughout the three hour battle, the patrol accounted for the destruction or loss of sixty-five enemy boats and inflicted numerous casualties on the enemy personnel. His extraordinary heroism and exemplary fighting spirit in the face of grave risks inspired the efforts of his men to defeat a larger enemy force, and are in keeping with the finest traditions of the United States Naval Service.

NAVAL STATION, CHARLESTON, S.C.

Naval Station's Enlisted Club was named Thursday for J. Elliott Williams, of Columbia, who received the Medal of Honor among other decorations for heroism in the Republic of Vietnam.

A capacity audience of 300 watched Capt. R. H. Blount, Station Commanding Officer, unveil a showcase containing a picture of Williams and the citation which accompanied the highest military award for valor. He presented a plaque to Williams to commemorate the occasion.

Afterwards the men and women eligible to use the facility lined up with invited civilian guests to shake the honoree's hand and to ask for his autograph. Many had served with him in Vietnam or elsewhere or knew persons who had been associated with him.

Williams, 41, South Carolina's U.S. Marshal, was transferred to the Fleet Reserve in 1967, after 20 years service, with the rate of boatswain's mate first class. He said he considered the naming an honor not for himself alone but for him as a representative of all enlisted personnel.

All platform guests praised Williams' actions. Capt. J. E. McEnearney, Navy Resale System Field Operations Officer, Brooklyn, N.Y., saluted the former enlisted man for exploits, "which have become legendary".

U.S. Representative Mendel J. Davis said the nation has nothing to fear so long as it can produce men like Elliott Williams. Others commending Williams were Capt. E. P. Flynn Jr., representing Rear Admiral H. J. Kossler, Sixth Naval District Commandant, who was ill, and Lieutenant Commander B. V. Dennis, destroyer tender Yellowstone chaplain.

A telegram from U.S. Senator Strom Thurmond (R-SC) expressed regrets that a "critical" vote for the Naval Trident submarine program prevented his presence here. He described the club naming as "appropriate recognition" of Williams, who has had a "high standard of patriotism, dedication and conduct for others to emulate".

Special guests included Mrs. L. Mendel Rivers, U.S. District Judges R. W. Hemphill and R. F. Chapman, State Representatives Julian LeaMond, Sidi Limehouse and Herbert Fielding, North Charleston Mayor John E. Bourne and Trident Chamber of Commerce President Dr. Gordan Stine.

Also, State Republican Party Chairman Ken Powell, of Columbia, and former chairman, Raymond A. Harris, of Darlington; Capt. J. R. Primm, Supply Center, Commanding Officer, and Capt. Whitney P. Jones, C.O., Southern Division, Naval Facilities Engineering Command.

Family members present were Mrs. Roy Williams, the honoree's mother; wife, Elaine, and children Deborah, James, Michael, Charles and Gail.

Ceremony music was by the Sixth Naval District band and dance music by the combo. Members of the advisory board were introduced. Buffet included ham and turkey sandwiches, shrimp salad, Swedish meatballs and party franks.

Williams received the Medal of Honor for action October 31, 1966, during which 57 enemy craft were sunk by the efforts of the two river patrol boats he commanded.

Military decorations won by Williams during Vietnam service are Medal of Honor, Navy Cross, Silver Star Medal, Navy and Marine Corps Medal, Bronze Star Medal, with Combat "V" and star indicating a second Bronze Star, Navy Commendation Medal with Combat "V", Purple Heart with star in lieu of a second Purple Heart and Vietnam Gallantry Cross with star indicating a second award.

Other medals and awards include the Vietnam Service Medal (one star), Republic of Vietnam Campaign Medal, National Defense Service Medal (one star), United Nations Service Medal, Korean Service Medal (two stars), Korean Presidential Unit Citation and five awards of the Good Conduct Medal.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE TRAGIC KILLING OF ISRAELI OLYMPIC MEMBERS

The Senate continued with the consideration of Senate Resolution 358.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the names of the following Senators be added as cosponsors of the resolution (S. Res. 358): the distinguished Senator from Rhode Island (Mr. PELL), the distinguished Senator from Washington (Mr. MAGNUSON), the distinguished Senator from Iowa (Mr. HUGHES), the distinguished Senator from Michigan (Mr. HART), the distinguished Senator from Nevada (Mr. BIBLE), and the distinguished Senator from Oklahoma (Mr. HARRIS).

The PRESIDING OFFICER (Mr. STEVENSON). Without objection, it is so ordered.

Mr. SYMINGTON. Mr. President, I ask unanimous consent that my name be added as a cosponsor.

Mr. MANSFIELD. I am delighted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, a total of 92 Senators have now cosponsored this resolution, and I ask unanimous consent that their names be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

COSPONSORS OF SENATE RESOLUTION 358

Senators Aiken, Allen, Allott, Anderson, Baker, Bayh, Beall, Bentsen, Bible, Boggs.

Senators Brock, Brooke, Buckley, Burdick, Harry F. Byrd, Jr., Robert C. Byrd, Cannon, Case, Chiles, Church.

Senators Cook, Cooper, Cotton, Cranston, Curtis, Dole, Dominick, Eagleton, Eastland, Edwards.

Senators Ervin, Fulbright, Gambrell, Gravel, Griffin, Gurney, Hansen, Harris, Hart, Hartke.

Senators Hatfield, Hollings, Hughes, Humphrey, Inouye, Jackson, Javits, Jordan of North Carolina, Kennedy, Long,

Senators Magnuson, Mansfield, Mathias, McClellan, McGee, McGovern, McIntyre, Metcalf, Miller, Mondale.

Senators Montoya, Moss, Muskie, Nelson, Packwood, Pastore, Pearson, Pell, Percy, Proxmire.

Senators Randolph, Ribicoff, Roth, Saxbe, Schweiker, Scott, Smith, Sparkman, Spong, Stafford, Stennis.

Senators Stevens, Stevenson, Symington, Taft, Talmadge, Thurmond, Tower, Tunney, Weicker, Williams, Young.

The PRESIDING OFFICER. The question is on the adoption of the resolution (S. Res. 358) offered by the Senator from Montana and 91 other Senators. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from North Carolina (Mr. ERVIN), the Senator from Alaska (Mr. GRAVEL), the Senator from Oklahoma (Mr. HARRIS), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. McGEE), the Senator from South Dakota (Mr. McGOVERN), the Senator from Montana (Mr. METCALF), the Senator from New Mexico (Mr. MONTOYA), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES) is absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), the Senator from North Carolina (Mr. ERVIN), the Senator from Alaska (Mr. GRAVEL), the Senator from Oklahoma (Mr. HARRIS), the Senator from Iowa (Mr. HUGHES), the Senator from Washington (Mr. MAGNUSON), the Senator from South Dakota (Mr. McGOVERN), the Senator from New Mexico (Mr. MONTOYA), the Senator from Rhode Island (Mr. PELL), the Senator from Montana (Mr. METCALF), and the Senator from Wyoming (Mr. McGEE) would each vote "yea."

Mr. SCOTT. I announce that the Senator from Delaware (Mr. BOGGS), the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), and the Senator from Oregon (Mr. HATFIELD) are necessarily absent.

The Senator from Maryland (Mr. MATHIAS) is absent to attend the funeral of a friend.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Delaware (Mr. BOGGS), the Senator from Hawaii (Mr. FONG), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD) and the Senator from Maryland (Mr. MATHIAS) would each vote "yea."

The result was announced—yeas 82, nays 0, as follows:

[No. 392 Leg.]

So the resolution (S. Res. 358) was unanimously agreed to. The preamble was agreed to.

Mr. BOGGS subsequently said: Mr. President, due to a necessary commitment in Seaford, Del., earlier today, I could not be on the Senate floor at the time the Senate voted on Senate Resolution 358. Had I been here, I would have voted in favor of this important resolution.

Nevertheless, I learned about the resolution prior to its consideration, and asked that I be listed as a cosponsor for I feel very strongly the sense of profound sorrow expressed by the resolution.

I fully endorse the resolution's expression of sympathy to the people of Israel and the members of the families of the slain athletes.

I also support fully the declaration condemning anyone or any nation which gives sanctuary, support, sympathy, aid, or comfort to the evil persons, and their backers, who undertook these barbaric acts.

While the Olympics may never recover the joyful and friendly spirit that prevailed only a couple of days ago, I am hopeful that the terrible events of Munich will lead eventually toward a more peaceful world.

This great tragedy must show the Arab extremists that violence gains nothing. The hope for the future in the Middle East is face-to-face peace talks between the Arab nations and the people of Israel.

We in the United States and the other nations of the world can best memorialize the 11 slain Israelis by working toward such a conference and a peaceful, responsible settlement in the Middle East.

Nothing less is acceptable.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The **PRESIDING OFFICER.** Under the previous order, the Chair now lays before the Senate the unfinished business, Senate Joint Resolution 241, which will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The **PRESIDING OFFICER.** The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The **PRESIDING OFFICER.** Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, it is my understanding that a conference report is ready to be called up; and because it has priority, I am willing to await consideration of the Mansfield amendment to the interim agreement.

UNIFORMED SERVICES HEALTH PROFESSIONS REVITALIZATION ACT—CONFERENCE REPORT

Mr. HARRY F. BYRD, JR. Mr. President, I submit a report of the committee of conference on H.R. 2, and ask for its immediate consideration.

The **PRESIDING OFFICER** (Mr. GAMBRELL). The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2) to establish a Uniformed Services University of the Health Sciences and to provide scholarships to selected persons for education in medicine, dentistry, and other health professions, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The **PRESIDING OFFICER.** Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

(The conference report is printed in the House proceedings of the CONGRESSIONAL RECORD of August 16, 1972, at pp. 28362–28363.)

Mr. HARRY F. BYRD, JR. Mr. President, this bill passed the House of Representatives on a recorded vote of approximately 330 to 30, an overwhelming vote. It passed the Senate on a voice vote, and then it went to the committee of conference.

There was a disagreement between the House and the Senate in regard to various aspects of this proposal. The House conferees were adamant in their position on one phase of this measure; namely, that the establishment of a Uniform Services University should be authorized immediately. The House receded on the other differences of viewpoint between the House and the Senate.

The purpose of this measure is to try to find some means to keep in the armed services and bring to the armed services a sufficient number of doctors and dentists and other medical officers. The armed services are having great difficulty today in retaining doctors and other professional medical men.

The Department of Defense, the House of Representatives, and the Senate feel that steps must be taken by way of additional scholarships and by the establishment of this university to be assured that the armed services, without the draft, will have sufficient medical personnel for the future.

The Senate conferees did not get all they wanted from the conference. That is the normal procedure, I take it. But the Senate was able to modify some of the House provisions in regard to scholarships which the Senate felt were too liberal.

MAJOR POINTS OF DIFFERENCE BETWEEN SENATE AND HOUSE VERSIONS OF H.R. 2

Mr. President, there were six major points of difference between the House and Senate versions of H.R. 2 and these had to do with:

First. The establishment of a Uniformed Services University of the Health Sciences.

Second. Scholarship program benefits.

Third. A scholarship student attending a university which either disestablished ROTC or barred armed services' recruiters from its campus.

Fourth. Statutory numerical limitations on promotion of medical and dental officers to general and flag officer rank.

Fifth. Scholarship payback period.

Sixth. Technical amendments to the House version of H.R. 2.

I ask unanimous consent that at this point there be printed in the RECORD an outline of the major differences between the House and Senate versions of H.R. 2.

There being no objection, the outline was ordered to be printed in the RECORD, as follows:

OUTLINE OF THE MAJOR DIFFERENCES IN THE SENATE AND HOUSE VERSIONS OF H.R. 2—THE UNIFORMED SERVICES HEALTH PROFESSIONS REVITALIZATION ACT OF 1972

ISSUE	HOUSE VERSION	SENATE VERSION
1. The Uniformed Services University of the Health Sciences (University).	**Provides authority to establish the University within 25 miles of the District of Columbia. The University would be so organized as to graduate not less than 100 medical students annually, with the first class graduating not less than 10 years after enactment of the bill. Cost: Estimated at $102 million over a 10-year period and includes salaries of faculty members in addition to construction costs.**	**Provides for a feasibility and desirability study of the University in place of the House bill provision authorizing such a University.**
2. Scholarship program and benefits.	Provides for a medical scholarship program under which a maximum of 5,000 scholarships at any one time would be granted to persons to attend civilian medical schools. As a condition to receiving such a scholarship, a person would have to agree to serve at least one year of military service for each year of training received. The House version of the scholarship program provides that:	Provides for the medical scholarship program but reduces the total scholarship benefits payable to a student below that recommended by the House. The Senate version of the scholarship program provides that:
	1. The full cost of the student's medical school tuition and fees be paid by the Government.	1. The full cost of the student's medical school tuition and fees be paid by the Government (same as House version).
	2. Each student serve on *active duty* as a Reserve officer in grade O–1 (2nd Lt./Ensign).	2. Each student serve on *inactive duty* as a Reserve officer in grade O–1 (2nd Lt./Ensign) except for 45 days per year when he would serve on active duty in grade O–1.
	3. Each student receive the full pay and allowances of grade O–1: $8,642 for a student with dependents and $8,250 for one without dependents (in addition to medical school tuition and fees).	3. Each student receive a monthly stipend of $400 except when he is on active duty when he would receive the full pay and allowances of grade O–1. Under the Senate version a student with dependents would receive in pay and allowances about $5,285 per year and one without dependents $5,235 (in addition to medical school tuition and fees).
3. Scholarship student attending a university which either disestablished ROTC or barred armed services' recruiters from its campus.	Prohibits a scholarship student from attending a university which has taken either of these actions.	Permits a scholarship student to attend a university which has taken either of these actions.
4. Statutory numerical limitations on promotion of medical and dental officers to general and flag officer rank.	**Removes all statutory numerical limitations on the promotion of medical and dental officers to general and flag officer rank.**	**Continues the present statutory numerical limitations on promotion of medical and dental officers to general and flag officer rank. The Senate report requires the Department of Defense to study the question of increased promotion opportunities for medical corps officers and to report its findings to the Senate Committee on Armed Services not later than January 1, 1973.**
5. Scholarship payback period.	Limit the duration of the scholarship program to courses of study of not more than *four* years duration.	Varies the length of the scholarship program depending on the period required for a medical degree; certain medical school curricula, for example, may require 6 years for completion of the medical degree.
6. There were several technical amendments made to the House version of the bill, some of which were recommended by the Department of Defense and others by the Senate Committee on Armed Services. These technical amendments were accepted by the House conferees and were included in the text of the conference report.		

DIFFERENCE NO. 1—THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Mr. HARRY F. BYRD, JR. Under the House-passed bill, authority was provided to establish the university within a radius of 25 miles of the District of Columbia. The university would be so organized as to graduate not less than 100 medical students annually, with the first class graduating not less than 10 years after enactment of the legislation.

The Senate amendment deleted authority for the establishment of a Uniformed Services University of the Health Sciences, and substituted a provision providing for a feasibility study to determine the desirability of establishing such a university as provided in the House language. The feasibility study proposed by the Senate amendment was essentially designed to reexamine the entire proposal as contained in the House-passed bill. In accordance with the Senate language, the study was to be conducted by the Secretary of Defense and the results reported back to the President and the Congress not later than 1 year after the date of enactment of the act.

The House conferees were adamant in their support for the university. They pointed out that a feasibility study of the university would serve no useful purpose since the subject had been fully studied both within and without the Department of Defense. In addition, the House conferees pointed to the strong endorsement by the Secretary of Defense, the national shortage of doctors which this university would help alleviate, and the outstanding Government medical facilities in the Washington area which this university would make use of.

Although the Senate conferees were concerned over the apparent lack of consensus within the administration and the various health professions for establishing such a university, they ultimately receded on their position with an amendment which reduced the first year authorization funding for design, planning and construction to $15 million rather than the $20 million contained in the House-passed bill. In addition, the amendment proposed by the Senate conferees would require future line item annual authorizations before appropriations for construction could be provided in subsequent years for the university.

DIFFERENCE NO. 2—SCHOLARSHIP PROGRAM AND BENEFITS

Both the House and Senate versions provided for a scholarship program under which a maximum of 5,000 scholarships at any one time would be granted to persons to attend civilian medical schools. As a condition for receiving such a scholarship, a person must agree to serve at least 1 year of military service for each year of training received.

The House version of H.R. 2 would permit a scholarship student to serve on active duty as a Reserve O–1 and receive the full pay and allowances of pay grade O–1—second ensign—which would amount to $8,642 for a student with dependents and $8,250 for a student without dependents—in addition to full medical school tuition and fees. The Senate version would require each student to serve on inactive duty as a Reserve O–1 and receive a monthly stipend of $400 per month except when he was on active duty for 45 days per year when he would receive the full pay and allowances of grade O–1. Under the Senate version a student with dependents would receive in pay and allowances about $5,285 per year and one without dependents $5,235—in addition to full medical school tuition and fees.

HOUSE RECEDES ON SCHOLARSHIP PROGRAM BENEFITS

The Senate conferees maintained that the scholarship provisions of the House were too liberal for someone in a student capacity. Under the House version a scholarship student could receive almost $12,000 in total benefits per year as opposed to about $8,000 per year under the Senate version. The House conferees attempted to increase the stipend amount to $500 per month because of their concern with attracting sufficient numbers of scholarship students but the Senate conferees held to their position and the House conferees receded.

DIFFERENCE NO. 3—SCHOLARSHIP STUDENT ATTENDED A UNIVERSITY WHICH EITHER DISESTABLISHED ROTC OR BARRED ARMED SERVICES' RECRUITERS FROM ITS CAMPUS

The House version of H.R. 2 contained a provision which prohibited the detailing of scholarship students to any institution of higher learning if that institution had adopted a policy which bars recruiting personnel of any of the Armed Forces from the premises of that institution, or if such institution of higher learning had directed the disestablishment of Reserve Officer Training Corps units at the institution despite the desire of the Armed Forces to continue such training at the institution. The Senate version of H.R. 2 permitted a scholarship student to attend such schools.

The House conferees believed that the schools in question should not receive any benefits under this legislation from the Department of Defense either directly or indirectly in view of the apparent policy of the institutions to divorce themselves completely from any affiliation with the Armed Forces of the United States. The Senate conferees felt that this would be unfair and undue financial hardship for students attending such schools. Many of these students, for example, may have played no part in the disestablishing of the ROTC unit or the barring of recruiters and in some cases may even have opposed these actions.

In addition, the Senate conferees held the view that adoption of the House prohibition would have a serious impact on the Department's ability to attract the numbers and quality of students required by the scholarship program. The Senate conferees pointed out that approximately 9 percent of all students now attending medical schools are in schools which would be directly affected by this prohibition. Therefore, they argued that notwithstanding the merits or demerits of the principle embodied in the House prohibition, the overriding urgency of the physician shortage problem required elimination of the House prohibition. The House conferees therefore reluctantly receded and concurred in the Senate action.

DIFFERENCE NO. 4—STATUTORY NUMERICAL LIMITATIONS ON PROMOTION OF MEDICAL AND DENTAL OFFICERS TO GENERAL AND FLAG OFFICER RANK

The House version of H.R. 2 removed all the statutory numerical limitations on the promotion of medical and dental officers to general and flag officer rank. This action was taken to provide the Armed Services with additional career incentives for medical and dental officers.

The Senate conferees did not concur in this House action, although they conceded that increased promotion opportunity was essential for officers in the Medical Corps. The Senate report on H.R. 2, however, did require the Department of Defense to study the question of increased promotion opportunities for medical officers and to report its findings not later than January 1, 1973. The Senate conferees were also reluctant to remove all statutory limitations in this regard and pointed to the Department of Defense opposition to the House provision.

In view of the adamant position of the Senate conferees on this issue, the House conferees reluctantly receded with the understanding that the respective Committees on Armed Services would, if necessary, take early legislative action on this problem shortly after the convening of the 93d Congress.

DIFFERENCE NO. 5—LENGTH OF SCHOLARSHIP PROGRAM

Under the House version of H.R. 2, the scholarship program was limited to courses of study of not more than 4 years' duration. Under the Senate version of H.R. 2, courses of study could extend to as much as 6 or more years' duration.

The Senate conferees pointed out that recent changes and innovations in medical training, and medical school curricula, have resulted in some courses, for example, requiring as much as 6 years for the completion of training for a medical degree. Therefore, the Senate conferees urged that the language be made sufficiently flexible to encompass these innovations in medical training as well as others that might occur in future years. The House concurred with the Senate conferees on this issue and receded without amendment.

DIFFERENCE NO. 6—TECHNICAL CHANGES

The House conferees agreed to several technical amendments to the House version of H.R. 2, which had been recommended by the Department of Defense and the Senate Committee on Armed Services. Since these were of a technical nature, they do not require further explanation.

CONCLUSION

In closing, Mr. President, I urge Senate adoption of the House-Senate conference report on H.R. 2. As I have indicated, the Senate receded on the Uniformed Services University issue and the House conferees receded on every other major point of difference between the Senate and House verisions of H.R. 2. I believe there was real compromise on both sides. The result is a responsible piece of legislation which will help solve potentially critical medical and allied science manpower shortages in the armed services in the years to come.

Mr. COTTON. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield to the distinguished Senator from New Hampshire.

Mr. COTTON. This bill has troubled me a great deal, because in our Appropriations Subcommittee on Health, Education, and Welfare, for several years we have been facing the problem that many medical schools in this country are trying to expand, trying to accommodate more students, some of them seeking to advance from 2-year courses to 4-year courses. In our Appropriations Subcommittee we have tried to be as liberal as possible in aid to these schools, based on the number of new and extra students they can take in, because student after student after student is being turned away.

When you have a large number of established medical schools in the country that are struggling to increase their facilities and accommodate more students and, thus, increase the number of doctors that will go into practice, to begin all over again and establish a separate institution to produce doctors for the armed services, I fear, will have the result of further starving our attempts to be as liberal as possible in promoting and helping to establish medical schools to increase their personnel and the number of students.

I do not feel that so strongly that I want to oppose this measure, because this measure, in itself, I suppose, in that it trains doctors, will have a certain effect on the civilian population and will relieve for medical services in the civilian population perhaps some now that—in other words, the more doctors the armed services have, the more the general supply of doctors will be.

I do think that the Senate should bear in mind, because in a few days now we will be trying, probably, to revise and prepare the HEW appropriation bill that will not meet with a further veto, that we will have to be as frugal as possible in it. Many programs clamor for attention. I feel that, perhaps, right at the time we are trying to place the emphasis on helping medical schools to increase their output, this measure, in a sense, could do more harm than good.

I merely express my feeling about this. I am not trying, at this late point, to throw a roadblock in the way. But I do think it should be borne in mind that if we are going to do this, there are things we should do to open up and make more available medical school training for our civilian population in our established medical school training for our civilian population in our established medical schools.

Mr. HARRY F. BYRD, JR. Mr. President, if I could respond briefly to the distinguished Senator from New Hampshire, the Committee on Armed Services had doubts about the proposal, just as the Senator from New Hampshire has. For that reason, it was recommended by the committee and approved by the Senate that, instead of authorizing the establishment of such a university at this time, the better approach would be to have a feasibility study and have the Department of Defense report back to Congress at the end of 3, 4, or 6 months, after obtaining additional information.

That was the basis on which the Senate went to conference with the House. The House conferees were unanimous and adamant in their determination that the establishment of such a university be authorized now.

The House conferees receded on all the other points at issue but they would not recede on this particular point. The House conferees feel strongly that this would be helpful to the armed services in getting adequate medical personnel into the armed services and retaining adequate personnel.

I might say that the view just expressed by the Senator from New Hampshire represents to a considerable extent the view of this Senator.

Mr. COTTON. I gathered that. I cannot help feeling that if scholarships were established in the regular medical schools for the training of physicians for the armed services, with the understanding that if they accept a scholarship they will be available for the armed services, in that way we would get more dollar for dollar than by creating and building a new university. I think that, probably, I gather, is the opinion of the Senator from Virginia. I am sure that the Senate conferees did their best on this, and I commend them for it.

Mr. DOMINICK. Mr. President, will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. If I may, I would first yield to the distinguished Senator from Mississippi (Mr. STENNIS) and then I will be happy to yield to the Senator from Colorado.

Mr. STENNIS. Mr. President, I thank the Senator from Virginia, but I have in mind making some remarks that will take longer than to ask just a question, so that I believe if the Senator from Colorado wants to ask a question he would be more in order to speak at this time.

Mr. HARRY F. BYRD, JR. I am happy to yield to the Senator from Colorado.

Mr. DOMINICK. Mr. President, I want to congratulate the distinguished Senator from Virginia, first of all, for the work he did on the bill when it first came before the committee, and second, for the fight he put up in the conference.

Mr. President, I elected not to sign the conference report. I think I am the only one, aside from the Senator from New Hampshire, who did not sign it. I did not sign it for the very reasons that the Senator from New Hampshire was bringing up, plus the comments made by the distinguished Senator from Virginia.

I do not think that there is anything in the establishment of a building for the purpose of educating doctors or reeducating doctors in the armed services which will contribute a single thing, with the possible exception of adding to the burden of the taxpayer. I do think that the fellowship program is a good idea. The idea of having physicians being able to go back to their colleges and do things of that kind and reeducate themselves in medical science is good. But, heaven knows, we now have the medical manpower training bill, which I worked hard on in the Committee on Labor and Public Welfare, and which the Senate and House passed last year, which is specifically designed to increase the number of doctors.

I see nothing wrong in having the kind of program where, for the purpose of going through medical school on a scholarship, the student will agree to serve a certain amount of time in the armed services, which is the fellowship program that the Senator from Virginia suggested.

But, for the life of me, I cannot understand why we should pour our money into concrete when we already have more than adequate concrete around the country for the purpose not only of educating doctors but also of many other people.

I am not going to ask for a rollcall vote on this, but I have a statement in opposition, and I want my position as being against this conference report made publicly known, and therefore state as follows:

Mr. President, I elected not to sign the conference report on H.R. 2 as an indication of my total opposition to the establishment of the Uniformed Services University of Health Sciences—USUHS. However, let me stress that I do support the expanded medical scholarship program, the other major feature of the bill.

Regarding the USUHS, the Senate Armed Services Committee recommended the requirement for such a university be examined further and the full Senate, in approving H.R. 2, upheld this recommendation. The House, on the other hand, approved the establishment of the university. In the conference, the Senate receded to the desire of the House.

I disagree with the contention that a special institution is required to provide opportunities for armed services' health professionals to be involved with an academic environment at certain points in their careers, thus improving retention. Let me stress it is the special institution I object to, not the need to return to an academic environment. However, there are ample civilian institutions the Department of Defense can turn to for this training.

Mr. President, last year the Comprehensive Health Manpower Act was passed in which authorization for programs in the bill totaled $2.9 billion for fiscal 1972–74 as follows: $816.1 million in fiscal 1972, $963.8 million in fiscal 1973, and $1.1 billion in fiscal 1974. One feature of the bill provided construction assistance grants for schools in the health professions. In this area the bill authorized $10 million per year for each of fiscal 1972–74 for grants to new schools of medicine, osteopathy and dentistry; authorized $118 million in fiscal 1972, $138 million in fiscal 1973, and $156 million in fiscal 1974 for special projects grants for schools in the health professions; and authorized $20 million in fiscal 1972, $15 million in fiscal 1973, and $10 million in fiscal 1974 for grants to schools with serious financial problems.

These authorizations represent major investments by the American taxpayers in the medical school system of this country. Now to ask them to pay another $101.7 million, the estimated startup costs of the institution over a 10-year period, plus an annual operating cost of $21 million after that, under the assumption, retention of military doctors will be improved if they can study at their own medical university, just does not make good sense. How much uniqueness is there in military medicine? Surely there is not enough to justify an entire new university.

Mr. President, the Senate hearings on H.R. 2 contain a letter to Chairman STENNIS from the Association of American Medical Colleges which makes some excellent points in opposition to the USUHS, and I believe these points bear repeating. The association states:

> The resolution of the problem [striving to meet the armed services' requirements for health professionals] appears to be inextricably tied to increasing the number of well-trained physicians graduated by American medical schools who have an affinity for a career in military medicine and to reducing the turnover rate of career medical officers in the armed services who retire to civilian life.

This, of course, represents a statement of the problem I believe we can all agree with. The letter then continues:

> The Association of American Medical Colleges does not believe that the establishment of a self-contained government medical school would adequately meet either of those objectives.

The reasoning behind this belief has been thoughtfully set forth by the prestigious National Academy of Sciences:

> The academic preparation for medicine and other professional careers in health involves a carefully integrated process of education, training, and controlled experience which must be carried out in a broad and diverse community setting which will permit encounter with the full range of diseases, disabilities and health problems. . . . The manner in which this broad community base could be developed for a purely military medical school seems to present a number of difficulties. More importantly, little would seem to be gained from such a step that would compare with the sizable contributions that could accrue both to the nation at large as well as to military needs by continuing the expansion of our existing system of state and privately supported medical institutions for the health professions. It is this series of institutions with their deep community roots and involvement that can provide the soundest base for the development of the highly qualified professionals

> needed to cope with the full range of health and medical problems, civilian and military.

The association then makes a proposal in lieu of the establishment of a USUHS which—

> Calls for the development of close professional relationships between academic institutions and nearby military programs and installations. If adequately developed, these relationships could provide the setting for a desirable enrichment of military medical life, permitting career military medical personnel to participate in educational and research activities in close association with academic programs.

Again, the association refers to the comments of the National Academy of Sciences regarding this approach:

> Steps could be taken to expand in a carefully planned manner the relationships between major DOD medical facilities and adjacent centers of medical research and education. In this fashion a series of university-based educational and research centers could be developed within the defense system of medical installations which would provide the opportunity to bring academic capability to bear upon the problems of military medicine and permit DOD medical officers to enrich their careers through research and teaching in an academic setting in close association with their professional peers.

This type of approach makes a great deal of sense and would make full use of assistance already authorized by the Congress for health manpower training.

Mr. President, opposition to establishment of a USUHS without further study has also been expressed by Senators JAVITS and KENNEDY. In their capacity as members of the Labor and Public Welfare Committee, they wrote to me jointly on June 15, 1972, and said:

> We were pleased also that the Senate turned aside for the present the House proposal for a Uniformed Services University of the Health Sciences. The proposal clearly seems to demand further study. Nearly every important, recognized education organization opposes such a government medical school. And the Administration appears uncertain of its position. Considerable disagreement on this issue between the Department of Health, Education and Welfare and the Defense Department appears in the record of the hearings. A feasibility study of the establishment of such a school, as proposed by the Senate, may well show that it is unnecessary in meeting the health personnel requirements of the armed services, that special scholarships, increased service pay and allowances and higher numbers of M.D.s can meet those requirements more efficiently.

As their letter points out, the administration seems uncertain of its position, and there is disagreement between HEW and the Department of Defense. While the Defense Department understandably is supporting the USUHS, there seem to be waverings even within their own ranks, as evidenced by statements on other proposals regarding health professionals, namely the scholarship program and special pay and bonus provisions.

During the hearings on H.R. 2 the Department of Defense stated:

> At the present time we are retaining less than one percent of the two-year non-career physicians in the Armed Forces. Of those physicians who participate in our military residency programs, we are retaining between 25–30 percent.

It is clear then that exposure to military medical training programs increases the retention factor by 25 to 30 times. The Surgeon General of the Army, Lt. Gen. Hal B. Jennings, corroborated this in his testimony before the Senate committee, indicating it is reasonable to assume that the scholarship program will provide a retention rate of at least 25 to 30 percent. The Department of Defense indicated in an answer for the record that a 50-percent retention of scholarship students during the early years of the program—1980 to 1985—and 25 percent thereafter would probably meet their career needs. It is quite possible that the scholarship program will provide this kind of retention.

To solve the compensation problem for health professionals after a scholarship student has completed his payback time under the scholarship program the Department of Defense has asked the Congress to approve a generous special pay and bonus provision.

In a letter dated March 22, 1972, forwarding the "Uniformed Services Special Pay Act of 1972," (S. 3410 introduced by Senator ALLOTT) the General Counsel of the Department of Defense, J. Fred Buzhardt, stated in regard to the special pay and bonus provisions—in the proposed legislation—for officers in the health professions that—

> The combined effect of special pay and the proposed bonus is expected to solve the health professions retention problem. This will permit a significant reduction in the number of these professionals required, a corresponding reduction in training investment, and improved health care for the armed forces.

The Department of Defense is on record as saying that its medical special pay and bonus provision proposal are expected to solve its problem in the retention of health professionals.

Let us not delude ourselves that solving the health professional retention problem can be done cheaply. It cannot. But we are trying to solve the problem in the wrong way by authorizing the USUHS. Further, it seems obvious to me that the Department of Defense is not unanimously behind the concept of a USUHS and is simultaneously pursuing its own separate course to solve the retention problem through the special pay and bonus proposals. Surely, we do not need nor can we afford both.

I think it is also worthwhile to point out that a good deal of the problem of retention of health professionals in the Armed Forces is the matter of their utilization or misutilization once they are in the armed services. The General Accounting Office—GAO—produced a study, dated December 16, 1971, entitled, "Improvements Needed in Establishing Requirements for, and Uses of, Medical Professional Personnel in the Military Services," concluded that there is some misutilization of medical manpower in the armed services.

The Department of Defense generally agreed with the findings of the GAO report. In fact, Dr. Richard S. Wilbur, Assistant Secretary of Defense—Health and Environment—in his testimony before the committee stated in regard to the recommendations of the GAO study:

> Many of the suggestions they make are good ones; we are already engaged in implementing some of them.

Deputy Assistant Secretary of Defense for Health Resources and Programs, Mr. Vernon McKenzie, in a letter to the committee dated February 23, 1972, explained a statement made by Secretary Laird in his annual Defense Department report—fiscal year 1973 that the Department of Defense would be returning—

> Some thousands of physicians, dentists and other medical personnel to civilian communities.
>
> Secretary Laird's statement refers to planning now underway as part of our efforts to attain an all-volunteer medical force. Under our plans we would, through increased efficiency, be able to return large numbers of health professionals to civilian communities without replacement. Moreover, under our plans, as Secretary Laird pointed out, there would be no decrease in the high quality medical care which we provide for our beneficiaries. Our plans cover improvements in the number and quality of clerical help available, new equipment, new facilities with more treatment rooms per physician and more offices per dentist. They cover more and even better trained paramedical workers. They also involve the avoidance of duplication of effort within each service and between services. By the coordination of functions of adjacent health facilities of the same or different services, we believe we can improve physician and patient satisfaction.

The Department of Defense anticipates reduction from 15,587 physicians in the armed services in fiscal year 1971 to 12,800 in fiscal year 1974, and 11,000 in fiscal year 1975. Certainly the Department of Defense appears to be taking imaginative steps in overcoming the misutilization of health professionals in the armed services, thereby reducing their number, and thus eliminating one of the major disincentives to retention of these professionals.

In regard to the point of increasing retention of health professionals in the armed services by increasing their opportunities of being involved in an academic environment at certain points in their careers, the exchange in the Senate committee hearings between Dr. Wilbur and Senator BENTSEN is worth noting:

> Dr. WILBUR. As I was saying earlier, we have lost many of our excellent men to academic institutions because they can't have academic status or have difficulty having academic status while they are in the military and because they wish to teach they leave us for civilian institutions.
>
> Senator BENTSEN. Why don't you have a program like the State Department? The State Department, when you have a man who has been on tour for a period of time and you want to give him a sabbatical, they have a program where they can send him to a university and he doesn't lose his status with the State Department and he can choose a university almost of his choice and go down and teach for a period of 9 months and that is a real refresher.
>
> Dr. WILBUR. That is my other package that I will be back with later—my retention package, Senator. I am very delighted you mentioned that because that will be of help to me. Yes, I propose to come up with just that sort of plan.

Secretary of Health, Education, and Welfare Elliot Richardson, in a letter to the committee, dated January 26, 1972, favored the scholarship program and strongly opposed the medical university. In regard to the retention of armed services health professionals, Secretary Richardson advocated:

> Expansion in a carefully planned manner of the relationships between major DOD medical facilities and adjacent centers of medical research and education. One promising result of these relationships might be the development of a series of research and training centers developed in conjunction with the related academic institutions to be devoted to problems of broad health significance but of special importance to the military; for example, tropical medicine, the management of trauma, environmental stress and disability, etc.

Mr. Richardson believes that there is room for a fruitful relationship between military medical services and private centers of medical research and education. Dr. Wilbur is evidently in full agreement with this approach as he is hoping to implement a plan by which he would give military health professionals an opportunity to be involved in an academic environment at certain points in their careers.

All of the above, in my opinion, clearly shows there is little enthusiasm for the establishment of a USUHS. In addition, a review of the hearings conducted by the Subcommittee on General Legislation of the Senate Committee on Armed Services will reveal the opposition to this institution by many distinguished organizations.

Mr. President, I ask unanimous consent that a list of the organizations be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

LIST OF ORGANIZATIONS

American Association of Dental Schools, Chicago, Illinois.

American Dental Association, Washington, D.C.

American Medical Association, Chicago, Illinois.

American Nurses Association, New York, New York.

American Public Health Association, Washington, D.C.

American Veterinary Medical Association, Washington, D.C.

Association of American Medical Colleges, Washington, D.C.

Federation of Associations of Schools of the Health Professions.

University of West Virginia School of Medicine, Morgantown, West Virginia.

Mr. DOMINICK. Mr. President, the retention problem for health professionals exists now and requires solutions that can be in force when the draft expires next year. All of the resources described by those who oppose establishment of the USUHS are available now, or could be available immediately through congressional or administrative action. Even under the most ideal conditions construction and beginning of operation of the USUHS is at least 5 years away.

It seems to me it is time we took advantage of the improvement in resources already provided by the American taxpayer. The facilities are available to provide the in-service training for medical personnel at appropriate times in their service careers. The Federal Government has been more than generous in assisting these civilian medical institutions in meeting the expanding demand for health professionals, and I foresee no major problem in these civilian institutions participating in this program.

Now, Mr. President, I would like to speak briefly about the scholarship provisions of H.R. 2.

The scholarship program approved in H.R. 2 is more generous than any previous public or private medical scholarship program. Under the scholarship program a student will receive not only full payment of tuition and fees but also a minimum of $5,200 per year. After a scholarship student completes his medical school education, he is then eligible for promotion to the pay grade of captain/lieutenant with the full pay and allowances of that grade. Currently, these pay and allowances are in excess of $14,000 for a married man not including tax advantages, medical, commissary and exchange privileges, and so forth. A scholarship student will earn, after medical school, in excess of $14,000 for perhaps 1 year of internship and 3 years of residency. This is considerably more, I am told, than he could expect to earn in civilian life while completing his intern and residency training. Thus, a scholarship student who begins his first year of medical school under the program could expect to receive substantially more than his civilian counterpart for the next 8 years—assuming 4 years of medical school and 4 years of intern and residency training. At the time he completes his mandatory service—payback time—his annual pay, at today's rates, would be $19,000. If he undergoes specialty training and incurs an additional obligation, his grade and annual pay at that time would be lieutenant colonel/commander and $30,000 respectively.

In conclusion, Mr. President, I strongly believe the problem can be solved without authorizing the USUHS, through the scholarship program and the special pay and bonus proposals, through administrative actions already being implemented or considered by the Department of Defense, and through programs already authorized by Congress for health manpower training assistance. Many authorities in the field of professional health services agree with my assessment and have so stated. I remain convinced the position adopted by the Senate was the proper one, and I regret we did not prevail in conference. It is my hope the Appropriations Committees of the Congress will also recognize the lack of need for this project and refuse to appropriate the necessary funds.

Mr. THURMOND. Mr. President, will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I am happy to yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to take this opportunity to commend the distinguished Senator from Virginia for his outstanding leadership in this matter. I do not know of any man in the Senate for whom I have higher respect than the able Senator from Virginia. He has gone into this question very deeply. He has given it great thought.

There is no question that we have in this country today a tremendous shortage of medical personnel. There is no question, in my mind, that we need more doctors, and that we need more dentists. By establishing this medical services university for the Armed Forces it will help to relieve that shortage.

I realize that it might be possible to get some medical personnel educated in a cheaper way and in some other manner but the trouble is, who will do it? Every medical university in this land is overcrowded.

The Medical University of South Carolina today has so many applications waiting that the number of applicants is far greater than the number of people they can accommodate. Many of them have to be turned back.

This measure will provide more medical staff for the people of America. I do not know what the situation will be. It might be that it will be extremely difficult for the armed services to obtain personnel. However, by having its own medical university, the armed services, in my opinion, will be able adequately to fill the medical positions in the armed services.

I can understand that there is great cost involved. I do not generally like to vote for any measure that involves great cost to the Government. I think that my record on economy shows that. However, I think that this is the best step for the armed services and for the country to take.

I commend the Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I thank the Senator from South Carolina, and I now yield to the Senator from New Hampshire..

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. COTTON. Mr. President, I appreciate the work done by the Senator from South Carolina. And I also commend the Senator from Virginia for the work he has performed.

I do not think that many people realize, although many in the Senate realize, that through the years we have year after year in our subcommittee faced this medical school problem. When one establishes a new medical school, it is not merely a case of building the buildings. It is not a case even of adding a laboratory to an institution. Even to advance a 2-year medical school course, the premed course, to a full 4-year medical school course, as they are doing in Dartmouth in my State, costs many millions of dollars in investments in the facilities themselves, the highly technical facilities necessary to train physicians and surgeons.

I think that this new venture will result, if it is going to prove to be efficient, in a terrific outlay before we get through with it. And I think that it will not add nearly as many personnel to the reservoir of doctors available to the armed services as it would if we were more liberal in responding, and we have tried to be as liberal as we could, to medical school after medical school all over this country which are seeking, even the 4-year ones, to expand their facilities.

I feel constrained to take the same position that my distinguished friend, the Senator from Colorado, takes. And while I will not ask for a rollcall vote, I feel that I must go on record as being opposed to the conference report.

Mr. HARRY F. BYRD, JR. Mr. President, I yield now to the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, I thank the Senator from Virginia. With his indulgence and with the indulgence of the Senate, I want to go beyond merely asking questions.

The slight division that exists among us underscores the thoroughness with which the subject matter has been gone into here, the seriousness of the problem and of our efforts to find possible solutions.

I have been familiar with this problem, that the military has, with reference to doctors for a good number of years. Coming as I do from a rural State, and from a rural area of that State, I do not think that anyone here is more acutely aware than I am of the need for doctors for our rural people. They are suffering.

Frankly, I have urged the military to get along with fewer doctors. I want the number reduced in order that we could have more doctors for the civilians. However, I am fully convinced in the light of the times and today's trends that the only possibility for the military to retain a sufficient nucleus for their medical corps is to have a medical school of their own to which they can attract some talented young men and inspire them and instruct them along the lines of making a career of military medicine.

The services are now able to retain less than 1 percent of the doctors that are brought into service. These figures are alarming. The services are just not able to cope with the conditions existing in outside life for these physicians. Military medicine has had many of the most distinguished men in the medical profession. I think in terms of General Heaton, now retired, who was one of the most outstanding men I have known since I have been here. He served for several terms as Surgeon General of the Army. Walter Reed Hospital was under his command. He was the personal physician for General Eisenhower when he was President. General Heaton was a man of outstanding administrative ability as well as being a great surgeon. I have talked with him for years about these problems and have consulted with him about the bill.

I am convinced of the need for this. I wanted to resist the services having their own medical school. However, I became convinced of the need for this because of years of experience with the problem and particularly now when the services are able to keep less than 1 percent of the physicians and surgeons.

We resorted to the Selective Service System to augment the number of personnel that the services can keep. However, those procedures have now collapsed. We are going to drop the Selective Service. The President announced that there would be no more Selective Service after June 30, 1973. We already knew that would be so unless Congress were to pass another law, because the law expires by its own terms on June 30 of next year. So does the draft for the doctors, the medical men. We had a draft for them for awhile. However, it was merged into one selective service. And that will expire on June 30.

We are faced with a situation about which we have to do something. We have the scholarship program and it is tightened up considerably from that in the House bill, so as to put it on a down to earth basis. I think it will be helpful. However, that is not enough.

I am converted and fully convinced that in order to keep a nucleus of the medical corps within the Services we will have to go to the other plan.

The Selective Service will expire. That is the major point that was in the minds of the conferees—that we had to do something about this.

There is another factor that ought to be mentioned, I think. The location for a new medical school is limited to Washington and the surrounding area. This is not to try to favor this area, but because of the unusual situation here from which the medical school would benefit.

I briefly read from the report:

Within the environs of the Nation's Capital, for example, may be found the National Institutes of Health, the Armed Forces Institute of Pathology, the Armed Forces Radiobiology Research Institute, the National Library of Medicine, Walter Reed Army Institute of Research, Walter Reed Hospital, the Naval Medical School and Research Institute, the Naval Hospital at Bethesda, Andrews Air Force Base Hospital, the Walter Reed Army Institute of Nursing, and the Hospital of the Veterans' Administration.

Mr. President, there is an amazing background of medical resources that would be available to this service school here once it is established.

This is not an open-ended authorization. There is a limit of 1 year and they will have to come back every year. So I think we have put in every safeguard and restriction that was reasonable in connection with this entire project. If it were not felt to be a necessary step by those supporting it, this bill would not be before the Senate. I hope the Senate will see fit to adopt the conference report.

Mr. HARRY F. BYRD, JR. I thank the able Senator from Mississippi.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. FULBRIGHT. How much is authorized?

Mr. HARRY F. BYRD, JR. The first year authorization is $15 billion.

Mr. FULBRIGHT. For construction?

Mr. HARRY F. BYRD, JR. That is correct.

Mr. FULBRIGHT. What is the estimate for operation?

Mr. HARRY F. BYRD, JR. For design, planning, and construction the amount is $15 million.

Mr. FULBRIGHT. What is the estimate for operation after that?

Mr. HARRY F. BYRD, JR. Approximately $20 million a year is the estimate.

Mr. FULBRIGHT. Do I understand that the Senator from New Hampshire feels that if this money were distributed among existing institutions it would create a better result?

Mr. HARRY F. BYRD, JR. Perhaps the Senator from New Hampshire should answer that question. I understand his position is as the Senator has stated it.

My position is that I would prefer, instead of authorizing this university at the present time, to have a more detailed study and a feasibility study before the authorization is enacted. But, as I mentioned earlier, the House conferees were adamant on this point. The House conferees receded from their position on other matters at issue with the Senate, particularly the size of the scholarships, which many of us in the Senate thought were too liberal, and the Senate conferees thought in this regard it would have to make some compromise also.

Mr. FULBRIGHT. I do not know how much study has been given to it, but in my State I am sure our existing institutions could use a little assistance. We have had physical facilities for a number of years greater than we could finance in furnishing the operation. We had a very fine, large hospital but we were short of funds for operation and there was a good deal of complaint. It is true there was a demand by students to go there but we were short of funds for the operation, not for the building.

I thought the Senator from New Hampshire had a point. This could well serve the military and at the same time increase the facilities and the capacity of facilities in the overall view.

When we speak of this amount of money it should go far in helping those institutions in being, many of which are starved for funds.

Mr. STENNIS. Will the Senator yield on that point?

Mr. FULBRIGHT. I shall yield in just a moment.

I refer to the concentration. We already have this great concentration. The Senator from Mississippi mentioned the very large concentration of facilities here. I am sure it is true of many States. I think they would benefit by the scholarships and by an increase in funds for operation. I think it would be beneficial to the military and the country as a whole.

I sympathize and agree with the point of view of the Senator from New Hampshire. I regret this kind of money could not be made available for increasing the capacity of existing institutions in administering these services. It is too late to do anything about it but I am sympathetic to the point of view of the Senator from New Hampshire.

Mr. HARRY F. BYRD, JR. I yield to the Senator from Mississippi.

Mr. STENNIS. Mr. President, I regret that I interrupted the Senator from Arkansas, but I thought he had concluded.

I was going to raise the point that even though we do not have the figures available here, a great deal of Federal support already goes to most of the medical schools, whether they are State-owned or privately owned. It has become a very substantial part of their support, as I understand it.

I have the privilege of serving on the subcommittee with the Senator from New Hampshire, where he renders a very valuable service. I refer to the HEW Subcommittee on Appropriations, where we have this problem and where we have support for these medical schools.

In my judgment we would be taking very little away from all of the multitude of medical schools that receive Federal assistance, and they deserve it, by having this establishment here, for the purpose I already outlined.

Mr. COTTON. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. COTTON. Mr. President, I thank the distinguished Senator from Arkansas for his observations. The Senator from Washington (Mr. MAGNUSON) is the chairman of our subcommittee, and I serve as the ranking minority member. As most members of the Committee on Appropriations know, it is up to the chairman and the ranking minority member to really listen to most of the voluminous evidence that comes before us. For years now we have been straining everywhere with all of our resources, when there is competition for so many of these programs, to try to eke out assistance for medical schools in this country. Most of them have a somewhat different problem than I gather from the Senator from Arkansas exists in his institutions.

They need more room, they need more buildings, more dormitories, and laboratories, they need more equipment, and the students are just waiting for them if they could be accommodated. Now, they are turned away. I cannot help feel that dollar for dollar, not criticizing the military at all, my suggestion would be more beneficial. The civilian medical schools are attached to the best universities in this land. It has been my observation that these old schools are better equipped, and it would be beneficial if they were given the financial backing to extend their facilities. We have a number of them that have been struggling along and have only had 2-year courses and then students have had to seek admittance to other medical schools that extend 4-year courses.

With the moneys we have been able to eke out, we have followed the practice of furnishing to medical schools assistance contingent on the additional students they were able to take in and also a system of scholarships and fellowships.

I am not speaking disparagingly of his effort, which has been so well described by the Senator from Mississippi, but it seems to me that when we have going institutions with years of experience and with the valued faculty that has long been trained in training young medical students, that we have a dollar investment, and that it would be best and most effective to invest in that. It would not be a difficult matter at all to establish scholarships so that there would be an appropriate proportion of those students who had scholarships under contract—scholarships under which they agreed to furnish their services to the armed services.

But we are really talking about a situation where we are locking the door to the stable when the cows are out. It is a thing that has gone all the way through and gone through the final conference with the House and Senate. I know the Senator from Virginia exercised his usual careful judgment. There is no one who is more careful and more sparing in the use of Government funds.

My position is entirely in accord with that of the Senator from Colorado's. I just feel that in this new departure, we are departing from the best medical and best fiscal practice.

Mr. DOMINICK. Mr. President, if the Senator will yield, we still have one more feather to put on this chicken, and that is when it comes before the Appropriations Committee, because the scholarship programs we have in here are separate from funding for construction of universities. So we could still go ahead, in the appropriation process, give funds to medical schools under the agreement that students would go into the service for 5 years, and still not find enough money for construction.

I assure the Senator from New Hampshire that, if, as, and when, there are hearings, I will be up here in opposition to the construction funds and in favor of the scholarship funds.

Mr. COTTON. I am glad to hear that.

Mr. HARRY F. BYRD, JR. Mr. President, I want to say, in that connection, that when the appropriation comes before the Senate, I shall listen very carefully to the views of the distinguished ranking Republican member on the Appropriations Subcommittee, the Senator from New Hampshire (Mr. COTTON).

I want to make my position on this clear. I do not want to mislead the Senate in any way. I opposed one provision in the bill, namely a Uniformed Services University. I opposed it before the subcommittee which I chaired; I opposed it in the full Committee on Armed Services, which, by a closely divided vote, sustained the position I took. When we came into conference, we ran into an entirely different problem.

The house conferees were determined on this issue, and the Senate conferees felt that, if we were going to get any bill at all, and this is only part of the total legislation, the Senate conferees must be prepared to make some compromise, just as the House conferees compromised by accepting all other revisions written into the bill by the Senate and the Senate Committee on Armed Services.

So the total package—the conferees report—is not to my liking in every respect. Nevertheless, it was the best the Senate conferees could do in our negotiations with the House of Representatives. The purpose of the legislation is to obtain and retain qualified medical personnel for the armed services.

Mr. KENNEDY. Mr. President, this conference agreement reflects a conscientious effort by the House and Senate conferees to come to terms with the problem of recruiting physicians for the U.S. Armed Services. Given our changing military draft system, it will be increasingly difficult in months and years ahead to recruit a sufficient number of qualified physicians to fill these needs. Without the draft, the military services are not in a position to compete in the marketplace for health professionals. The number of physicians available is substantially below our Nation's need, and the incomes they make are considerably higher than are possible in the armed services.

The Senate Health Subcommittee, which I chair, has encountered this same recruitment problem with respect to the Public Health Service Commissioned Corps. The PHS Corps is also one of the Nation's uniformed services, and is available to young physicians as a means of fulfilling their draft obligation. The Commissioned Corps staffs the Indian Health Services, the Communicable Disease Center in Atlanta, Ga., the National Health Service Corps, the Public Health Service hospital and clinic system, and a variety of other important medical posts. The possibility of serving in these difficult posts as a means of satisfying military draft obligations has been a primary recruitment factor in bringing young physicians and other health professionals into the Public Health Service. Like the other uniformed services, the Public Health Service Commissioned Corps cannot effectively compete for health professionals without this incentive.

The Congress has already taken several steps to alleviate the shortage of physicians in our Nation. The Comprehensive Health Manpower Training Act of 1971 offered expanded Federal support to our Nation's medical schools in exchange for expanded enrollments. If funded at its full authorization levels, this law would eliminate our Nation's shortage of physicians by 1978.

Also the Congress is currently considering legislation that would adjust pay scales for military health service personnel to be more competitive with income levels of health professionals in the civilian sector. Ultimately, greater availability of physicians, plus more competitive salaries should help resolve the military's problems of recruitment.

The conference report before us, however, offers several additional recruitment advantages to the military. First, it establishes a substantial scholarship program for health professional students who will commit themselves to several years of military service. In addition to paying educational expenses, the program pays the student and his dependents a small but livable salary for up to 6 years of medical study. This scholarship program matches very closely the scholarship program established for the Public Health Service Commissioned Corps in S. 3858, which was reported by the Health Subcommittee, and passed by the Senate on August 18, 1972. It is important that these programs be comparable, and that the Public Health Service be given devices for attracting physicians and other health professionals that are equally enticing to those used by the military.

H.R. 2 also establishes a uniformed services university of the health sciences. The intent is to enhance medical careers in the military service by creating teaching posts in this institution, as well as to attract young students to obligate themselves to a period of military service in exchange for a medical education. Given the current national shortage of medical school capacity, the availability of 100 or more additional places should certainly serve as an effective recruitment device. Every year, thousands of qualified students are turned away from medical and other health professional schools in this country simply because there is not room. Many of these students will undoubtedly be attracted to exchange military service for medical education. In addition, of course, a quality institution will be able to attract students who are inclined to a military way of life.

However, a military medical school raises a number of important questions. First, it raises the possibility of a special and separate health educational system being established in the country which is not compatible with institutions in the civilian sector.

Second, it assumes a Federal responsibility for the direct training of future Federal/military personnel which is without precedent.

I have long been convinced that the health educational institutions in our Nation must be reformed in order to respond to the challenges that face us in our country. I have also been convinced that these institutions are capable of producing the personnel we need, given adequate Federal support, and incentives and opportunities for change. Because of these misgivings, I am pleased that the Senate insisted on establishing an annual line item authorization for this new university. This will allow a close annual review by both the authorizing and appropriation committees of the progress in planning and implementing the university.

Overall, I believe H.R. 2 offers some important mechanisms for the training and recruitment of physicians, and I congratulate the committees on their work. The Health Subcommittee will watch progress on both these programs very closely for their applicability in other areas.

Mr. HARRY F. BYRD, JR. Mr. President, I move the adoption of the conference report.

The motion was agreed to.

QUORUM CALL

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The Senate continued with the consideration of the joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

Mr. ROBERT C. BYRD. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. The question is on the amendment of the Senator from Montana, No. 1434, to Senate Joint Resolution 241.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BUCKLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUCKLEY. Mr. President, I rise to speak in support of the amendment to Senate Joint Resolution 241 which has been offered by the Senator from Washington. This amendment simply expresses the reasonable understanding of the Congress about the future relationship on strategic matters between the United States and the Soviet Union. This is an entirely appropriate moment for the Congress to share the responsibility with the President for the making of an important component of our foreign policy.

As I understand it, the Jackson amendment would simply state three understandings of what U.S. policy should be with respect to the forthcoming second round of negotiations with regard to strategic arms limitation.

First, the amendment provides that the failure of the United States and the U.S.S.R. to achieve a permanent treaty on offensive arms which would have the effect of limiting the threat to the ability of our land-based strategic deterrent forces to survive a Soviet first strike would jeopardize our "supreme national interests."

Mr. FULBRIGHT. Mr. President, will the Senator yield for a question?

Mr. BUCKLEY. Certainly.

Mr. FULBRIGHT. I was under the impression that we were going to vote on the pending amendment. The amendment the Senator is addressing his remarks to has not been offered, is that correct? Is it correct that the Jackson amendment has not been offered?

Mr. BUCKLEY. It certainly has been the subject of widespread speculation and discussion.

Mr. FULBRIGHT. I mean it has not been called up. It is not before the Senate; is that correct?

Mr. BUCKLEY. It has not been offered; no.

Mr. FULBRIGHT. I would like to try to clarify the situation before us, if I could. The Senator from Montana has offered his amendment as the pending business. Is it the purpose of the Senator from New York not to allow a vote on the Mansfield amendment today?

Mr. BUCKLEY. No. I believe, with all due respect to the distinguished chairman, that in considering the Mansfield amendment one must also keep in mind the alternative, which we all know will be offered in due course, namely, the Jackson amendment. Therefore, by speaking in favor of the Jackson amendment, I impliedly am speaking against the Mansfield amendment.

Mr. FULBRIGHT. I do not want to be misunderstood. The Senator has a perfect right to speak about it. I am trying to understand what the parliamentary situation is.

The request has been made for a package unanimous-consent agreement on all amendments. I and some other Senators interested in this matter have declined to make that agreement. However, we are—I am, and I think all of those interested in my point of view are—perfectly willing to proceed to vote on all of these amendments as they arise. That is, we are not disposed to delay consideration of the resolution or any amendments thereto, and I have thought we would be able to proceed to consideration of all amendments, and disposition of this matter today or possibly tomorrow.

What I am trying to understand is whether or not it is the position of Senators who support the position of Senator Jackson that they will not allow a vote on any amendments unless they get an overall agreement on all amendments. I am only inquiring what the situation is; that is all.

Mr. BUCKLEY. I regret that I am not in a position to speak for the Senator from Washington. I am sure he could clarify his position.

Mr. FULBRIGHT. I would like, if the Senator will allow me, to make my position very clear that I am prepared to proceed to a vote on the pending amendment and all subsequent amendments in order, and without any undue delay whatever. There is no disposition on my part or that of anyone associated with me and interested in this matter to delay any vote at all. We can dispose of this amendment today if the Senate will permit, or certainly tomorrow, because I think it requires a matter of only a few minutes. According to Senator MANSFIELD's statement that he made yesterday, he will use only a few minutes. I certainly would not take more than 5 minutes on it. But we do object to tying down all amendments and all freedom of debate in the Senate.

As the Senator knows, the rules of the Senate, absent unanimous consent, provide for debate. Rule XXII was a matter of debate here in the Senate for many years, and many of us fought very hard and long to prevent its emasculation. I object to, by unanimous consent, emasculating freedom of debate.

I am opposed to delay. I am more than willing, as a matter of fact anxious, to dispose of this matter. I want to make my position clear that I am not anxious to delay any vote at all. I am prepared to move rapidly to dispose of all amendments and the resolution itself.

I think it would be very useful if those supporting the Jackson amendment would make their position clear on the parliamentary matters. I am not arguing about the substance of it at this time.

Mr. **BUCKLEY**. I thank the Senator from Arkansas for his observations, but as I say, I do believe that we have before us one of the very critical matters involving not only foreign relations but the future security of the United States. I believe it is of such critical importance that it is necessary that we fully understand the implications of each amendment that comes before us.

As I say, I personally feel that the way to analyze the merits of the Mansfield amendment is really to talk about the Jackson amendment. It is for that reason that I would like to proceed with my remarks about the Jackson amendment, in the hope that those who might be inclined to vote in favor of the Mansfield amendment would reserve judgment until they consider the alternatives which will be presented to them.

Mr. **MANSFIELD**. Mr. President, will the Senator yield?

Mr. **BUCKLEY**. Certainly.

Mr. **MANSFIELD**. Just as a matter of information, could the Senate have the benefit of knowing how long the Senator intends to address it?

Mr. **BUCKLEY**. About 15 or 20 minutes.

Mr. President, as I understand it, the Jackson amendment would simply state three understandings of what U.S. policy should be with respect to the forthcoming second round of negotiations with regard to strategic arms limitation.

As I mentioned earlier, the first of these understandings would provide that the failure of the United States and the U.S.S.R. to achieve a permanent treaty on offensive arms which have the effect of limiting the threat to the ability of our land-based strategic deterrent forces to survive a Soviet first strike would jeopardize our "supreme national interests."

This aspect no more than restates the obvious. It is well understood that the terms of the interim agreement provide for a significant quantitative advantage in favor of the Soviet Union in both intercontinental and submarine launched ballistic missiles. Moreover, because of the very large size of some Soviet missiles, the interim agreement provides a 4- or 5-to-1 advantage for the Soviet Union in terms of the most important long-term measure of the capacity of a ballistic missile force, namely its payload capacity or "throw weight."

It is important to appreciate that if the Soviet Union were to achieve the same level of warhead design sophistication which the United States now enjoys on a production line basis, they could deploy up to five times as many independently targeted warheads on their ballistic missiles as could the United States.

The United States will be able to accept the quantitative inferiority embodied in the interim agreement only if the agreement is truly "interim." At the present time, the United States enjoys a 2-to-1 margin in the number of deployed warheads over the Soviet Union. This advantage is one which is certain to disappear over the next few years as the Soviet Union deploys its own multiple warheads.

It has been argued that the Soviet Union would require 5 or more years to deploy multiple warheads, and thus there is ground for complacency for the duration of the interim agreement. The record on the subject suggests that there is no such ground.

It took the United States 7 years to go from fission bomb development to thermonuclear bomb development—from 1945 when the first A-bomb was detonated to 1952 when the first H-bomb was detonated. The Soviet Union detonated their first A-bomb in 1949, but detonated their first H-bomb only 5 years later. They developed the technique for artificial earth satellites—Sputnik—ahead of the United States, and have shown a willingness to expend resources for strategic nuclear forces far beyond the requirements of simple deterrence. It took the United States only 3 years to develop the hardware for its own multiple warheads. It would be highly imprudent for the Congress to assume that the Soviet Union would be so technologically retarded that it would be incapable of developing and deploying multiple warheads within a 5-year period.

It seems to me most likely that if we allow the imbalance in the interim agreement to remain beyond the 5-year term of the agreement, the threat to our land-based deterrent would become stark.

Mr. President, it is important that we understand that the language of the Jackson amendment is not substantially different from language used by administration witnesses in hearings on the interim agreement before the Committee on Foreign Relations and the Committee on Armed Services. These witnesses made it clear that the development by the Soviets of the ability to threaten the survivability of our land-based deterrent forces would in fact prove an unacceptable threat to our national security. While they did not necessarily agree as to precisely when the Soviet Union would be able to threaten the survival of our deterrent forces, none doubted that the Soviet Union had the basic elements with which to do so if the life to the agreement were extended beyond its 5-year-term.

By accepting the amendment under consideration, Congress simply reinforces the idea that it correctly understands the interim agreement to be in fact "interim" in effect and in no way a permanent solution to the problem of appropriate strategic nuclear force levels with respect to either ICBM's or SLBM's.

The second element of the Jackson amendment represents nothing more than commonsense. No negotiated agreement can be considered "stable" if it fails to insure that there will be no disadvantage for either side. All the amendment does is to apply to a permanent agreement limiting offensive strategic weapons the logic of the ABM treaty which places equal limits on each side with respect to the number of ABM interceptors which can be deployed by either side. If an ABM treaty were offered which provided the Soviet Union with a permanent 4- or 5-to-1 advantage in the critical parameter of ABM capacity, such a treaty would undoubtedly be overwhelmingly rejected by Congress as well as by the American people, and with good reason.

The Jackson amendment would apply the commonsense principle of "no disadvantage" by requesting that any future treaty "not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union."

It is difficult to see how any exception can be taken to such a proposition. As mentioned earlier, the United States can "live with" temporary inequality, but permanent inequality can only be a source of conflict.

The third element of the Jackson amendment places the Congress squarely on record as supporting those research and development and procurement efforts which will assure the maintenance of a strategic force which will leave no doubt as to the United States intent to preserve a position of nuclear parity. The Senate has wisely approved the funding for the current effort for the B-1 bomber and the Trident submarine and missile program. The Jackson amendment would emphasize the fact that Congress will not permit the deterrent capacity of any element of our strategic forces to degrade over time.

There is no more important effort Congress can make than to assure a continuing high level of research and development for it is our only reliable hedge against technological surprise, and our only insurance policy against Soviet evasion. Research must be pressed far more vigorously than it has in the past because of the risks inherent in any arms limitation agreement—more so because the pending agreement is merely "interim" in nature.

Finally—and this is another area in which I believe that the Mansfield amendment is defective, because the Jackson amendment describes the fundamental understandings of the Senate which are in accord with those who negotiated the SALT accords—this statement of the Senate's position will provide the President with the maximum in bargaining strength in the second round of SALT, while placing Congress squarely on record as supporting a sensible permanent agreement limiting offensive weapons on a basis which will yield neither nation any long-term advantage.

Mr. President, it is for these reasons that I urge that the Mansfield amendment not be adopted and that, instead, the Senate regard favorably the proposals which are incorporated in the amendments which will be submitted by the Senator from Washington.

NATIONAL HEART, BLOOD VESSEL, LUNG, AND BLOOD ACT OF 1972—CONFERENCE REPORT

Mr. MANSFIELD. Mr. President, on behalf of the Senator from Massachusetts (Mr. Kennedy), I submit a report of the committee of conference on S. 3323, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. Stevenson). The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3323) to amend the Public Health Service Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack against diseases of the heart and blood vessels, the lungs, and blood, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

(The conference report is printed in the House proceedings of the Congressional Record of August 16, 1972, at pp. 28358–28360.)

Mr. MANSFIELD. Mr. President, I understand that this has been cleared on all sides.

Mr. JAVITS. Mr. President, I am honored to have been referred to as the "father" of the National Heart Institute—having introduced on June 9, 1947, H.R. 3762, joined by then Senator, now Representative, Pepper, of Florida, which provided for the establishment of the Heart Institute within NIH—I am particularly pleased to endorse strongly and to encourage my colleagues to support the conference report on the National Heart, Blood Vessel, Lung, and Blood Act of 1972 (S. 3323), which I cosponsored with the Senator from Massachusetts (Mr. Kennedy).

This legislation would establish a national commitment to combat heart disease—the Nation's No. 1 killer, killing more than 1 million persons annually, and leading health problem—and other major causes of death and disability.

This legislation will permit us to launch a more effective effort against heart, blood vessel, lung, and blood diseases in accordance with the President's commitment to give, and I quote from his state of the Union address:

increased attention to the fight against diseases of the heart, blood vessels and lungs, which presently account for more than half of all the deaths in this country.

The major differences between the Senate- and House-passed bills were that the Senate bill contained provisions relating to emergency medical services; established prevention programs—in accordance with a most worthwhile amendment offered by the ranking minority member of the Health Subcommittee, the Senator from Pennsylvania (Mr. Schweiker); and authorized $1.470 billion over a 3-year period, while the bill passed by the House authorized appropriations of $1.290 billion. In essence, the conference agreement retained the emergency medical service and prevention programs provisions and split the money figures, authorizing $1.380 billion.

Mr. KENNEDY. Mr. President, all of the differences between the respective versions of the bill have been resolved, and this resulting bill contains all of the essential elements of an effective program to combat these major diseases. The essence of the Senate-passed bill is contained in the conference report.

Last year, Mr. President, the Congress enacted sweeping legislation in respect to the conquest of cancer. Heart disease claims twice as many victims as does cancer. And the bill the Senate has before it now is designed to do all that is necessary in order to advance the attack against these diseases.

The bill calls for the Director of the National Heart and Lung Institute of the NIH to carry out a comprehensive program for, first, research into the cause and the prevention of all forms of heart, lung, and blood diseases; and second, research into basic biological processes in respect to the heart and lung; third, research into techniques, drugs, and devices used in the diagnosis and treatment of persons suffering from these diseases; fourth, establishment of programs for field studies and large-scale testing and demonstration of preventive therapeutic and rehabilitative approaches, including emergency medical services for persons suffering from heart and lung diseases; fifth, public and professional education relating to all aspects of these diseases.

The bill, Mr. President, also includes special prevention and control programs for these diseases. These prevention and control programs have been modeled after similar programs which were included in last year's cancer legislation. For this special program, the bill authorizes a total of $105 million for 3 years.

The bill also authorizes the Director of the Heart and Lung Institute to provide for the development of 15 new centers for basic and clinical research into the diseases of the heart, blood vessels, and blood. In addition, the bill authorizes the development of 15 additional new centers for basic and clinical research into lung diseases, including bronchitis, emphysema, asthma, cystic fibrosis, and other lung diseases of children.

As a result of the conference, Mr. President, the bill now requires that the 15 centers in respect to heart and blood diseases shall also be utilized for prevention programs, including programs to develop improved methods of detecting individuals with a high risk of developing heart disease, programs to develop improved methods to eliminate those factors which cause those individuals to be vulnerable to heart diseases, and programs to develop more skilled health professional manpower in the area of prevention.

In addition to the funds which are authorized for the special prevention and control program, the bill authorizes a total of $1.275 billion over the next 3 years. This fund level is a compromise between the Senate and House bills.

Mr. President, the Senate Health Subcommittee has worked very hard on this legislation, and I believe that the conference report we bring to the Senate is an excellent one. Without question, the Heart and Lung Institute at the NIH along with the other research institutes at the NIH need to get on with the effort envisioned by the legislation. I am convinced that with a sustained effort on their part, we will increase the likelihood of making significant advances against these diseases which claim such a heavy toll in death and disability.

I urge the adoption of the conference report.

Mr. MANSFIELD. I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The Senate continued with the consideration of the joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

Mr. MANSFIELD. Mr. President, I have listened with interest to the remarks of the distinguished Senator from New York (Mr. Buckley) in his opposition to the so-called Mansfield amendment to the interim aid agreement on offensive weapons, which is now the pending business.

It distresses me to find that he takes issue with the remarks of the President of the United States as contained in the declaration of principles issued by the President of the United States and the General Secretary of the Central Committee of the CPSU.

For example, let me point out that the second declaration of the declaration of principles signed by Richard Nixon, President of the United States of America, at Moscow, on May 29, 1972, is the exact equivalent of the amendment offered by the Senator from Montana, now speaking—an amendment, incidentally, cosponsored by the distinguished ranking Member of this body, the Senator from Vermont (Mr. Aiken), the Senator from Kentucky (Mr. Cooper), the Senator from New York (Mr. Javits), and the Senator from Idaho (Mr. Church).

It is difficult for me to understand how anyone can be for what the President of the United States has agreed to in Moscow and to stand up on the floor of the Senate and argue against the proposal which is now before the Senate.

Mr. President, the stabilization that is sought under phase I of SALT means that each side will be assured of the total validity of the other's deterrent capacity. The importance of such assurance is not diminished, I think, by the approval of new weapons development such as those contained in the military procurement authorization bill. But the importance of SALT would, indeed, be diminished, if not obliterated, if it were suggested that the agreement, rather than stemming the tide of arms development, should be construed as a signal to increase this Nation's might unilaterally to a point beyond that of sufficiency or that of providing sufficient retaliation as a deterrent.

The issue before the Senate, therefore, is whether this Nation is prepared to take a first step toward some limitation or whether it will, instead, continue the saber-rattling so long a part of the arms race in which we have now been engaged for nearly three decades. Either we begin now to end the arms race or we do not. Either we take this step—and do so in good faith—or we do not.

The SALT Treaty ratified so overwhelmingly on August 3 set out the framework for this important initiative. It is within that framework—limiting defensive weapons—that the idea of strategic weapons is made valid and totally creditable. This is the great breakthrough occasioned by phase I of SALT. With it, this Nation need not continue in the arms race and its lack of participation need not impair its security in the least. With it this Nation can determine the sufficiency of its deterrence on its own and without comparison to the offensive deterrence of the Soviet Union. Phase I, in effect, codifies the concept of sufficiency; a doctrine that permits an independent and autonomous judgment as to how much of a deterrent force is enough. If what we have is sufficient, we need no more. That we can eliminate an enemy 10 times over with existing force is enough; it is all we need. That another party's force can eliminate us 20 times over is of no concern. Redundance is not and should not be a part of our national policy.

In that light, I might ask, what does the pending amendment do to enhance the resolution before the Senate?

It makes it clear beyond question, I believe, that we endorse expressly the declaration signed by the President which is designed to ease and avoid military confrontations to the greatest extent possible. Most important, I think, is that part of the declaration which would deny advantage to one side or the other. As it is stated: "both sides recognize that efforts to obtain unilateral advantage at the expense of the other, directly or indirectly, are inconsistent."

They are inconsistent. That is what the President signed. And it is to affirm that endorsement that this amendment is proposed.

With it, and with the underlying SALT agreement, this Nation is not denied its obligation to remain strong and to maintain a sufficient deterrent force. That national goal remains totally secure.

What we do say, however, is that this small step away from arms escalation should not be twisted into an augmentation of the arms buildup. Let us use SALT as a signal for further and more comprehensive agreements, and not as a signal to obtain a new defense posture, one which is unilateral and could only add to the danger of military confrontation.

Mr. President, I am prepared to vote on this. I am prepared to enter into a reasonable agreement on this amendment and I do so because of the fact that, on yesterday, it was made crystal clear—if I may use a well known phrase—that there would be no unanimous consent agreements entered into for a package for any bill which may come before the Senate.

So, Mr. President, if there is no chance of getting a reasonable agreement, it is my intention to move to table the pending amendment. I shall vote against the tabling motion but I think we should have a little movement.

Therefore, Mr. President, I move to table my own amendment.

Mr. FULBRIGHT. Mr. President, will the Senator yield for just a moment? Will he withhold his request?

The PRESIDING OFFICER (Mr. BENTSEN). The motion is not debatable.

Mr. FULBRIGHT. I thought the Senator from Montana said if he could get a reasonable amendment?

Mr. MANSFIELD. A reasonable amount of time.

Mr. FULBRIGHT. I suggested yesterday that he would take 20 minutes. Has the Senator reason to believe that we cannot get an agreement to vote in 20 minutes?

Mr. MANSFIELD. That is correct.

Mr. President, I move to table the pending amendment and suggest the absence of a quorum so that I may ask for the yeas and nays.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. BENTSEN). The question is on agreeing to the motion of the Senator from Montana to table his amendment No. 1434.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. CANNON), the Senator from North Carolina (Mr. ERVIN), the Senator from Oklahoma (Mr. HARRIS), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. McGEE), the Senator from South Dakota (Mr. McGOVERN), the Senator from New Hampshire (Mr. McINTYRE), the Senator from Montana (Mr. METCALF), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES) is absent on official business.

Mr. SCOTT. I announce that the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), and the Senator from Oregon (Mr. HATFIELD) are necessarily absent.

The Senator from Maryland (Mr. MATHIAS) is absent to attend the funeral of a friend.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Kentucky (Mr. COOK) is detained on official business.

On this vote the Senator from Kentucky (Mr. COOK) is paired with the Senator from Oregon (Mr. HATFIELD). If present and voting, the Senator from Kentucky would vote "yea" and the Senator from Oregon would vote "nay."

The result was announced—yeas 31, nays 52, as follows:

[No. 393 Leg.]

So the motion to lay the Mansfield amendment on the table was rejected.

Mr. MANSFIELD. Mr. President, once again I will make an effort——

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. The Senate will not proceed with its business until there is order. Those Senators who are conversing will please take their seats.

The Senator from Montana may proceed.

Mr. MANSFIELD. Mr. President, I wonder if it would be possible to reach a time limitation just on the pending amendment. Efforts have been made but so far they have been unsuccessful. I would point out to the membership on the basis of statements made yesterday that the Senate has been told that agreements covering a package would be objected to. That is every Senator's right, just as it is to object to a unanimous-consent agreement on a pending amendment. But I would point out that not later than the hour of 2 p.m. the Senate on the second track turns to the revenue-sharing bill. I would point out this is a most important Interim Agreement on Offensive Weapons which the President of the United States consummated.

I would point out that the language of the pending amendment quotes in toto the second declaration of the declaration of principles issued in Moscow and signed by President Richard Nixon and the General Secretary of the Communist Party, Leonid Brezhnev.

So, in an attempt to achieve a little movement, I made a motion to table, which I voted against as I stated I would. Now, in an attempt to get something beyond motion—a little action—I would like to request of the distinguished Senator from Washington if he would consider the possibility of a brief limitation on the pending amendment so that we could at least get that far along the road to consideration.

Mr. SCOTT. Mr. President, will the distinguished Senator yield to me first, very briefly?

Mr. MANSFIELD. I yield.

Mr. SCOTT. I would just like to underscore the request of the distinguished majority leader. The calendar is running against us, and we are all much aware of the passage of time and of the overhanging burden of legislation. I hope we can come to some agreement.

Mr. MANSFIELD. I appreciate the comments of the distinguished Republican leader.

I yield to the distinguished Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington.

Mr. JACKSON. Mr. President, as the Senate knows, I have made very clear my willingness to reach a unanimous-consent agreement affecting all the amendments. Realistically, the amendment that the Senate must face up to is the amendment that I cosponsored with 30 colleagues, and it is in this area where the problem of consent has been encountered. I think if we are going to be realistic, we must face up to that issue, and I am ready and willing, as I have been from the very first day, to enter into a unanimous-consent agreement on all the amendments and final action on the pending resolution, but I cannot turn around and approve a hit and miss approach. If we do that, then we run into the problem of motions to table, among other things, on which no notice need be given. Given that approach, Senators, of course, will not have an opportunity to be advised in advance when the vote is going to take place. But I am ready and willing, as I have been from the very beginning, the very first day, to reach a unanimous-consent agreement on all amendments and on final action on the resolution.

Mr. MANSFIELD. What the Senator from Washington has said is correct, but the leadership, apart from the amendment of the Senator from Montana which is now pending, is faced with a dilemma. We were told by two Senators on yesterday that they would object to any package unanimous-consent agreements. Now we are told by the distinguished Senator from Washington—and he has been most consistent—that he will agree to nothing but a package unanimous-consent agreement. If we continue to operate on that basis, the Senate will face an impasse which it will not be able to bypass unless the preference of individual Senators will give way to the desires of the Senate as a whole.

Mr. BAKER. Mr. President, will the Senator yield briefly on that point?

Mr. MANSFIELD. Yes.

Mr. BAKER. Mr. President, on yesterday I was one of the two Senators who indicated that he would object to any unanimous-consent request that included a prohibition against nongermane amendments. I did not mean to say on that occasion, and I thought I did not say, that I would object to all unanimous-consent agreements otherwise employed.

As far as I am concerned, a package is fine as long as it does not include a prohibition against nongermane amendments or unless there is first an opportunity for me to examine such a unanimous-consent agreement.

In this particular case I have no objection to a provision in the proposed unanimous-consent agreement against nongermane amendments. I believe I have never so objected, but I want to preserve my right to object to any such proposal for the remainder of this term. In this case I have no such objection. I certainly do not want to stand in the way of an agreement that will expedite action.

Mr. MANSFIELD. I appreciate that statement. The Senator was aware that the leadership was trying to protect his right on the basis of statements made not only on yesterday but on previous times.

What is the attitude of the distinguished Senator from New York, who indicated he might have some reservations to unanimous-consent agreements under certain circumstances?

Mr. JAVITS. Mr. President, if the Senator will yield, the Senator from New York wished to provide against unanimous consents which allowed nongermane amendments. If, as the Senator from Tennessee (Mr. BAKER) says, he is not going to raise that objection with respect to this matter, I certainly do not, because it does exactly what I want, to wit, permits only amendments that are germane.

Mr. MANSFIELD. Then, Mr. President, it appears the two objections which I had assumed would come from the other side have now been laid aside temporarily.

I would like at this time to ask the distinguished chairman of the committee if he would give consideration, along with his interested colleagues—and he has to talk with them—to a package agreement for a time limitation on each amendment, a time limitation on the measure itself, and perhaps a time certain on which a final vote could be taken.

Mr. FULBRIGHT. Mr. President, if the Senator will yield, we did discuss this question. I have discussed it with a number of my colleagues, some of whom have amendments at the desk. We were reminded that the Senate used to pride itself on freedom of debate. This is a proposed limitation on all aspects of the measure, including all amendments, even those which have not yet developed and which could develop. This kind of limitation is unusual and inappropriate for important measures. We are quite willing to agree to a time limitation on the Senator's amendment and on every amendment as it comes up, reserving the right, on new amendments that may come up, to have additional time.

There is no disposition on my part, or on the part of any of those associated with me in this matter, to delay action. I personally believe we could dispose of the matter today—not, of course, by 2 o'clock, but in the course of a few hours—if we could proceed under the traditional rules of the Senate, and not by unanimous consent.

All of those who have amendments say they will not agree to the requirement of the Senator from Washington that there be a limitation on every amendment and that that must be agreed to—in other words, the package.

It is true that the Senator has taken this position from the beginning. I only point out that it is not the traditional way for the Senate. It operates under rule XXII, among others, which used to be considered important in the Senate, and I still consider it important. I would personally not be disposed to agree to the Senator from Washington's proposal lest we put ourselves in a straitjacket on all amendments and the final disposition of the bill.

Mr. JACKSON. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JACKSON. I would point out to the Senator that, in connection with the treaty that was submitted to this body by the President covering agreement with the Soviet Union on antiballistic missiles, we entered into a unanimous-consent agreement, and I agreed to that at the outset, and made clear then that I would do the same on the interim agreement. So, speaking of precedent, there have been many, and there is the one just before this one in which we agreed to a stipulated time of debate and vote by unanimous consent. That is not unusual in this body.

Certainly, with a number of Senators being away, I cannot agree to a situation in which, if I bring my amendment up, a motion to table can be offered at any time. I want to cooperate, and I have from the very beginning, as the Senate knows, because I made it clear, when both of these Moscow accords were submitted by the President, that I would agree to a unanimous consent. That worked out well on the ABM debate, and I do not see why we cannot apply that same principle to the interim agreement.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. MANSFIELD. Yes, indeed.

Mr. PASTORE. It strikes the Senator from Rhode Island that the crucial amendment which we have to face up to is the so-called Jackson amendment, of which I am a cosponsor.

I was wondering if we could not consider, as a minipackage, not only that the Mansfield amendment be voted on at a time certain, but that it be followed by the so-called Jackson amendment, to be voted on at a time certain, without a motion to lay the amendment on the table.

Mr. MANSFIELD. That would be agreeable to me, if it could be done.

Mr. FULBRIGHT. May I inquire of the Senator, what about amendments to the Jackson amendment? Would they be subject to motions to table?

Mr. PASTORE. Well, the agreement would have to cover the amendments to the Jackson amendment.

Mr. FULBRIGHT. I would be perfectly willing to vote on this amendment. As I understand, the Jackson amendment has not been offered yet.

Mr. PASTORE. That is true, but everybody knows he is going to offer it.

Mr. FULBRIGHT. When he offers the Jackson amendment, I think we could get agreements on each one as they are offered, but there may be some additional ones. We do not know what is going to happen either on the Mansfield amendment or on amendments to the Jackson amendment.

Mr. PASTORE. Well, if amendments and bids for agreement are to multiply, it strikes the Senator from Rhode Island we are going to be here until Christmas.

Mr. FULBRIGHT. Does not the Senator from Rhode Island agree that the Senate rules provide for freedom of debate, and that this business of unanimous consent has grown up largely on routine legislation?

Mr. PASTORE. I know, but that is for freedom of debate, not frustration; and it is not limitless. I mean there comes a point where the will of the Senate has to be expressed. I do not know how the Jackson amendment is going to fare, but I do know it is a crucial amendment, and if it is defeated, that is the end.

On the other hand, if it is to prevail, I do not think any attempt to dilute it would carry. If it is the will of the Senate to accept the Jackson amendment in an unadulterated form, I do not think any attempts to weaken it will succeed, and the need here is to bring about a decisive test. The Senator from Montana moved to lay his own amendment on the table in order to exercise some kind of a test. The will of the Senate has been expressed, and we have refused to lay it on the table. Therefore, it is the active, pending business. All I am suggesting is that we vote on the Mansfield amendment, and I shall vote for it, and then, if the Jackson amendment comes up, I shall vote for it, too.

Mr. FULBRIGHT. I agree with the Senator. I am willing to vote on the Mansfield amendment immediately, and then consider the Jackson amendment.

Mr. PASTORE. Yes.

Mr. FULBRIGHT. Why does not the Senate do that? Why does the Senator say now we have got to agree to a limitation on all possible amendments to the Jackson amendment?

Mr. PASTORE. Because I have a pretty good idea just what they are, and the Senator from Arkansas knows what they are.

Mr. FULBRIGHT. I do not see why we do not proceed to vote on them.

Mr. PASTORE. The point is, we keep talking and do not vote on anything.

Mr. FULBRIGHT. I will stop talking. Let us vote.

Mr. MANSFIELD. Mr. President, there is a lot of sparring going on on this bill. It has been going on for some time. I would hope that a time would come when Senators would subordinate their personal feelings and personal desires and consider the position in which the Senate finds itself during these particular days covering the beginning of a political campaign and covering the matters which confront us in these weeks and maybe months ahead, keeping in mind the fact that this is a presidential proposal which was consummated at great length by men in whom we all have confidence—I refer to Ambassador Smith and his colleagues, and I certainly refer to the President of the United States, who signed this in behalf of all of us.

To go on like this, I do not know where it is going to end, but I would hope, in view of the fact that there is no possibility at this moment of achieving an agreement, that the Chair would put the pending amendment to the Senate for a vote.

The PRESIDING OFFICER (Mr. BENTSEN). The question is on agreeing to the amendment of the Senator from Montana.

Mr. JACKSON. Mr. President, I just want to say to the Senator from Montana that I am willing to sit down again and see if we can find some area of agreement here much along the lines suggested by the Senator from Rhode Island, and that is to get an agreement for a time certain to vote on the Mansfield amendment and my amendment, together with the amendments thereto. I am willing, certainly, to make another try at it. But I believe that we are not going down the right road here to bring this to an early and final solution unless we face up to the main controversy, which is the amendment that I along with some 30 Senators have cosponsored. I think the sooner we face up to that, the sooner we can bring this to a final conclusion. I am willing to explore, this afternoon, other alternatives to those we have discussed as a possible means of trying to resolve it. But I want to again emphasize that the unanimous-consent approach has just been applied to a treaty, which is a permanent obligation unless terminated by either party, and when we apply unanimous-consent procedures in that kind of situation, it seems to me that we ought to at least be willing to treat the pending matter, which is not a treaty, on the basis of some reality, and that is that we can dispose of this matter very rapidly if we reach a unanimous agreement.

The facts are, I think, that we have the votes to carry my amendment. That is the reason for the delay. If the parties agree that they are willing to have a vote, why can we not agree to it under proper stipulation, so that Senators, many of whom, on both sides of the aisle, are in and out, will know when that vote is going to occur? That is all.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. JACKKSON. Without a unanimous-consent agreement, you cannot do it. I am not going to fall into the trap of having someone make a motion to table without warning, and without being able to advise other Senators who want to be heard and to vote.

Mr. MANSFIELD. Will the Senator yield?

Mr. JACKSON. I yield.

Mr. MANSFIELD. Mr. President, going back to the SALT Treaty, there were no reservations or understandings offered. It came in clean, and it was disposed of clean. Therefore, there was no need, really, for a unanimous-consent agreement in the sense that one would be desirable for the present legislation.

The Senator is against a piecemeal time limitation on amendments. He has a point of view, but would he be against a vote on the pending amendment at this time, without any time limitation being tied to it?

Mr. JACKSON. I do not want to agree at this time——

Mr. MANSFIELD. I am not asking for a time limitation now. This is just a vote.

Mr. JACKSON. No; as I say, I do not want to agree on this one amendment at this time.

Mr. MANSFIELD. No; I am not asking for an agreement. Is the Senator prepared to vote on this amendment at this time without any agreement?

Mr. JACKSON. No. No; not at this time. I want to see if we can make another try, to see if we can reach an agreement, because we need to know what amendments are going to be offered. I have an idea as to some, and I think we ought to be able to be in a position to have an understanding about when these amendments are going to be offered and when we are going to get some votes. Otherwise, there will be no order. If a Senator does not want to bring up an amendment at a given time and there is no unanimous-consent agreement, he can go on talking indefinitely.

Mr. MANSFIELD. Yes; but——

Mr. JACKSON. And I understand the problem. It is my amendment that the time is being consumed on. I have been ready from the very first day, and I made it clear over and over again——

Mr. MANSFIELD. Mr. President, the Senator's amendment has not been offered. It has just been talked about. All we are doing—and this includes all of us—is tilting at windmills. We are getting nowhere. We might be satisfying our own ego, our own sense of well-being, but as far as the Senate is concerned, we are not subordinating our personal desires to what the institution itself should be doing, and we are all going to pay for the machinations which are going on, and nobody is going to benefit—nobody—but all of us will lose because of it.

Mr. FULBRIGHT. Mr. President, will the Senator yield to me?

Mr. JACKSON. I will just make one final statement on this.

If the vote on the Mansfield amendment would solve the problem, I would agree, but it would not solve the problem. Why delude the Senate? Whom are we kidding?

For some reason, the moment my amendment was offered, it caused the pending business to be set aside for a whole week. Since when do we get into a situation in this body that, when a Senator offers an amendment, the pending business is set aside for a whole week? These are the facts. And a special meeting of the Committee on Foreign Relations was held to discuss my amendment. Does not a Senator have a right to offer amendments to a pending bill? What is unusual about it? Who delayed? Not the Senator from Washington. I made it clear right from the beginning, and I have tried my very best to work with the leadership on both sides to reach a unanimous agreement to vote. In fairness, I think these facts ought to be pointed out.

If the vote on the Mansfield amendment would solve the problem right now, I would agree immediately. But I am not going to indulge in fictions and try to delude the people of this country that by agreeing to vote on the Mansfield amendment, we have agreed to go right ahead and act on this whole matter. I think we have to face up to the real issue, and the real issue is our simple amendment that stipulates, in effect, that in any follow-on agreement on strategic arms limitation with the Soviet Union, it should be the policy of the United States to achieve equality. That is the issue before the Senate, and I believe that the sooner we face up to that issue, the sooner we will be able to get a final vote.

Mr. MANSFIELD. Mr. President, the issue is not equality. Everybody believes in equality.

The suggestion was made to the distinguished Senator from Washington that the word "overall" be inserted for "equality." That was turned down. It is equality in specific fields.

I do not know what we are trying to seek when we have enough TNT in this country and in the world to account for 15 tons applicable to every man, woman, and child on the face of the globe.

I would hope that we would get away from this sparring and this moving for advantage and get down to the business which confronts the Senate and this country, which is far more important than the business of any individual Senator. The sooner we can reach an accommodation of our divergent views, the better off the Senate is going to be.

So far as I am concerned, I am willing to agree to any kind of time limitation to bring this matter to a head and to trust the judgment of the Senate as a whole.

I certainly am disappointed, when the Mansfield amendment, so-called, is given the prestige and the credibility it has received this afternoon; because it is not that important—it is just an affirmation, word for word, of the second declaration in the declaration of principles issued by the President of the United States and the Chairman of the Communist Party in the Soviet Union, a declaration to which they affixed their signatures. It is a simple statement of what they stand for. Either they believed in what they did or they did not.

Unfortunately, the administration is against its own language. It is hard to understand. It is simple language to which the President affixed his signature. What are they for? What they did? Or are they for an amendment which they say is fine, but they do not believe in its interpretation? The administration is trying to have it both ways. If they have ever got themselves in a box—and it is their own fault—they got themselves in a box on the Jackson amendment. They are for it, but they are not for its interpretation. What are they for? We would like to know.

Mr. SYMINGTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. SYMINGTON. Mr. President, in support of the position just taken by the majority leader, on the first of June, at the joint session, the President of the United States stated:

> I ask from this Congress and I ask from the Nation the fullest scrutiny of these accords. I am confident such examination will underscore the truth of what I told the Soviet people on television just a few nights ago, that this is an agreement in the interest of both nations.

What the majority leader has said about the position of the administration in this matter is of special interest. It has been my understanding they are for this amendment. It has also been my understanding that they are against it in any case an interpretation of it.

I would present to the Senate that this extended discussion and delay is putting us all in an increasingly difficult position if we are sincere in wanting to work out a meaningful arms control agreement; because pretty soon the leaders of the Soviet hardliners in that nation, comparable to the hardliners in this Nation, are going to be able to go to the Soviet people, under their controlled system, and say, "The President of the United States now admits that when he spoke to you about the fairness of this agreement, he was not telling you the facts."

To me, it is regrettable indeed that we are placing ourselves in such a position.

Mr. FULBRIGHT. Mr. President, in order at least to clarify the air, I had said in prior debates that I would move to table Senator JACKSON's amendment. I have no desire to table it if we can get to a vote on the merits and the opportunity to amend it. I can say without any reservation that I would not move to table it—certainly not without prior notice and without an agreement. At the same time, I would make no agreement and I would not make a motion to table it without agreement with the Senator.

I have said that more or less in the same spirit in which the Senator from Montana has moved simply to get some action, to get some kind of test on it. But I would not make a motion to table the Jackson amendment without prior notice.

Next, I wanted to clarify the fact that there is no need for further negotiations about a package agreement. If no one else wishes to object, I shall object to a package agreement; but in that connection, I would take very limited time on any amendment, including the pending business or the Jackson amendment.

The point is that the practice of the Senate always has been, prior to recent times, to proceed under the rules of the Senate, without unanimous consent. To do otherwise was quite unusual. I do not object to the unanimous consent procedure on routine matters or on matters of lesser importance than this. I consider this an extremely important matter. The Committee on Foreign Relations voted unanimously to approve it. The President and his spokesmen submitted it to the country, both in the joint session and at the White House, without any reservations. The House has approved it without any reservations, with an overwhelming vote—I think there were only seven votes against it in the House of Representatives—328 in favor of it, without any amendments.

As a Member of the Senate and as a member of the Committee on Foreign Relations, I am not going to agree to put the Senate in a straitjacket on these votes. I am perfectly prepared to vote now, immediately, on this matter, and within a very brief time on any amendments to the Jackson amendment; but I insist upon abiding by the rules as I think the traditions of the Senate have interpreted them.

I submit that the Senator from Washington is endangering the entire measure. His action raises very serious questions as to whether his purpose is to kill the agreement itself because in his view it does not provide for equality. Of course, I join the views of the Senator from Montana completely, that the agreement does provide equality, overall equality. That was the thrust of the President's view as he made his views known at the joint session and through Dr. Kissinger and others. So I would regret very much if this agreement is killed but, at the same time, I am not going to agree to a package deal. It is up to the Senator from Washington. He must take the responsibility of holding this up, as he has held it up now, as he says, because he wants a package deal. There will be no package deal as long as I am able to stand on the floor of the Senate. I am not going to agree to a package deal. I want to make that clear so that we do not delay it any longer. It is entirely up to the Senator from Washington whether we vote now on this amendment and on succeeding ones.

For my part, I am unable to see why, if he has the votes as he says he has—and I do not disagree, because I do not know—but if he has them, the Mansfield amendment can be disposed of before 2 o'clock, so far as I am concerned, if he wants us to go ahead and allow us to vote on it. But I am not going to agree at this time to a unanimous-consent agreement.

Mr. JACKSON. Mr. President, the way to bring debate of this kind to a conclusion, of course, as the Senator from Arkansas well knows, is to enter into a unanimous-consent agreement. I must say that the business of the Senate would come to a complete halt if we did not have unanimous-consent agreements at each session of Congress. We have a long series of them. I see no reason in the world why, if they want to vote on it, we cannot agree to vote at a specific time.

I point out in this whole business—I cannot find out how many amendments to my amendment there really are—that any reasonable person would want to enter into an agreement and understand when those amendments will take place so that Senators can be here at that time.

I am amazed it would be said that the unanimous-consent process has not been used in connection with important legislation. We do it at every session of Congress. I am ready and willing to cooperate with the leadership in expediting this matter, as I have from the outset when we brought up the ABM treaty.

One other word, Mr. President, and I am not going to get into the substance of this debate at this moment—I will have some remarks to make in just a moment—but there seems to be the impression going around that we are trying to modify or change what was agreed to in Moscow. That is not what is before the Senate. What is before the Senate is an effort on the part of the junior Senator from Washington to implement the Fulbright doctrine. Senators will recall that the Fulbright doctrine suggested that the Senate give its advice—and not just its consent—on these matters, and that not all policy be made downtown. The Senator from Washington is trying to implement the Fulbright doctrine.

All we are doing here, Mr. President, is offering an amendment that suggests certain policy guidelines that represent the views of the body that will have to pass on the follow-on treaty.

What is wrong with that?

The objective is to achieve strategic parity or equality in the follow-on treaty. That is the thrust of our amendment. We are not trying to modify the interim agreement. Our amendment is not a modification of the interim agreement. Some people have sown confusion on this point. The administration itself has made it clear they would never have agreed to the interim agreement as a final treaty because it provides for a substantial disparity of forces vis-a-vis ours and the Soviet Union's.

The whole objective of our amendment is to provide for advice by the Senate relating to negotiations of the follow-on treaty on strategic offensive forces. I shall speak in a moment on that in some detail.

I would point out further, Mr. President, that there is a great opportunity here for the Soviets to roll back their strategic forces. We hear so much talk about how to save money. Of course we all want to do that in defense. But, would it not be wonderful and sensible if the Soviet Union would announce that it will cut back its forces, its ICBM forces from 1,618 land-based to 1,000, and that they will hold their submarine building program to 42, where it is right now, one ahead of ours?

We cut back our ABM missile sites from four to two, and our negotiators knew full well that it would end up being just one—and the conferees in connection with the military procurement bill have already set that at one.

Mr. AIKEN. Mr. President, will the Senator from Washington yield for one or two questions?

Mr. JACKSON. I yield.

Mr. AIKEN. May I ask the distinguished Senator from Washington whether he is opposed to the position of the President in regard to the interim agreement as stated on June 15 of this year?

Mr. JACKSON. Well——

Mr. AIKEN. Is he opposed to the position of the President?

Mr. JACKSON. On June 15 the President spoke at some length about the Moscow accords. Nothing he said then detracts from the need for my amendment, which, I might add, the White House supports.

Mr. AIKEN. Then he opposes the position taken by the President on June 15 of this year——

Mr. JACKSON. That is not what I said.

Mr. AIKEN (continuing). And which would be approved on the part of the Senate by the Mansfield amendment.

Mr. JACKSON. As the Senator knows, I voted for the ABM treaty. I did not concur and I do not concur in this interim agreement without some understanding as to what the policy of the government will be in connection with the negotiations for a follow-on treaty that is to take place pursuant to this interim agreement.

Mr. AIKEN. Then the Senator from Washington is opposed to the position taken by the President on June 15?

Mr. JACKSON. I hope to be able to support the interim agreement, with the Jackson amendment. I think there are many other Senators who feel the same way.

Mr. AIKEN. Would approval of the Mansfield amendment nullify the Jackson amendment if that were also approved later? Would that not solve the problem so far as the Senator from Washington is concerned?

Mr. JACKSON. The Mansfield amendment is not related at all to my amendment.

Mr. AIKEN. But the Senator's amendment is not before the Senate.

Mr. JACKSON. Of course not. I was not born yesterday. I am not offering an amendment at this time since, without a unanimous agreement, a motion to table could be offered at any time at any hour. I want to get an agreement here so that we can vote under orderly procedures.

Mr. AIKEN. In opposing the Mansfield amendment, one has to oppose the position of the President as stated after the treaty and the Interim Agreement had been signed.

Mr. JACKSON. I do not believe that follows. In fact, the White House has endorsed my amendment.

Mr. AIKEN. There is no other interpretation in the minds of the people of this country. One either approves the position of the President or he does not. Personally, I think that the President has done everything within his power to bring war to an end and restore peace to this world. But what is going on here is convincing millions of people in this country that he is not doing that. I believe that he is. But there are so many others that are using this almost farcical situation here in the Senate to say that he did not mean it at all.

Mr. JACKSON. Mr. President——

Mr. AIKEN. The attitude of the Senator from Washington in opposing the President gives greater credence to that belief.

Mr. JACKSON. I am not opposing the President. Let me comment on something that is very clear to the American people. I hope the Senator will stay on the floor just for a moment. I believe that the American people—and the great majority, I think, of the Members of this body—understand the objective of trying to achieve strategic parity with the Soviet Union. That is what my amendment suggests as a matter of policy, and my amendment is supported by the White House.

How in the world can a Senator go to his constituents and say, "Well, I voted against the amendment that had as its objective a negotiation to achieve parity and equality with the Soviet Union in strategic arms"?

Parity is what our politicians on both sides of the political aisle in this country have been insisting upon for years—as a minimum.

I am suggesting that if the Senate adopts the barebones agreement that is before us without some policy statement to make it clear that we want to achieve strategic equality in the ongoing negotiations, it can only result in trouble.

Mr. MANSFIELD. Mr. President, if the Senator will yield, he has made the assertion that that is what the politicians on both sides are in favor of, what the Senator is advocating. I think that the Senator is correct. The politicians are.

Mr. JACKSON. I will let each Senator decide that question.

Mr. AIKEN. Mr. President, the American people have been told repeatedly that we have not only equality with the Russians in this field, but that we have superiority in many fields.

Mr. JACKSON. We are talking about the future. As the Senator knows, my amendment is a policy statement relative to strategic arms negotiations that will get underway this fall.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. TOWER. Mr. President, does the Senator from Washington agree that given their present momentum in advancing their military technology, both qualitatively and quantitatively, and given our current lack of momentum, the Soviets would, in the absence of an equitable agreement, in a short period of time achieve or exceed superiority?

Mr. JACKSON. I do not think there is any doubt about that. This is what the argument is all about. For the life of me, I cannot understand how the Senate would deny this Nation a policy guideline which stipulates to our SALT II negotiators that when they proceed to meet with the Russians in Geneva in October, next month, it shall be their objective to adhere, for offensive strategic weapons, to the principle of equality that obtains in the ABM treaty. What in the world is wrong with that?

I know of the other extraneous arguments that are brought up—that we have a lot of warheads in Europe. Those warheads are under the enormous nuclear threat posed by comparable Soviet forces, and those comparable forces cannot be ignored.

The Senator has talked about a situation where we are not trying to compare apples and oranges, but are trying to compare oranges and oranges—and that is, their ICBM's with our ICBM's and their land-based forces with our land-based forces. And I think our amendment is a reasonable proposal for the Senate to adopt as a guideline for our negotiators.

Mr. TOWER. Mr. President, if the Senator will yield further, does the Senator believe that if the Soviet Union could achieve or did achieve absolute superiority and if we allowed ourselves to be in a position of inferiority, they would not be somewhat more reluctant to negotiate an agreement on trade tariffs?

Mr. JACKSON. The Senator is correct. And not only would that be true, but I would say that Soviet strategic superiority would be the most destabilizing development that could take place on this planet. The risktaking that Moscow would engage in and the adventurism that the Soviets are prone to undertake from time to time would increase manyfold. And the increasing effects on the problems of world diplomacy would be enormous—if the Soviets achieved superiority. I do not think there is any doubt whatever of that. It is the political implications that could be the most serious. There has been a tendency, I think, to interpret the relative strategic posture of the two countries in terms of a nuclear race. I think Soviet strategic superiority would have its greatest impact on the diplomatic and political situation and the future chances of individual liberty.

Mr. TOWER. Does not it sometimes appear that we profess too much our innocence of any desire to engage in military confrontation? Does not the historical record show that the United States has always acted with vigorous restraint? In the period since World War II, we could have at one time or another fought a preemptive war and won it and won it decisively. We have been provoked many times.

Does the Senator think that the United States actually chooses war as a matter of policy and that the United States would try to impose its will on the rest of the world because of the superiority of our military establishment? I do not think that anyone believes that is so.

Mr. JACKSON. I cannot believe it. No other country in the history of the world had available to it the destructive capability that was a monopoly and that was held by the United States. We then exercised a great degree of restraint in the post-World War II period.

Mr. TOWER. Mr. President, in 1948, for example, when we were severely provoked and when it was apparent that the Soviets were treating our post-war agreement as a scrap of paper and backing up their actions with a blatant show of force, did we not show great restraint? We could have indeed fought a preemptive war and won it.

Mr. JACKSON. The Senator is correct. In 1948 the Soviet Union took over Czechoslovakia by a show of military force and directed the subversion from within. We had a nuclear monopoly at that time. At that time the Soviet Union did not have any nuclear weapons. It was not until August or September of 1949 that they were able to achieve their first nuclear capability.

In Korea and in other situations we could have, if we had made it a matter of national policy, reserved the right to use nuclear force. However, we made it very clear that we would not do so. Not only that, but at the end of World War II, as the Senator will recall, we offered the Acheson-Lilienthal proposal involving on our part a turning over of the nuclear arms to an international body under the U.N., and the Soviet Union vetoed that proposal.

Mr. TOWER. The Senator is absolutely correct. That would lead me to believe that the Soviet Union does not have any fear of the United States being an aggressor nation that chooses to use war as a national policy.

It appears to me that the Soviet Union does want national superiority for one reason, and that is so that it can impose its will on the rest of the world.

Some people say, "What difference does it make if the Soviet Union has superiority?" I think it makes this difference. If they are superior, it is unlikely that we will ever fight a war. However, what is likely is that they will be able to achieve their goals through their nuclear force.

Mr. JACKSON. Nuclear blackmail.

Mr. TOWER. The Senator is correct, nuclear blackmail.

Mr. JACKSON. Ballistic blackmail. Some people have warned about that. I warned about it in a speech in 1956.

The tendency has been to treat strategic arms as an action-reaction type of thing, particularly in terms of a nuclear war. Too many people overlook the fact that it is the diplomatic and foreign policy implications of this power in the hands of the Soviet Union that we have to be thinking about, and how they will be using that power to achieve their foreign policy objectives without fighting a war, so to speak. I believe that is what the Senator is referring to.

Mr. TOWER. The Senator is correct. I concur. Does it not follow that we must then necessarily negotiate from a position of present military strength if we are to achieve a limitation of strategic arms that will continue to lead the people of the world to feel reasonably sure in their aspirations toward self-determination.

Does it not occur to the Senator from Washington that actually the adoption of his amendment would strengthen the hand of the President in these negotiations and actually perhaps result in a better agreement in the final analysis than if we failed to serve notice that we will not accept inferiority? It occurs to me they would be much more willing to negotiate and that it would strengthen the hand of the President.

Mr. JACKSON. I agree with the Senator from Texas. The objective we all seek is to bring about a stabilization of forces in the world so there will be less of a threat to the peace of the world. Secondly, in time there can actually be a reduction of the money that has to be spent on all sides in connection with the armament program of the countries that are involved. This is what we are trying to do.

As I said a moment ago, I would like to see the Soviet Union follow the example we set when we rolled back on our ABM forces. We had four sites authorized, we cut back and agreed to two in the ABM treaty—which in effect was really one, and the Soviets did no cutting back.

There is the greatest opportunity now that I have ever experienced in my lifetime, with the two nations going to Geneva, for the Russians to agree to cut back their intercontinental ballistic missile forces, land based and sea based, to a point of equality or parity with the United States. This would save money for the Soviet Union and it would save money for the United States. If we want to make headway, as we all do, in trying to limit and control arms, I think the amendment I will offer at the appropriate time will help our Government achieve that objective. This is the kind of objective we all seek in order to bring about the kind of stabilization we want for all mankind in this troubled world.

Mr. TOWER. I completely concur with the remarks of the Senator. This is extremely constructive and I believe it is necessary. I hope that at such time as the Senator offers the amendment the Senate will adopt it.

Mr. JACKSON. I thank the Senator.

Mr. President, I shall be brief in my remarks today as the Senate continues its consideration of the interim agreement on strategic offensive weapons. I have already spoken several times on this important matter and I shall have more to say as the debate progresses and as the arguments of those who oppose my effort to offer guidance for future SALT negotiations are brought before us. Today I wish to dwell for a moment on my belief that the adoption of my amendment to the SALT authorizing resolution could be a great step toward a winding down of United States-Soviet strategic arms competition and toward the achievement of a stable strategic balance.

Let me say, first, that I share the view of the administration and, I believe, a majority of the Senate, that the interim agreement is not the basis for and is unacceptable as a permanent treaty. Such a treaty must provide for United States-Soviet equality. The present U.S. advantage in strategic weapons technology, which now offsets Soviet numerical superiority, cannot be assured in a long term treaty. What may be a tolerable basis for an interim agreement, therefore, would be intolerable as the basis for a treaty. It is for this reason that I have sought, along with 30 of my colleagues, an amendment that would place the Senate on record in support of a future SALT agreement that adheres, for offensive weapons, to the principle of equality that obtains in the agreement signed in Moscow on defensive weapons.

I must say, Mr. President, that I am

puzzled at the continuing refusal of the severest critics of U.S. strategic weapons procurement and deployment programs to join with me in calling upon the Soviet Union to reverse its weapons buildup and content itself with equality with the United States in strategic offensive weapons.

Senators opposing our amendment have often called for restraint in strategic weapons programs, urging that we "take risks for peace." I would like to hear those same Senators urge the Soviet Union to refrain, for example, from proceeding beyond the 42 nuclear submarines they now have either operational or under construction.

Mr. President, the Soviets are permitted but certainly not obligated to build 62 nuclear submarines of the Polaris type under the interim agreement. The United States, as Senators know, is limited to 44 such boats although, in reality, we will have only 41 during the life time of the 5-year interim agreement. I find this disparity disquieting as I have said before and I would very much like to see it narrowed. I am certain that many Senators share my view on this point.

Why, then, should the Soviet Union not stop building submarines at their current level—which is reliably reported by our intelligence sources to be 42 Y-class submarines? Alternatively, why should the Soviet Union not halt its construction program after it places its 44th Y-class submarine under construction thereby limiting itself to the number to which we, on an interim basis, are limited? Either formula, in my view, would be very much preferable to the further expansion of Soviet submarine forces beyond 42 to, in the extreme, as many as 62 submarines. Surely all Senators can agree that it would be a most desirable result of the follow-on SALT negotiations if some formula along these lines could be arranged. I propose that a leveling on the basis of equality such as this should be the central objective of the SALT II deliberations when they resume later this autumn. And I have offered my amendment advising the President that he ought to seek such a treaty to enable the U.S. Senate, which must ratify any treaty to emerge from these continuing talks, to express itself along these lines in advance of the negotiations.

Of course, the sort of eventual submarine balance outlined here is merely one example of the way in which I believe that the principle of equality can contribute to a reversal of the trend of the last several years in which we have seen the unrelenting growth of Soviet strategic forces. Such a result would greatly increase the security of our own nuclear deterrent, possibly enabling the United States to avoid future strategic programs that might otherwise be required to meet our strategic objectives.

One could easily multiply the examples of the stabilizing effects of the equality principle. Under the limits agreed to on an interim basis and now before the Senate, the Soviets have an advantage in missile throw weight that, while already very large, is subject to still further increases. As things now stand, the overall Soviet intercontinental missile throw weight is approximately four times our own. Now, as many Senators know, the overall throw weight of a nation's missile force determines, in the final analysis, the nature and size of the attack that it can deliver. Assuming that technology tends to equalize out in the long run—and it always has in the past—it is generally true that the greater the throw weight, the greater the capability of the force and the greater the number of warheads that can be delivered by it. It is, by the way, because of these considerations that we cannot assume that the central U.S. advantage in the present strategic situation—our superior number of warheads—would continue, under any long-term SALT II treaty, to offset the considerable Soviet throw weight advantage.

Part of this enormous Soviet throw weight advantage is made up of their older, liquid-fueled SS-7 and SS-8 ICBM's. Would it be unreasonable to propose that, as part of a SALT II agreement, the Soviets dismantle these weapons and thereby bring their ICBM throw weight down—and closer to our own? This would be a move in the direction of fairness. And it would be a move in the direction of slowing the arms buildup by beginning to narrow the now considerable disparity between the larger Soviet force and our own smaller one.

There is an added reason why the dismantling of the Soviet SS-7 and SS-8 missiles would be a step in the right direction. These weapons are obsolete. The United States, which once possessed a substantial force of equivalent weapons, abandoned them long ago. Senators doubtless recall the Atlas and Titan I missiles that used to be a significant part of the U.S. inventory. Under the interim agreement the Soviets are permitted to exchange the obsolete SS-7 and SS-8 missiles for new submarine launched missiles on a one-for-one basis. But the United States, which has already retired its equivalent Atlas and Titan I missiles, is granted no such trade-in privilege. So the dismantling of the SS-7 and SS-8 missiles, of which there are over 200, would be a move in the direction of equality in terms both of throw weight and the trade-in provisions of the interim agreement.

Again, Mr. President, the Soviets presently have under development new ICBM's which, in the view of our experts, would enable them to increase still further their missile throw weight without going beyond the 1,618 ICBM's permitted under the interim agreement. The actual deployment of these new weapons would widen rather than narrow the current disparity by increasing the present four to one Soviet advantage still further. Should we not propose, as the basis for a SALT II agreement, that the overall effect should be a narrowing of the gap between our respective forces? If the Soviets are intent on deploying new and bigger missiles, should there not be, as a basis for SALT II, some compensating reductions in other Soviet systems so that we move closer to, rather than further from, United States-Soviet equality? Or better yet, perhaps they can be persuaded to refrain from deploying bigger missiles in the first place. Surely such a result would increase our security and enable us both to forego new strategic programs and make it possible for both countries to have more funds available for important domestic programs.

Mr. President, I pointed out earlier that the Soviets are free but not obligated to build the full complement of 62 submarines, and I suggested that the principle of equality in my amendment points to the wisdom of their stopping with a smaller number. As Senators know, under the ABM treaty the United States is free but not obligated to build a missile-defense site around Washington, D.C. We have, for good reasons, elected not to exercise our right and option to deploy an ABM to defend our capital. I would urge that the Soviets consider the wisdom of likewise refraining from exercising their option with respect to deploying additional nuclear submarines.

Mr. President, the world would be very much safer if SALT II were to result in an agreement which, because it was based on the principle of equality, brought Soviet force levels into line with our own. Costly arms programs could be obviated. The foundation would be laid for reductions on both sides leading to smaller and more secure strategic forces requiring lower budgets and reducing present uncertainties.

Now, some Senators might argue that the Soviets would never agree to a SALT II treaty based on the principle of equality agreed to in the ABM treaty. Such a decision on the part of the Soviets would be regrettable and, let me add, it would be indefensible. The United States cannot and should not be forced to accept a SALT treaty on offensive weapons that departs from that principle.

Mr. President, I urge my colleagues to join with me and the other cosponsors in supporting an amendment that could lead to a turning around of the strategic build-up that has, with intensity increasing since 1965, threatened to upset the strategic balance. Many of my colleagues have frequently come to this Senate chamber to urge, to argue, to implore the United States not to develop or deploy strategic weapons. Where are they now when the subject is to get the Soviets to reduce their strategic forces to achieve an equalization and a stabilization that would serve the cause of peace? If ever there was a time for the Senate to advise both the President and the Presidium, this is it.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Hackney, one of its reading clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 5416. An act for the relief of Ossie Emmons and others;

H.R. 6467. An act for the relief of Harold J. Seaborg;

H.R. 11047. An act for the relief of Donald W. Wotring;

H.R. 11629. An act for the relief of Cpl. Bobby R. Mullins;

H.R. 11631. An act for the relief of Robert Gibbons;

H.R. 11814. An act for the relief of Claude V. Alcorn and 21 others;

H.R. 12099. An act for the relief of Sara B. Garner;

H.R. 12903. An act for the relief of Anne M. Sack; and

H.R. 15865. An act for the relief of Richard L. Krzyzanowski.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred to the Committee on the Judiciary:

H.R. 5416. An act for the relief of Ossie Emmons and others;

H.R. 6467. An act for the relief of Harold J. Seaborg;

H.R. 11047. An act for the relief of Donald W. Wotring;

H.R. 11629. An act for the relief of Cpl. Bobby R. Mullins;

H.R. 11631. An act for the relief of Robert Gibbons;

H.R. 11814. An act for the relief of Claude V. Alcorn and 21 others;

H.R. 12099. An act for the relief of Sara B. Garner;

H.R. 12903. An act for the relief of Anne N. Sack; and

H.R. 15865. An act for the relief of Richard L. Krzyzanowski.

REVENUE SHARING ACT OF 1972

Mr. MANSFIELD. Mr. President, I ask unanimous consent that H.R. 14370, the Revenue Sharing Act, be laid before the Senate and made the pending business, in accordance with the previous agreement.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

Mr. LONG. Mr. President, those of us in favor of the measure have explained the bill to the extent we think is appropriate at this time. We hope that any Senators who desire to offer amendments would confine themselves to amendments germane to the bill, that they would offer their amendments or at least explain them, and offer the Senate an opportunity to vote on them.

Those of us in favor of the bill brought it to the Senate before the recess. We explained the committee's position, on behalf of both the Democrats and the Republicans on the Committee on Finance. We were ready to vote and to debate amendments yesterday; we had none of our own to offer. The leadership twice suggested the absence of a quorum to prevent the bill from going to third reading.

We would hope that if Senators do not want the bill passed without amendments—which would be perfectly fine with the committee—they would present themselves and explain their amendments. Otherwise, we would suggest that the bill be advanced to third reading.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. Tower). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Roth). Without objection, it is so ordered.

AMENDMENT NO. 1468

Mr. RIBICOFF. Mr. President, I call up my amendment No. 1468 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered, and the amendment will be printed in the Record.

The text of the amendment is as follows:

On page 38, line 15, strike out everything after the word "States" through line 23 and insert:

"(1) 40 percent of the funds available under subsection (a) of this Act, shall be allocated to the States for such entitlement period so that each State receives an amount which bears the same ratio to the total amount to be allocated to all the States for such period as—

"(A) the sum of the population of that State and its urbanized population bears to

"(B) the sum of the populations determined under paragraph (A) for all the States.

"(2) 60 percent of the funds available under subsection (a) of this Act shall be allocated to the States for such entitlement period so that each State receives an amount which bears the same ratio to the total amount to be allocated to all the States for such period as—

"(A) the general tax effort factor of that State multiplied by the relative income factor of that State bears to

"(B) the sum of all the products determined under paragraph (A) of all the States."

On page 56, line 6, add a new subsection:

"(f) For purposes of this subtitle, the term 'urbanized population', when used in reference to any State, means (A) the population of each area, within such State, which consists of a central city or cities of 50,000 or more inhabitants (and of the surrounding closely settled territory for such city or cities) which is treated as an urbanized area by the Bureau of the Census for general statistical purposes, or, if greater, (B) 30 percent of the population of such State (determined on the same basis as resident population is determined by the Bureau of the Census for general statistical purposes). The data used for determining population and urbanized population under this section shall be the most recently available data provided by the Bureau of the Census, except that where the Secretary determines that the data so provided are not current enough or are not comprehensive enough to provide for equitable allocations, he may use such additional data (including data based on estimates) as may be provided for in regulations."

On page 64, strike lines 13 through 20 and insert:

"(a) In General.—The Secretary shall allocate to each State, for each entitlement period beginning on or after January 1, 1973, the following amounts (but not exceeding $500,000,000, in the case of the entitlement period beginning January 1, 1973):

"(1) 40 percent of the funds available under section 121 of this Act, shall be allocated to the States for entitlement period so that each State receives an amount which bears the same ratio to the total amount to be allocated to all the States for such period as—

"(A) the sum of the population of that State and its urbanized population and bears to

"(B) the sum of the population determined under paragraph (A) for all the States.

"(2) 60 percent of the funds available under section 121 of this Act, shall be allocated to the States for such entitlement period so that each State receives an amount which bears the same ratio to the total amount to be allocated to all the States for such period as—

"(A) the general tax effort of that State multiplied by the relative income factor of that State bears to

"(B) the sum of all the products determined under paragraph (A) of all the States. On page 66, strike lines 5 through 23 and insert:

"Sec. 123. Definitions and special rules for application of allocation formulas.

"(a) In General.—For purposes of this subtitle—

"(1) Population.—Population shall be determined on the same basis as resident population is determined by the Bureau of the Census for general statistical purposes.

"(2) Income.—Income means total money income received from all sources, as determined by the Bureau of the Census for general statistical purposes.

"(3) Personal income.—Personal income means the income of individuals, as determined by the Department of Commerce for national income accounts purposes.

"(4) Dates for determining allocations and entitlements.—Except as provided in regulations, the determination of allocations and entitlements for any entitlement period shall be made as of the April 1 immediately preceding the beginning of such period.

"(5) Intergovernmental transfers.—The intergovernmental transfers of revenue to any government are the amounts of revenue received by that government from other governments as a share in financing (or as reimbursement for) the performance of governmental functions, as determined by the Bureau of the Census for general statistical purposes.

"(6) Data used; uniformity of data.—

"(A) Generl rule.—Except as provided in subparagraph (B), the data used shall be the most recently available data provided by the Bureau of the Census or the Department of Commerce, as the case may be.

"(B) Use of estimates, etc.—Where the Secretary determines that the data referred to in subparagraph (A) are not current enough or are not comprehensive enough to provide for equitable allocations, he may use such additional data (including data based on estimates) as may be provided for in regulations.

"(b) General Tax Effort Factor of States.—For purposes of this subtitle—

"(1) In general.—The general tax effort factor of any State for any entitlement period is (A) the net amount collected from the

State and local taxes of such State during the most recent reporting year, divided by (B) the aggregate personal income (as defined in paragraph (3) of subsection (a)) attributed to such State for the same period.

"(2) STATE AND LOCAL TAXES.—

"(A) TAXES TAKEN INTO ACCOUNT.—The State and local taxes taken into account under paragraph (1) are the compulsory contributions exacted by the State (or by any political subdivision of the State) for public purposes (other than employee and employer assessments and contributions to finance retirement and social insurance systems, and other than special assessments for capital outlay), as such contributions are determined by the Bureau of the Census for general statistical purposes.

"(B) MOST RECENT REPORTING YEAR.—The most recent reporting year with respect to any entitlement period consists of the years taken into account by the Bureau of the Census in its most recent general determination of State and local taxes made before the close of such period.

"(c) GENERAL TAX EFFORT FACTOR OF COUNTY AREA.—For purposes of this subtitle, the general tax effort factor of any county area for any entitlement period is—

"(1) the adjusted taxes of the county government plus the adjusted taxes of each unit of local government within that county area, divided by

"(2) the aggregate income (as defined in paragraph (2) of subsection (a)) attributed to that county area.

"(d) GENERAL TAX EFFORT OF UNIT OF LOCAL GOVERNMENT.—For purposes of this subtitle.—

"(1) IN GENERAL.—The general tax effort factor of any unit of local government for any entitlement period is—

"(A) the adjusted taxes of that unit of local government, divided by

"(B) the aggregate income (as defined in paragraph (2) of subsection (a)) attributed to that unit of local government.

"(2) ADJUSTED TAXES.—

"(A) IN GENERAL.—The adjusted taxes of any unit of government are—

"(i) the compulsory contributions exacted by such government for public purposes (other than employee and employer assessments and contributions to finance retirement and social insurance systems, and other than special assessments for capital outlay) as such contributions are determined by the Bureau of the Census for general statistical purposes,

"(ii) adjusted (under regulations prescribed by the Secretary) by excluding an amount equal to that portion of such compulsory contributions which is properly allocable to expenses for education.

"(B) CERTAIN SALES TAXES COLLECTED BY COUNTIES.—In any case where—

"(i) a county government exacts sales taxes within a unit of local government and transfers part of all of such taxes to such unit without specifying the purposes for which such unit may spend the revenues, and

"(ii) the Governor of the State notifies the Secretary that the requirements of this subparagraph have been met with respect to such taxes, then the taxes so transferred shall be treated as the taxes of the unit of local government (and not the taxes of the county government).

"(e) RELATIVE INCOME FACTOR.—For purposes of this subtitle, the relative income factor is a fraction—

"(1) in the case of a State, the numerator of which is the per capita income of the United States and the denominator of which is the per capita income of that State;

"(2) in the case of a county area, the numerator of which is the per capita income of the State in which it is located and the denominator of which is the per capita income of that county area; and

"(3) in the case of a unit of local government, the numerator of which is the per capita income of the county area in which it is located and the denominator of which is the per capita income of the geographic area of that unit of local government.

For purposes of this subsection, per capita income shall be determined on the basis of income as defined in paragraph (2) of subsection (a).

"(f) For purposes of this subtitle, the term 'urbanized population,' when used in reference to any State, means (A) the population of each area, within such State, which consists of a central city or cities of 50,000 or more inhabitants (and of the surrounding closely settled territory for such city or cities) which is treated as an urbanized area by the Bureau of the Census for general statistical purposes, or, if greater, (B) 30 percent of the population of such State (determined on the same basis as resident population is determined by the Bureau of the Census for general statistical purposes). The data used for determining population and urbanized population under this section shall be the most recently available data provided by the Bureau of the Census, except that where the Secretary determines that the data so provided are not current enough or are not comprehensive enough to provide for equitable allocations, he may use such additional data (including data based on estimates) as may be provided for in regulations."

Mr. RIBICOFF. Mr. President, I ask unanimous consent that Mr. Theodore Leary of my staff be permitted the privilege of the floor during the consideration of the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I support the basic concept of revenue sharing. Many of our State and local governments are faced with a growing fiscal crisis as the demand for governmental services outpaces their ability to raise revenues.

Between the fiscal years 1955 and 1970 State and local general expenditures rose almost three times in current dollar terms—from $33.7 billion to $131.3 billion. During the same period State and local revenues rose from $31.1 billion to $130.8 billion. In order for these State and local governments to keep pace with costs, they have been forced to raise their taxes dramatically. Many of them, however, have reached the saturation point and can no longer maintain their effort.

Regrettably the Federal categorical grant programs designed to aid State and local governments have failed to alleviate their problems and in some instances have even aggravated them. The proliferation of these programs, each with their own regulations and narrow purpose, is confusing beyond belief. Catalogs now have to be published to guide State and local officials through the bewildering inventory of rules and requirements.

Even the process of applying for a grant may represent a distortion of local priorities. In winning Federal funds, State and local authorities effectively tie their own hands because of the matching funds principle behind most grant-in-aid programs. A State or locality which is successful in obtaining Federal grants soon finds that dollars from Washington can limit the scope and number of projects they would like to initiate on their own.

It is time to return some of the money this Nation's citizens send each year to Washington back to their own State and local governments without the usual restrictive conditions attached. It is time to let the people themselves determine how their hard-earned tax dollars should be put to work at the State and local level.

How this new money will be distributed to the States and localities is the critical element in the consideration of the legislation now before us and the issue which demands the Senate's most careful scrutiny.

I do not believe that anyone will argue against the fact that the rejuvenation of our deteriorating cities was one of the prime considerations in the development of the revenue-sharing concept. Yet the Senate Finance Committee has approved a bill which is only partly responsive to our urban problems. The committee's formula for making the initial allocation of the $5.3 billion pure revenue-sharing fund to the States—one-third State population, one-third State relative income, and one-third State general tax effort—is a conscious attempt to penalize those areas with the most explosive and expensive problems.

Even the most casual examination reveals that the committee's formula gives more of the $5.3 billion to those States which need it least and less to those States most in need.

Even more dramatic evidence of the inequities contained in the committee's formula can be found by studying the per capita amounts local governments receive of the $5.3 billion and the relative role the $5.3 billion will play in each local government's budget.

For example, the average per capita grant to all the local governments in Oakland County, Mich., will be $5.67. In Hartford County, Conn., it will be higher, $14.61, but nowhere near the $30.37 and $32.12 received in Jackson County, Ark., and Acadia Parish, La., respectively.

These same revenue-sharing funds will account for 8.3 percent of the total local government income in Oakland County. Again, Hartford's share is slightly higher, 8.9 percent, but far from the 50-percent level found in the Arkansas and Louisiana localities.

It is true that the formula adopted by the committee for determining each locality's share of its State's allotment does aid cities relatively more than the House bill. That, however, does not compensate for the fact that in the total distribution of the $5.3 billion, urban States and their State governments get far less than their fair share. While the greatest burden of urbanization is obviously borne by municipal governments, we must also recognize that many urban-oriented services are provided by State governments.

The committee has made an attempt to rectify this situation by distributing the $1 billion supplemental social service grant program fund on the basis of urbanized population.

Mr. President, I want to take this opportunity to thank our distinguished chairman for the gracious comments he made in opening the discussion of this bill. At that time he kindly commented on the contributions that I and other Senators had made. I thank the Senator from Louisiana and also the Senator from Utah (Mr. BENNETT) for trying to work out a formula that would add additional sums of money for those States that would receive lesser amounts than those provided in the House bill.

Mr. President, by adding this money the committee can correctly claim that all but four States and the District of Columbia fare better under its bill than under the House version. It is easy to see why most States get more—the total fund has been increased by $1 billion. The committee's claim ignores the fact that while most State's total rises, the urban States do not receive as large a percentage of the entire fund as they would have under the House bill. For example, while Connecticut's total rises from $72.6 million to $75 million, its percentage of the total drops from 1.4 to 1.2 percent. The impact can be seen in other States as California's percentage drops from 11.5 to 10.2 percent, Ohio's from 4.3 to 3.8 percent, and Michigan's from 4.6 to 4.1 percent.

More important is the fact that there is no way the Finance Committee can guarantee that the final social service formula will be based solely on urbanization or that this new $1 billion fund will even be in the bill. By basing the distribution of the social service funds solely on urbanization the committee has admitted that its original formula was incomplete and unfair. It is however asking the urban States to now place all their eggs—or funds—in one basket.

I do not believe the Senators from the urban States can accept that logic for the risk is too great.

During his opening remarks on this bill the distinguished chairman of the Senate Finance Committee argued that the committee had significantly improved the House bill by eliminating the complex dual formula used for determining the distribution of funds to the States and localities and replacing it with a single formula. This was a step in the right direction. We should, however, take it one step further and eliminate the special social service formula and combine all four factors—population, relative income, tax effort, and urbanized population—into one formula for the entire $6.3 billion fund. We must guarantee that no matter what the final size of the fund each State will receive the same relative share.

My amendment distributes the entire amount authorized by the bill on the following schedule: 30 percent tax effort, 30 percent relative income, 20 percent population, and 20 percent urbanized population. This formula would give the appropriate recognition to the many problems which led to the development of revenue-sharing legislation and would not penalize any single State or group of States.

No formula for apportioning revenue-sharing funds will satisfy everyone, but the formula I propose today would fairly allocate money to the States on the combined basis of relative populations, income, general tax effort, and degree of urbanization. I urge the Senate to adopt this amendment.

Mr. President, I ask unanimous consent that a table detailing each State's allocation under my amendment, the House bill, and the committee bill be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

STATE ALLOCATIONS IN MILLIONS OF DOLLARS FOR THE HOUSE, FINANCE COMMITTEE, AND RIBICOFF FORMULAS

	House bill	Finance Committee	Finance Committee increase over House	Ribicoff	Ribicoff over House	Ribicoff over committee
Alabama	80.2	138.2	58.0	103.9	23.7	−24.3
Alaska	6.6	6.3	−.3	6.9	.3	.6
Arizona	46.1	64.7	18.6	58.0	11.9	−6.7
Arkansas	38.3	65.2	26.9	51.7	13.4	−13.5
California	610.8	644.4	33.6	723.2	112.4	78.8
Colorado	59.4	71.8	12.4	68.7	9.3	−3.1
Connecticut	72.6	75.0	2.4	91.4	18.8	16.4
Delaware	17.3	15.8	−1.5	17.0	−.3	1.2
District of Columbia	26.0	20.4	−5.6	25.2	−.8	4.8
Florida	150.0	194.6	44.6	192.2	42.2	−2.4
Georgia	103.4	136.4	33.0	124.1	20.7	−12.3

Mr. LONG. Mr. President, the House of Representatives received from the administration a formula that would distribute revenue-sharing funds by taking into account the population of a State and the relative tax effort that the people of that State were making to help themselves.

Looking at it from the Senate point of view, it is very difficult to justify the type of thing that was done from that point forward.

The reason I say that, Mr. President, is that by the time the House got through changing the formula, not only had the House added $300 million to the amount of funds in the bill, but they had also proceeded to reduce the money available to 29 States. The House Ways and Means Committee worked out a far more complicated formula than was suggested to them by the administration, and that committee, supported by the House under a closed rule whereby the bill could not be amended, not only increased the total amount by $300 million but it proceeded to reduce the funds to 29 States—more than half of all the States.

Oddly enough, the States that got the biggest slash in the help they would receive are the poorer States of the Union. That is very difficult to justify. For example, Mr. President, we in Louisiana apparently had the dubious fortune of leading the list. Louisiana is one of the lowest income States in the United States.

It is a State that has about the average population. It is one of those States that is making the greatest tax effort to help itself. Under the House measure, Louisiana would take the biggest cut, the largest of any State under the House proposal. The reduction would be $18 million.

Then the House turned to the largest and wealthiest States of the Union—give them an increase over the amount of funds they would be provided in the administration bill.

Let us take California. California, being one of the largest and wealthiest States, is most able to take care of itself. Under the House formula, California would receive an increase of $20 million.

Let us take New York. New York is one of the wealthy States of this Nation and one of the most populous. New York would receive an increase of $115 million.

Connecticut is not one of the largest, but it is clearly one of the wealthiest and one of the most affluent States in the

Union, enjoying the overflow from the New York metropolitan area. It is a State in such good shape that it strongly resisted the income tax because it has a very high percentage of affluent people, which is one of the conditions that one would look for in judging the need for revenue sharing. Connecticut received an increase of $13 million under the House formula.

Mr. RIBICOFF. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. I will yield in a moment if the Senator will permit me a moment or two more.

Let us take Mississippi, the lowest income State in the United States. Compared to what Mr. Nixon recommended, the House proceeded to give Mississippi a cut of $15 million.

And so it goes. Oklahoma is one of the low income States. It had one of the biggest cuts. Washington, a relatively low income State, numbered fourth highest among the States which had their funds cut under the House formula.

States such as Iowa, New Mexico, Arkansas, and Tennessee would lose money under the House proposal as compared to the recommendations made by the administration.

Mr. President, those of us in the Senate looked at the same problem, and we concluded that it was fair to consider the tax effort people are making by taxing themselves.

Having done that, the members on the Committee on Finance felt it would be appropriate to add one other factor and that was the relative income of the people of that State. So we multiplied the population by two things: One, the tax effort the people are making to help themselves, and, two, to then multiply the first product by the inverse of per capita income so that the poorer the people in the State are, the more they get. In other words, the more they do to help themselves out of their means, the more they get. In doing it that way we came up with a formula that the spokesman for the administration said he thought was an improvement on what the House had done and what the administration had recommended.

The recommendation that the Senator from Connecticut makes moves back in the direction of the mistake I think was made in the House to begin with, where 29 States—more than the majority of the States of the Union—received less help. The Senator goes beyond that, since under his formula only 15 States would receive more, and they are the more wealthy and affluent States.

I have no apology for the fact that we added $1 billion to the bill as a tradeoff to end this 3 for 1, open-ended matching for social services of an undefined nature, which is an expense rising to levels that no one ever anticipated and which is threatening to bankrupt the Federal Government.

We suggested as part of that package that this $1 billion should be distributed on the basis that would take into account urbanization. There is support for this formula because it is in the urban areas where the Federal Government sustained the greatest expenditure of funds for those purposes. This is the argument the Senator made in the committee, and considering the fact that it is in those States that the spending for those social service programs would be implemented, it was fair to add an urbanization formula.

I can understand the cities have their problems, but cities have problems because they have people. Rural areas also have problems because they have people. We are seeking to help millions and improve city services. I would be the first to agree that there are inadequate services—inadequate garbage collection, inadequate trash collection, inadequate law enforcement. The same formula we apply in distributing money among the States to help to meet those problems takes these poor people into account and causes them to get a lot more money compared to the House bill—it causes them to get a lot more money in Watts and central Los Angeles than in Beverly Hills. All of that makes good sense, but it does not make much sense to reduce the amount of money that goes to rural areas and the poor people there in the effort to asssit people who live in the large metropolitan areas where perhaps sanitary services are not everything that is desired. In some respects you would be taking funds away from rural people who cannot afford even a flush toilet.

It would make better sense to retain the benefits that the committee provided to try to help finance these 35 poorer States and to retain the bill in its present position. When we go to conference we may well have to concede some or part of what the Senator is advocating. The House will insist on its figures and we will insist on our figures. The House provided more money for affluent States than the Senate did. We may have to compromise and yield to some degree to their position. I am certain they will be compelled to yield to ours. What the Senate sees here is not the final result, and one should keep in mind that when we go to conference we are looking at House figures as they appear on page 4 of the committee report. These large and more populous States and more affluent States that would receive more benefits in the House bill would find the Senator's amendment more to their advantage. I think it would be best that the Senate should not agree to the amendment.

I yield to the Senator from Connecticut.

Mr. RIBICOFF. Mr. President, I would like to point out to the distinguished Senator that the idea of the revenue sharing came into being because of the great problems the cities of America suddenly found themselves confronted with in the mid-1960's. The pressure arose as it became self-evident that the cost of running the cities had become so high it was becoming impossible for cities to provide services. This was further compounded by the fact that the cost of supplying services in the big cities exceeded the cost of supplying the same services in the small towns of America. So we find the big cities, whether they are in New York or California, with their backs against the wall, losing industries and services and being confronted with one problem after another.

For this reason I have tried to work out a formula that I think is equitable to every section of the Nation. I am realistic enough to know that the formula the chairman worked out with the overwhelming majority of the Committee on Finance does favor numerically in dollars more States than my formula. But by adding an urbanization factor I think we strike an equitable relationship between all States.

Let us take the State of Louisiana, the distinguished Senator's State. May I say that no other State is better represented in the Senate than the State of Louisiana. Whenever a formula comes up before the Committee on Finance the State of Louisiana never comes out second best to any State in the Union. I take my hat off to the Senator for protecting his State, but those from urban States are so outvoted in the Committee on Finance that urban problems are overlooked and bypassed.

Under the House bill Louisiana receives $83.2 million; under the proposal of the Committee on Finance Louisiana would receive $138.9 million, a fantastic increase. Under my proposal the amount would be $110.3 million, which is still $27.1 million over the House bill.

I am trying to point out we have a nation with problems in the 50 States and we should try to work out formulas whereby each State does not just look after its own interests. I recognize that rural areas have problems that are similar to problems of the big cities. I have tried to strike a balance by taking the three factors the Senator from Louisiana mentioned and adding in urbanization, which recognizes the special problems of the American cities.

In this way practically every State gets a fair share instead of setting 35 States against 15.

Mr. LONG. With all due deference to the able Senator—and he does a magnificent job; I am very proud to serve on the same committee with the distinguished Senator from Connecticut—it is not the State of Louisiana that does best as compared with the House bill; it is the State of Mississippi. The reason for that is that Mississippi has more poor people and also because Mississippi suffered somewhat the same fate as did Louisiana—because they took a big cut on the House side.

In any event, the Senator's argument would assume that it made good sense to do what the House of Representatives did when it took a recommendation that sought to take into account the fact that many poor people were doing the best they could to help themselves with their problems, whether they lived in a city or a rural area, and shifted away from that formula toward one which favored the relatively wealthy States, in ways which nobody could defend under any stretch of the imagination, and gave favored treatment to areas like Beverly Hills and Scarsdale over the poorest city areas—an utterly indefensible result.

We on the Finance Committee proposed only one formula. We proposed that the same formula would apply not only to a State, but also to the subdivisions within that State. The formula works by taking the relative per capita income, and the relative tax effort of those people, and multiplies those two factors by the State's population.

It amused me to see what the metropolitan area papers said when it was assumed that, since large States like New York and California received less as a result of the committee action, it was rural oriented. When the formula was put in the computer to work out the allocation of funds, it could be seen that cities in New York and California, like cities in Illinois and Michigan, which needed help the most would get lots of help. And at whose expense? At the expense of the very wealthy suburbs, which really did not need any assistance at all.

Every one of us on the committee—I know I can speak for myself, and I think I speak for everyone on the Finance Committee—made a breakdown of how this proposal would work, community by community, and concluded that it did the most poetic justice that the mind and logic of man could suggest, because those who were trying to help themselves with their problems were given the most help, and those who were given the least help were those with the most income and the least need for help. Those which had high incomes and were able to help themselves, but did not do much about it, did not make out as well.

We on the committee were consistent. We advocated the same distribution formula for distributing funds within the States that we advocated for distributing among the 50 States.

I found it somewhat amusing this morning to read an editorial in the great metropolitan Washington Post, which said that the formula that we applied within the States made good sense, and we were to be applauded for that, but it did not like the idea of applying that same formula insofar as distributing funds among the States is concerned.

I might say that by applying the same formula among the States as within the States, makes sense and provides justice. We have provided statistics for every State. Senators will find it works out fairly and justly.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. BENNETT. While my colleagues have been discussing the problem of the big cities, I have been provided with a list of eight of our largest cities to show Senators how the Finance Committee version takes care of them as compared with the House version.

Under the House version, New York would have had $20.12 per capita. Under the committee version, it will receive $33.13, which is more than a 50-percent increase.

Chicago would have received $17.49 under the House version. Under the committee version it will get $23.75.

Philadelphia would have received $21.21. Under the Senate committee version, it will receive $28.49.

Detroit would have received $17 under the House version. It will get $28.09 under the Senate committee version.

Los Angeles would have received $10.55. The Finance Committee raised that to $14.58.

San Francisco, instead of $19.59, will get $31.21.

St. Louis, instead of getting $21.39, will get $26.84.

And Newark, which is held up to us as a city with probably the greatest ghetto problem in the country, would have its share raised from $15.89 to $26.03.

Under the Ribicoff proposal there would be an additional increase for all of these cities except for St. Louis, and there might be a slight drop for St. Louis.

I submit that the differences which I have read, which range as high as a 50-percent increase in the Senate committee's version over the House version, are great enough, and I do not think we need to add additional funds for those metropolitan, urbanized areas, when we consider how well we have treated them in the Finance Committee.

Mr. RIBICOFF. Mr. President, will the Senator yield for a short comment?

Mr. BENNETT. I yield.

Mr. RIBICOFF. I think it should be pointed out to my distinguished colleague from Utah that in urban-oriented States, many of the city and urban services are provided by the States, and, therefore, the urban State governments have additional burdens and costs which predominantly rural States do not have. So, by providing additional funds for those States, it enables those States to give services to the cities and enables the States themselves to continue as viable organizations.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. HARTKE. I would like to commend the Senator from Connecticut (Mr. RIBICOFF) for proposing to do something about one of the severest problems we have, and that is how to straighten out our cities, and not permit them to sink into their own mud and mire.

There is no question but that the proposal in the Finance Committee bill does provide more money for the cities, but, as the Senator from Connecticut has pointed out, the reason is that we added a billion dollars. If we add a billion dollars to a $5 billion program, we are going to provide more money for more people. As long as the people in the cities have to look exclusively to the city governments for the solution of their problems, serious problems will continue to grow. We are going to have to do something about the cities very soon.

In the process of providing revenue, I think we at least recognize that some of the problems can be solved if we can provide some financial assistance to the cities. The difficulty with the arguments made by those defending the Finance Committee proposal is that they are still not cognizant of the problems of city life.

I happen to be the only member of that committee who ever served as a city mayor. I came from a rural area originally, and later served as mayor of a city, and I can say quite honestly that poverty in rural areas is not the same as poverty in the cities. It is not as demeaning to the personality. Some may argue that poverty is poverty, but that is not true. As a young boy on the farm, I understood what it was to be poor, but I did not understand what it was not to be able to have open air, not to have recreational opportunities of any kind, or to be able to have your own garden or milk your own cow.

Today the cities are not even as they were when I was a youth, or even as they were when I was a mayor. They are piled up with garbage, they are piled up with crime, they are piled up with sewage, they are piled up with increasing debt, and they have no relief in sight. I think the Senator from Connecticut would agree that the total amount of money in this bill, if all the money were given to the cities, would not even begin to touch the problems of the cities.

Mr. RIBICOFF. I think the Senator is absolutely correct. The cities keep going downhill. Unfortunately, I cannot name a single city that is really getting better, because the financial problems of the cities keep getting worse and their populations keep increasing. I cannot think of a worse job than that of Mayor of a middle-sized or large city in this country. Populations keep shifting, the middle classes keep going to the suburbs, industries keep going to the suburbs, the income-producing property deteriorates and, taxes get higher. Every mayor in every city is caught in the vicious cycle of being a consistent loser. That situation does not prevail in either the rural areas or the suburbs of America.

We should be anxious about saving the fabric of American society, because once our cities fall apart, the fallout will affect the rural areas and the suburbs.

Mr. HARTKE. The Senator from Connecticut occupies a rather unusual position in this body because of his background and experience, which are probably without equal. He is a former Governor of his State and a former member of the President's Cabinet. In his own words he left the Cabinet to go where the action is. I share his frustration in seeing action that fails to result in performance.

We are constantly faced with the problem that the cities themselves, in looking for a solution, must turn to the Federal Government. For example, I talked with the mayor of Logansport yesterday. He said, "I am operating under a mandate from the Environmental Protection Agency to clean up the sewage of the city of Logansport. I have an application in for Federal funds. The State of Indiana is not willing to make its contribution; it does not have the funds to do so. So the difficulty is that I am faced with the proposition where I do not have enough funds. I do not have enough assistance to take advantage of funds available from the Federal Government and yet the Federal Government is telling me that our sewage problem is clouding the future of the city of Logansport, Ind."

That is just one place; its experience can be multiplied over and over again. I am certain that the Senator from Connecticut is well aware of the fact that the welfare load is such that if we ever expect to be able to break the welfare cycle, and I hope to goodness we can, we are going to have to give the cities some help with a part of that burden. As long as we are going forward with a program which recognizes only a part of the cities' problems the end result is going to be deterioration of the cities and a gradual slowing down of the whole course of the U.S. Government.

The difficulty is that those of us who take this stand, perhaps including the Senator from Connecticut, may be jeopardizing our seats. I commend the Senator from Connecticut for his effort, and will do everything I can to support him, and congratulate him for making this move forward.

Mr. RIBICOFF. I commend the Senator from Indiana for his deep knowledge and concern with all the problems that come before the Finance Committee. There are few Members of this body who understand the problems of economics and finance as does the Senator from Indiana.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. Cannon), the Senator from Oklahoma (Mr. Harris), the Senator from Washington (Mr. Magnuson), the Senator from Wyoming (Mr. McGee), the Senator from South Dakota (Mr. McGovern), the Senator from New Hampshire (Mr. McIntyre), the Senator from Montana (Mr. Metcalf), the Senator from Rhode Island (Mr. Pell), and the Senator from Mississippi (Mr. Stennis) are necessarily absent.

I further announce that the Senator from Iowa (Mr. Hughes) is absent on official business.

I further announce that, if present and voting, the Senator from Washington (Mr. Magnuson), and the Senator from New Hampshire (Mr. McIntyre) would each vote "nay."

Mr. SCOTT. I announce the Senator from Hawaii (Mr. Fong), the Senator from Michigan (Mr. Griffin), the Senator from Oregon (Mr. Hatfield), and the Senator from Ohio (Mr. Taft) are necessarily absent.

The Senator from South Dakota (Mr. Mundt) is absent because of illness.

If present and voting, the Senator from Oregon (Mr. Hatfield) would vote "nay."

The result was announced—yeas 24, nays 61, as follows:

So Mr. Ribicoff's amendment (No. 1468) was rejected.

MESSAGE FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer (Mr. Roth) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had agreed to the amendment of the Senate to the joint resolution (H.J. Res. 55) proposing the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of the Seabees of the U.S. Navy.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 14896) to amend the National School Lunch Act, as amended, to assure that adequate funds are available for the conduct of summer food service programs for children from areas in which poor economic conditions exist and from areas in which there are high concentrations of working mothers, and for other purposes related to expanding and strengthening the child nutrition programs; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. Perkins, Mr. Pucinski, Mr. Hawkins, Mr. Meeds, Mr. Quie, Mr. Ashbrook, and Mr. Ruth were appointed managers on the part of the House at the conference.

QUORUM CALL

Mr. HARTKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HARTKE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REVENUE SHARING ACT OF 1972

The Senate continued with the consideration of the bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

Mr. HARTKE. Mr. President, I call up my amendment No. 1461 and ask that it be stated.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

On page 61, beginning with line 21, strike out through line 2 on page 62, and insert in lieu thereof the following:

"(5) individuals employed in jobs financed in whole or in part out of its trust fund established under paragraph (1) will be paid wages which are not lower than whichever is the highest of (A) the minimum wage which would be applicable to that individual under the Fair Labor Standards Act of 1938, if section 6(a)(1) of such Act applied to the participant and if he were not exempt under section 13 thereof, (B) the State or local minimum wage for the most nearly comparable covered employment, or (C) the prevailing rates of pay for persons employed in similar public occupations by the same employer."

Mr. HARTKE. Mr. President, I ask unanimous consent that the Senator from Minnesota (Mr. Humphrey) be listed as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, the amendment which I have called up deals with the question of the general revenue sharing bill.

The PRESIDING OFFICER. Would the Senator suspend for a moment?

The Senate will please be in order so that the Senator from Indiana can be heard?

The Senator may proceed.

Mr. HARTKE. Mr. President, the general revenue sharing bill, as reported by the Senate Finance Committee, provides that $30 billion in Federal funds be distributed to States and localities over the next 5 years. Unfortunately, the legislation omits any provision that fair and adequate labor standards shall be observed in the spending of this money. The pending Hartke amendment makes it clear that States and localities must spend revenue-sharing funds under the prevailing wage concept.

It is true that the law as presently drafted carries a "no strings" label on the funds. It is not true, however, that in order to insure that States and local communities will be able to decide how to get the most for the money, the basic rights of workers must be abandoned.

Various kinds of wage protection have been incorporated in Federal and State labor legislation to insure that contracts would not be awarded to employers whose idea of competitive bidding is to undercut prevailing wages. Obviously, it is not the intent of this Congress that persons employed in jobs financed wholly or in part by funds allocated under this statute shall be paid wages which are lower than the prevailing rates of pay for persons employed in similar occupations in the same locality. Nor is it the intent of this Congress that revenue-sharing funds be used by those who would destroy the basic rights of labor to pirate business away from fairminded employers.

Prevailing wage legislation is needed as a protective corollary to the practice of awarding Government contracts to the lowest bidder. Unless all bidders are required to pay prevailing wages to their employees, the lowest bidder would become the one who paid the workers the least. Government contracts would then become the vehicle for exploiting workers. Prevailing wage laws offset this tendency by requiring that all bidders abide by existing community wage standards for the type of work being contracted out by the Government. Such laws do not raise or lower wages in the community. They merely assure that the existing community wage standards for such work are to be paid when work is done for the Government and paid for with Government money.

Prevailing wage laws have been in existence for nearly a century. First they applied only as a criterion for establishing wage rates for blue-collar Federal employees. Later this standard was extended to Federal Government contractors. In recent years, Congress attempted to close loopholes in prevailing wage legislation so that the principle would apply to all types of Government contracts—whether for construction, manufactured goods, or services. Now that Federal funds are to be turned over to the States and localities to spend, these wage protections must be extended as well. Otherwise, Congress will just be enacting a new loophole.

Mr. President, the pending Hartke amendment includes a clearly defined statement in terms of the obligation of the States and localities to guarantee that the money is spent under a "prevailing wage concept." In no case should any worker paid with general revenue-sharing funds be paid less than the minimum wage incorporated in the Fair Labor Standards Act which has been approved by Congress.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that George Krumbhaar, counsel to the Joint Economic Committee, be granted the privilege of the floor during the consideration of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, I commend the Senator from Indiana for his amendment.

The Federal Government should not be giving away millions of dollars without some requirement that the States and localities pay wages in revenue sharing assisted programs similar to those prevailing in their own areas for similar work.

I fully support this amendment offered by the Senator from Indiana and the next one he intends to offer which would reinstate the Davis-Bacon provisions which the Senate Finance Committee regrettably eliminated.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. RIBICOFF. I yield.

Mr. PASTORE. Mr. President, did I understand the Senator from Connecticut correctly when he said that the Davis-Bacon provision inserted in the House bill was deleted by the committee?

Mr. RIBICOFF. The Senator is correct. Davis-Bacon Act protection was accorded in the House bill, but the Finance Committee eliminated it. But that is the subject of the Senator from Indiana's next amendment.

Mr. PASTORE. And this one provides, as I understand it, for the prevailing wage.

Mr. HARTKE. This provides for the prevailing wage.

Mr. PASTORE. In the particular community.

Mr. HARTKE. The Senator is right, in the particular community. The difference is that the Davis-Bacon protection was provided in the House bill. I have a series of formats which will cover this idea which has been basic in Congress for a long time.

Mr. PASTORE. I understand.

Mr. FANNIN. Mr. President, would the Senator yield?

Mr. HARTKE. I yield.

Mr. FANNIN. To answer the question of the distinguished Senator from Rhode Island, I think we should have clarification of this matter. This goes farther than I think the Senator from Indiana seeks to go, because it requires that individuals employed in jobs financed in whole or in part by revenue sharing must be paid the higher rate, the Federal minimum wage that is applicable to the job or State or local minimum wage.

For the most part, in comparable Federal employment the prevailing wage is higher. So it really is not paying the local wage rate for a comparable job. It is paying a higher rate.

So there is a vast difference. We are getting back to the Davis-Bacon Act when we do that. And of course the Davis-Bacon Act was in the House bill. We have illustrations of why the Davis-Bacon Act would be very detrimental to a local employer as compared to the rate that is now in existence in the local communities. To give an example, in the city of Page, Ariz., the minimum wage rate for common labor was about $2.50 an hour. However, it would be under the Davis-Bacon Act because the Government had a plant there. So, it would be $7.90 an hour under the amendment now offered by the distinguished Senator from Indiana.

There is a vast difference in paying $2 50 which is the wage rate paid in the local community, and going into a job that pays $7.90 an hour.

Mr. HARTKE. I do not disagree with the statement of the Senator, but the Emergency Employment Act is identical with this language. I have discussed it with the Secretary of Labor and the Secretary of the Treasury and they have indicated they support this type of legislation.

Mr. FANNIN. I do not want anybody to be misled into thinking they are going to have the local wage rate because it is not the local wage rate. This is the highest of all these wage rates. Does the Senator agree that is what the language states?

Mr. HARTKE. It is the highest of the, prevailing wage rate in the community. The Federal minimum wage or the State minimum wage. This is exactly what we did in the Emergency Employment Act. The Senator may complain about what it does and the Senator may complain about what Congress has done in the past. However, I am saying that if you are going to take Federal funds and distribute them the same standards should apply for specific contracts by the Government.

Mr. FANNIN. There is a vast difference because if a local community has a small job and they are going to do it with their own facilities they would be forced to pay these rates and to bring in a contractor doing work under a union contract. In the case to which I referred they would have to pay three times as much for this work.

It was brought out during the hearings that many times it is less costly for a community not to use Federal funds, such as Hill-Burton funds for hospitals, or funds for work of that nature, because they are forced to pay wages that sometimes are three times as high. In Utah some communities have turned down funds of this nature because if they utilize them they would have to pay an average of three times as much as they would otherwise.

Mr. HARTKE. Yes; the Senator may be a little confused on what we are trying to do. In the first place, if the Federal minimum wage is higher, that would apply. If the prevailing wage is higher, that would apply.

Mr. FANNIN. I think it is clear that when the Senator says the highest, they would have to pay three times as much.

Mr. HARTKE. If the prevailing rate is higher they would get that, but if the minimum wage is higher they would get the national rate. That is all we are saying.

Mr. FANNIN. For instance, in Maryland, in a small community, under the Senator's provision, they would not be paying the wage rate that was prevailing there; that would be the Federal contract in operation at the time, and if that contract called for a wage rate under Davis-Bacon, they would come in and establish the wage rate not from the standpoint of that small town, but from the working contract.

Mr. HARTKE. All of this is handled by the Department of Labor.

Mr. FANNIN. Yes, it is. Of course it is. It forces the payment of a wage rate that is totally unrealistic. There is no problem as far as many jobs are concerned where they must pay a wage rate, not in the area but in that community.

Mr. HARTKE. Let me say that the Senator may be pointing to a specific case but over the years the Labor Department has testified on this before the committee that as far as they are concerned, when they establish a prevailing rate in the area, that prevailing rate is neither inflationary nor excessive in that area. This is being administered properly and if it is being administered properly it is not a problem.

Mr. FANNIN. We can give many illustrations where it is applied by the Department of Labor, and it has been so excessive that they have not been able to utilize Federal funds.

Mr. HARTKE. Let me say to the Senator that this is a procedure which has been administered by the Department of Labor. They have stated it does not provide inequities and that it is being done properly.

I am trying to provide the same basic rights that would apply if this were a Federal project under the Emergency Employment Act.

Mr. FANNIN. When the Senator talks about Federal contracts it is different than Federal funds being utilized by local communities.

Mr. HARTKE. That is correct.

Mr. FANNIN. I realize as far as States are concerned the Davis-Bacon Act applies on Federal projects. But why apply it to a local community project where it will cost them two or three times as much?

Mr. HARTKE. Because if you appropriate this money for a project identically the same procedure would result.

Mr. FANNIN. You could not say it is a Federal project like building a plant or some large facility. We are talking about local community projects.

Mr. HARTKE. I understand what the Senator is saying. The Senator does not approve of the standard wage concept. I cannot argue with the Senator if he does not accept the standard wage concept. I cannot make him accept it. But this is what it does. It is well established in law and it has been affirmed repeatedly by Congress. We are only trying to put something back in this bill that has been previously approved by Congress, something that has been recognized by the House, something that has been recognized by the Treasury as a proper approach and by the Department of Labor as a proper approach. The administration is prepared to support it.

I find it difficult at this time to go ahead and try to contradict anyone who is opposed to the prevailing wage concept. If it is good for Federal projects it is good for projects funded with Federal money.

Mr. COTTON. Mr. President, will the Senator yield for a question?

Mr. HARTKE. I yield.

Mr. COTTON. The Senator is talking about the prevailing wage and the minimum wage. I want to be clear in my mind as to what the amendment means. It means that the Davis-Bacon Act shall apply to all wages expended under the funds in this act. Is that correct?

Mr. HARTKE. There are two amendments I am presenting. This is the prevailing wage concept. The Davis-Bacon Act uses the same concept but it is applied to construction workers alone. The Davis-Bacon Act has been on the books for a long time and that same basic rate applies to all employees. This deals with nonconstruction employees. If the prevailing wage is in that area, an area established by the Department of Labor, those wages shall be paid to any project funded under these funds. In addition, there is a provision that if a minimum Federal wage is higher than a prevailing wage, then it would apply. If the prevailing wage is higher, then it would apply.

Mr. COTTON. I am cognizant of the provisions of the Davis-Bacon Act. The only weakness of it was that the Secretary of Labor could declare any part of the United States he saw fit as one community so that in one fell swoop he put Boston, Mass., wages into effect in every remote community in my State and throughout New England.

When the Senator talks about prevailing wages in this amendment, he is applying the Davis-Bacon principle to nonconstruction workers. That is what the amendment does, does it not?

Mr. HARTKE. I am willing to accept that. That is a fair interpretation. Really, we are proposing the prevailing wage concept. What the Senator is saying is correct. I do not dispute for a moment that the area is designated by the Department of Labor.

Mr. COTTON. I have never complained about the principle of the Davis-Bacon Act except for the fact it has been enforced and because of the authority of the Labor Department, the Labor Department can declare all of the area east of the Mississippi as a locality if it so chooses, and it means we have that standard set. That is exactly what happened in New England.

Mr. HARTKE. The Senator is exactly right in his assessment and analysis of how the Davis-Bacon Act works. As a practical matter, it will not do that. If the Senator from New Hampshire would like to change the authority of the Secretary of Labor to designate the areas to be covered, that should be done in a separate amendment. All I am saying is that the concept, of which the Senator approves, should be involved in this legislation because this involves Federal funds. If the Senator from New Hampshire wants to change the Secretary of Labor's authority to designate areas, that is entirely different. All I am desiring here is equity of treatment, equity in the assessment of workers. If we are going to use Federal funds, then the same basic principle should apply.

Mr. COTTON. I thank the Senator for his clarification. The Senator from New Hampshire recognizes that he is powerless, and has been for 18 years, to revise the Davis-Bacon Act, and does not intend to try. But what the Senator's amendment really means is that if the Davis-Bacon Act applies, which in our locality, for instance, means that the prevailing wage of Greater Boston and Massachusetts shall prevail, every time we construct something in a little community in northern New Hampshire, where living conditions and living costs, and everything else, are different, it will make sure that funds that the Government borrows and pays interest on to distribute under the guise of revenue sharing—though it is not revenue; it is borrowed money—in every center in every remote locality in this country shall be used under the standard of the Davis-Bacon Act, or, if it is not a construction job, it shall be spent on a basis similar to the standard under the Davis-Bacon Act—in other words, you pay metropolitan wages in "Bingtown."

Mr. HARTKE. Let me comment for just a moment on what the Senator from New Hampshire has said. Let me read the language from the amendment. It says the Fair Labor Standards Act shall apply. That is an old law. It says the minimum wage law, which we passed in this Congress, shall apply. Subsection (C) reads:

> The prevailing rates of pay for persons employed in similar public occupations by the same employer.

That is a provision of the amendment. It is certainly very limited in scope.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. PASTORE. Does the Senator's amendment mean that if a mayor of a city who received that money augmented his police department, all additional policemen who come aboard shall be paid the same wages as those who were there already?

Mr. HARTKE. The Senator helps make it very clear.

Mr. PASTORE. Let me take this a step further so that there will be no misunderstanding. Let us assume that in that city there are certain Federal employees and municipal employees, and a secretary working on the Federal payroll gets $10,000 a year, but a secretary working under the municipal payroll gets $6,000 a year. Under the Senator's amendment, a new secretary engaged by the city will be paid how much?

Mr. HARTKE. Her salary would be the salary being paid by the city, unless the Federal minimum wage was in excess of that.

Mr. PASTORE. It would be in my particular case.

Mr. HARTKE. Yes.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. LONG. I do not understand the amendment, and I must beg the Senator's indugence while I try to get it straight in my mind. As I understand it, under the amendment, subsection (B) provides that a person must be paid the State or local minimum wage for the most nearly comparable covered employment, or (C) the prevailing rates of pay for persons employed in similar public occupations by the same employer.

This subsection (C) is already in the committee bill, I believe. Is it not?

Mr. HARTKE. Yes.

Mr. LONG. So what we are really talking about, then, are subsections (A) and (B), "individuals employed in jobs financed in whole or in part out of its trust fund will be paid wages which are not lower than whichever is the highest of (A) the minimum wage which would be applicable to that individual under the Fair Labor Standards Act of 1938 if section 6(a)(1) of such act applied to the participant and if he were not exempt under section 13 thereof."

Then, am I to understand that if this is a category that is not subject to the minimum wage, the minimum wage shall nevertheless be applied to that category?

Mr. HARTKE. That is right.

Mr. BROCK. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. BROCK. Let me cite a case. Some of our communities are making an effort to get people off the welfare rolls, and they are taking them off and leaving their welfare payments intact, but they are paying them additional amounts for training type of work in order to give them a job skill and an opportunity to acquire meaningful employment later on. Would this proposal force the authorities to pay them at the Federal minimum wage?

Mr. HARTKE. Is the Senator speaking about trainees?

Mr. BROCK. I am speaking about people who are not clearly defined as either trainees or employees. Maybe they are both, but there are plenty of programs in which they are in training categories, whether they are trainees or not. The fact is that they are given low skill jobs at low pay which is supplementary to the subsistence pay which they normally receive as unemployed, in order to give them an opportunity to acquire a step up on the productivity ladder.

It looks to me like the Senator is pretty well eliminating the underemployed and the unemployed and the poor from participation in this program, because he is pricing them out of the market.

Mr. HARTKE. The Emergency Employment Act would apply there. What the Senator is saying is that if they are trainees they are going to receive trainee's assistance. I want to make sure they receive income which comes within the minimum wage standard established in the State.

Mr. BROCK. If the trainee was receiving $1.20 an hour, would he not be required to have his wage raised to the Federal minimum wage, under the Senator's amendment?

Mr. HARTKE. Not unless the provisions of the Fair Labor Standards Act applied. I go back to the Fair Labor Standards Act, as amended and passed recently. All we are saying, in substance, is that all these provisions of law which have heretofore applied under the Fair Labor Standards Act, the Emergency Employment Act, and the Minimum Wage Act shall apply if we are going to provide money under the revenue sharing concept, and not permit the Government to be a participant in cutting down wages. The Senator from Rhode Island put it correctly. If there are going to be trainees, they are to be paid trainees' wages, but if a person is going to be put on the payroll, he should be paid the same as those already there.

Mr. BROCK. The Senator is talking as though these were Federal projects. He says they should be paid the same. These are not Federal projects. The whole purpose is to give some flexibility to local government to respond to its own problems and the problems of its constituents.

If we are going to establish this kind of a criterion, without any flexibility at all, it seems to me we would inhibit their ability to respond to those needs.

Mr. HARTKE. No, I cannot agree with that analysis at all. The truth of it is that what we are doing here is providing Federal funds to local communities with no strings attached. All I am saying is that the gift shall not be one which goes in and undermines the prevailing local wages of the State and the minimum wage scales of the Federal Government. That is what we are saying. What we are saying is that this measure, cannot be used to prevent paying these employees the same rate as the same employers pays to other similar employees. In other words, it cannot be used to promote wage discrimination.

Mr. BROCK. I have seen some unions claim that every training program that is devised is an effort to cut the wages of their membership below the prevailing wage, though I think that is a ridiculous argument.

Mr. COTTON. Mr. President, will the Senator yield to me for just one remark?

Mr. HARTKE. I would be glad to yield.

Mr. COTTON. The Senator from Indiana, with his usual clarity, who has a faculty for getting down to brass tacks and presenting a question so that everyone can understand it, put a question to the distinguished Senator from Indiana asking if, in a city, secretaries working on a Federal payroll were receiving $10,000 a year, and secretaries working on the payroll of the city were receiving $8,000, and the amendment of the distinguished Senator from Indiana were adopted, what would the secretaries receive under this amendment, and the Senator's reply was $8,000.

Since the Senator's answer to that question, I have read his amendment again very carefully, and if that is what they would receive, then I cannot read plain English, because the amendment says distinctly differently. It says:

> whichever is the highest of (A) the minimum wage which would be applicable to that individual under the Fair Labor Standards Act . . . . (B) the State or local minimum wage for the most nearly comparable covered employment, or (C) the prevailing rates of pay for persons employed in similar public occupations by the same employer."

It says "whichever is the highest."

Mr. HARTKE. Will the Senator permit me to try to explain that?

Mr. COTTON. That is what I want.

Mr. HARTKE. No. 1, that secretary— and I understand that is what the Senator is concerned about——

Mr. COTTON. Yes.

Mr. HARTKE. If the Federal minimum wage were the highest wage, the hypothetical secretary would receive that wage. If the State law provides a higher minimum wage, then she would get the minimum State wage.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. PASTORE. In order to clarify this, what the Senator is actually saying is this, that in no case will anybody be paid less than the minimum wage. That is what it amounts to, is it not?

Mr. HARTKE. The employee will be paid the minimum Federal wage or the minimum State wage, or, in other words, what everybody else gets from the same employer for employment in the same category. He will be paid whatever minimum other employees receive who are working for the city.

Mr. PASTORE. It strikes the Senator from Rhode Island that even without inserting this provision in the law, one would expect the particular mayor to do exactly what the Senator is trying to have him do by inserting it in the law.

Mr. HARTKE. That is right.

Mr. PASTORE. Because all the Senator from Indiana is trying to do is to make sure that they will not use this money to undercut prevailing wages. That is all he is trying to say. In other words, all he is saying is that for the comparable job already being performed, if they add to it new personnel, they have got to pay that new personnel the same amount of money.

Mr. HARTKE. Yes.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HARTKE. I am glad to yield to the Senator from Louisiana.

Mr. LONG. The more I read this amendment, the more it seems to me the Senator is not saying what the Senator from Rhode Island says he is saying. The more I read this, the more it looks to me like they have to pay whichever is the highest of three levels. The first is the prevailing wage they pay their own employees. This point was in the House bill, and the committee has left it in this bill, and that point we are not arguing. But in addition, they have to pay whichever is the highest of two other amounts. They would have to pay whichever is the higher, the Federal minimum wage, even though that does not apply to them, or if they have a State or local minimum wage which is higher than the Federal minimum, they would have to pay that wage, even though that does not apply to that particular employment.

The committee found no objection if you have to pay at least as much as you are paying your own policemen. But the amendment would provide that even though the Federal minimum wage law does not apply to city policemen, you still have to pay at least the Federal minimum wage. Even though it does not apply to city police, you have to pay that, unless you have a State minimum wage law which is higher than the Federal minimum wage, then you must pay that.

So, you take a three-way deal, and whichever one is highest of the three is what you are going to pay. Is that not correct?

Mr. HARTKE. Surely. The Senator——

Mr. LONG. Even though right now none of them apply to you?

Mr. HARTKE. Will the Senator permit me to comment?

Mr. LONG. Yes; I am asking the Senator to.

Mr. HARTKE. The Senator is correct. But that is the way it is in the Emergency Employment Act. All I am saying is, if they are going to use Federal money, they are going to pay the Federal minimum wage. That is all the Senator from Indiana is saying.

Mr. LONG. I hope the Senator from Rhode Island heard the answer of the Senator from Indiana that what I said is correct, and here are three minimum wage principles, and you have to pay the highest of those three, even though none of them is applicable to you as the law stands now.

The Senator in effect says, "Yes, the reason they ought to do that is because the Federal Government is paying 90 percent of the costs or 50 percent of the costs and, therefore, they ought to pay the highest of those three." Whether the Federal Government is paying 90 percent of the expense or whether it is paying 50 percent, they will pay the highest of the three.

In this case, however, the Federal share might not be 90 percent. It might not be 50 percent. It might be just 1 percent, and the increased cost of applying this minimum wage rule might be more than the value revenue sharing would bring to the city. So it could be a very heavy burden.

We in the committee found no objection at all to saying that they will pay people the wage rate which persons employed in similar public occupations by the same employer are paid. As a result if they hire a policeman, they will pay him the same as they are paying other policemen. We found no objection to that. But if you take two other rules, neither of which otherwise would apply, and say, "You will pay the second if that is the higher," and then add a third, and say "You will pay that if that is the higher," that may be a reasonable requirement where the Federal Government is putting up 90 percent of the cost of a project, but where the Federal contribution may be only 1 percent or less than 1 percent, that is a very strained requirement to put on the payment of Federal aid.

A lot of the mayors want to take this revenue-sharing money and put it right into their operating budgets. That would mean everything they have added through revenue sharing, which might be only 2 to 5 percent of their operating budgets, might be consumed with this wage increase, so there is a question as to whether they are going to show a net gain at all, or whether they will have to levy a tax on their people to take advantage of the revenue sharing.

Mr. President, the majority of the committee felt that we should not put that unnecessary strain on this effort to help State and local governments, and every move that the Senate Finance Committee made to change this bill that had anything to do with requirements was not to put requirements on, but to take requirements off. We did feel that the provision that would require the payment of the same prevailing wage that they are paying other employees in the same type employment was reasonable, and that it should be in the bill. But in view of the fact that the Federal funds might only be 2 percent or 5 percent of a budget of the city or community we were seeking to aid, it occurred to us that the other strings might exceed the value of the revenue sharing.

Frankly, that is one reason why the cities are so concerned about the prospect of having revenue sharing subject to annual appropriations. They fear that every time a revenue-sharing bill goes through the Senate just for the regular annual amount, they might get an amendment such as this, which might cost them more than the revenue sharing would be worth to that community. That was the point made by many of them.

I must say that the AFL–CIO and its various groups have been consistent. In the first place, they were against revenue sharing completely. They felt that it ought to be handled like any other Federal program, with every condition attached to it that conscience and good judgment and logic could suggest, and that many of those amendments should be on there to provide an employer every opportunity to give the employee better pay and working conditions and shorter hours. But it was also their position that if you are going to pass this bill the Federal Government should put the hammer hold on the community and make them do what the AFL–CIO thought should be done.

That is, after all, the one big fear about revenue sharing—that we would attach strings to revenue sharing that would become so burdensome that by the time the communities met all requirements, they might have been better off to have forgotten about the whole idea.

While I think the Bacon-Davis concept is properly applied where the Federal contribution is sufficient and substantial so that a community can undertake the burden placed on it by having to pay a much higher wage rate, I can recognize the possibility that in many communities this requirement might prove to be a trap, because a board of county commissioners or a local community might make the mistake of taking the revenue-sharing money and putting it in their operating budget, so that revenue sharing would be a part of their total expenditures.

I would commend section (C) of this amendment, but I do have reservations about sections (A) and (B), in view of the fact that for some communities this is not going to be a large share of their budget.

Mr. BENNETT. Mr. President, will the Senator yield for the purpose of a unanimous-consent request?

Mr. HARTKE. I yield.

Mr. BENNETT. Mr. President, at the request of the Senator from Illinois (Mr. Percy), I ask unanimous consent that Robert Vastine, a member of his staff, have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, I ask unanimous consent that the name of the Senator from Connecticut (Mr. Ribicoff) be added as a cosponsor of amendments 1461, 1462, 1463, and 1466.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. I yield to the distinguished Senator from Idaho.

Mr. CHURCH. Mr. President, I think I shall support the amendment offered by the distinguished Senator from Indiana, but it does point up the internal contradiction that lies at the heart of the proposed legislation.

As I recall, when President Nixon first proposed revenue sharing, his argument was that it would strengthen the State and local governments. None of us could dsagree that both State and local government in this country need additional revenue. But when it comes from Congress, it is very likely to come with strings attached. Even though the President, in his original proposal, said that he would insist upon no conditions except the basic constitutional requirement relating to nondiscrimination between races, already we are adding new conditions.

The particular condition that the Senator from Indiana seeks to add is one that I think is praiseworthy. Therefore, I shall vote for it.

I do not know how you get away from imposing conditions that seem to be reasonable when you are doling out Federal money. Therein lies the internal contradiction. It is not possible to have it both ways. It is not possible to have a revenue-sharing program without strings attached.

This is just the beginning of a series of knots that will be tied in this, and subsequent Congresses, which will restrict and regulate the use of revenue-sharing funds by State and local governments. Therein lies the internal contradiction.

As we increase the Federal allotment to State and local governments, we will also enlarge upon the degree of Federal control over the use of the funds. In the end, instead of strengthening State and local governments, we will weaken them still further. As they become more dependent upon Federal funds, we will erode away the independence of State and local governments. In the name of giving them additional strength, we will in fact impose further Federal limits on their freedom of action. Thus, our federalism is fed more and more out of the Federal Treasury, and State and local governments continue to decline. That is why I doubt that I can support this legislation on final passage. At the very least, it is my intention to vote against this bill, unless Congress and the President are willing to raise the money to pay for it.

At the moment, we do not have any revenue to share. Faced with a $38 billion deficit this year, the Federal Government is much worse off than most of the State and local governments the bill purports to help. Unless we have the gumption to raise the money we propose to share, instead of adding still further to the enormous national debt, I shall vote against this bill on final passage.

But I do want the Senator to understand that I appreciate the fact that we should not extend Federal funds, without laying down certain conditions that we feel are fair and proper. Because the particular conditions contained in this amendment seem to me to be praiseworthy, and because they are consistent with previous policy adopted by Congress as it relates to the disposition of other Federal moneys. I am constrained to support the amendment that the Senator offers.

Mr. HARTKE. I thank the Senator. I think he points up exactly what the difficulty is with the whole problem.

This is something which has been discussed in the Committee on Finance The whole idea of taking Federal money and doling it out could have been obviated if we had some type of tax credit scheme. Unless we do this, we are going to have to proceed with the idea that we are taking the taxpayers' money and are putting it into the Treasury. If we do not adopt this amendment, we will have two separate standards. One of them will be applied where the appropriation process is gone through. In this case, they will not go through the appropriations process, which I find rather peculiar, but I will support the committee's position on it. In good conscience, I never did think it was a position which was defensible.

If you are going to appropriate money, the Appropriations Committee should be the appropriating body. But ultimately that issue too will be settled on the floor of the Senate.

If we do not apply this standard in the revenue-sharing bill, then we ought to repeal it in such legislation as the emergency employment legislation. There is no difference. If Federal money is being given to the States to be used on local projects, we should not use two standards.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. LONG. The Senator is aware that even if we tried to help the States by way of a tax credit, there is nothing to keep any Senator from offering an amendment on any revenue bill to put any conditions he desires on that tax credit, including the ones the Senator from Indiana has in his amendment. If the Senator wants to help the local communities and the States with the problem of the increasing restrictions on Federal aid, the only way we can do this is through restraint, by keeping the strings off in our actions on the floor of the Senate or in the House. That is the problem, whether we go by way of the tax credit, the tax deduction, or an appropriation, it makes no difference. It is a problem of restraint right here. It is the courage to say, "Yes, I would like to see them get more money in a way they can really use it." If you want to help them you should be saying, "I do not think I should be putting strings on this appropriation, this tax credit, or this tax deduction, because if I do, it will undermine the independence of the government and the ability of the local people and the local officials to do what they are trying to achieve."

In any event, the same problem remains. If the Federal Government wants to help the communities, it has the power, whether it goes the tax credit, tax deduction, or the appropriation route, to put on the strings. The restraint has to be the restraint of the individual elected representative not to put the strings on.

Many more types of strings can be suggested for the cities if we want to further restrict their benefits from revenue sharing. Many ideas have occurred to me that would be good conditions, but I dropped them, because I was persuaded meritorious though I thought they were, that if we put all the strings on, it would defeat the purpose of the bill.

Mr. HARTKE. Let me say to the Senator from Louisiana that I think the issue is clear. Under the Emergency Employment Act if we hire someone, he receives the highest of the Federal minimum wage, the State minimum wage, or the prevailing wage rate for similar employees. Failure to adopt the Hartke amendment would put the city in the ridiculous position of paying an Emergency Employment Act employee, at one rate, and a revenue sharing employee at a different rate. Both would be financed by Federal money.

Mr. LONG. It is a question of whether we are paying 100 percent Federal money, 90 percent Federal money, 50 percent Federal money, or one-half of 1 percent Federal money. The Senator would apply the concept to them even though the Federal contribution is less than 1 percent.

Mr. HARTKE. The Federal Revenue Sharing Act is a 100-percent contribution from the Federal Government and from the deficit, as Senator CHURCH said. We are taking 100 percent Federal money. Not one penny is being required to be donated by the State or collected by the State.

Mr. LONG. By the time the revenue-sharing money gets to the city employee, it might represent one-half of 1 percent Federal revenue sharing. What the Senator is proposing here might require the community to pay 20 or 50 percent for additional wages. In that situation, it would be well advised to take the revenue-sharing money and put it over into one isolated area of expenditure which would not be subject to the Davis-Bacon Act, because it has a high wage rate attached to it, where this requirement would not give them any problem rather than using it in something else which is far more needed. That would create a severe problem, in my judgment.

Mr. HARTKE. All the Senator is saying is, "I do not like the prevailing wage concept." Those who vote against this amendment will be voting against the wage concept embodied in the Emergency Employment Act. Some people may want to do that. I do not think that Congress would like to find itself in that anomolous position.

Mr. LONG. If we are talking about 100-percent Federal money, I would be willing to go along with the amendment, or even 50 percent and I would go along with that, but when the Federal contribution is 1 percent that, I think, Senator, is going a little bit too far.

Mr. HARTKE. All I can say is that this is a 100-percent contribution from the Federal Government. The State does not make one assessment. The local community does not make one assessment. This is 100-percent Federal money—$30 billion in the next 5 years.

Mr. FANNIN. Mr. President, the Senator says this is 100-percent Federal money. Does not the Senator agree that an employee can work 1 day for a city or a local community on a job and the next day he would be, perhaps, working on a job financed by revenue sharing. So that he would have two different wage scales and they would be forced to employ that person on a different basis. As the bill now stands, the worker must be paid no more than the prevailing rate for persons employed in a similar job. Is that not true?

Mr. HARTKE. That is right, but, really, I cannot conceive of anyone here doing it differently. Maybe the Senator from Arizona would like to.

Mr. FANNIN. Does not the Senator agree that the bill now requires that a worker must be paid no lower than the prevailing rate for persons employed in a similar job by a local government?

Mr. HARTKE. That is right, a policeman and another policeman would get the same salary no matter whether it is this Government or a local government.

Mr. FANNIN. They would be paid a fair wage by the State or local government, so that then they would get Federal funds. When they have a person that comes under revenue sharing, then they have to raise the wage rate as much as three times the amount.

Mr. HARTKE. The Senator can point to examples, of course, but all I am saying is that if we use Federal funds, Federal laws, and fair labor standards will apply.

Mr. FANNIN. The language was discussed in committee and, on the basis on which it is now proposed to the Senate, was overwhelmingly voted. It was a vote, I think, something like 8 to 2. So it is something that was thoroughly considered. If the Senator applies his principle that he is talking about here in his amendment, it would preclude a local government in many instances from taking advantage of revenue sharing. It would be precluded, because it would be more advantageous not to pay two or three times the wage rate for a construction job or some particular service. It would be better off not to accept the funds.

Mr. HARTKE. All I can say to the Senator from Arizona is that he does not like the prevailing wage standard. He also does not like the minimum standards. His record is consistent on that score. He has opposed every minimum wage to come before the Senate. That is all right with me. If he is not for the Fair Labor Standards Act, that is his privilege. But I say again that if we use

Federal money, then the Federal wage standards should apply to the workers.

Mr. FANNIN. It is not the prevailing wage rate the Senator would apply but a wage rate inconsistent and not intended by the revenue-sharing program.

Mr. HARTKE. I am perfectly willing to concede to the Senator that he can vote against this amendment, but I cannot conceive of the rationale that makes a distinction between the Emergency Employment Act, which this Congress adopted, and the revenue-sharing bill.

Mr. FANNIN. We have great unemployment in this country today, and we are trying to provide employment for as many people as we can who, perhaps, are not skilled to the extent that they can justify the construction wage rate or a high wage rate in the construction industry. Here we are saying that if a worker comes to work, we will pay him this amount, but if he goes to another job, in a local community, we will pay him one-third that much. This is just not consistent. It will work a hardship on the community. It is also a very unrealistic way to handle the wage earner. I cannot understand why the Senator is not satisfied with the provision that we now have in the bill that does require a minimum wage rate to be paid. That is very inconsistent, to my way of thinking, not to provide for this, as on page 61, section 5, it does specifically spell out that the person is protected. This would increase the prevailing wage rates being paid in the community. I hope that the Senator's amendment is rejected. It would be very detrimental to the revenue-sharing bill. It will probably mean that many communities in this Nation will not be in a position to use these funds. In fact, it would be more advantageous for them to do the work themselves than to go to the Federal Government for the revenue-sharing funds.

Mr. HARTKE. Mr. President, if the Federal Government is going to try to afford some type of relief to the local communities, I do not think it should contribute to the destruction of the local minimum wages. I do not think it should contribute to the destruction of the minimum wage standards set by the State. I do not think it should contribute to the destruction of the prevailing rates being paid.

The end result of a failure to agree to the amendment would be a steady deterioration in the Davis-Bacon law that has long been adopted and approved by Congress. This would be a step backward for the working people.

Mr. COOPER. Mr. President, will the Senator yield for a question?

Mr. HARTKE. I yield.

Mr. COOPER. Mr. President, may I ask the Senator from Indiana whether his amendment would authorize payment prescribed under the Fair Labor Standards Act to an individual who otherwise would be exempt?

Mr. HARTKE. Yes; it would.

Mr. COOPER. Would the Senator from Indiana tell me how his amendment would accomplish that? If one reads the amendment, it would not seem to do that. It says:

> Individuals employed in jobs financed in whole or in part out of its trust fund established under paragraph (1) will be paid wages which are not lower than whichever is the highest of (A) the minimum wage which would be applicable to that individual under the Fair Labor Standards Act of 1938, if section 6(a)(1) of such Act applied to the participant and if he were not exempt under section 13 thereof, * * *

If the Fair Labor Standards Act does not apply to an individual, he is exempt. Would the Senator's amendment then cause him to be covered by the Fair Labor Standards Act? Would the act be applicable? Is the Senator, in effect, writing an amendment to the Fair Labor Standards Act rather than talking about revenue sharing?

Mr. HARTKE. The fact is that the minimum wage would be applicable to that individual. In other words, it would apply to all those individuals and others who are presently exempt.

Mr. COOPER. Mr. President, I will give an illustration. Assume Mr. Smith is unemployed, and he secures employment in a job which is partly financed by revenue-sharing funds. It is a position which is at present or at the time this measure becomes law is exempt from the Fair Labor Standards Act. Would the amendment require the minimum wage to be paid to him?

Does the Senator's amendment amend the Fair Labor Standards Act so as to provide that the minimum wage be paid to an individual who would otherwise be exempt? That is an easy question to answer.

Mr. HARTKE. Yes, it would.

Mr. COOPER. Then, the Senator's amendment in effect amends the Fair Labor Standards Act?

Mr. HARTKE. Insofar as those funds were used, the Senator is correct.

Mr. COOPER. Is that not a change? I want to vote for the Senator's amendment. However, if it is correct that the Senator is seeking to amend the Fair Labor Standards Act indirectly. I want to know that, and I would not vote for the amendment.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. HARTKE. I yield.

Mr. HUMPHREY. It is my interpretation—and I think we ought to get this clear from the language that is here—that what we are really saying is that there are really three or four options which apply for the wage standard under this particular amendment.

The first is:

> Will be paid wages which are not lower than whichever is the highest of (A) the minimum wage which would be applicable to that individual under the Fair Labor Standards Act of 1938 . . .

Mr. COOPER. I understand that.

Mr. HUMPHREY. Then it also says that those that are exempt continue to be exempt. That is what it says here. It says that those that are exempt under the Fair Labor Standards Act of 1938, as amended, would continue to be exempt.

Mr. COOPER. That is what I thought.

Mr. HUMPHREY. That is what I thought as a cosponsor. But if it is not, I do not want to be a cosponsor.

Mr. COOPER. The Senator from Indiana just said the opposite.

Mr. HUMPHREY. Mr. President, I think there is a misunderstanding here. The next option is the State or local minimum wage for the most nearly comparable covered employment, and the other is the prevailing rates of pay for persons employed in similar public occupations by the same employer.

In other words, what we are really saying here is that the wages to be paid will be the highest of those three possibilities, the possibilities under the Fair Labor Standards Act, as amended, with the exemptions that are presently in the law. That is my understanding.

Mr. COOPER. That is the way I understood it.

The language confuses me. I do not think the amendment is necessary, because, if the Fair Labor Standards Act applies, we are simply saying in this amendment that it does apply. And if it says further that it does not apply, it does not add anything to it. I wonder what its purpose is. If it is an attempt to amend the Fair Labor Standards Act, then I want to know.

Mr. HARTKE. Mr. President, I have discussed this matter with the chairman of the Labor Committee, the Senator from New Jersey (Mr. WILLIAMS). I do not think a lot of harm could be done by interpreting the amendment along the lines suggested by the Senator from Minnesota because, as I understand it, the law passed by the Senate leaves practically no exemptions anyway.

As far as I am concerned, if the Senator wants to make that clear and make sure that those who are presently exempt would continue their exemption, I would be willing to accept that change in the Hartke amendment.

Mr. COOPER. Mr. President, I would like to know if the Senator from Indiana agrees with the interpretation of his cosponsor the Senator from Minnesota (Mr. HUMPHREY).

Mr. HARTKE. I will agree to that.

Mr. HUMPHREY. Mr. President, I would like to ask one other point here.

I think the Senator from Louisiana has made a very valid point in reference to funds under revenue sharing coming to the local treasury—municipality, county, or State. Let us say that only about 5 percent or 3 percent of those funds actually go for the payment of services. This amendment would require that Federal standards such as we apply under Davis-Bacon, mass housing, or urban transit and so forth would be used. I think we ought to change this amendment to read as follows: "individuals employed in jobs financed in whole or in which more than 50 percent of such funds comes out of its trust funds . . ."

Then, we have not changed the basic standards which we have today in categorical grants and public construction. Then, we meet what I consider to be a very persuasive argument on the part of the Senator from Louisiana. I am not the main author of this amendment, but

I do try to be informed. I sat here and I listened to the debate. While I am strongly in favor of the general thrust of the Hartke amendment, and I join him in it, so far as I am personally concerned I believe it would be better legislation and sounder practice if we add these provisions to the bill, to state: "Individuals employed in jobs financed in whole or in which 50 percent of the funds come out of the trust funds under paragraph 1."

Mr. LONG. While I do not like the idea of any strings to money we are going to make available to the cities and communities, I have felt that something may be said for them where the Federal contribution is substantial. I voted to apply the Davis-Bacon Act, I would vote to apply it again where the Federal contribution is 50 percent, 75 percent, or 90 percent. But frankly, I did not vote for the first Hartke amendment and if I did not vote for one I would not expect to vote for the second. Number 1461 relates to the minimum wage and number 1462 applies to the Davis-Bacon Act. If I voted for one I would expect to vote for the other.

If you are looking at the situation of a city such as San Francisco, which has a very fine and able mayor who testified before us, where revenue sharing will be about 5 percent of his overall budget, it might be wages are very high there, but there are many other cities where wages are not high and it could be that by applying the Davis-Bacon concept to other city employees they would be barred from using this money unless they made wage increases larger than the shared revenue.

Admittedly, there are ways that people could get around this Hartke amendment, such as using the money to buy only fire trucks and other equipment, so that the provision would not apply.

Frankly, I would say that it would not be a bad compromise to say that this rule shall apply to situations where expenditures of funds from the local revenue sharing trust fund represents 50 percent or more of the wages which are paid to employees on a project.

Mr. HARTKE. I understand the Senator to say that if the amendment along the lines of the suggestion of the Senator from Minnesota were adopted in this amendment—does he anticipate he would expect to amend the amendment applying the Davis-Bacon Act, in the same fashion?

Mr. LONG. Yes.

Mr. HARTKE. That the Senator would want the same limitation?

Mr. LONG. Yes.

Mr. HARTKE. The Davis-Bacon Act deals with construction contracts on Federal projects. All we are saying is that the Davis-Bacon Act shall be applied to revenue-sharing funds used by local communities.

Mr. HUMPHREY. But that is almost all Federal funds, or 75 percent of Federal funds. There is a lot of difference in that and having county or municipal funds from a local district.

Mr. HARTKE. I cannot argue the fact that there may be some local money used, but I can find no one who would disagree with me that there is no local tax and no State tax and that it is 100 percent Federal funds.

I wish to point out this is not the end; this is just the beginning. This is just a foot in the door. Next year, they will be back for $20 billion. This is just the beginning and we had better get principles fixed in our minds.

The benefits of revenue sharing should not come at the expense of the working people.

Mr. HUMPHREY. The problem is that in many areas there is not a sufficient amount of money. In many major communities, the teachers are highly organized. In my State, the problem of the teachers is that there is no money. You cannot get money from an empty treasury. The purpose of revenue sharing is to put money in the treasury. It will permit hospital workers, teachers, and other workers to get a fair wage. We should be careful here that we do not destroy what we are trying to get. I am for revenue sharing. I know that some are not. But I am not going to adopt amendments that will destroy revenue sharing. But I do want to see standards to make it what we hope it will be and not destroy certain standards that already are established.

That is why I am saying we should accept the language I have proposed, which does not upset the apple cart and does not destroy the standards and it may reenforce the measure. My proposal was to include:

> Individuals employed in jobs financed in whole or in which 50 percent of the funds come from trust funds.

Then, you have applied Davis-Bacon because the Davis-Bacon standard applies where there are Federal contracts in construction and not where some little local school district that does not get Federal funds is going to build a schoolhouse. It is where you have Federal contracts and Federal standards. If we were to modify it, it would improve the language.

I know there are those who believe there should not be any modification. I appeal to the author of the amendment to take what I consider to be a major step. Maybe it is not all he wants, but it gets at what we hope to accomplish here and it does not overly extend the matter.

Mr. HARTKE. First, this is not Davis-Bacon.

I just want to make clear it is not. This is the prevailing wage concept which is embodied in the Davis-Bacon Act. As the Senator says, it does not weaken it. This is a revolutionary concept, if we take the wording the Senator from Minnesota is talking about.

Mr. HUMPHREY. All it really says is as follows. Here is revenue sharing, shall we say, in the city of Marshall, Minn., of $125,000. That goes into the community treasury. That is what it is for. It goes in there. If that represents 3 to 4 percent of the amount of money that is available for the prevailing wage in that community so that we can have somebody working in the park or somebody working in a hospital, is the Senator going to tell me that we have to apply all Federal standards for that 3 percent?

Mr. HARTKE. Does the Senator want to do away with the Federal minimum wage?

Mr. HUMPHREY. May I say to the Senator that is included in his amendment. Where we do have standards in present Federal law—and those that are the highest in this instance—they prevail. That is right here.

Mr. HARTKE. I understand that, but how does the Senator get to the 50 percent?

Mr. HUMPHREY. That is for the areas where we do not have Federal standards that apply. For example, if we have Federal standards for minimum wages for hospital workers—it does not make any difference whether they are in Isanti County or in Westchester—it means they are to be paid the minimum wages. The hospital worker in this instance is covered by the Federal Labor Standards Act.

Mr. HARTKE. That is what the amendment says now.

Mr. HUMPHREY. That is correct. Let us take an instance where they are not presently covered, such as working in a park.

Mr. HARTKE. If it is exempt today, it stays exempt.

Mr. HUMPHREY. That is right.

Mr. HARTKE. Where does the 50 percent come in?

Mr. HUMPHREY. That is protection so the amendment would not be interpreted as meaning that if 2 percent of the revenues goes to pay for a park program, they are going to be able to impose Federal standards on the park worker.

Mr. HARTKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The call of the roll was resumed.

Mr. HARTKE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. HARTKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Does the Senator from Indiana withhold his request for a quorum call?

Mr. HARTKE. Mr. President, I ask unanimous consent that the request for the quorum call be suspended, if ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. They have been ordered.

Mr. LONG. Mr. President, it seems to

me that if we are going to apply the minimum wage concept we ought to include the Davis-Bacon provision in the same motion. I do not believe it should be applied, but I do not think we should vote on a part of this concept without knowing the full implications of it. I therefore send to the desk an amendment, which is the next numbered amendment of Senator HARTKE and ask that it be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The assistant legislative clerk read Mr. LONG's amendment to the amendment, as follows:

On page 1 at the beginning of the amendment insert the following:

"(5) that all laborers and mechanics employed by contractors or subcontractors in the performance of work on construction financed in whole or in part out of its trust fund established under paragraph (1) will be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a–5), and that with respect to the labor standards specified in this paragraph the Secretary of Labor shall act in accordance with Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c); and".

On page 61, line 21, strike "(5)" and insert "(6)".

Mr. LONG. Mr. President, this was the next numbered amendment of the Senator from Indiana (Mr. HARTKE). It is at the desk. This amendment would seek to apply the Davis-Bacon Act, as well as the minimum wage concept, in order to make complete the Senator's proposal.

It would seem to me we might as well face this issue as one proposition. Basically that is what it is. I do not see any point in the Senate's voting on part of a theory and then, having become committed to a part, being asked to go along with the rest of it. If the Senate is going to vote for the proposal, it should not vote for just a part of it.

Frankly, Mr. President, if this is to be done, it ought to be done across the board. I would hope the sponsor of the previous amendment, being the same Senator, would be willing to agree to this amendment.

Mr. HARTKE. Mr. President, I would prefer that this not be done, because we are dealing with two separate items.

In the first place, the Senator from Louisiana is exactly right. Amendment 1462 was intended to be called up. But the history of the Davis-Bacon Act is just a little bit different than the history of the Prevailing Wage Act, which I talked about previously. The Davis-Bacon Act provision was included in the House-passed bill and was dropped by the Senate committee in reporting the bill to the floor.

In other words, what we have is two different ideas. The previous amendment, without this second amendment, was not in the original House-passed bill, and I would hope that we could deal with these matters separately.

Mr. LONG. It would seem to me, Mr. President, that it is all the same idea, all the same concept, that as a condition of some mayor getting revenue sharing, even though it might be only 1 percent of the overall budget, that if this money finds its way into any of his activities where he is paying for the services for the people, it implies a wage increase. Of course, some of us fear that by the time we got through voting for a revenue-sharing bill, the whole thing would be used up in wage increases. Some fear that the mayors might just take all the money and give themselves a pay raise, so that revenue sharing would be of no benefit to anyone else.

This is a danger one has to confront, if he is willing to trust local governments. I believe that in the long run they have a way of serving the public interest, even though in the short run they sometimes develop defects which we necessarily complain about.

Certainly the principle is the same in this amendment as in the Senator's previous amendment—that implicit in getting the revenue-sharing money is a requirement that if any of this money finds its way into your services, you must have the burden of paying a higher scale of wages in a greater number of situations than you would otherwise pay. This, in many cases, might well mean that the increased cost would then exceed what was being received through revenue sharing, a strain which might place a burden so heavy that it would completely negate all the benefits of the more than $6 billion.

Mr. ALLOTT. Mr. President, will the Senator yield for a question?

Mr. HARTKE. Will the Senator yield a moment?

Mr. LONG. I yield to the Senator from Colorado.

Mr. ALLOTT. I would like to ask him, first of all, referring to the first amendment offered by the Senator from Indiana, if the reference there to the exemption under section 13 thereof refers to exemption for city, State, and county employment?

Mr. HARTKE. Yes, it does.

Mr. ALLOTT. I thank the Senator from Indiana. I hope I can get the floor in a little while and make a few remarks about this bill.

Mr. LONG. If the Senator desires to speak to it, I am willing to yield.

Mr. HARTKE. Let me make a comment first. I would hope the Senator from Louisiana would permit us to vote on these matters separately. After all, we have a 40-year history on the Davis-Bacon Act. It was born in the depths of the depression, under President Hoover. At that time, the idea was that there was a need to protect the wage earner from being victimized by contractors who might otherwise take advantage of situations where the Federal Government was trying to provide money for local items. That bill was passed in 1931. Since that time we have repeatedly adopted the provisions of that act. Some people have objected to it, but generally speaking, the whole idea has never been seriously open to question.

The fact still remains that the House of Representatives did include this provision in its bill, and for that reason I would hope that we could deal with these matters in an organized fashion, rather than lumping them all together.

Mr. LONG. In any event the Senator will have two separate votes, if the Senate resists the amendment.

Mr. HARTKE. I would like to have them considered separately, if I could.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HARTKE. If the amendment as offered by the Senator from Louisiana as an amendment to the amendment of the Senator from Indiana is voted on in this fashion, would it preclude a vote on the amendment No. 1461, which is amended by the present amendment of the Senator from Louisiana?

The PRESIDING OFFICER. If amendment 1462 were adopted, then the vote would occur on amendment No. 1461 as amended by the adoption of amendment No. 1462. In other words, 1462 and 1461 together.

Mr. HARTKE. I understand that. What I asked is a different question. I am trying to find out the effect of the vote.

If there is a vote upon the amendment of the Senator from Louisiana as an amendment to amendment 1461, which was the original amendment offerred, and in the event that amendment fails, would that preclude the separate introduction of that amendment at a later date, to be considered by itself and not as a part of amendment No. 1461?

The PRESIDING OFFICER. No, it would not.

Mr. HARTKE. In other words, I want to make this very clear: The parliamentary situation is that a vote upon the amendment of the Senator from Louisiana would not constitute a prior vote upon the merits of that proposition, even though the words are identical?

The PRESIDING OFFICER. It would not. The reason it would not is that the Senator from Louisiana has slightly changed the language, so that they are not identical.

Mr. HARTKE. Oh, he has changed the language?

The PRESIDING OFFICER. He has changed the language to make it conform as an amendment to amendment No. 1461.

Mr. HARTKE. Then, as I understand, the parliamentary situation is that no matter what the results of the action on amendment 1462 as it now appears as an amendment to 1461, it could still be considered as an amendment in the first degree?

The PRESIDING OFFICER. That is correct.

Mr. HARTKE. And the reason for that is that as an amendment in the second degree it could only be considered as an amendment to the amendment already introduced?

The PRESIDING OFFICER. That is correct.

Mr. HARTKE. Could I further clarify this? If amendment 1462, which is of-

fered now as an amendment by the Senator from Louisiana, but was originally introduced by the Senator from Indiana, is adopted as an amendment to amendment 1461, and then the amended amendment were to fail, would it preclude the second introduction of either of these amendments, to be considered and voted on separately?

The PRESIDING OFFICER. No, it would not.

Mr. HARTKE. I thank the Chair.

Mr. LONG. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. Am I correct in my understanding that if the amendment is agreed to, it would remain subject to further amendment, either by language added at the end or by language added to the portion of the amendment that had not yet been amended?

The PRESIDING OFFICER. The Senator is correct.

Mr. BROCK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BROCK. Was the amendment of the Senator from Louisiana offered as an amendment in the nature of a substitute or additional language to 1461?

The PRESIDING OFFICER. It was a perfecting amendment.

Mr. BROCK. As additional language?

The PRESIDING OFFICER. Adding language.

Mr. BROCK. I thank the Chair.

Mr. TOWER. Mr. President, the net effect of the two amendments being offered by the Senator from Indiana will be, I think, to place the worst possible strain on this revenue sharing money that we could cook up here.

The whole idea is to give this money to State and local governments so that they can spend it at their discretion. One of the principal motivations behind this is to supplement the incomes of State and local governments that have reached perhaps the limits of expendable resources.

Actually, I think that most people who support the idea of revenue sharing look at it as pretty much of a temporary or transient thing, that many of us would prefer to see the sources of money now preempted by the Federal Government returned to State and local governments so that they would not have to receive the money back down through the bureaucracy again.

I think we take a great deal away from the local decisionmaking process when we insist upon placing strings of this kind. The net effect will be to drive up the cost of programs that are funded under this revenue sharing proposal. The net effect will be that State and local governments will have less in terms of real money to spend for their projects that are funded partially or wholly by these revenue sharing funds, because they will be compelled to pay inflated wages. This is going to punish small towns, because wage rates are going to be calculated as being those of the next biggest metropolitan area nearby.

For example, the small town of Athens, Tex., would have to pay the highest union negotiated rates in Dallas, and this perhaps would make the use of revenue sharing money uneconomical for small towns.

The effect of Davis-Bacon is to punish small contractors and, again, to punish rural areas and to stifle and inhibit development in small towns and rural areas.

The Senator from Indiana mentioned some 40 years of experience with Davis-Bacon. That experience has led us to believe that we should consider very seriously the repeal of Davis-Bacon as it applies to federally funded housing projects, because the experience is that it has made low-income housing more costly and has tended to keep these projects out of the smaller towns in the rural areas.

We have already had 3 days of testimony on this subject in the Committee on Housing, Banking, and Urban Affairs, and it has made a voluminous record that shows conclusively that Davis-Bacon is an inhibition on the prohibition of standard housing for low-income families and for elderly people.

We should not keep perpetuating this evil, particularly in a revenue-sharing proposal that is designed to leave as much to the local decisionmaking process as possible.

Regardless of whether the amendment of the Senator from Louisiana to the amendment of the Senator from Indiana is adopted, in either case, this amendment should be resoundingly defeated, because it would defeat the whole purpose of revenue sharing.

Mr. HARTKE. Mr. President, I understand what these people are saying. They do not like the Davis-Bacon Act, the minimum wage concept, or minimum standards on State and Federal levels. That is what this is going to boil down to.

I thought we had that pretty well cleared up when we talked it over with the Labor Department and the Treasury Department, and both agreed that these amendments were in order.

Senator Scott is in the Chamber now, and I yield to him.

Mr. SCOTT. Mr. President, I have been asked by the administration to advise the Senate that the administration finds fully acceptable the four labor protective amendments proposed to the revenue-sharing bill by the Senator from Indiana (Mr. Hartke). These amendments have been reviewed by the Department of Labor, as well as the Treasury Department, and it is the considered judgment of the administration that these basic labor protectives will strengthen the operation and administration of the general revenue-sharing program.

I will add, for myself, that I realize that there is a wide division of opinion here—there is on this side of the aisle—but I am asked to make this statement, and I do so in accordance with the request of the administration.

Mr. HARTKE. I thank the distinguished minority leader, because we did discuss these proposals with the administration. There were a couple of other amendments we discussed with the administration, and they felt that they could not go along with them and they should not be adopted. Therefore, we did not offer those amendments. They are at the desk. We intend to offer just the four which have been discussed with the administration.

I again want to express my thanks to the distinguished minority leader for making that statement and to thank the administration for the cooperation they have given us on this measure. We worked with them long hours to make sure that the best interests of all concerned—the workers, the municipalities, and the Federal Government—were all protected. I express my personal thanks to the Secretary of Labor and the Secretary of the Treasury for their cooperation in this matter.

Mr. LONG. Mr. President, I must say that I, being on this side of the aisle, do not regard myself as being privy to as much communication with the White House as when a Democrat occupied the position now occupied by President Nixon.

I sat in a joint session in the House of Representatives when the President announced this principle, and he said there should be no condition other than a condition that there would be no discrimination. Knowing no more than that, when we acted on this measure, I felt that I was supporting what the President had said and what we all applauded when he said that we ought to help these communities and that there should not be any strings except one, which was totally unnecessary anyway—no discrimination. I do not think the Constitution would let you discriminate because of race, color, or creed—and soon it is to be amended to provide that you cannot discriminate because of sex.

Not having voted because someone from the White House communicated with me, but having voted because something made common sense to me, I felt that I should vote to do what I thought was best for these communities and that we should apply a minimum of strings.

I think that if Senators are going to vote for the first Hartke amendment, they should vote for the other one, because they will be asked to vote that way, and they should not vote in the blind, thinking that they are only voting to apply the minimum wage concept when they are really voting to apply a major increase in the cost of government to most local and city governments and in many cases a large increase to State governments. In some instances, it may well be that the cost of the labor increases might exceed the revenue-sharing benefit.

I would hope that if these amendments should be agreed to, the AFL–CIO might decide that they are for the bill after all. They testified against it. I guess if in some cases the benefit to them is more than the benefit to the community or the taxpayers, they might decide that they favor the bill.

I do think that the idea of a minimum of strings is good, but if some are to apply, I think we ought to recognize that we are going to vote on a larger grouping. I hope the amendment I have offered, which would put these two amendments together, will be agreed to.

Mr. PASTORE. Mr. President, I want to say a word or two with reference to the overdoing of the subject of cost.

It is my experience, and I think it has been the experience of most Members of Congress, that usually the minimums that are set are always far below prevailing wages. I think we are overdoing this afternoon the idea of how much more it is going to cost and stressing what a great burden it is going to be to the municipalities and to the States. I think that the element of fright is being overemphasized this afternoon. I do not think any real peril is involved here. It is nothing more than simple justice in the four amendments and I hope they will all be adopted.

Mr. FANNIN. Mr. President, I think we should review the purposes of the committee action that was taken, which was to allow the localities to pay the wage rates prevailing in their own communities——

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Arizona yield for the purpose of my making a unanimous-consent request?

Mr. FANNIN. I am very happy to yield to the Senator from West Virginia.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I am authorized by the distinguished majority leader to make the following request, which has been cleared with the distinguished manager of the bill, the Senator from Louisiana (Mr. Long), with the distinguished ranking minority member, the Senator from Utah (Mr. Bennett), and with the distinguished Chairman of the Committee on Appropriations, the Senator from Arkansas (Mr. McClellan).

I ask unanimous consent that at no later than 12:30 p.m. tomorrow, it be in order for the distinguished majority leader or his designee to lay aside the unfinished business and call up H.R. 14370, the measure now before the Senate, and that the amendment to be offered by the Senator from Arkansas (Mr. McClellan) on behalf of the Appropriations Committee, amendment No. 1450, then be the pending question, the time on that amendment to be equally divided between the manager of the bill (Mr. Long) and the Senator from Arkansas (Mr. McClellan); and that the vote on that amendment occur no later than 4:30 p.m. tomorrow.

The PRESIDING OFFICER (Mr. Tunney). Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Arizona for yielding.

Mr. FANNIN. Mr. President, to review the purposes of the committee action that was taken to allow the localities to pay the wage rates prevailing in their own communities rather than to require the payment of unrealistic, higher wages which often are imposed under the area-wide concept of Davis-Bacon, we should take into consideration why this was done. It was done in order that we could have the local communities sponsor the projects which are needed projects that would employ people at the wage rates prevailing in the community. This bill, as I have stated many times, applies only to the local communities and not to State projects. It has no effect on the little Davis-Bacon acts of the States. It does require that workers must be paid no lower than the prevailing rates for persons employed in similar jobs by such local governments.

If this is changed, then we kill the whole concept of revenue sharing because we will place a barrier on the communities in utilizing the funds and in many cases make it more beneficial for them to supply their own funds. Either that, or not even have the projects at all, because of the excessive wage rates that will be required so far above the wage rates now prevailing in the communities.

There are fair wage rates being paid, and I have given many illustrations. I gave the one in my own State of Arizona, in the northern part of the State, in the small town of Page, where the beginning wage rate for a common laborer is around $2.50 an hour. But here, if we apply this principle, because there is a power plant there, would the wage rate be $7.50 an hour for a laborer. In this town they pay $5 an hour to a mechanic, but because of Davis-Bacon it would be $10.90 an hour; for a carpenter from $5 to $9.32 an hour, if the Davis-Bacon Act applies. It is $10—more than double. This shows exactly what would happen. It would not be beneficial for the community to accept the revenue-sharing program. The community would be better off to go ahead and finance its own.

So, Mr. President, I hope that we will be able to maintain by what is intended in the original revenue-sharing program and that we will have the provisions now in the bill take precedence.

Mr. President, I feel that it is very important we give full consideration to what is involved. I do not feel that we have. This is a fair and equitable bill. It should be noted that the committee retained the nondiscriminatory provisions of the bill. It has other provisions in it which are fair and equitable to the employee, to the city and to the community involved. If we go ahead and make these changes that are desired by the Senator from Indiana, I am afraid we will kill the whole benefit of this legislation.

Mr. LONG. Mr. President, I ask for the yeas and nays on my amendment to the Hartke amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. Tunney). The question is on agreeing to the amendment of the Senator from Louisiana (Mr. Long) to the Hartke amendment.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Nevada (Mr. Cannon), the Senator from Wyoming (Mr. McGee), the Senator from South Dakota (Mr. McGovern), the Senator from Montana (Mr. Metcalf), the Senator from Rhode Island (Mr. Pell), the Senator from Oklahoma (Mr. Harris), and the Senator from Washington (Mr. Magnuson) are necessarily absent.

I further announce that the Senator from Iowa (Mr. Hughes) is absent on official business.

Mr. SCOTT. I announce that the Senator from Hawaii (Mr. Fong), the Senator from Michigan (Mr. Griffin), the Senator from Oregon (Mr. Hatfield), the Senator from Illinois (Mr. Percy), and the Senator from Ohio (Mr. Taft) are necessarily absent.

The Senator from South Dakota (Mr. Mundt) is absent because of illness.

If present and voting, the Senator from Illinois (Mr. Percy) and the Senator from Oregon (Mr. Hatfield) would each vote "yea."

The result was announced—yeas 86, nays 0, as follows:

So Mr. Long's amendment to Mr. Hartke's amendment (No. 1461) was agreed to.

Mr. LONG. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The amendment will be stated.

The amendment was read as follows:

> At the end of amendment 1461 as amended add the following: "(7) Paragraphs (5) and (6) of this subsection shall apply only if the funds paid from the trust fund for the laborers and mechanics employed by the contractors and subcontractors referred to in paragraph (5) or the wages paid which are referred to in paragraph (6) constitute 50 percent or more of such wages."

Mr. LONG. Mr. President, this is the amendment that was suggested, in effect, by the Senator from Minnesota (Mr. Humphrey). I think it makes good sense. We have applied the Davis-Bacon Act first to Federal contracts where the Federal Government is paying all the expense. We had a right to do so. Subsequently, when we had aid to State programs and the Federal Government was paying as much as 90 percent of the cost of building a highway or 75 percent of the cost of building an airport, we agreed with organized labor when it said, "In view of the fact the Federal Government is paying the overwhelming proportion of this cost it should increase the wage ceiling on the States by making them comply with the Davis-Bacon Act." It has been extended to the point where we have applied it in some cases where the Federal Government is paying 50 percent of the cost of a highway or improvements under the Hill-Burton Act.

Under revenue sharing, however, there will be cases where the Federal Government share would be no more than 1 percent. As a matter of fact, Federal revenue-sharing funds under this bill will be only 5 percent of the overall State and local revenue. In county after county and in small city after small city, under the Davis-Bacon Act, these little communities will find revenue sharing might increase their costs by 15 or 20 percent on construction or other projects.

It would seem fair that if the Davis-Bacon Act, which is a Federal wage standard for Federal construction projects where the Federal Government is paying the majority of the cost, is to be imposed on those localities, it should apply only where the Federal contribution is at least 50 percent because that is the lowest degree of Federal matching known to me.

It seems reasonable to me, as suggested by the Senator from Minnesota, that if the Davis-Bacon Act and the other prevailing wage concept suggested in this amendment are to be applied to the local government as a condition of revenue sharing, it should be applied only to a project on which revenue-sharing funds represent at least 50 percent of the total cost. If it is less than that, we do not have a typical Federal matching program, and it would be setting a new precedent in theory to require the Davis-Bacon Act to be applied where the Federal contribution is less than 50 percent.

On that basis we would be saying that revenue sharing is going to pay for 50 percent or more of the project, we will require that the Davis-Bacon Act apply. Keep in mind, if revenue sharing is just added to the general operating budget, it is only going to be about 5 percent of it—on the average. If it is less than 50 percent, which is the lowest percentage now required to bring the Davis-Bacon Act into operation, then this provision applying the Davis-Bacon Act, in addition to the other requirement, would not be necessary.

I think that is a reasonable proposition, and it would seem to me that this amendment should be agreed to.

If Senators really want revenue sharing to impose no greater burden on State governments than the additional money to be passed to them, it would seem unreasonable to make an increase in the labor costs inevitable. In community after community the increase in labor costs could exceed the benefits of the revenue sharing bill.

I am normally content to vote for things that organized labor would suggest, but if this exceeds the revenue sharing to be available to a community, then the purpose portrayed to the American people for revenue sharing would be defeated.

Therefore, I think in fairness this amendment should be agreed to.

Mr. MILLER. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. MILLER. Suppose we have a situation where there is a construction project by the municipality and only 15 percent of the revenue sharing is going to go into it. Under the Senator's amendment the Bacon-Davis Act would not apply, but what would be the standard that would apply? Would it be the committee standard?

Mr. LONG. It would be the law that exists right now. Let me put it this way. There would be no additional standards imposed by this bill if the revenue sharing contribution is only 15 percent of the total wages paid on the project.

Mr. MILLER. I wish to ask a further question. The Senator will recall that the bill of the Committee on Finance when we reported it provided that the wages to be paid should be no lower than the prevailing rates for persons employed in similar jobs by local governments.

Now, is that still going to be in the bill if we adopt the Senator's amendment?

Mr. LONG. Senator, that is in the Hartke amendment, and because it is in the Hartke amendment, my amendment to the Hartke amendment would apply to it. The Hartke amendment, as the Senator knows, provides that the higher of any one of three categories has to be paid.

Mr. MILLER. That has been deleted. That has been superseded, has it not?

Mr. LONG. No. That is in the Hartke amendment.

The Hartke amendment seeks to strike the part of the committee bill which does what the Senator is discussing at this moment.

Mr. MILLER. Then, do I understand that what we have before us is an amendment by the Senator from Indiana which would take the higher of those three standards, namely, the prevailing wage, the minimum wage, Federal or State and local minimum wage?

Mr. LONG. Yes.

Mr. MILLER. And we have on top of that the application of the Davis-Bacon Act, and now the Senator is proposing that the 50-percent cases shall be the ones covered by the entire Hartke amendment, as amended?

Mr. LONG. That is correct.

Mr. MILLER. All right. And that will leave the other cases without any standard except whatever exists now, without any application on the part of the pending legislation?

Mr. LONG. Well, Senator, it would be the other situation that the Senator is discussing——

Mr. MILLER. The 15 percent, for example?

Mr. LONG. In the situation where the Senator would like the city or county to pay its new employees the same wage scale it is paying its old employees, as was provided in the committee bill, that would be superseded by the Hartke amendment.

If that should be the case, and the Senator from Iowa would like to offer an amendment to correct that and say that the employer only is expected to pay the new employees the same wages as the old employees, and the 50-percent requirement I am offering would not apply in that case, I would be happy to agree to such an amendment. But I am talking about what the Hartke amendment intended if it were fully implemented by the Senate—the way it would be if passed. Under that amendment an employee must be paid the same as others in the same line of work. If the State minimum wage is higher, however, it applies, even though the employee is not covered now by the State minimum wage; if the Federal minimum wage is higher, it applies even though an employee is now exempt from it. If the Davis-Bacon Act applies, he would have to be paid under the Davis-Bacon Act. So we have all those standards applying, and the highest wage would have to be paid.

I would simply say that, on this four-step bill, where a State would have to pay higher and higher wages as a condition of getting revenue sharing, it would have to do that only when the Federal contribution is as much as 50 percent of the wage cost of a project.

Let us assume that a State or a city wanted to build a new sanitary sewerage system and it was going to pay for it out of the revenue-sharing funds. The Davis-Bacon Act would apply. If it was going to build a hospital, the Davis-Bacon Act would apply. But if the funds were to be applied to the operating budget, the minimum wage rules would not apply if the revenue-sharing funds were 5 percent, or even 1 percent, of its overall operation.

Mr. MILLER. It would not have to comply with the Davis-Bacon Act because it was under 50 percent, but if I understood the Senator correctly, it would have to comply with the other three standards as set forth in the original Hartke amendment.

Mr. LONG. Under the amendment that I am offering, the 50-percent rule would apply to all of the Hartke amendments, both the three minimum wage concepts and the Davis-Bacon Act concept. If the amendment should be agreed to and the Senator wanted to offer an additional amendment to do what the committee had agreed to do in the first instance without the 50-percent limit I would be happy to support it as a part of the bill.

Mr. MILLER. I thank my colleague from Indiana. I would like to have the Senator from Indiana comment on this. I have a feeling that we may be leaving a gap here. I was here when the debate was being carried on earlier, and I was impressed with the Senator's suggestion of 50 percent, but I am not clear in my mind yet, after we adopt the amendment—and I am sure we will—where that leaves us with the 5, 10, or 15 percent and whether we are going to cover the three-factor original Hartke amendment or whether it will be the will of the Senate to adopt the Senate Finance Committee's approach, which I thought was pretty good. I would like to get a comment from my friend from Indiana.

Mr. LONG. That remains to be seen. The Hartke amendment has not been agreed to yet. If it is not agreed to, of course, the committee's original provision would prevail.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. PASTORE. Does not the amendment offered by the Senator from Louisiana vitiate the action we took unanimously on his amendment? All one would have to do is use the money in operating expenses and it would vitiate the amendment adopted unanimously just a moment ago. Is that not so?

Mr. LONG. It could have been gotten around before. Revenue sharing funds could be spent on supplies rather than labor, and the Davis-Bacon Act would not have applied, anyway.

Mr. PASTORE. That is right. All we are doing here is suggesting to every municipality to put the money into operating expenses and then it does not have to pay minimum wages.

Mr. LONG. Mr. President, I offered the amendment a moment ago, as I explained, because I did not think we ought to vote on this concept of imposing a very heavy wage increase on State and local governments which may well exceed every nickel they will get under revenue sharing. I do not think we ought to impose that heavy burden on them in a step-by-step procedure by which they are asked to do something which is referring to a minimum wage, and then some other thing, and then something else. It is my thought that if we are not talking about Davis-Bacon, we ought to make it clear, and if we are going to vote for that concept, we ought to put the Davis-Bacon concept into it.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. PASTORE. We keep saying this step is going to result in an increase in wages. That has not been proved on this floor. Will someone please prove to me, in a documentary way, by substantial documentation, that if we adopt these four amendments we are raising wages in every city and town in this country? That has to be proved. I have not been convinced. I have heard here only that we are going to try to knock out the amendment put in by the House and try to defeat the four amendments that have been approved by the administration and have been sponsored by the Senator from Indiana.

Mr. LONG. I do not think the Senator heard the speech made by the Senator from Arizona (Mr. FANNIN). He emphasized the result of having the Davis-Bacon Act wages.

Will the Senator from Arizona please refer to those figures?

Mr. FANNIN. Yes. I have figures supplied for Page, Ariz. Right now the wages paid for a laborer are $2.50 an hour. Under Davis-Bacon, they will be $7.50 an hour. A mechanic is now paid $5 an hour. If Davis-Bacon applies, it will be $10.50 an hour. A carpenter receives $5 an hour. It will be $9.32 an hour under Davis-Bacon. An electrician receives $5 an hour. It will be $10.10. A painter receives $4.50 an hour. It will be $7.85. A truck driver receives $3 an hour. It will be $7.75 under these provisions.

So this is something that we can and have documented, and there are many other illustrations that could be used. We do not even need to go any farther than to some of these small, coastal counties in Maryland and Virginia to find similar situations, where they would come to the Washington area to set the wage rate that would be applied. So there is just as much differential for those areas as I have illustrated in the small town of Page, Ariz.

Mr. PASTORE. Does not the Senator from Arizona agree that if we are going to begin spending Federal money, and we have the Davis-Bacon Act which applies to Federal contributions and Federal contracts, the same standard should apply here?

Mr. FANNIN. It depends on what we are trying to achieve. Are we trying to do something for these communities? Are we trying to achieve greater employment? I think that would be the answer.

We are trying, through this legislation, to help these communities. We would certainly defeat that attempt if we had the Davis-Bacon Act apply in these situations.

Mr. PASTORE. Well, I hope we are not trying to encourage scab wages.

Mr. FANNIN. No, we are not. The committee bill, as far as that is concerned, would not be affected by the Davis-Bacon Act. It requires that workers must be paid no lower than the prevailing rates for present employees in similar jobs in the same locality.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. FANNIN. I am pleased to yield to the Senator from Utah.

Mr. BENNETT. I would like to try to clarify the matter further by giving another illustration.

Here is a little town of 500 people. They decide to provide their local policeman or constable, or whatever he is, with an automobile, and they have got to build a one-car shed to put that automobile in.

As I understand it, under the Hartke amendment, that community must pay Davis-Bacon wages to the carpenter that they employ to build that $300 or $400 shed. There is no exception.

It seems to me that there should be some dividing line of size before you begin to impose on this little community the Davis-Bacon schedules, that are always developed from the nearest metropolitan community.

We were talking in the committee about the situation in Utah. In southern Utah, I understand they used the Las Vegas, Nev., wage schedules to develop Davis-Bacon schedules for communities of 200 or 300 people, 200 miles away, in the depths of the Utah Desert.

I think this 50-percent proposal is a good rule of thumb for making sure that we do not impose these very high levels on such a job as building a one-car garage. Is it the understanding of the Senator from Arizona that if the Hartke amendment were to apply, and Davis-Bacon were to be put in on an unlimited basis, it would be necessary to pay that carpenter the Davis-Bacon wages, for a job of that size?

Mr. FANNIN. I think it very definitely establishes that that is true, that it would apply, and it would work a tremendous hardship on the community. The garage is a good illustration, or if we are talking about facilities for the police department, or whatever it might be that needed services. It would be a tremendous obligation for that community.

Mr. DOMINICK. Mr. President, will the Senator from Arizona yield?

Mr. FANNIN. I am pleased to yield to the Senator from Colorado.

Mr. DOMINICK. We had a situation that occurred in southern Colorado, in the San Luis Valley, where, with Federal funds, they were developing a community center building in a Mexican-American community.

They were already to let the contract when the Labor Department came in and said, "We have got to find out what the prevailing wage is." But, instead of going to their own locality, they went to find out what it was in Denver. The net result was that it increased the cost of the program by about two and one-half times, and they were about to cancel the whole contract.

We therefore went to the Labor Department and asked them to review it again. It is still in the process of review. The time for the start of construction and completion of the job has already been postponed by at least 6 to 8 months, and maybe a year, simply because of this problem.

My question is this, if the Senator can tell me: What is this 50 percent rule we are talking about here? How would that affect a revenue sharing grant which would be given to that same locality? What would they then have to do, with this 50-percent rule? Suppose they wanted to build a community building in this Mexican-American community?

Mr. FANNIN. If this is a project that is over 50 percent financed by Federal funds, then, of course, Davis-Bacon would apply in this instance. In the other instance, the Hartke amendment would apply. But in the first instance, it is my understanding that the requirement would still be that the workers must be paid at rates no lower than those paid by the local community for similar jobs.

Mr. DOMINICK. In the illustration I gave, it would have worked no hardship if they were figuring on the prevailing rates in the local community.

As I understand the Senator, what we are now saying is that the 50 percent proposal we have before us is better than it otherwise would be, but still does not give them much freedom of action to determine what to do with the funds they otherwise would have?

Mr. FANNIN. The Senator is correct. It was not in accord with the intention of the committee insofar as the handling of these funds is concerned. It was the committee members that the communi-overwhelming intent and opinion of the ties should have freedom in this regard, but it would require them to pay prevailing wage rates for similar jobs in that same community, so it was fair and equitable, but it did not have the strings attached that we will now have attached.

Mr. MILLER. Mr. President, will the Senator from Arizona yield for a question?

Mr. FANNIN. I am pleased to yield to the Senator from Iowa.

Mr. MILLER. I understood, from the Senator's colloquy with the Senator from Colorado, that if less than 50 percent Federal money was going to go into the construction of that building, the prevailing wage rates would apply.

Perhaps they would, but I do not see that they would under the bill as amended by the Hartke amendment, because the Hartke amendment strikes that portion of the Finance Committee bill which provides for the prevailing wage. It strikes it all out, starting on line 21 and running over through line 22 on page 62, and that is the part of the Finance Committee's bill which provides for paying wages which are not lower than the prevailing wages. The Hartke amendment strikes that out, and covers those three factors of a local minimum wage, Federal minimum wage, and another factor.

Mr. FANNIN. If I may answer the Senator's question, the item the Senator is talking about is the prevailing wage for similar employment. That is the provision of the Hartke amendment.

Mr. MILLER. But the Hartke amendment adds those other two factors, and says "whichever is the highest."

Mr. FANNIN. That is right.

Mr. MILLER. If it just said prevailing wage, then I would not be confused, but it goes on to those other two.

Mr. FANNIN. I agree with the Senator that there is some confusion in that regard. I think the distinguished Chairman made it plain that it was his intention that this would apply; but, of course, if anyone wanted to clarify it completely, another amendment could be offered, if there was a question in the Senator's mind as to whether this would apply.

Mr. MILLER. I thank the Senator. I wonder if the Senator would yield for a further comment.

Mr. FANNIN. I yield.

Mr. MILLER. I hope that the Senator from Indiana, when he does get the floor—he has been waiting patiently—will comment on the situation in which the prevailing wage would apply except when it goes to Federal money, in which event Davis-Bacon would apply, because I think there is confusion in the way in which the amendment of the Senator from Louisiana would be added to the Hartke amendment.

Mr. HARTKE. Mr. President, the Senator has spoken of confusion. If this amendment is adopted, it will put the biggest bookkeeping job we have ever seen upon every local government. They will have to manipulate their budgets and spending so that they can put 49 percent in each situation. So that it is only 49 percent Federal. They will hire every accountant, every Philadelphia lawyer—and a few from Las Vegas—to make sure they can accommodate themselves to this type of situation.

Quite honestly, what we have here is an attack on the Davis-Bacon Act.

After all, the House of Representatives put this in the bill. It was taken out in the Finance Committee. Many things are taken out in the Finance Committee of which I do not approve. But we are now on the floor of the Senate.

I want to read the statement made by Senator Scott, which was made at the request of the administration. We talked to the people at the Labor Department. We talked to the Secretary of Labor. We talked to the people at the Treasury Department and the Secretary of the Treasury. The administration is fully in accord with the principles of the four amendments I have before the Senate at this time. Senator Scott said this, and I want to repeat it for the benefit of the Senate:

> Mr. President, I have been asked by the administration to advise the Senate that the Administration finds fully acceptable the four labor protective amendments proposed to the Revenue Sharing Bill by the Senator from Indiana (Mr. Hartke). These amendments have been reviewed by the Department of Labor, as well as the Treasury Department, and it is the considered judgment of the Administration that these basic labor protectives will strengthen the operation and administration of the general revenue sharing program.

That is the considered judgment of this administration.

Herbert Hoover would turn over in his grave if he saw what was being done on the floor of the Senate to the two Republicans who sponsored the measure—Mr. Davis, a Republican Senator, and Mr. Bacon, a Republican Representative. Mr. Hoover requested this type of language. The same arguments were made then. Through the years we have tried to build it up. If Senators want to gut the whole idea of paying fair wages to labor, if they want to take this country back to the idea that contractors and cheap labor can be brought into their local communities then they would vote for this amendment.

If the Long amendment is adopted, I think it would cure the unemployment of all accountants and bookkeepers in the United States. Every community from size 10 up, every county and every city, would have to employ a bookkeeper to make sure that they were below the 50 percent figure, so that they could pay less than fair wages to people who work for a living. That is the issue.

Mr. LONG. Mr. President, the Senator read a statement from the White House which initially was a great surprise to me, because I had not been kept informed about what was the White House position.

I offered the amendment we are talking about, and I am positive that the White House was not in a position to advise the Senator how to vote for my amendment, because it did not know I was going to offer the amendment. So, as a practical matter, with respect to the amendment I have offered, if you are going to impose these great additional labor expenses on the communities, it makes all the sense on earth that the Federal contribution ought to be substantial.

So I think it would be very presumptive of the Senator to assume, even if he were standing here as the minority leader, that the President of the United States would insist that the Davis-Bacon Act be complied with, even though the Federal contribution be a mere one-half of 1 percent. Nobody had a chance to ask Mr. Nixon about that, because nobody knew I was going to offer an amendment. Sometimes I cannot keep up with him, and it works both ways. He did not know I was going to offer the amendment. I do not know how anybody, without keeping in touch with him, could say that the President would not be for my amendment and would be for the Hartke amendment.

It seems to me that if this sort of cost increase is to be imposed, the Federal contribution should be substantial. The lowest degree of Federal matching in any program with which I am familiar—and I stand to be corrected if somebody will show me that I am wrong—is 50 percent. In most instances, it would be more than that.

I yield the floor, Mr. President.

Mr. PASTORE. Mr. President, I think we are beginning to kick a dead horse.

It strikes me—and it already has been said—that this contribution that will be made under revenue sharing will amount to approximately 5 percent. The biggest responsibility of any municipality is education—paying their teachers and building their schools. It strikes me that if any municipality is going to be burdened by the Davis-Bacon Act, all they have to do is to put this money into their educational budget. Every community today is confronted with the financial problems of education. I do not think that this afternoon is the time or this is the excuse that we should do anything to disrupt and destroy the philosophy of the Davis-Bacon Act.

I repeat: If in Arizona it will be difficult for officials without straining their own budget, to accept this money and put it into any channel that would subject them to the Davis-Bacon Act, then all they have to do is to put these shared funds into education, and they would have to put less of their local money into their budget for education. They could use the Federal contribution to do precisely that.

It would be a dangerous course for us, after the Davis-Bacon Act has become an integral part of the philosophy of Federal contribution, to destroy it here this afternoon. I hope we will not do it.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. FANNIN. When the Senator suggests putting it in education, does he want all the employees of his educational system under the Davis-Bacon Act?

Mr. PASTORE. No. As a matter of fact, the law provides that in that particular case the Davis-Bacon Act only applies to construction.

Mr. FANNIN. The provisions of the Hartke amendment go beyond the Davis-Bacon Act.

Mr. PASTORE. No. He has already explained it by saying that if you engage more police officers, all the amendment means is that the new men that are engaged have to be paid the same wages as the prevailing wages being paid to other police officers. The Davis-Bacon Act has to do only with construction.

Mr. FANNIN. Amendment No. 1461 does not even mention construction.

Mr. PASTORE. Well, it was amended by the Senator from Louisiana.

Mr. FANNIN. It has not been amended yet.

Mr. PASTORE. Yes, that was adopted.

Mr. FANNIN. But it has not been finalized.

Mr. HARTKE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. Muskie). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Muskie). Without objection, it is so ordered.

Mr. LONG. Mr. President, I have discussed this matter with the Senator from Indiana (Mr. Hartke), and some of those who agree with him and some of those who agree with me, who have suggested to us a compromise to modify my amendment, which I personally would be willing to agree to. I propose to modify it where the figure of 50 percent appears by reducing that to 25 percent. The amendment is at the desk. The change would be simply this, that for the provisions of the Hartke amendment to take effect, Federal participation in the project would have to be as much as 25 percent.

Mr. HARTKE. Mr. President, this is an acceptable compromise to the extent that we can make some progress, to do it this way. Under such circumstances, I would be willing to accept that modification.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana as modified.

The amendment as modified was agreed to.

Mr. HARTKE. Mr. President, I understand that the yeas and nays have been ordered on my amendment.

The PRESIDING OFFICER. The Senator is correct.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS—UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent, out of order, that the vote on the pending amendment to the interim agreement on offensive weapons, the so-called Mansfield amendment, occur not later than the hour of 12 noon tomorrow, and that the vote be on the amendment as offered with no amendments attached thereto, and that it does not preclude the right of the Senator from Washington (Mr. Jackson) to offer his amendment.

Mr. JACKSON. Mr. President, reserving the right to object—I want to state that I have been in touch with the majority and minority leaders, and I should like to be explicit on this matter, that adoption of the Mansfield amendment will not in any way prejudice the amendment that I intend to offer with some 40 cosponsors.

Mr. MANSFIELD. That is correct. It was so stated.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

Mr. JACKSON. Mr. President, I want to say that from the very beginning I have favored and supported a unanimous-consent agreement in connection with the pending interim agreement. I would hope that tomorrow Senators would agree on a time certain to vote on my amendment, especially in light of the many cosponsors and the several amendments thereto. We have established some movement now in connection with the Mansfield amendment and I would hope that we could reach agreement tomorrow on a time certain for voting on my amendment.

If not, I, as one Member of this body, am prepared to join and file a petition for cloture, if that is the only way we can get to a vote. I want the record to be straight and clear on that, because I have tried from the very beginning to get an early vote on the amendments pending.

UNANIMOUS-CONSENT AGREEMENT TO VOTE ON APPROPRIATIONS COMMITTEE AMENDMENT

Mr. BENNETT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Utah will state it.

Mr. BENNETT. Earlier we had an unanimous consent agreement to vote on the McClellan amendment to the pending measure at 4:30 p.m. tomorrow afternoon and I understood that was to be set back half an hour. Has it been set back?

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent—in conformity with the suggestion made by the distinguished Senator from Utah (Mr. Bennett), and the request having been cleared with the able Senator from Louisiana (Mr. Long) and the able Senator from Arkansas (Mr. McClellan), that the vote on the Appropriations Committees amendment occur tomorrow at 5 p.m.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

ORDER FOR UNFINISHED BUSINESS TO BE LAID ASIDE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as the unfinished business is laid aside temporarily tomorrow, it remain in a temporarily laid-aside status until the close of business tomorrow or until the disposition of the Revenue Sharing Act of 1972, whichever is the earlier.

The PRESIDING OFFICER. Without objection, it is so ordered.

REVENUE SHARING ACT OF 1972

The Senate continued with the consideration of the bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

Mr. FANNIN. Mr. President, I move to table the amendment of the Senator from Indiana (Mr. Hartke) as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona.

Mr. FANNIN. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona to table the amendment of the Senator from Indiana (Mr. Hartke) as amended.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. Anderson), the Senator from Nevada (Mr. Cannon), the Senator from Oklahoma (Mr. Harris), the Senator from Washington (Mr. Magnuson), the Senator from Wyoming (Mr. McGee), the Senator from South Dakota (Mr. McGovern), the Senator from Montana (Mr. Metcalf), and the Senator from Rhode Island (Mr. Pell) are necessarily absent.

I further announce that the Senator from Iowa (Mr. Hughes) is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. McGee) and the Senator from Washington (Mr. Magnuson) would each vote "nay."

Mr. SCOTT. I announce that the Senator from Hawaii (Mr. Fong), the Senator from Michigan (Mr. Griffin), the Senator from Oregon (Mr. Hatfield), the Senator from New York (Mr. Javits), the Senator from Illinois (Mr. Percy), and the Senator from Ohio (Mr. Taft) are necessarily absent.

The Senator from South Dakota (Mr. Mundt) is absent because of illness.

If present and voting, the Senator from Oregon (Mr. Hatfield) and the Senator from Illinois (Mr. Percy) would each vote "nay."

The result was announced—yeas 28, nays 56, as follows:

So Mr. Hartke's amendment, as amended, was agreed to.

Mr. HARTKE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RIBICOFF. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. Muskie). On behalf of the Vice President and pursuant to Public Law 89-491, the Chair appoints Senator Joseph M. Montoya to be a member of the American Revolution Bicentennial Commission in lieu of Senator John O. Pastore, resigned.

The PRESIDING OFFICER. On behalf of the Vice President, and pursuant to Public Law 91-452, the Chair appoints the following Senators to be members of the Commission on the Review of the National Policy Toward Gambling: John L. McClellan, Howard W. Cannon, Marlowe W. Cook, and Edward J. Gurney.

APPOINTMENT OF CONFEREE

Mr. PASTORE. Mr. President, I ask unanimous consent that the Senator from Washington (Mr. Magnuson) be appointed as a conferee on the bill, H.R. 14989, making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year 1973, vice Senator Allen J. Ellender, deceased.

The PRESIDING OFFICER (Mr. Roth). Without objection, it is so ordered.

MESSAGE FROM THE HOUSE— ENROLLED BILLS SIGNED

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills:

H.R. 9323. An act to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes; and

H.R. 12350. An act to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore.

REVENUE SHARING ACT OF 1972

The Senate continued with the consideration of the bill (H.R. 14370) to provide payments to localities for high-priority expenditures, to encourage the States to supplement their revenue sources, and to authorize Federal collection of State individual income taxes.

AMENDMENT NO. 1463

Mr. HARTKE. Mr. President, I call up my amendment No. 1463, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

> On page 61, line 17, strike "and".
>
> On page 61, between lines 20 and 21, insert the following:
>
> "(5) no part of the funds it receives under this subtitle will be expended for the purpose of inducing any business or industry operating in another State or locality to leave that State or locality and transfer its operations to the State or county in which the government receiving such funds is located; and".
>
> On page 61, line 21, strike "(5)" and insert "(6)".
>
> On page 62, between lines 2 and 3, insert the following: "Any person or class of persons harmed, or which demonstrates a reasonable expectation of harm, by an expenditure of funds by a State government or unit of local government contrary to the provisions of paragraph (5) may bring an action in the appropriate district court of the United States, without regard to the amount in controversy or the citizenship of the parties, for such injunctive or other relief as the court may consider appropriate (other than the awarding of any monetary damages)".

Mr. ROBERT C. BYRD. Mr. President. will the Senator from Indiana yield?

Mr. HARTKE. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent—having cleared this request with the Senator from Louisiana (Mr. Long), the Senator from Indiana (Mr. Hartke), and the Senator from Utah (Mr. Bennett)—that time on amendment No. 1463, now pending, and time on amendment No. 1466, which will be offered immediately following the disposition of amendment No. 1463, be limited to 30 minutes on each, to be equally divided between the Senator from Louisiana (Mr. Long) and the Senator from Indiana (Mr. Hartke).

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. I ask unanimous consent that time on each remaining rollcall vote today be limited to 10 minutes, with the warning bell to be sounded after the first 2½ minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARTKE. Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were ordered.

Mr. HARTKE. Mr. President, I would like to state, for the benefit of the Senate, that it is my intention, if we can dispose of these amendments with a relatively short argument, that the entire time would not be necessary.

I repeat the message previously delivered by the distinguished minority leader, which confirms the previous discussions I have had with the administration concerning the two amendments with which we will proceed at this time. The administration said that these amendments have been reviewed by the

Department of Labor as well as the Treasury Department, and the administration considered that these provisions would strengthen the operation of the general revenue-sharing program.

The amendment I have called up at this time provides the assurance that general revenue sharing funds will not be misused to pirate industry from one community to another. It would fly in the face of the intent of this bill if one community with a large amount of available revenue sharing funds were able to lure industry and jobs away from another community.

In 1968, this body curbed an abuse when some local communities extended their full faith and credit to giant corporations, enabling them to float tax-free bond issues in behalf of industrial development. Prior to that action, giant corporations floated bonds of limitless amounts for the construction of new facilities at interest rates far lower than would have been paid if they had gone into the general bond market.

One of the abuses that led this body to act against the practices of unlimited industrial bond financing was the proposal by United States Steel Corp. to finance a facility in Lorain, Ohio, through the sale of $80 million of industrial bonds by the county of Lorain. The magnitude of the loss of tax funds to the Federal Treasury and the erosion of the tax-free bond market spurred us to act. Now we have specific restrictions as to amount and procedure for floating these tax-free bonds for corporate benefit.

Earlier, in 1965, this body also acted under the Economic Development Act to specifically forbid the use of Federal funds in behalf of so-called runaway corporations. That act specifically provided that funds could be used to enlarge a company's operations or provide for expansion of a company into a new territory. However, the legislation sought to prevent a community from receiving Federal funds, developing an industrial park, and then enticing industries from other localities to relocate.

It has been the consistent intent of Congress to curb the practice of industrial piracy wherein either Federal funds are used or the tax-free bond obligations of a local jurisdiction are utilized.

Now we are faced with a situation in the Revenue Sharing Act before us whereby this very abuse could conceivably reoccur. It is possible that the no-strings funds in this legislation may be utilized by a State or a local jurisdiction to establish an industrial park or to offer some special low-tax or no-tax inducement for the purpose of pirating an industry into its locale.

Commonsense dictates that the $30 billion of Federal funds that are being turned over to the States and localities in this legislation must have at least basic Federal guarantees against exploitation and misuse. One such possible misuse—as we have learned in the past—is industrial piracy.

I hope such an abuse will never occur. I hope it is not contemplated by any recipient community, but I do believe that we have the responsibility to specify in this legislation that we do consider industrial piracy an improper use of revenue sharing funds.

Mr. President, the pending Hartke amendment makes that stipulation clear. We should not allow the revenue sharing bill to leave the floor of the Senate without this basic safeguard for the rights of the workers as well as for the rights of a community to protect its industrial base against possible piracy by another locality that is bankrolled by no-strings revenue sharing funds.

Mr. President, I reserve the remainder of my time.

Mr. LONG. I yield myself 5 minutes.

Mr. President, I do not know how Senators individually are going to vote on the revenue sharing bill, but I do know that Senators who have had a chance to discuss this revenue sharing bill with representatives of local governments, with county commissioners, with mayors, and with State legislators have found that if you want their approval say that you are in favor of a revenue sharing bill with no strings attached. This they approve of. It sounded good when President Nixon stated that he wanted no strings other than against discrimination, which, after all, is against the Constitution anyway.

But, Mr. President, the administration, the same men who said they wanted no strings attached, have already attached two. One to assure that wages paid will be no lower than prevailing wage rates, and a second to add the Davis-Bacon proposition. Now, here comes the third amendment to say that none of this money can be used to attract industry from somewhere else.

Let us look at the situation of a community. They decide that in order to survive, they will have to build a little industrial park. Theoretically, if whoever comes in had a plant nowhere else, and he is not moving anywhere, then apparently he has complied with the third Hartke amendment; but, on the other hand, how would they know?

It may be that the company is expanding its facility. How would one decide whether it is just moving one machine, or moving a whole plant? That type of thing, Mr. President, would be the subject of litigation. This amendment would give rise to taxpayer lawsuits, and would tie the money up in litigation. This is one more string that would require more auditing and more questions asked about whether you could or could not use the money for industrial parks. Of course, all of that is contrary to the philosophy of the bill, that this ought to be of some help to State and local governments which they can count on to use for whatever they might need.

Some of these communities might be badly distressed, with a lot of people out of work, needing to find somebody to locate there. Some of them may need a payroll 10 times as badly as the area from which a machine might be moved.

As I say, Mr. President, this is one more basis for trying to trace the funds, trying to audit the funds, trying to check on them, and trying to put in more strings. And this will not be the end of it, either. The same Senator, the Senator from Indiana, has another amendment behind this one to say that if even a nickel of the revenue-sharing money goes into an urban transit system, there will be more strings that have to be obeyed.

In addition to the strings that applied when the Federal Government was going to make grants to pay for the entire cost, or 80 percent of the cost, of urban mass transit improvement, now we are told that if even a nickel of this revenue-sharing money goes to repair a local trolley car or to an urban transit system, the towns have to comply with all the strings and conditions that exist in the Urban Transit Act.

Mr. President, if Senators do not want revenue sharing, I suggest that the thing to do is vote for one amendment, and then another, each appealing on the face of it, but which add up to so much auditing and so many strings that the poor local people will have to throw up their hands and say, "We had best just forget about it."

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. AIKEN. Is it the Senator's argument that if a community uses this revenue, or the share allocated to it, to improve its roads and schools and fire department, to improve the community, and, as a result, an industry moves in from another State and locates in that community, would that be a violation of the law as proposed in this Hartke amendment?

Mr. LONG. No, I think it is really intended to apply only in a situation where something well beyond ordinary services is provided to a particular industry. But there are all kinds of problems that arise even in connection with that.

For example, if you give them any more police protection than ordinarily provided, someone could file a taxpayer lawsuit and throw the whole procedure into litigation.

Mr. AIKEN. Do not all communities frequently expend funds to improve their localities, with the express purpose of inducing industries to locate there?

Mr. LONG. Of course they do.

Mr. AIKEN. If industries came over the border from another State, it seems to me it could constitute a violation of the law as proposed in this amendment.

Mr. LONG. Of course they do, and of course that opens up the basis for a taxpayer suit, which is expressly authorized by the amendment, to start arguing about the matter, whether this industry is actually coming from somewhere else or whether it is a new industry in fact. And whether, if it came from somewhere else, it was induced to do so by the use of revenue sharing funds. It is one more complication, one more string.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LONG. I yield myself 2 more minutes.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. BENNETT. Along the same line,

suppose a community takes space in a newspaper in the metropolitan city in the State, saying, "We want new industry," and suppose some inquiries develop. And without building an industrial park or without investing money in bricks and mortar, a new industry comes as a result of the advertising. Would that subject a community to the same prohibition?

Mr. LONG. I am sure the Senator did not intend it, but a taxpayer lawsuit could challenge it and could tie up the revenue sharing money and any other money involved with it, on the theory that it is all a violation of a Federal law to do anything of that sort.

Mr. BENNETT. As a matter of fact, if, under any circumstances, any new industry moved into the community and the community was using revenue sharing funds for any purposes, you have the basis at least of a delaying action to the point where the industry would say, "We can't wait around for that. We'll go somewhere else."

Mr. LONG. That could very well happen, even though the case might ultimately be lost. It could tie them up in court quite a while, trying to prove this was not an industry moving from somewhere, that it was a new enterprise or an expansion.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HARTKE. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Indiana has 10 minutes, and the Senator from Louisiana has 8 minutes.

Mr. HARTKE. Mr. President, I am prepared to yield back the remainder of my time.

Mr. LONG. I yield back the remainder of my time.

Mr. HARTKE. I would like to make one comment. The administration has approved of this amendment.

I yield back the remainder of my time.

Mr. LONG. Mr. President, when we agreed to yield back the time, the Senator wanted to make a further statement, and now I think I ought to do so.

There is no limit to the strings that the mind of man can conceive to place on this bill. While we were thinking about the bill, even before we could discuss it with the administration witnesses, I thought of a half dozen very desirable strings that could be added. I was persuaded to drop the whole idea only because the more I talked to the mayors and the State legislators and the county commissioners and the Governors and everybody concerned with local governments, the more I became convinced that even though it might be a good idea that people should not do one thing and another, the less desirable it appeared to try and regulate them in this bill. By the time we would get through putting all these strings on this bill, with all the good things I could think of that people should not do and should do, and all the good things the House Members can think of, which we took out of the bill, desirable though they may be, the bill would be unworkable. In the last analysis, if you believe in revenue sharing as a concept, you ought to have some faith and confidence that a local government would know how to spend the money. If you do not have any faith in local government or State government, you ought to vote against revenue sharing and have nothing to do with it. If you are for the concept of sharing some revenue, on the theory that the people in the local community ought to know better how to spend it than we would, then you ought not vote to add these strings, each of which has some appeal. By the time Congress gets through putting strings on it, not just the first time but the second and third times, you would wish you never heard of the idea.

You can see these amendments—they are added in the Senate; it cannot be done in the House—march in: Here is Davis-Bacon, here is urban transit, here is a condition labor would like to have to give them a little advantage in negotiating a good contract, here is something this group wants, and here is something somebody else wants. And you want to make sure they do not use the money to give the mayor a pay raise.

So many strings can be added to it that they negate the whole thought, which is that the Federal Government has taxed away so much money from the people at the local government levels that we ought to send some back.

Mr. BENNETT. Mr. President, will the Senator yield me 2 minutes?

Mr. LONG. I yield.

Mr. BENNETT. This amendment is very loosely drawn. It depends on the word "inducing." If the amendment said that none of these funds could be used to subsidize an industry brought in from the outside, that would be one thing. But to say that it cannot be used to induce, it means, if you want to go to the limit, that the mayor cannot talk with anybody in business on the outside and suggest, "We have a fine place here," because part of the mayor's salary may have been paid for out of revenue sharing funds.

I can understand the principle behind this thing, but it is so loosely drawn that if a recalcitrant taxpayer really got his back up, he could almost stagnate the operation of that community whenever any official made a move to try to persuade somebody to come in and go into business in the town. I think that for that reason the amendment should be defeated.

Mr. HARTKE. Mr. President, how much time remains to both sides?

The PRESIDING OFFICER. The Senator from Indiana has 10 minutes, and the Senator from Louisiana has 3 minutes.

Mr. HARTKE. Mr. President, I yield back the remainder of my time, with no further statements of any kind.

Mr. LONG. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Indiana. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Oklahoma (Mr. HARRIS), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. MCGEE), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Montana (Mr. METCALF), and the Senator from Rhode Island (Mr. PELL) are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES) is absent on official business.

I further announce that, if present and voting, the Senator from Wyoming (Mr. MCGEE) would vote "yea."

Mr. SCOTT. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from New York (Mr. JAVITS), the Senator from Illinois (Mr. PERCY), and the Senator from Ohio (Mr. TAFT) are necessarily absent.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from Illinois (Mr. PERCY) would each vote "nay."

The result was announced—yeas 26, nays 56, as follows:

Taft

So Mr. HARTKE's amendment (No. 1463) was rejected.

AMENDMENT NO. 1466

Mr. HARTKE. Mr. President, I call up my amendment No. 1466 and ask that it be stated.

The PRESIDING OFFICER (Mr. HART). The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. HARTKE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the Record.

The text of the amendment is as follows:

On page 63, between lines 16 and 17, insert the following:

(d) Conditions Applicable To Use of Revenue Sharing Funds for Urban Mass Transportation Projects for Which Other Federal Financial Assistance Is Available.—

(1) In General.—The terms and conditions applicable under section 3(e)(4) of the Urban Mass Transportation Act of 1964 to any expenditure by a State government or unit of local government for a purpose for which a grant of money or other assistance is available under that Act shall apply, under regulations prescribed by the Secretary, to any expenditure for such purpose out of funds received under this subtitle by a State government or unit of local government.

(2) Enforcement.—If the Secretary determines that a State government or unit of local government has failed to comply with the provisions of paragraph (1), he may withhold payments to that government in accordance wtih the provisions of subsection (b). Any person or class of persons harmed, or demonstrating a reasonable expectation of harm, by an expenditure of funds by a State government or unit of local government in violation of the provisions of paragraph (1) may bring an action in the appropriate district court of the United States, without regard to the amount in controversy or the citizenship of the parties, for such injunctive or other relief as the court may consider appropriate (other than the awarding of any monetary damages).

(3) Regulations.—Within 90 days after the date of enactment of this Act, the Secretary shall, by regulation, issue a catalog of purposes and projects to which this subsection applies setting forth the terms and conditions which, under paragraph (1), are applicable to expenditures under this subtitle.

Mr. HARTKE. Mr. President, I ask for the yeas and nays on this amendment.

The yeas and nays were ordered.

Mr. HARTKE. Mr. President, this is the final amendment I intend to call up tonight.

The amendment requires compliance with the labor protection provisions of the Urban Transportation Act in urban transportation projects financed or assisted by Federal funds generated through the Revenue Sharing Act of 1972. This amendment meets the need for legislative equity and administrative order, as well as maintaining the integrity and credibility of laws passed by Congress. There should be no opportunity left for the possibility of bypassing the declared policy of the United States as expressed by previous acts of Congress.

As a result of extensive hearings and debate in 1963–64, Congress determined that the public interest would best be served by providing for the protection of existing employee interests affected by transit projects financed by Federal funds. These legislative requirements were originally enacted in the Urban Mass Transportation Act of 1964. The arrangements contained therein have been affirmed and reaffirmed by Congress over the years by periodic congressional review of the Urban Mass Transportation Act and the inclusion of similar provisions in the High-Speed Ground Transportation Act, and in the Washington Metropolitan Transportation Compact. Through this process of review and reaffirmation, these protective arrangements have achieved basic nonpartisan acceptance. Including and reiterating this national policy in the Revenue Sharing Act of 1972 would assure that the possibility of a double standard treatment of projects by applicants and/or by the administration would be avoided.

More than 500 such protective arrangements in projects involving almost $4 billion have been certified by the Secretary of Labor since the enactment in 1964. Thousands of workers have retained precious retirement benefits, job security, insurance, hospital and medical coverage, and other valuable rights and benefits. Conversely, failure to reaffirm in this legislation the national policy requiring compliance with recognized labor protections would deprive more than 100,000 workers in the transit industry of basic rights and interests, including not only their rights of organization and collective bargaining, but also pension rights accumulated after long years of struggle and financial sacrifice.

Unfortunately, the good faith of the parties cannot be relied upon to carry out the laws of the country. For instance, one city, which was able to obtain Federal funds from sources other than the Urban Mass Transportation Act, took over the local transit system. It then proceeded to deprive employees of all of their rights and benefits, including destruction and enforced liquidation of a funded pension plan which many retirees and workers approaching retirement age were counting on. Because Federal funds were available which did not assure basic employee protections, such as are now provided for in the Urban Mass Transportation Act of 1964, that city's administration callously destroyed the hard-won rights and benefits of employees who had earned them after a lifetime of service to the public. There are far too many similar examples to let this need go unanswered.

Mr. President, the Senate will make a substantial contribution to public order, to the avoidance of conflict, to administrative and legislative equity, by setting forth these clear-cut guidelines in the public interest. That is the intent of the pending amendment. I urge its adoption.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. HARTKE. I will be glad to yield to the Senator from Kentucky.

Mr. COOPER. Mr. President, I am pleased to see that the Senator from West Virginia, the chairman of the Public Works Committee (Mr. Randolph), is on the floor. Of course, I know that the Mass Transportation Act was not reported from the Public Works Committee. It was reported from the Committee on Commerce. However, we have some joint jurisdiction.

I will ask this question first. I am familiar with section 3(e)(4), which relates to workers. And it is applicable to the Mass Transportation Act.

Does the Senator intend that those provisions applying to the Mass Transportation Act shall apply, as the language states on page 2, "for a purpose for which a grant of money or other assistance is available under that act" to any project for which the revenue-sharing funds may be used, the same as under the Mass Transportation Act?

Mr. HARTKE. No. If the funds are available under the Mass Transportation Act, it would apply if revenue-sharing funds are used to acquire a mass transportation system.

Mr. COOPER. What are some of those purposes? Is the Senator talking about the Philadelphia plan?

Mr. HARTKE. No. We are talking about the guarantee of pension rights and employee rights.

Mr. COOPER. If any of these funds are used under the Mass Transportation Act, the same rules would apply, would they not?

Mr. HARTKE. I think they would. I just want to make sure that they would.

Mr. COOPER. I have listened to the Senator's statement, and with all due deference, I could not determine what the specific purpose was.

Mr. HARTKE. I think the Senator from Kentucky may be entirely right. What he is saying is that the Mass Transportation Act would apply under any circumstances. I think he is right. I want to make sure that it is covered in this bill and that is the purpose of the amendment.

Mr. COOPER. That is if it is related only to the Mass Transportation Act. However, I do not want to be redundant.

Mr. HARTKE. All I am doing is trying to make sure that the provisions of that act will apply. If they apply anyway, it does no harm to make sure that we do it through this amendment.

Mr. LONG. Mr. President, the Finance Committee was not the committee that handled the Urban Mass Transportation Act. However, we did have the opportunity, as all other Senators did, to sit on the floor and vote on amendments and hear them explained to us insofar as we could escape other legislative duties during that time. And the best way that I can understand this problem is that we were asked by the union leaders—and a majority of the Members complied with their urging in this regard—to include first one condition and then another condition in there to protect union labor.

That was fine with us. We undertook to protect the pension rights and the other rights. I do not have them all before me. They were not timid about making demands, and I applaud them for that, because they are not supposed to be timid when speaking for those whom they represent. If a city is going to take over a private transportation system and operate it and guarantee all of the pension rights that the employees were guaranteed, that was all right with me. And it also seemed all right to most Senators, because this involved funds we were appropriating out of Federal money, and if these companies were going to pay for these things, why should we not do these various things for labor if we think it desirable?

However, the Senator would provide that if $1 of this money were going to pay the mayor's salary and the mayor would be in charge of operating that company that went broke, he will have to do all of these things that we put in the Mass Transportation Act, and the Federal Government will have to pay for it. That is an entirely different matter. It is the same principle as where the contribution might be only 1 percent or average out to 5 percent of the cost of operating the city government or county government. We are now asked to make them comply with all the conditions in the Mass Transportation Act if any of that money whatever, directly or indirectly, finds its way into the bus system or any other transit system in the city, for that matter.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. HARTKE. Mr. President, that is not the case. This deals only with the acquisition of a company. For example, if the city government through revenue-sharing should apply those funds to a bus company, it should meet all of the conditions which that bus company had to meet.

Mr. LONG. That is fine if the Federal Government is paying the money under the Urban Mass Transportation Act to acquire a bus system. However, if the city is obligating itself to take over a system because the operator went broke—and maybe the reason for going broke was because he undertook to do so many things for labor that it bankrupted him—and we are only contributing about 1 percent at best under the revenue proposal, I think it unreasonable to impose these conditions. It would be a reasonable proposal if the Federal Government was going to pick up all or most of the cost. It would become an unreasonable proposal when the Federal Government is going to pay for 5 percent or maybe for 1 percent of the cost of taking over this transportation system.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. HARTKE. Mr. President, I want to make two things clear. One of them is that it is not the way the Senator said, and the second is that it deals with the city where funds are applicable under the Mass Transportation Act.

Mr. LONG. What we are saying in the principle of this amendment is somewhat like the principle the Senator was advocating in the case of the other amendment. If we in Congress pass these Federal laws at the urging of these groups, it means that if we are going to spend any other money for education, we have to comply with all the requirements we put in the education laws, and if we spend any more money for highways, we have to comply with all the requirements we put in the highway legislation.

All we are going to pay is 5 percent, but they would still have to comply with all the different requirements. When we talk about the Federal Government paying all or 50 percent of the cost, that is one matter, but where the Federal Government might not be paying any of it, people might be taken to court. The local government's books would have to be audited about whether a single revenue sharing nickel was allowed to get into the trolley car system, and the highway system, I suppose. All of this was a good idea when we voted on Federal aid highways. But now the Senator wants to make all of this apply even though the Federal Government might only be paying 5 percent of the money and to me that is an unreasonable proposition.

The most unpopular thing that one can do is to go before the county commissioners or the State legislature and make a speech and say, "I voted to add conditions, and I found a whole bunch of good ideas I voted to impose on you." Frankly, I believe I can beat this one. I have thought of half a dozen conditions to put on this one that would beat it to death. For instance, put a referendum on it and have everyone vote whether to use the money this way or that way. That would be a far better amendment than we have here to comply with all the conditions of the Mass Transit Act, if the city takes over the bus system because it went broke.

While these strings may be good, they impose a heavy burden in many cases when all the city is getting is perhaps 1 percent, 2 percent, or 5 percent from the Federal Government to share the burden of the cost.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. BENNETT. I think the implication of this amendment is that the Federal Mass Transit Act is faulty. It does not do its job. Therefore, we must take this completely unrelated bill and strengthen the Mass Transit Act by imposing an additional burden on the local community. If all these problems exist they should be taken care from the point of view of the Mass Transit Act and not from this point of view.

Mr. LONG. It is perfectly all right with me to impose these conditions that the Senator from Indiana wants, if we are paying for it, but this is a very unreasonable condition. It means that every mayor, every county commissioner, governor, and State head has to study these conditions. We have not heard the end of it when Senators have meritorious ideas telling counties and cities how to operate.

Mr. President, I hope the amendment is not agreed to.

Mr. HARTKE. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. HARTKE. Mr. President I just want to say that what we are trying to do here is to make sure we do not have two parts of the Federal Government doing two different things. We are trying to provide the means under the Mass Transit Act to provide funds for the cities for the acquisition of these transit systems. If they do acquire them, with funds appropriated under the Mass Transit Act, the law provides that the people working there shall not be deprived of their rights. I am saying that it makes good sense to provide the same basic protection for those employees when their rights are involved in an acquisition with Federal funds provided by revenue sharing. This is 100-percent Federal money. We are talking about acquisition and not operation. If we are going to take Federal funds from revenue sharing and acquire the interest of, say, O. Roy Chalk in town, the rights of D.C. Transit employees should not be abrogated.

If it is good in one case it is good in another case.

Mr. President, has the time expired on the other side? If it has, I am prepared to yield back my time.

Mr. MILLER. Mr. President, will the Senator yield for a question?

Mr. LONG. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Louisiana has 9 minutes remaining and the Senator from Indiana has 7 minutes remaining.

Mr. HARTKE. I yield for a question.

Mr. MILLER. Mr. President, I merely want to make clear what this section 3 (e)(4), referred to in line 6, page 1 of the Senator's amendment is. Is that the acquisition of a transit facility?

Mr. HARTKE. Yes.

Mr. MILLER. In other words, the amendment goes only to the acquisition. Is that correct?

Mr. HARTKE. Yes.

Mr. MILLER. I thank the Senator.

Mr. HARTKE. As the Senator from Kentucky said a while ago, it is a question of whether this legislation is needed. We want to make sure that the labor protectives in the mass transit act apply to acquisitions made with revenue-sharing funds.

Mr. LONG. Mr. President, under the Senator's logic we can take every desirable condition that has been put on aid to education from the kindergarten to a postgraduate degree and say if 1 nickel of revenue-sharing money finds its way into the schools, colleges, or kindergartens they must comply with all of those conditions. When you put those conditions on they must pay the cost to comply. Here we say if even 1 nickel of revenue sharing gets into the hospital, for instance, it must comply with all of the conditions of the Hill-Burton Act; if 1 nickel gets into the highway program all of the conditions on Federal aid to highways must be met. We have standards for the construction of sewers. The county would have to comply with all the Federal standards for the construction of a sanitary system. If they want to put in a day care center, they would have to comply with all the Federal conditions for day care centers. The problem is there are so many conditions that the local governments could not comply with all of them without a tremendous burden, if they were to get even 1 nickel of revenue-sharing money.

Those examples are just as logical as someone's union rights. There is no end to the conditions the minds of men could conceive along this line. If Senators are against the bill, they should vote for the amendment. These are the kinds of things that everybody agrees will kill revenue sharing—or the sorts of conditions that local governments would find it difficult to comply with.

The PRESIDING OFFICER. The question is on agreeing to the amendment. Is all time yielded back?

Mr. HARTKE. Mr. President, these amendments were not thought up in the dark. We discussed them with the Treasury. They informed the Senate through the Senator from Pennsylvania (Mr. SCOTT) that it was their considered judgment that they would strengthen the operation of the general revenue-sharing program.

I hope that in the interest of bipartisanship this amendment can be agreed to.

The PRESIDING OFFICER (Mrs. EDWARDS). All time on the amendment has been yielded back. The question is on agreeing to the amendment of the Senator from Indiana. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Oklahoma (Mr. HARRIS), the Senator from Washington (Mr. MAGNUSON), the Senator from Wyoming (Mr. MCGEE), the Senator from Montana (Mr. METCALF), the Senator from Rhode Island (Mr. PELL), and the Senator from South Dakota (Mr. MCGOVERN) are necessarily absent.

I further announce that the Senator from Iowa (Mr. HUGHES) is absent on official business.

Mr. SCOTT. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Hawaii (Mr. FONG), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from New York (Mr. JAVITS), the Senator from Illinois (Mr. PERCY), and the Senators from Ohio (Mr. TAFT and Mr. SAXBE) are necessarily absent.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Oregon (Mr. HATFIELD) and the Senator from Illinois (Mr. PERCY) would each vote "nay."

The result was announced—yeas 27, nays 54, as follows:

So Mr. HARTKE's amendment (No. 1466) was rejected.

Mr. LONG. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Madam President, there will be no more rollcall votes tonight.

ORDER FOR ADJOURNMENT UNTIL 10 A.M.

Mr. ROBERT C. BYRD. I ask unanimous consent that when the Senate completes its business today it stand in adjournment until 10 o'clock a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that on tomorrow, immediately after the two leaders have been recognized under the standing order, there be a period for the transaction of routine morning business of not to exceed 30 minutes, with statements therein limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO LAY BEFORE THE SENATE THE UNFINISHED BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that immediately following the period for the transaction of routine morning business tomorrow, the Chair lay before the Senate the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PERMIT THE SWITCHING OF TRACKS TOMORROW

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that it be in order, at no later than 1 o'clock p.m. tomorrow, for the distinguished majority leader or his designee to lay aside the unfinished business and call up the second track item, the revenue-sharing bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTOR VEHICLE INFORMATION AND COST SAVINGS ACT

Mr. ROBERT C. BYRD. Madam President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 976.

The PRESIDING OFFICER (Mrs. EDWARDS) laid before the Senate the amendment of the House of Representatives to the bill (S. 976) to promote competition among motor vehicle manufacturers in the design and production of safe motor vehicles having greater resistance to damage, and for other purposes, which is to strike out all after the enacting clause, and insert:

That this Act may be cited as the "Motor Vehicle Information and Cost Savings Act".

DEFINITIONS

SEC. 2. For the purpose of this Act:

(1) The term "passenger motor vehicle" means a motor vehicle with motive power, designed for carrying twelve persons or less, except a motorcycle, trailer, or multipurpose passenger vehicle.

(2) The term "multipurpose passenger vehicle" means a motor vehicle with motive power designed to carry twelve persons or less, which is constructed either on a truck chassis or with special features for occasional off-road operation.

(3) The term "passenger motor vehicle equipment" means any system, part or component of a passenger motor vehicle as originally manufactured or any similar part or component manufactured or sold for replacement or improvement of such system, part, or component or as an accessory, or addition to a passenger motor vehicle.

(4) The term "property loss reduction standard" means a minimum performance standard established for the purpose of increasing the resistance of passenger motor vehicles or passenger motor vehicle equipment to damage resulting from motor vehicle accidents or for the purpose of reducing the cost of repairing such vehicles or such equipment damaged as a result of such accidents.

(5) The term "bumper standard" means any property loss reduction standard the purpose of which is (A) to eliminate or reduce substantially physical damage to the front or rear ends (or both) of a passenger motor vehicle resulting from a low-speed collision (including but not limited to a low-speed collision with a fixed barrier), or (B) to reduce substantially the cost of repair of the front or rear ends (or both) of such a vehicle when damaged in such a collision; but such a standard may not specify a specific dollar amount for the cost of repair of a vehicle damaged in such a collision.

(6) The term "manufacturer" means any person engaged in the manufacturing or assembling of passenger motor vehicles or passenger motor vehicle equipment including any person importing motor vehicles or motor vehicle equipment for resale.

(7) The term "make" when used in describing a passenger motor vehicle means the trade name of the manufacturer of that vehicle.

(8) The term "model" when used in describing a passenger motor vehicle means a category of passenger motor vehicle based upon the size, style, and type of any make of passenger motor vehicle.

(9) The term "motor vehicle accident" means an accident arising out of the operation, maintenance, or use of a passenger motor vehicle or passenger motor vehicle equipment.

(10) The term "Secretary" means the Secretary of Transportation.

(11) The term "insurer of passenger motor vehicles" means any person engaged in the business of issuing (or reinsuring, in whole or part) passenger motor vehicle insurance policies.

(12) The term "damage susceptibility" means susceptibility to physical damage incurred by a passenger motor vehicle involved in a crash or collision.

(13) The term "crashworthiness" means the protection that a passenger motor vehicle affords its passengers against personal injury or death as a result of a crash or collision.

(14) The term "motor vehicle" means any vehicle driven or drawn by mechanical power manufactured primarily for use on the public streets, roads, and highways, except any vehicle operated exclusively on a rail or rails.

(15) The term "State" includes each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Canal Zone, and American Samoa.

(16) The term "interstate commerce" means commerce between any place in a State and any place in another State, or between places in the same State through another State.

(17) The term "United States district courts" means the Federal district courts of the United States and the United States courts of the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Canal Zone, and American Samoa.

(18) The term "person" means any individual, association, corporation, or institution.

TITLE I—BUMPER STANDARDS

FINDINGS AND PURPOSE

SEC. 101. (a) The Congress finds that it is necessary to reduce the economic loss resulting from damage to passenger motor vehicle accidents.

(b) It is the purpose of this title to reduce the extent of such economic loss by providing for the promulgation and enforcement of bumper standards.

SETTING OF STANDARDS

SEC. 102. (a) The Secretary shall, by rule, promulgate bumper standards for passenger motor vehicles or passenger motor vehicle equipment manufactured in the United States or imported into the United States, other than passenger motor vehicles or items of passenger motor vehicle equipment which are intended solely for export (and are so labeled or tagged on the vehicle or equipment itself and on the outside of the container, if any) and which are exported. Any such standard shall seek to obtain the maximum feasible reduction of costs to the public and to the consumer, taking into account:

(1) the cost of implementing the standard and the benefits attainable as the result of implementation of the standard;

(2) the effect of implementation of the standard on the cost of insurance and prospective legal fees and costs;

(3) savings in terms of consumer time and inconvenience; and

(4) considerations of health and safety, including emission standards.

(b) Bumper standards under this title shall not conflict with motor vehicle safety standards promulgated under title I of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1391, et seq.).

(c) In promulgating any standard the Secretary may for good cause shown exempt any make, model, or class of passenger motor vehicle manufactured for a special use, including occassional off-road operation, if such standard would unreasonably interfere with the special use of such passenger motor vehicle.

(d) The Secretary shall establish the effective date of any bumper standard when finally promulgating the standard, and such standard shall apply only to passenger motor vehicles or passenger motor vehicle equipment manufactured on or after such effective date. Such effective date shall not be—

(1) earlier than the date on which such standard is finally promulgated, or

(2) later than eighteen months after final promulgation of the standard unless the Secretary presents to Congress and publishes a detailed explanation of the reasons for such later effective date.

In no event shall the Secretary establish an effective date which is earlier than July 1, 1973.

(e)(1) All rules establishing, amending, or revoking a bumper standard under this title shall be issued pursuant to section 553 of title 5 of the United States Code, except that the Secretary shall give interested persons an opportunity for oral presentation of data, views, or arguments, and the opportunity to make written submissions. A transcript shall be kept of any oral presentation.

(2) The Secretary may also conduct a hearing in accordance with such conditions or limitations as he may make applicable thereto, for the purpose of resolving any issue of fact material to the establishing, amending, or revoking of a bumper standard.

JUDICIAL REVIEW

SEC. 103. (a) Any person who may be adversely affected by any rule issued under section 102 of this title may at any time prior to sixty days after such rule is issued file a petition with the United States Court of Appeals for the District of Columbia, or any circuit wherein such person resides or has his principal place of business, for judicial review of such rule. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Secretary or his delegate. The Secretary thereupon shall file in the court the record of the proceedings on which the Secretary based his rule, as provided in section 2112 of title 28, United States Code.

(b) If the petitioner applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Secretary, the court may order such additional evidence (and evidence in rebuttal thereof) to be taken before the Secretary, and to be adduced in a hearing, in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify his findings as to the facts, or make new findings, by reason of the additional evidence so taken, and he shall file such modified or new findings, and his recommendation, if any, for the modification or setting aside of his rule, with the return of such additional evidence.

(c) Upon the filing of the petition referred to in subsection (a) of this section, the court shall have jurisdiction to review the rule in accordance with chapter 7 of title 5, United States Code, and to grant appropriate relief as provided in such chapter.

(d) The judgment of the court affirming or setting aside, in whole or in part, any such rule of the Secretary shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(e) The remedies provided for in this subsection shall be in addition to and not in lieu of any other remedies provided by law.

POWERS OF THE SECRETARY

SEC. 104. (a)(1) For the purpose of carrying out the provisions of this title, the Secretary, or on the authorization of the Secretary, any officer or employee of the Department of Transportation may hold such hearings, take such testimony, sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, papers, correspondence, memorandums, contracts, agreements, or other records as the Secretary, or such officer or employee, deems advisable.

(2) In order to carry out the provisions of this title, the Secretary or his duly authorized agent shall at all reasonable times have access to, and for the purposes of examination the right to copy, any documentary evidence of any person having materials or information relevant to any function of the Secretary under this title.

(3) The Secretary is authorized to require, by general or special orders, any person to file, in such form as the Secretary may prescribe, reports or answers in writing to specific questions relating to any function of the Secretary under this title. Such reports and answers shall be made under oath or otherwise, and shall be filed with the Secretary within such reasonable period as the Secretary may prescribe.

(4) Any of the district courts of the United States within the jurisdiction of which an inquiry is carried on may, in the case of contumacy or refusal to obey a subpena or order of the Secretary or such officer or employee issued under paragraph (1) or paragraph (3) of this subsection, issue an order requiring compliance therewith; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(5) Witnesses summoned pursuant to this subsection shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

(b) All information reported to or otherwise obtained by the Secretary or his representative under this title which information contains or relates to a trade secret or other matter referred to in section 1905 of title 18 of the United States Code, shall be considered confidential for the purpose of that section, except that such information may be disclosed to other officers or employees concerned with carrying out this title or when relevant in any proceeding under this title. Nothing in this section shall authorize the withholding of information by the Secretary or any officer or employee under his control from the duly authorized committees of the Congress.

(c)(1) The Secretary is authorized to request from any department, agency, or instrumentality of the Government any information he deems necessary to carry out his functions under this title; and each such department, agency, or instrumentality is authorized and directed to cooperate with the Secretary and to furnish such information to the Department of Transportation upon request made by the Secretary.

(2) The head of any Federal department, agency, or instrumentality is authorized to detail, on a reimbursable basis, any personnel of such department, agency, or instrumentality to assist in carrying out the duties of the Secretary under this title.

(d) The Secretary shall conduct such research as is necessary for him to carry out his functions under this title.

INSPECTION AND CERTIFICATION

SEC. 105. (a) Every manufacturer of passenger motor vehicles or of passenger motor vehicle equipment shall establish and maintain such records, make such reports, and provide such items and information, including the supplying of vehicles or equipment for testing, as the Secretary may reasonably require to enable him to determine whether such manufacturer has acted or is acting in compliance with this title and bumper standards prescribed pursuant to this title and shall, upon request of an officer or employee duly designated by the Secretary, permit such officer or employee to inspect vehicles and appropriate books, papers, records, and documents relevant to determining whether such manufacturer has acted or is acting in compliance with this title and bumper standards prescribed pursuant to this title. Such manufacturer shall make available all such items and information in accordance with such reasonable rules as the Secretary may prescribe.

(b) For purposes of enforcement of this title, officers or employees duly designated by the Secretary, upon presenting appropriate credentials and a written notice to the owner, operator, or agent in charge, are authorized (1) to enter any factory, warehouse, or establishment in which passenger motor vehicles or passenger motor vehicle equipment is manufactured, or held for introduction into interstate commerce or are held for sale after such introduction; and (2) to inspect such factory, warehouse, or establishment. Each such inspection shall be conducted at reasonable times and in a reasonable manner and shall be commenced and completed with reasonable promptness.

(c) (1) Every manufacturer or distributor of a passenger motor vehicle or an item of passenger motor vehicle equipment shall furnish to the distributor or dealer at the time of delivery of such vehicle or item of equipment by such manufacturer or distributor a certification that each such vehicle or item of equipment conforms to all applicable Federal bumper standards.

(2) Paragraph (1) of the subsection shall not apply to any passenger motor vehicle or item of passenger motor vehicle equipment which is intended solely for export (and is so labeled or tagged on the vehicle or equipment itself and on the outside of the container, if any) and which is exported.

PROHIBITED ACTS

SEC. 106. (a) No person shall—

(1) manufacture for sale, sell, offer for sale, or introduce or deliver for introduction in interstate commerce, or import into the United States, any passenger motor vehicle or passenger motor vehicle equipment manufactured on or after the date any applicable Federal bumper standard takes effect under this title unless it is in conformity with such standard;

(2) fail to keep specified records or refuse access to or copying of records, or fail to make reports or provide items or information, or fail or refuse to permit entry or inspection, as required under this title or any rule issued thereunder; or

(3) (A) fail to furnish a certificate required by section 105(c), or (B) issue a certificate required by such subsection to the effect that a passenger motor vehicle or passenger motor vehicle equipment conforms to all applicable bumper standards, if such person knows, or in the exercise of due care has reason to know, that such certificate is false or misleading in a material respect.

(b) (1) Paragraph (1) of subsection (a) shall not apply to the sale, the offer for sale, or the introduction or delivery for introduction in interstate commerce of any passenger motor vehicle or any passenger motor vehicle equipment after the first purchase of it in good faith for purposes other than resale. Nothing contained in this paragraph shall be construed as prohibiting the Secretary from promulgating any standard which requires vehicles or equipment to be manufactured so as to perform in accordance with the standard over a specified period of operation or use.

(2) Paragraph (1) of subsection (a) shall not apply to any person who establishes that he did not have reason to know in the exercise of due care that the vehicle or item of equipment is not in conformity with applicable bumper standards or to any person who, prior to such first purchase, holds a certificate issued under section 105(c) to the effect that the vehicle or item of equipment conforms to all applicable Federal bumper standards, unless such person knows that such vehicle or such equipment does not so conform.

(3) A passenger motor vehicle or passenger motor vehicle equipment offered for importation in violation of paragraph (1) of subsection (a) shall be refused admission into the United States under joint regulations issued by the Secretary of the Treasury and the Secretary; except that the Secretary of the Treasury and the Secretary may, by such regulations, provide for authorizing the importation of such vehicle or equipment into the United States upon such terms and conditions (including the furnishing of a bond) as may appear to them appropriate to insure that any such vehicle or such equipment will be brought into conformity with any applicable Federal bumper standard prescribed under this title, or will be exported or abandoned to the United States.

(4) The Secretary of the Treasury and the Secretary may, by joint regulations, permit the temporary importation of any passenger motor vehicle or passenger motor vehicle equipment after the first purchase of it in good faith for purposes other than resale.

(c) Compliance with any Federal bumper standard issued under this title does not exempt any person from any liability under statutory or common law.

ENFORCEMENT

SEC. 107. (a) Whoever violates subsection (a) of section 106 may be assessed a civil penalty of not to exceed $1,000 for each violation. With respect to violations of paragraph (1) or (3) of subsection (a) of section 106, a separate violation is committed with respect to each passenger motor vehicle or each item of passenger motor vehicle equipment which fails to conform to an applicable bumper standard or for which a certificate is not furnished or for which a misleading or false certificate is issued; except that the maximum civil penalty shall not exceed $400,000 for any related series of violations.

(b) (1) Upon petition by the Secretary or by the Attorney General on behalf of the United States, the United States district courts shall have jurisdiction, for cause shown and subject to the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this title, or to restrain the sale, offer for sale, or the introduction or delivery for introduction in interstate commerce, or the importation into the United States, of any passenger motor vehicle or passenger motor vehicle equipment which is determined, prior to the first purchase of such vehicle or such equipment in good faith for purposes other than resale, not to conform to applicable bumper standards prescribed pursuant to this title. Whenever practicable, the Secretary shall give notice to any person against whom an action for injunctive relief is contemplated and afford him an opportunity to present his views, and, except in the case of a knowing and willful violation, shall afford him reasonable opportunity to achieve compliance. The failure to give such notice and afford such opportunity shall not preclude the granting of appropriate relief.

(2) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this subsection, which violation also constitutes a violation of this title, trial shall be by the court or, upon demand of the accused, by a jury. Such trial shall be conducted in accordance with the practice and procedure applicable in the case of proceedings subject to the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

(3) Actions under paragraph (1) of this subsection and under subsection (a) of this section may be brought in the district wherein any act or transaction constituting the violation occurred, or in the district wherein the defendant is found or is an inhabitant or transacts business, and process in such cases may be served in any other district of which the defendant is an inhabitant or wherever the defendant may be found.

(4) In any actions brought under paragraph (1) of this subsection and under subsection (a) of this section, subpenas for witnesses who are required to attend a United States district court may run into any other district.

CIVIL ACTION

SEC. 108. (a) Any owner of a passenger motor vehicle who sustains damages as a result of a motor vehicle accident because of noncompliance with any applicable bumper standard may bring a civil action against the manufacturer of that vehicle in the United States District Court of the District of Columbia, or in the United States district court for the judicial district in which that owner resides, to recover the amount of that loss, and in the case of any such successful action to recover that amount, costs and reasonable attorneys' fees shall be awarded to that owner.

(b) Any such action shall be brought within three years of the date on which the damages are sustained.

PUBLIC ACCESS TO INFORMATION

SEC. 109. Subject to section 104(b), copies of any communications, documents, reports, or other information sent or received by the Secretary in connection with his duties under this title shall be made available to any member of the public, upon request, at cost.

EFFECT ON STATE LAWS

SEC. 110. (a) Except as provided in subsection (b) of this section, no State or political subdivision thereof shall have any authority to establish or enforce with respect to any passenger motor vehicle or passenger motor vehicle equipment offered for sale any bumper standard which is not identical to a Federal bumper standard.

(b) (1) Until a Federal bumper standard takes effect with respect to an aspect of performance of a passenger motor vehicle or of an item of passenger motor vehicle equipment, this Act shall not affect the authority of a State to continue to enforce any bumper standard which is applicable to the same aspect of performance of such vehicle or item of equipment and which was in effect or had been promulgated on the date of enactment of this Act.

(2) This section shall not affect the authority given to the Administrator of the Environmental Protection Agency by section 209(b) of the Clean Air Act (42 U.S.C. 1857f-6a(b)).

(3) The Federal Government or the government of any State or political subdivision thereof may establish a bumper standard applicable to vehicles or equipment procured for its own use which is not identical to the Federal standard under section 102 if such requirement imposes an additional or higher standard of performance.

AUTHORIZATION

SEC. 111. There is authorized to be appropriated to carry out this title $5,000,000 for fiscal year ending June 30, 1973; $9,000,000 for the fiscal year ending June 30, 1974; and $10,000,000 for the fiscal year ending June 30, 1975.

REPORTS

SEC. 112. The Secretary shall report to the Congress and to the President not later than March 31 of each year on the progress in carrying out the purposes of this title. Each such report shall contain a statement of the cost savings that have resulted from the administration of this title, and include such recommendations for further legislative or other action as the Secretary determines may be appropriate.

TITLE II—AUTOMOBILE CONSUMER INFORMATION STUDY

CONSUMER INFORMATION

SEC. 201. (a) During the first year after enactment of this Act the Secretary shall conduct a comprehensive study and investigation of the methods for determining the following characteristics of passenger motor vehicles:

(1) The damage susceptibility of such vehicles.

(2) The degree of crashworthiness of such vehicles.

(3) The characteristics of such vehicles with respect to the case of diagnosis and repair of mechanical and electrical systems which fail during use or which are damaged in motor vehicle accidents.

(b) After reviewing the methods for determining the characteristics enumerated in subsection (a), the Secretary shall make specific recommendations for the further development of existing methods or for the development of new methods.

(c) After the study has been completed the Secretary is authorized and directed to devise specific ways in which existing information and information to be developed relating to (1) the characteristics of passenger motor vehicles enumerated in subsection (a), or (2) vehicle operating costs dependent upon those characteristics (including information obtained pursuant to section 205 of this title), can be communicated to consumers so as to be of benefit in their passenger motor vehicle purchasing decisions.

(d) The Secretary shall compile the information described in subsection (c) and furnish it to the public in a simple and readily understandable form in order to facilitate comparison among the various makes and models of passenger motor vehicles with respect to the characteristics enumerated in subsection (a).

(e) The Secretary, not later than February 1, 1975, shall establish procedures requiring the automobile dealers to provide insurance premium rates to prospective purchasers that would enable the prospective purchasers to compare the difference in costs for auto insurance on the various makes and models of passenger motor vehicles.

ADMINISTRATIVE POWERS

SEC. 202. In order to carry out his functions under this title the Secretary is authorized to—

(1) appoint and fix the compensation of such employees as he deems necessary without regard to the provisions of title 5, United States Code, governing appointment in the competitive service and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates;

(2) obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code, but at rates for individuals not to exceed $100 per diem;

(3) contract with any person for the conduct of research and surveys and the preparation of reports; and

(4) appoint, without regard to the provisions of title 5, United States Code, governing appointments in the competitive services, such advisory committees, representative of the divergent interests involved, as he deems appropriate for the purposes of consultation with and advice to the Secretary. Members of advisory committees appointed under paragraph (4) of this section, other than those regularly employed by the Federal Government, while attending meetings of such committees or otherwise serving at the request of the Secretary, may be compensated at rates to be fixed by the Secretary but not exceeding $100 per day, and while away from home or regular place of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently. Members of such advisory committees shall, for the purposes of chapter 11, title 18, United States Code, be deemed to be special Government employees.

COOPERATION OF FEDERAL AGENCIES

SEC. 203. (a) The Secretary may request from any department, agency, or independent instrumentality of the Government any information he deems necessary to carry out his functions under this title; and each such department, agency, or independent instrumentality is authorized and directed to cooperate with the Secretary and furnish such information to the Department of Transportation upon request made by the Secretary.

(b) The head of any Federal department, agency, or independent instrumentality may detail, on a reimbursable basis, any personnel of such department, agency, or independent instrumentality to assist in carrying out the duties of the Secretary under this title.

HEARINGS AND PRODUCTION OF DOCUMENTARY EVIDENCE

SEC. 204. (a) For the purpose of carrying out the provisions of this title, the Secretary, or on the authorization of the Secretary, any officer or employee of the Department of Transportation may hold such hearings, take such testimony, sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, papers, correspondence; memorandums, contracts, agreements, or other records as the Secretary, or such officer or employee, deems advisable.

(b) In order to carry out the provisions of this title, the Secretary or his duly authorized agent shall at all reasonable times have access to, and for the purposes of examination the right to copy, any documentary evidence of any person having materials or information relevant to the study authorized by this title.

(c) The Secretary may require, by general or special orders, any person to file, in such form as the Secretary may prescribe, reports or answers in writing to specific questions relating to any function of the Secretary under this title. Such reports and answers shall be made under oath or otherwise, and shall be filed with the Secretary with such reasonable period as the Secretary may prescribe.

(d) Any United States district court within the jurisdiction of which an inquiry is carried on may, in the case of contumacy or refusal to obey a subpena or order of the Secretary or such officer or employee issued under subsection (a) or subsection (c) of this section, issue an order requiring compliance therewith; and any failure to obey such order of the court may be punished by such court as a contempt thereof.

(e) Witnesses summoned pursuant to this section shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

(f) Any information which is reported to or otherwise obtained by the Secretary or such officer or employee under this section and which contains or relates to a trade secret or other matter referred to in section 1905 of title 18 of the United States Code shall not be disclosed except to other officers or employees of the Federal Government for their use in carrying out this title. Nothing in the preceding sentence shall authorize the withholding of information by the Secretary (or any officer or employee under his control) from the duly authorized committees of the Congress.

INSURANCE INFORMATION

SEC. 205. (a) Insurers of passenger motor vehicles, or their designated agents, shall, upon request by the Secretary, make such reports and furnish such information as the Secretary may reasonably require to enable him to carry out the purposes of this title.

(b) Such reports and information may include, but shall not be limited to—

(1) accident claim data relating to the type and extent of physical damage and the cost of remedying the damage according to make, model, and model year of passenger motor vehicle, and

(2) accident claim data relating to the type and extent of personal injury according to make, model, and model year of passenger motor vehicle.

(c) In determining the reports and information to be furnished pursuant to subsections (a) and (b) of this section, the Secretary shall—

(1) consider the cost of preparing and furnishing such reports and information;

(2) consider the extent to which such reports and information will contribute to carrying out the purposes of this title; and

(3) consult with such State and insurance regulatory agencies and other agencies and associations, both public and private, as he deems appropriate.

(d) The Secretary shall, to the extent possible, obtain such reports and information from the insurers of passenger motor vehicles on a voluntary basis.

(e) Every insurer of passenger motor vehicles shall, upon request by the Secretary, furnish him a description of the extent to which the insurance rates or premiums charged by the insurer for passenger motor vehicles are affected by the damage susceptibility, crashworthiness, and cost of damage repair and personal injury involved relating to each of the various makes and models of passenger motor vehicles. Such insurer shall also furnish the Secretary upon request such information as may be available to such insurer reflecting the effect of the damage susceptibility, crashworthiness, and cost of damage repair and personal injury involved relating to each of the various makes and models of passenger motor vehicles upon risk incurred by insuring each such make and model.

(f) The Secretary shall not, in disseminating any information received pursuant to this section, disclose the name of, or other identifying information about, any person who may be an insured, a claimant, a passenger, an owner, a driver, an injured person, a witness, or otherwise involved in any motor vehicle crash or collision unless the Secretary has the consent of the persons so named or otherwise identified.

(g) The information required by this section shall be furnished at such times and in such manner as the Secretary shall prescribe by regulation or otherwise.

PROHIBITED ACT

SEC. 206. No person shall fail or refuse to furnish the Secretary with the data or information requested by him under this title.

INJUNCTIVE RELIEF

SEC. 207. Upon petition by the Attorney General on behalf of the United States, the United States district courts shall have jurisdiction, for cause shown and subject to

the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of section 206. Whenever practicable, the Secretary shall give notice to any person against whom an action for injunctive relief is contemplated and afford him an opportunity to present his views and shall afford him reasonable opportunity to achieve compliance. The failure to give such notice and afford such opportunity shall not preclude the granting of appropriate relief. Paragraphs (3) and (4) of section 107(b) shall apply to any action under this section in the same manner as they apply to actions under section 107.

CIVIL PENALTY

SEC. 208. (a) Whoever violates section 206 shall be subject to a civil penalty of not to exceed $1,000 for each violation. A violation of section 206 shall constitute a separate violation with respect to each failure or refusal to comply with a requirement thereunder; except that the maximum civil penalty under this subsection shall not exceed $400,000 for any related series of violations.

(b) Any civil penalty under this section may be compromised by the Secretary. In determining the amount of such penalty, or the amount agreed upon in compromise, the appropriateness of such penalty to the size of the business of the person charged and the gravity of the violation shall be considered. The amount of such penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person charged.

(c) Paragraphs (3) and (4) of section 107 (b) shall apply to any action under this section in the same manner as they apply to actions under section 107.

APPROPRIATIONS AUTHORIZED

SEC. 209. There are hereby authorized to be appropriated to carry out the provisions of this title $3,000,000 per fiscal year for the fiscal year ending June 30, 1973, and for each of the two succeeding fiscal years.

TITLE III—DIAGNOSTIC INSPECTION DEMONSTRATION PROJECTS

POWERS AND DUTIES

SEC. 301. (a) The Secretary shall establish motor vehicle diagnostic inspection demonstration projects, inspections under which shall commence not later than January 1, 1974.

(b) To carry out the program under this title, the Secretary shall—

(1) make grants in accordance with subsection (c) and furnish technical assistance to States; and

(2) consult with the Administrator of the Environmental Protection Agency.

(c) (1) Any demonstration project under this title shall be conducted by, or under supervision of, a State in accordance with the application of the State submitted under section 303, and may provide for the performance of diagnostic inspection services either by public agencies or by private organizations, but no person may perform diagnostic inspection services for profit under any such program.

(2) Not less than five nor more than ten demonstration projects may be assisted by the Secretary under this title. No more than 50 per centum of the projects so assisted may permit diagnostic inspection services to be performed under the project by any person who also provides automobile repair services or who is affiliated with, controls, is controlled by, or is under common control with, any person who provides automobile repair services.

ELIGIBILITY AND CRITERIA

SEC. 302. (a) A State may be eligible for grants or other assistance under this title if the Secretary determines on the basis of an application by such State that such State will undertake a motor vehicle diagnostic inspection demonstration project which meets the requirements of subsection (b) of this section.

(b) (1) A motor vehicle diagnostic inspection demonstration project shall be designed, established and operated to conduct periodic safety inspections of motor vehicles pursuant to criteria established by the Secretary by regulation and emission inspections pursuant to criteria established by the Secretary by regulation in consultation with the Administrator of the Environmental Protection Agency.

(2) Such project shall require an additional inspection of any motor vehicle subject to the demonstration (as determined by the Secretary)—

(A) whenever the title to such motor vehicle is transferred to another person unless the transfer is for the purpose of resale; and

(B) whenever such motor vehicle sustains substantial damage to any safety-related or emission-related system or subsystem, as prescribed by the Secretary.

(3) To the greatest extent practicable, such inspections shall be conducted so as to provide specific technical diagnoses of each motor vehicle inspected in order to facilitate correction of any component failing inspection.

(4) A demonstration project shall provide for reinspection of vehicles which initially fail to meet the safety and emission standards established for the project after repair.

(5) Each project shall provide to the Secretary information and data relating to the development of diagnostic testing equipment designed to maximize the interchangeability and interface capability of test equipment and vehicles, and information, and data relating to the costs and benefits of such projects, including information and data relating to vehicle-in-use standards, vehicle designs which facilitate or hinder inspection and repair, the standardization of diagnostic systems and test equipment, the capability of the motor vehicle repair industry to correct diagnosed deficiencies or malfunctions and the costs of such repairs, the relative costs and benefits of the project, the efficiency of facility designs employed, recommendations as to feasible reject levels which may be employed in any such project, and such other information and data as the Secretary may require.

APPLICATIONS AND ASSISTANCE

SEC. 303. (a) A grant or other assistance under this title may be obtained upon an application by a State at such time, in such manner, and containing such information as the Secretary prescribes, including information respecting categories of expenditures by the State from financial assistance under this title.

(b) Upon the approval of any such application, the Secretary may make a grant to the State to pay each fiscal year an amount not in excess of 90 per centum of those categories of expenditures for establishing and operating its project which the Secretary approves. Federal financial assistance under this title shall not be available with respect to costs of inspections carried out after June 30, 1976, under such a project. Any equipment purchased with Federal funds may be retained by a State for its inspection activities following the demonstration project with the approval of the Secretary. Payments under this subsection may be made in advance, in installments, or by way of reimbursement.

AUTHORIZATION

SEC. 304. There is authorized to be appropriated to carry out this title $10,000,000 for the fiscal year ending June 30, 1973; $15,000,000 for the fiscal year ending June 30, 1974; and $25,000,000 for the fiscal year ending June 30, 1975.

TITLE IV—ODOMETER REQUIREMENTS

FINDINGS AND PURPOSE

SEC. 401. The Congress hereby finds that purchasers, when buying motor vehicles, rely heavily on the odometer reading as an index of the condition and value of such vehicle; that purchasers are entitled to rely on the odometer reading as an accurate reflection of the mileage actually traveled by the vehicle; that an accurate indication of the mileage traveled by a motor vehicle assists the purchaser in determining its safety and reliability; and that motor vehicles move in the current of interstate and foreign commerce or affect such commerce. It is therefore the purpose of this title to prohibit tampering with odometers on motor vehicles and to establish certain safeguards for the protection of purchasers with respect to the sale of motor vehicles having altered or reset odometers.

DEFINITIONS

SEC. 402. As used in this title—

(1) The term "odometer" means an instrument for measuring and recording the actual distance a motor vehicle travels while in operation; but shall not include any auxiliary odometer designed to be reset by the operator of the motor vehicle for the purpose of recording mileage on trips.

(2) The term "repair and replacement" means to restore to a sound working condition by replacing the odometer or any part thereof or by correcting what is inoperative.

(3) The term "transfer" means to change ownership by purchase, gift, or any other means.

UNLAWFUL DEVICES

SEC. 403. It is unlawful for any person to advertise for sale, to sell, to use, or to install or to have installed, any device which causes an odometer to register any mileage other than the true mileage driven. For purposes of this section, the true mileage driven is that mileage driven by the vehicle as registered by the odometer within the manufacturer's designed tolerance.

UNLAWFUL CHANGE OF MILEAGE

SEC. 404. It is unlawful for any person or his agent to disconnect, reset, or alter the odometer of any motor vehicle with the intent to change the number of miles indicated thereon.

OPERATION WITH INTENT TO DEFRAUD

SEC. 405. It is unlawful for any person with the intent to defraud to operate a motor vehicle on any street or highway knowing that the odometer of such vehicle is disconnected or nonfunctional.

CONSPIRACY

SEC. 406. No person shall conspire with any other person to violate section 403, 404, 405, 407, or 408.

LAWFUL SERVICE, REPAIR, OF REPLACEMENT

SEC. 407. Nothing in this title shall prevent the service, repair, or replacement of an odometer, provided the mileage indicated thereon remains the same as before the service, repair, or replacement. Where the odometer is incapable of registering the same mileage as before such service, repair, or replacement, the odometer shall be adjusted to read zero and a notice in writing shall be attached to the left door frame of the vehicle by the owner or his agent specifying the mileage prior to repair or replacement of the odometer and the date on which it was repaired or replaced. Any removal or alteration of such notice so affixed shall be unlawful.

DISCLOSURE REQUIREMENTS

SEC. 408. It shall be unlawful for any transferor to fail to give the following written disclosure to the transferee in connection with the transfer of ownership of a motor vehicle:

(1) Disclosure of the cumulative mileage registered on the odometer.

(2) Disclosure that the actual mileage is unknown, if the odometer reading is known to the transferor to be different from the number of miles the vehicle has actually traveled.

It shall be a violation of this section for any transferor knowingly to give a false statement to a transferee under the provisions of this section. The Secretary shall prescribe by regulation the manner in which information shall be disclosed under this section and in which such information shall be retained.

PRIVATE CIVIL ACTION

SEC. 409. (a) Any person who, with intent to defraud, violates any requirement imposed under this title shall be liable in an amount equal to the sum of—

(1) three times the amount of actual damages sustained or $1,500, whichever is the greater; and

(2) in the case of any successful action to enforce the foregoing liability, the costs of the action together with a reasonable attorney's fee as determined by the court.

(b) An action to enforce any liability created under subsection (a) of this subsection, may be brought in a United States district court without regard to the amount in controversy, or in any other court of competent jurisdiction, within two years from the date on which the liability arises.

INJUNCTIVE ENFORCEMENT

SEC. 410. (a) Upon petition by the Attorney General on behalf of the United States, the United States district courts shall have jurisdiction, for cause shown and subject to the provisions of rule 65 (a) and (b) of the Federal Rules of Civil Procedure, to restrain violations of this title. Whenever practicable, the Secretary shall give notice to any person against whom an action for injunctive relief is contemplated and afford him an opportunity to present his views. The failure to give such notice and afford such opportunity shall not preclude the granting of appropriate relief.

(b) Paragraphs (3) and (4) of section 107 (b) shall apply to actions under this section in the same manner as they apply to actions under section 107.

EFFECT ON STATE LAW

SEC. 411. This title does not—

(1) annul, alter, or affect the laws of any State with respect to the disconnecting, altering, or tampering with odometers with the intent to defraud, or

(2) exempt any person subject to the provisions of this title from complying with such laws,

except to the extent that those laws are inconsistent with any provision of this title, and then only to the extent of the inconsistency.

EFFECTIVE DATE

SEC. 412. This title shall take effect ninety calendar days following the date of enactment of this Act.

REPORT

SEC. 413. One year after the date of enactment of this Act, the Secretary shall report to the Congress and to the President on the extent to which the reliability of odometers can be improved, on the technical feasibility of producing odometers which are tamper proof, and on the Secretary's plans and recommendations for future action.

Mr. ROBERT C. BYRD. Madam President, I move that the Senate disagree to the House amendment and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MAGNUSON, Mr. HART, Mr. MOSS, Mr. COOK, and Mr. GRIFFIN conferees on the part of the Senate.

PROGRAM

Mr. ROBERT C. BYRD. Madam President, the program for tomorrow is as follows:

The Senate will convene at 10 o'clock a.m.

After the two leaders have been recognized under the standing order, there will be a period for the transaction of routine morning business, for not to exceed 30 minutes, with statements therein limited to 3 minutes, at the conclusion of which the Chair will lay before the Senate the unfinished business, Senate Joint Resolution 241, authorizing the President to approve an interim agreement between the United States and the U.S.S.R.

The pending question at that time will be on the adoption of amendment No. 1434 by Mr. MANSFIELD. Under the order previously entered, a vote will occur on the Mansfield amendment at no later than 12 noon. That will be a yea-and-nay vote, the yeas and nays having been ordered previously.

At no later than 1 p.m. tomorrow, the unfinished business will be laid aside, and the Senate will return to the consideration of the second-track item, H.R. 14370, the so-called revenue sharing bill.

The pending question at that time will be on amendment No. 1450 by Mr. MCCLELLAN. It is the Appropriations Committee amendment. There will be a yea-and-nay vote on the adoption of that amendment at 5 p.m. tomorrow.

Following the disposition of amendment No. 1450, the Appropriations Committee amendment, further amendments will be in order. They are expected to be called up. Several are at the desk. Yea-and-nay votes will occur thereon. Tomorrow will be a long day, a busy day, with several year-and-nay votes. Hopefully, the way can be cleared for passage of the revenue sharing bill on Friday—hopefully.

ADJOURNMENT UNTIL 10 A.M.

Mr. ROBERT C. BYRD. Madam President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and at 7:53 p.m. the Senate adjourned until tomorrow, Thursday, September 7, 1972, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate September 6, 1972:

DEPARTMENT OF STATE

Marion H. Smoak, of South Carolina, acting chief of protocol for the White House, for the rank of Ambassador.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Donald Harry Cowles, [redacted], U.S. Army.

Maj. Gen. Elmer Hugo Almquist, Jr., [redacted], U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Stanley R. Larsen [redacted], Army of the United States (major general, U.S. Army).

IN THE ARMY

HOUSE OF REPRESENTATIVES—*Wednesday, September 6, 1972*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Seek good and not evil, that you may live: And so the Lord will be with you.—Amos 5: 14.

Eternal Spirit, in whom is our strength, with whom is our peace and from whom comes our hope for life in this moment of prayer we wait upon Thee for Thy forgiving grace and Thy empowering spirit.

We share in the sorrow of all people at the deeds of violence which have taken the lives of fine men. Teach us all, Our Father, that hatred does not work and that only good will can heal the hearts of nations.

Strengthen the families of those slain with Thy sustaining presence and lift the burden of violence from the hearts of men.

In these baffling and bewildering days grant unto us the willingness to walk in the ways of wisdom and the will to work for a world in which men are free, where justice rules the minds of men, and where peace reigns in the hearts of nations. Make us and our country great and good in spirit that we may be channels through which Thy purposes come to new life in our day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment, a bill of the House of the following title:

H.R. 9323. An act to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 9222. An act to correct deficiencies in the law relating to the crimes of counterfeiting and forgery.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2) entitled "An act to establish a Uniformed Services University of the Health Sciences and to provide scholarships to selected persons for education in medicine, dentistry, and other health professions, and for other purposes."

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 16. An act to amend title 18 of the United States Code to provide civil remedies to victims of racketeering activity and theft, and for other purposes; and

S. 2087. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968 to provide a Federal minimum death and dismemberment benefit to public safety officers or their surviving dependents.

RECESS OUT OF RESPECT FOR MURDERED ISRAELI ATHLETES

Mr. PODELL. Mr. Speaker, I rise of course in despair over the events yesterday at Munich. I ask that the House stand in recess for 30 minutes out of respect for the 11 Israeli athletes who were killed so barbarically yesterday.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Accordingly (at 12 o'clock and 1 minute p.m.), the House stood in recess until 12:30 o'clock p.m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 12 o'clock and 30 minutes p.m.

EXPRESSION OF SYMPATHY TO PEOPLE OF ISRAEL AND FAMILIES OF THOSE WHOSE LIVES WERE LOST AT MUNICH

Mr. CELLER. Mr. Speaker, I offer a resolution (H. Res. 1106) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1106

Whereas with profound sorrow and deep alarm the House is informed of the events surrounding the killing of eleven members of the Israeli Olympic team participating in the Twentieth Olympiad at Munich, and

Whereas such actions are to be condemned as inimical to the interests and aspirations of the civilized world, be it hereby

Resolved, That the United States joins with the world in mourning the loss of Israel's athletes and extends its deepest sympathy to the people of Israel and to the families of those so tragically lost, and be it,

Further resolved, That all means be sought by which the civilized world may cut off from contact with civilized mankind any peoples or any nation giving sanctuary, support, sympathy, aid, or comfort to acts of murder and barbarism such as those just witnessed at Munich and that the Clerk of the House be directed to communicate these sentiments and expressions to the Secretary of State for appropriate transmittal.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER. The gentleman from New York (Mr. CELLER) is recognized.

Mr. CELLER. Mr. Speaker, supplementing the resolution which has been read by the Clerk, I wish to indicate that I personally believe that the Olympic games at Munich should now be terminated.

There is world protest against the brutal holocaust of these Arab murderers against the Israel athletes. The spirit of the Olympic games has been crushed. The continuation of the Olympic games would be a vivid condemnation of these horrendous acts.

The entire civilized world is aroused at these murders—apparently covertly or overtly applauded by some Arab nations. These beastly attacks can only be compared to the destruction of, say, the Sistine Chapel or the mutilation of the sacred scrolls of the temple or the murder of innocent defenseless bystanders.

The Olympic games stand for fair play and strenuous but just competition and harmony among nations. But these unspeakable crimes are the very antithesis of those laudable aims.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, yesterday the world witnessed at Munich an act of barbarism and brutality in the killing of unarmed members of the Israel Olympic team—an act which has few parallels in the annals of international crime.

It is the latest in a series of murders which has made the whole globe a battlefield and every civilian a possible victim.

Murder is loose in the world—murder that may strike at any place—any time. Who would have dreamed that the friendly relationships of the Olympic games would be shattered by the death-dealing chatter of machineguns?

It is one thing to act and to resolve, as we do today, Mr. Speaker, in this resolution which is good—but that is not enough. The hijackings continue—killings go on—and criminals are given haven by nations who should punish them rather than protect them.

Mr. Speaker, I urge the President to take steps to mobilize the nations of the world to halt this murder madness.

Mr. BOGGS. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Louisiana.

Mr. BOGGS. Mr. Speaker, I commend the distinguished dean of the House, the gentleman from New York (Mr. CELLER) for introducing this very timely resolution. I am one of the sponsors. I expressed sentiments very similar to those set forth in the resolution yesterday in a speech on the floor of the House.

I can only add that the gentleman from Illinois (Mr. YATES) of course is eminently correct in saying that the time has come to implement the international organizations so that piracy of this kind and banditry and outlawry, whether it be committed in the air as is now the subject of an international conference or whether it be committed against the innocent participants in a great athletic event dedicated to world amity, will be recognized as a challenge to these organizations and to the American Government.

I commend the gentleman from Illinois for his very timely suggestion.

I join, too, Mr. Speaker, in expressions of profound sympathy and regret that this great international event which has come to be known in modern history as well as in ancient times as a symbol of peace, should be so desecrated.

Mr. PODELL. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York (Mr. PODELL).

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman from New York yield for an observation or comment?

Mr. PODELL. I yield to the gentleman from Michigan.

Mr. GERALD R. FORD. Mr. Speaker, the only way despicable acts of murder and terrorism like that which occurred in Munich will be stopped is if doors all over the world are shut to such assassins.

While deeply mourning the deaths of the Israeli Olympic team members so senselessly slain by Arab terrorists in Germany, I agree completely with the action called for by Senate Resolution 358—that the civilized world ostracize any peoples or nation giving sanctuary or refuge to international outlaws of the Black September stripe.

In committing their outrages and delivering their ultimatums, Arabs terrorists ultimately seek escape. They attempt to find their way to a place of refuge.

In the case of the Munich affair, the announced destination was Cairo. It is my information that West German officials contacted the Egyptian Government but received no satisfaction from them during the time that negotiations with the terrorists still were in progress. This, to me, is shocking.

There should be no hiding place for assassins like the Arab terrorists. There should be no place to which they can flee after executing their hideous plots. I know of no other way in which such assassins can be stopped.

Mr. Speaker, I urge strong support for House Resolution 1106.

Mr. PODELL. Mr. Speaker, I thank the gentleman from Michigan.

Mr. Speaker, I rise in support of the resolution and in despair over the events in Munich yesterday. Yesterday the world paid a heavy price for its continued refusal to uproot and destroy terrorist violence. Yesterday a small group of Palestinian terrorist butchers showed that not only can they hire Japanese gunmen to slaughter innocent American airline passengers; not only can they hijack and blow up civilian aircraft; but also they can sink to new levels of barbarism—they can destroy the world's latest and most glorious efforts to work, play together and compete together in a healthy atmosphere of peace and mutual respect.

Is it to be that nowhere in this world can people compete in peace and work and play together? Has suspicion replaced respect? Have sharp words replaced friendly competition?

The Olympic games are continuing, as they should continue, but they should continue in a new spirit, in a spirit of mourning for the 11 lost lives of the Israeli Olympians and for the lost peace and lost friendship. They should continue with the full realization that the games have been disrupted by acts of insane violence. They should continue with the full consciousness that everyone is responsible for what happened yesterday. They should continue with the full understanding by spectators and participants alike and the world over that a price was paid for ignoring past terrorist actions.

They should continue if only to allow the world not to divorce itself from yesterday's massacre and not to divorce itself from the Olympic games with glib excuses about outside agitators and a few fanatic lunatics.

The entire world bears responsibility for the killings yesterday. How did these terrorists get Russian Kalashnikov automatic rifles? Who paid for them? Who filled the orders? Who allowed them to train? Where did these terrorists train? What country permitted them to organize? What country in the Middle East permitted them and gave them the incentive to continue world terrorist acts? Who distributed yesterday's statement in Cairo to the press extolling these feats of butchery? Why on the very same day did the Soviet Union in Egypt reject a strong United States and Canadian antihijacking and antiterrorist proposal?

Yesterday's massacre was not just the insane act of one small group. It was permitted and even encouraged by a calloused world, determined to ignore that which does not hit them over the head or poke them in the eyes.

The House of Representatives here must take the leadership until this terrorism stops. All civilized nations should make a common cause in denying these terrorists and assassins the aid and comfort of a place to flee, hide, and conceal themselves. Civilized man must deny them the sanctuary required to plot their outrages. The rabid dog and the killer shark have no place among ordinary people and the family of man must now in unison and unanimously agree in compact on this common cause that terrorists of all cloth be denied a haven and brought to justice.

I ask that international terrorism be ended. I ask that we salvage the 20th Olympiad with just such an agreement, signed by all of the participating nations of the world, that no nation may harbor such criminals or encourage such criminal terrorism; and if they do, then the nations of the world should enter into an agreement to boycott these countries, stop trading with these countries, because these countries do not have civilized concern for the people of the world.

Mr. WOLFF. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I am glad to yield.

Mr. WOLFF. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I rise in support of the resolution.

Mr. Speaker, I rise with heavy heart. The outrageous crime against the community of mankind perpetrated yesterday in Munich by Arab terrorists will be remembered forever for the consummate evil it represents.

The world is shaken by this wanton act of violence and nothing can ever be quite the same again. It clearly demonstrates the fanatical nature of the Black September movement and the madness of its followers. It shows again for all the world to see just how utterly irresponsible the leaders of the Arab nations are. Only King Hussein of Jordan raised his voice against those who brought on this crime. The rest were as silent as the sphinx. Yesterday, I took the floor to ask Arab leaders to act.

President Sadat of Egypt had an opportunity to come to the assistance of those held hostage, but he did not. He was asked to do so by Chancellor Brandt of West Germany, but he obviously could not be bothered by something so unimportant as the lives of 11 Jews. He must stand condemned before the world for his arrogant and blatant refusal to act. Too, Syria's response, hailing the terrorists' murders reaches a new low in savagery. Terror like this cannot be permitted to rule our society.

I am afraid, Mr. Speaker, that we have not seen the end of this yet—consequences are yet to come to the Arab world. We must hope that it too does not fall on the innocent.

Mr. Speaker, I urge the passage of this resolution.

Mr. HOSMER. Mr. Speaker, will the gentleman from New York yield?

Mr. WOLFF. I am glad to yield.

Mr. HOSMER. Mr. Speaker, I rise in strong support of the resolution (H. Res. 1106) to express my strong despair and repugnance to the violent events which occurred in the Olympics and to urge the unanimous passage of the resolution.

Mrs. GRASSO. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentlewoman from Connecticut.

Mrs. GRASSO. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I join in support of this resolution.

Mr. Speaker, in the Munich massacre, we mourn once again the persecution of the Jews.

The Olympic games, designed for the demonstration of peace and good will among nations, became the setting for the wanton and brutal slaughter of young Israeli athletes by Palestinian assassins.

The world was witness to the long night of terror and the bloody drama that left in its wake the lifeless bodies of men of good will who, in good faith, had journeyed from a proud homeland to join their peers in the traditional Olympic games. Many questions about the adequacy of security and the tactics for rescue remain unanswered.

As the Jewish world begins observance of a new year, a bitter truth is once again brought home. The terror of the night, as much as the arrows of the day, represent an ever present threat to the preservation of the Jewish homeland.

In this sad time, the tears of the world are joined in the grief of family and friends of these tragic victims.

Mr. EDMONDSON. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Oklahoma (Mr. EDMONDSON).

Mr. EDMONDSON. Mr. Speaker, I thank the distinguished dean of the House for yielding to me on this resolution, and I strongly support its passage.

I should like to be associated with the remarks made by the able gentleman from New York (Mr. CELLER), the eloquent remarks of our colleague (Mr. PODELL), and the strong statement which was issued yesterday by our distinguished Speaker of the House.

All Americans, I am sure, are appalled by this terrible act of violence which has cast such a terrible shadow over a great international event. All Americans, I am sure, will join me in the hope that our Government will do all in its power within the United Nations to secure effective international action to put an end to acts of violence and terror of this kind.

Mr. SIKES. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Florida (Mr. SIKES).

Mr. SIKES. Mr. Speaker, there is no way the Congress of the United States or the American people can adequately express our sympathy and concern for the events at the Olympic games. I have introduced a resolution of sympathy for those who died, for their families and friends, and for their nation. But more is needed than an expression of sympathy. We should do more than say we are sorry for what happened in Munich.

America and the world must move to end this kind of terrorism once and for all. I believe we can bring an end to acts of violence such as the tragic event which has horrified the world, and bring an end to incidents such as skyjackings and bombings.

The way to end these acts, Mr. Speaker, is to give the international criminals no place to hide, no country to run to, no haven from prosecution.

This is not too much to ask. It has been needed far too long. From the ashes of the Olympic tragedy, we can build a true monument to those who died—an international agreement among all responsible nations that those who engage in tactics of desperation such as this will not be welcome on the shores of any nation. Only when terrorists of any nation, whether they be Arab or American, learn that they have no place to hide or to scheme will there be an end to acts of insane violence.

People committed these murders, not nations. The Arab countries are no more to blame for the deaths of the Israeli athletes than Americans are to blame when terrorists from our shores hijack an airliner and flee to a more friendly shore.

Let us place barriers around the boundaries of every nation at the earliest possible moment. Let us begin at once, through international agreement or through the United Nations, to reach firm agreement with all other nations and let it be known that international criminals will be hunted down and punished.

Only in this way can world nations fully express their concern and assure the peoples of the world that an end to these tragic incidents is in prospect.

Mr. MONAGAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Connecticut (Mr. MONAGAN).

Mr. MONAGAN. I thank the gentleman for yielding.

Mr. Speaker. I wholeheartedly support the resolution by the distinguished gentleman of New York (Mr. CELLER) which I have been proud to cosponsor, and hope that it will receive the unanimous approval of the House.

One can only express horror and regret at the irrational slaughter of the Israeli Olympians in Munich. As with those who seek to gain results by violence elsewhere in the world the purpose here was to terrify people into action. As is so often the case, the result in this instance will be the opposite of that sought by the killers. Their purpose, if any, was to advance Arab supremacy but the result will be to sharpen the differences between the adversaries and make meaningful Arab progress more difficult.

It is tragic that this senseless act should have come at a time when Arabs and Jews of good will appeared finally to be moving toward some Middle East settlement. Perhaps it was this that the terrorists sought to prevent.

The games will go on as I am sure the fallen would have wished but the sympathy of the world goes to these gallant athletes' families and the nation of Israel.

Mr. SCHEUER. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Speaker, I should like to congratulate the leadership of the House and the distinguished dean of the New York delegation for sponsoring this legislation. I believe all of my colleagues who have preceded me have spoken meaningfully and from the depths of their hearts.

We must make absolutely sure that this matter does not end with platitudinous expressions of regret. We have had too much of this recently.

Last May, after three Japanese terrorists, acting on behalf of the Popular Front for the Liberation of Palestine, massacred 28 persons at Lod Airport, expressions of shock and dismay from all over the world poured into Jerusalem.

Last November the world was again shocked by the assassination of a Premier of one country in the capital of another and, once again, worldwide condolances poured into Amman.

Similar expressions of concern were voiced after numerous airplane hijackings, the attempt on the life of a former Jordanian Ambassador in London, the sabotaging of a West German factory, and the destruction of an oil complex in Italy.

Mr. Speaker, I could go on and on, but the point is embarrassingly self-evident.

The time has come for the international community to condemn these people for what they are—insane madmen—and to declare them and the countries which give them sanctuary international outcasts.

Admittedly, the prospects for such effective international action do not appear to be good. For example, Munich came virtually on the heels of a rejection of an international treaty on hijacking. At the very time men were being senselessly slaughtered in Munich our friends and allies, France and Britain, joined by the Soviet Union, were leading an effort to reject a treaty designed to deal precisely with just this international crime.

The incident in Munich is now tragic history; at the very least, it should shame these countries—our allies and pillars of Western civilization—to take strong and effective action not only against hijacking but also—and most especially—against those countries which harbor and nurture and give sanctuary to these guerrilla groups responsible for these outrageous acts of terrorism.

One step toward effective international action of the type which is urgently required would be to strengthen Interpol's ability to keep track of the international movements of known terrorists and to inform various countries of the presence of these individuals within their jurisdiction.

To me, it is a tragedy that Interpol, the only international police agency with the potential for this type of program, has a budget of less than $1 million per year—less than the police budget of Fargo, N. Dak. Surely the United States and the other member countries can do much better than this.

Mr. Speaker, the time for talk has long since past. The incident in Munich is an affront not only to the spirit of the Olympics, but to the very essence of human decency. Strong, effective international action must be taken now.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Ohio (Mr. KEATING).

Mr. KEATING. Mr. Speaker, I know I join all Americans in expressing my deep sympathy to the families and friends of the Israeli Olympic athletes who were senselessly slain in Munich yesterday.

Since the time of the ancient Greeks, the Olympic games have represented man competing against man in peace. Even during the Greek wars, athletes going to the Olympics were free to pass the enemy lines to participate. Yesterday, this was not the case.

In today's world seldom a day goes by without murder and death on the front page of our papers. Yet, this tragedy seems to go beyond the normal news events that horrify the public. Through television we became witnesses to the Olympics. We had grown to admire the accomplishments of these athletes, whether black or white, from a free or Communist country, whether Christian, Jew, Buddhist, or Moslem.

We admire them for their skill. And as they swam and fought and ran to new records it seemed that these young people were capable of truly great things. Now we mourn the death of 11 of their numbers.

And if the tragedy of spoiling the ageless spirit of the Olympics was not enough, the tragedy of the day was made even greater by the fact that once again "a knock on the door" took the lives of Jews in Germany. This tremendous, joyful event which was to mark the new Germany made us have memories of the old.

It must be said that under impossible circumstances the German Government did their best. We in the United States have learned that it is impossible to deal on rational terms with these extremist groups. The nations of the world should join together in making sure that no nation is a home for these international outlaws.

As with other tragedies that have occurred, we must go on. Hopefully, we can learn from the past.

This Friday at sunset will be Rosh Hashanah, the Jewish New Year. This Rosh Hashanah marks year 5736 on the Jewish calendar. Let us pray that this year will bring peace to the land of Israel and that the tragic events of the XX Olympiad will never occur again.

Mr. MADDEN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Indiana (Mr. MADDEN).

Mr. MADDEN. Mr. Speaker, I join in supporting and endorsing this highly necessary resolution presented by the Speaker, the majority and minority leaders in condemning the unlawful and murderous actions of the Palestinian terrorists at Munich. These Arab murderers must be apprehended and convicted of the international crimes which they inflicted on the Israeli athletes in cold blood, displaying a vengeance against people that could only be carried out with help outside of their small criminal band of terrorists.

The Congress of the United States, the people of America, and the world are startled that such a dastardly crime could be successfully executed by a small band of criminals on innocent citizens of a neighboring nation. It is indeed terrible that a crime involving bloodshed and murder could interrupt such a world-renowned event as the Olympic contests. All Europe and nations of the world will hold the Arabian people in contempt if these guilty criminals are not brought to justice. Any nation giving these criminals sanctuary without incarcerating them until they have answered for the unspeakable crimes which they committed against innocent representatives of their neighbors participating in the world-renowned athletic event should be condemned by all peace-loving and law-abiding people of the world.

The Congress, by this resolution, has gone on record speaking for all citizens of the United States in condemnation of the Munich murders and are demanding that the guilty parties be brought before the bars of justice and suffer a just penalty for their crimes.

STATEMENT OF MAYOR RICHARD GORDON HATCHER, OF GARY, IND., ON THE MUNICH CRIMES

Mr. Speaker, Mayor Richard Gordon Hatcher of Gary, Ind., has today ordered the flags throughout the city to be flown at half-mast in commemoration of the memory of the athletes from Israel who were the unfortunate victims of the Arab terrorists at Munich.

I include with my remarks the statement of Mayor Hatcher which he released today in condemning this dreadful international crime. Mayor Hatcher's statement follows:

> This barbaric killing of members of the Israeli Olympic team is a crime against humanity which cries out for compassion for the victims, their families and countrymen and a full indignation of each of us against the perpetrators. I join my fellow Americans and fellow citizens of the world in condemning these brutal and senseless acts.
>
> We must reaffirm our commitment that violence and terrorism are unacceptable substitutes for reason and order and apply whatever appropriate sanctions exist against terrorists and any who aid and abet them.
>
> We extend to Prime Minister Golda Meir and all Israelis our genuine sympathy and our assurance that neither they nor anyone must stand alone against this sort of act.
>
> I have ordered the American Flag at City Hall lowered to half-staff as a token of our concern and urge all my fellow citizens of Gary to join me in that jesture. We call upon the leaders of the world and support the forces of peace to find a lasting solution to the problem of the Middle-East—but we must never seek justification for acts of terrorism.

Mr. CELLER. Mr. Speaker, I yield such time as he may use to the gentleman from New York (Mr. KOCH).

Mr. HUNT. Mr. Speaker, will the gentleman yield to me?

Mr. KOCH. I yield to the gentleman.

Mr. HUNT. Mr. Speaker, I take this opportunity to associate myself with this resolution and rise in full support of it.

It would appear, as one of the gentlemen who spoke prior to me, my colleague from New York, said, the acts of barbarism must be eliminated, but knowing what they are and when they are to be committed is impossible.

The bad feature of this situation today is that we have so many people who have such a low regard for human life. Back in Biblical days we had Cain and Abel, and there has been no change since then. The tragedy of our society is we have no way of ferreting out these people who have such warped and depraved minds that they desire to commit atrocities such as this one in Munich against the Israeli athletes.

I think it is high time that we spent more money on this matter and that the Secretary of State should be contacted and have this matter brought to his attention. We should put more money into the Interpol situation.

I am a former member of a law enforcement group. I am a firm believer that we should know more about these terrorist groups than we do. If we look back to World War I, to Anton Pavolik with his Ustachi from Yugoslavia and Albania and the Montenegros, we see precedents for groups such as this group forming the Black September group, who take credit for this atrocity. It is about time civilization and civilized nations brand them once and for all and in doing so make sure that the law carries a penalty commensurate with the crime in which they have become involved. Capital punishment must be the prospective penalty.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. KOCH. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. Mr. Speaker, I appreciate the gentleman yielding to me.

I know how much he is involved with this problem.

I seek this time because as a member of the Committee on Foreign Affairs of this House, under the leadership of the great Sol Bloom, of New York, in 1945 I introduced into the House what became known as the Israel resolution calling for the House and the Congress to declare in that area a free and sovereign state to be known as the nation of Israel. Even in those days there was nothing of this sort between the opposing parties, so that today, so many years later, to know of this fantastic outrage is just as appalling now as it would have been then.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. KOCH. I am glad to yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, I rise in support of the resolution. The savage and senseless murder of 11 members of the Israeli Olympic team has shocked the people of the entire world. The slaughter by Arab terrorists serves as a reminder of the historic plight of the Jewish people—and of the vulnerability of all people to such acts of insane barbarism.

It is particularly sickening that this would happen at the Olympics, where the rival forces of the world are expected to put aside their differences to join in open, healthy athletic competition.

The tragedy is further heightened by the fact that the mass murder occurred in Munich, Germany, where a generation ago the Jewish people were the victims of terrorism and planned extermination to a degree unparalleled in the history of the world.

The Arab terrorists have hurt their cause with this latest act of savagery; they stand condemned today in the eyes of the entire civilized world.

Our hearts and prayers go out to the families of the 11 Israeli martyrs. Yet, while the families' suffering is most direct, the murder of the young athletes is ultimately a loss for all mankind.

Mr. KOCH. Mr. Speaker, first of all, I would like to thank the majority leader (Mr. Boggs), the chairman of the Committee on the Judiciary (Mr. Celler) who is my mentor and dear friend, and our colleague Sidney Yates for having brought this resolution so quickly to the floor of the House at this moment when the agony is with us.

The Jewish people throughout the ages have had more than their share of martyrs. I will not recount them. It is not necessary.

The 11 young Israeli murdered in Munich are now martyrs. They were struck down by a combination of events beyond their control. Their deaths will never be forgotten. They will be revered by generations to come for their courage as are the martyrs of the Massada who left such an indelible imprint on Jewish tradition and history. The "Olympic Eleven" murdered as they were will symbolize for Jews and non-Jews, for all time to come, the triumph of innocence over savagery. They are never to be forgotten and always to be revered, while their murderers, like Cain, are forever to be reviled.

But what is so terribly important to mark is that this was not an isolated incident. The fact that these terrorists could come to Munich and engage in this slaughter arises because the world has stood by uttering only pious words when comparable incidents have occurred.

When the 28 innocent civilians were struck down at Lod Airport, it was the French, who permitted the thugs to board the plane with machineguns on a French plane going to Israel, and then said they bore no responsibility for the massacre. And yesterday, for those who watched this unbelievable scene taking place before their eyes, it was even more unbelievable to learn that Egyptian officials at the highest level declined to give the German Government any assurances that if the 11 hostages and Arab terrorists were permitted to leave for Egypt, the hostages would be returned immediately.

There have been too many occasions when nations in the U.N. Security Council or the General Assembly have exonerated and sometimes even lauded attacks by terrorists coming from Lebanon and Syria on the people of Israel—and gone on to censure Israel, the victim who only asked for simple justice.

When nations and international forums do this, they provide the climate for murder and barbarism. And we ought not be surprised when these acts follow. The latest illustration of a failure to act is noted in today's New York Times reporting that the Soviet Union, Great Britain, France, and Egypt refused to support an antihijacking treaty offered by the United States providing that joint international sanctions be taken against any country not punishing or extraditing hijackers, or not releasing planes, crewmen, and passengers. I say those countries bear responsibility for what happened yesterday.

In his infinite wisdom, God will succor the innocent and punish the guilty.

Mr. BOLAND. Will the gentleman yield?

Mr. KOCH. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Speaker, I commend my colleague, Congressman Koch, for his forceful and sensible statement on the Munich tragedy. It is shocking that the spirit of brotherhood and friendship characteristic of the Olympic gathering should be shattered by the senseless assault by Arab terrorists. This is a tragic affront to men of goodwill everywhere.

I join with my colleagues in condemning these incredible acts of barbarism and extending our deepest sympathy to the families of the victims of the Arab fanatics.

The outrage is heightened by the fact that the terrorists chose the Olympic games as the setting for their criminal conduct. That an event designed to promote peace and understanding among nations should be so challenged is a threat to the international community. I call on all nations of the civilized world to seek the means of ostracizing any person or nation giving sanction, support or sympathy to the perpetrators of such heinous acts.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from Missouri (Mr. Symington).

Mr. SYMINGTON. Mr. Speaker, I rise in support of the resolution.

What was noble was gathered there: The graceful, the gifted, the disciplined, the self-denying who had each climbed the steep and rocky slope to the summit of human excellency, where they stood serene above the clouds, deeply breathing the pure air of achievement.

Children of Israel, whom we mourn, were among them. Poets of movement, they stood still, hand in hand, above the clamor of nations and the sulfur of war.

What could bring them down, these angels of our best nature, and with them our hearts and our hopes? Nothing. They are there yet, radiating a more eternal flame than ever a man made or torch bearer carried across continents and seas, history, memory, and time.

What of those who did the deed? Perhaps in some charnel retreat evil with its darkest smile conveys awards no man covets and nature itself reviles.

Was it a victory for evil? Let that question be judged when civilization has buried its honored dead, and then truly honored them by adopting the measures embraced in this resolution.

The gentleman from New York, my friend, Mr. Koch, is correct when he describes these fallen heroes as martyrs. They died surely for peace, but their sacrifice would stand as a reproach upon every Member of this Chamber unless and until we pass this resolution.

Mr. CELLER. Mr. Speaker, I yield such time as he may consume to the gentleman from West Virginia (Mr. Staggers).

Mr. CLANCY. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Ohio.

Mr. CLANCY. Mr. Speaker, I rise in support of this resolution.

Mr. CLANCY. Mr. Speaker, people of all nations deplore the horrible tragedy yesterday at the 20th Olympiad in Munich. I was shocked, as I am sure were all my colleagues here and decent, civilized men and women around the world. It was a dastardly, bestial act.

A small band of fanatic terrorists was unreasoning. They seized the world, its attention centered on the Olympics, in an insane grip. There is no way to compromise with such fanatics as these. One can not help but wonder about the abandonment of the death penalty when unpredictable killers like these are loose. Will the unknown murderers in the world today be discouraged if the murderous guerillas who were captured yesterday are simply punished by a few years in prison?

This year's Olympics had displayed the best that was in mankind and most nations' athletes had won a share of the glory. Men and women from countries of opposite philosophies had met in the arenas. They had competed according to the rules and the losers had graciously congratulated the winners.

Then, from out of the darkness burst a small band of guerrillas intent, really, on only one thing—to publicize to the world their hatred for another people. You know the story; how they crashed into the quarters of the Israeli athletes, how they held them hostage and, finally, how 11 Israelis were slaughtered and a policeman and four guerrillas were dead from their senseless, radical and criminal act.

We join with all people in mourning the loss of Israel's finest and we extend our deep sympathy to the people of that gallant country, especially to the families of those who lost their lives. I sincerely hope that the adoption of this resolution will contribute in some way to the elimination of dastardly acts like we witnessed in Munich yesterday.

We can never condone what occurred there and it is our fervent hope that civilized peoples everywhere unite in such a way that we will never again witness such an act.

Mr. MORGAN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Pennsylvania.

Mr. MORGAN. Mr. Speaker, I strongly support this resolution. I believe that the Congress should express immediately and forcefully its condemnation of those who planned, participated in, or condoned the murders which occurred yesterday at Munich, its sympathy with the families and friends of those whose lives were lost, and its determination to join with other nations in taking such action as may be possible and appropriate to prevent further acts of brutality against the innocent.

I am confident that all Americans, regardless of how they stand on any issue, are horrified by what happened in Munich. All sane and rational people realize that such an act must inevitably bring harm to the cause which it purports to advance.

I feel confident that most of the people of the Arab States do not advocate the murder of innocent people as a means of attaining their objectives.

We must recognize, however, that there are terrorist organizations within the Arab countries and that some Arab governments condone and even support their activities.

The U.S. Congress should make clear to such organizations and such governments where we stand and that we are determined to stamp out terrorism.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Mr. Speaker, I rise in strong support of this resolution.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Ohio.

Mr. HAYS. Mr. Speaker, I rise in support of this resolution.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, the tragic episode in Munich yesterday defies all that is logical and humane. Our expressions of outrage and shock ring hollow when compared to the monstrous act they attempt to describe.

This act of terror by the Arab guerrillas must be condemned by all peoples of all countries of the world. Not just Israel has suffered by this wanton killing of 11 of its finest countrymen. Mankind has suffered as barbarism again is loose in our so-called civilized world.

I heartily support this resolution condemning the Munich killings and I most enthusiastically support the call that no country grant safe haven to any of these terrorists who may still be running loose.

The tragedy of Munich has many faces. First, naturally, we grieve for the innocent victims who had dedicated so much of their lives to peaceful competition through international sport. Next, we grieve that what seemed to be small but steady progress toward some sort of solution to the Middle East problem might have been lost in the gunfire and death at Munich.

And we also grieve that such a noble endeavor as the international Olympic games should be the scene of such a bloody deed. In a world too often wracked by killing, the Olympic games existed as a fresh wind of hope which swept the world every 4 years. It is the grand example of international accord and brotherhood.

In our revulsion today over the acts of the terrorists, we must realize that the Olympic games was only an unwitting victim. The future of these great contests must not be jeopardized by the insane actions of a group of terrorists. I am confident they won't be, and that the spirit and the fact of the Olympics will survive this outrageous act.

Mr. Speaker, I urge this body give unanimous approval to this resolution today.

Mr. FRELINGHUYSEN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from New Jersey.

Mr. FRELINGHUYSEN. Mr. Speaker, I rise in support of the resolution.

Mr. Speaker, I rise in support of this resolution. I wish to add my voice to the growing international chorus expressing shock, anger, and horror at the events that occurred in Munich yesterday. These self-styled Palestinian commandos are no better than international murderers. Two years ago King Hussein of Jordan was severely criticized in certain quarters for his handling of the commando problem in his country. In the light of brutal acts such as those perpetrated yesterday we can understand how dangerous these Palestinian outlaws are, and what the result would have been had they been successful in seizing control of an entire nation such as Jordan.

Yet it is not enough to condemn this wanton killing. The recent wave of international banditry that has climaxed in the brutal deaths of 11 innocent Israeli athletes points up to need for firm international action to contain and control these outlaws. Steps must be taken to make certain that this kind of terrible deed can never happen again.

Mr. STAGGERS. Mr. Speaker, I want to thank the distinguished gentleman from New York for yielding to me. I further want to congratulate the distinguished leaders of this House, the Speaker, the majority leader, as well as our colleagues on the other side of the aisle, for setting aside the business of this body for a short time in order to voice our horror and grief over the tragedy at Munich. An appalling outburst of malice and venom has invaded the peaceful field of international sports where some of our best and most friendly young men and women were trying to build understanding and good will. The whole world stands in stunned unbelief. Our deepest sympathy goes out to all involved, the families of the slain contestants, the nations which joined in the festival of peace, the public officials who tried desperately to promote harmony and friendliness. It is a tragedy which should unite us all in a determination to overcome the evil in our hearts which has produced so much violence through the recent years. I know not what steps justice may suggest in the case, but I do pray that whatever is done may allay passions worldwide, and not stir them to further vengeance. May what is best in our natures rise to supplant the fiendish which lurks so close to the surface.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Alabama.

Mr. BUCHANAN. Mr. Speaker, I would like to associate myself with the remarks of the distinguished chairman of the House Interstate and Foreign Commerce Committee, Mr. STAGGERS.

The senseless slaying of the Israel delegation is a tragedy of many dimensions.

It is a personal tragedy to those who died and to their families. They have my deepest sympathy and my prayers.

It is a tragedy for the young State of Israel, which has had to struggle merely to survive in an often hostile environment, to lose these outstanding young people who were competing in an atmosphere of peace and harmony.

We can also share the sense of tragedy felt by the people of the Federal Republic of Germany who hosted the games and whose nation was invaded for the purpose of committing terror and disrupting everything for which the Olympic games stand and toward which West Germany had worked.

And it is a tragedy to the world that a group of young people participating in the Olympics in the spirit of international unity and who would perhaps have been leaders of Israel efforts toward peace in the future, died with their lives yet before them.

It is a grim and tragic fact that just as the courage and excellence which they displayed are a part of the reality of our times, so as well is the kind of brutality and inhumanity represented by the terrorists.

This is why it is so difficult to achieve instant peace or early solutions to the world's problems.

It does, however, seem a crime against life and history that in this era when there is so much basis for hope for peace, justice, and humanity among men, the violent acts of irrational individuals and terrorist groups have so marred the record of our times.

The Olympic games and the atmosphere in which they are held are a part of that hope for humanity, but they have been shattered by a group whose goals were not peace and unity but destruction and hate.

It is for us, the living, to pursue the goal of peace and justice for all the peoples of the world to insure that that minority which represents those who would inflict terror and spread hate will not prevail.

Mr. MAYNE. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Iowa.

Mr. MAYNE. Mr. Speaker, I rise in support of this resolution.

Mr. MAYNE. Mr. Speaker, I rise in support of the resolution, House Resolution 1006. At sunset this Friday, September 8, the Jewish festival marking the beginning of Hebrew year 5732—Rosh Hashana—will be held. I am sure there will be little festivity this Rosh Hashana in the homes of my Jewish friends, as they think of the many Israeli homes grieving from the loss of loved ones, the 11 young Israeli athletes whose lives were snuffed out in their very prime by senseless terrorism.

Surely all civilized peoples, whatever their race or creed, whether Jews, Christians, Hindu, Muslim, or Marxist-atheist, were shocked by the barbaric and dastardly abduction and murder of these young men. No cause, no rationale can excuse or justify this unprovoked terrorism against innocent parties whose only "crime" was their rightful pride in representing their nation in international athletic competition. The acts of these assassins were completely inimical to the interests and aspirations of the civilized world. Any individuals, groups, peoples or nations encouraging such terrorism or giving asylum, solace, and comfort to its perpetrators earn the contempt of all civilized mankind, and should be considered as pariahs, undeserving of any further contact with the civilized world.

Great progress had been made toward establishing just and lasting peace in the Middle East. We must not allow the terrorists to thwart these efforts, divide those seeking peace and exacerbate frictions, possibly escalating reciprocal acts of vengeance and reprisal into all-out conflict—for that was the very purpose of their acts of terrorism. The death of the athletes should instead spur on the efforts to stop the useless bloodletting and seek lasting peace in the area, and to cooperate internationally in preventing any further such tragedies in the future. I am sure the slain athletes, proud of their prowess and abilities, were keenly aware of the importance of the Olympics and would have strongly opposed any suggestion that the Olympics be terminated. The Olympics have over the years helped to build bridges between the nations, bringing their finest young men and women together to share a common love of sports, pride in self- and team-accomplishment, and spirit of competition and fair play. The Olympic Games have tended generally to break down the artificial barriers between peoples, to build understanding and to strengthen recognition of the international community of interests, best furthered by international cooperation. The continuation of the Olympiad, and of the Olympics in the future, is a fitting memorial to these Israeli athletes—if the Olympic torch is dropped and allowed to go out, they may indeed have died in vain.

I join with all my colleagues and the world in mourning the loss of the Israel athletes and in extending our deepest sympathy to their loved ones and to the people of Israel. I urge the adoption of the resolution proposed by our distinguished colleague from New York (Mr. CELLER), and further urge its implementation by the Secretary of State and President Nixon.

Mr. EILBERG. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Pennsylvania.

Mr. EILBERG. Mr. Speaker, I would like to associate myself with the remarks of the gentleman in the well.

Mr. EILBERG. Mr. Speaker, the murder of 11 members of the Israeli Olympic team is a barbaric crime not only against the people of Israel, but against all of the civilized peoples of the world.

The barbarians who committed this act are nothing more than common criminals and to dignify them with any title or label which indicates that they were anything more than murderers would be a grave mistake. They came with only one intention—to kill.

The United States must join with Israel and the other civilized nations in mourning the loss of these fine young athletes and their coaches.

This senseless act has brought us closer to the brink of a society where violence and death are the only means of settling arguments or disputes. We can only hope that it does not lead to further acts of violence and terrorism.

The people of the United States and our Government must do everything it can to make sure that nothing like this ever happens again. Everyone involved in this brutal murder must be caught and punished and we should support any means necessary to bring this about.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, I too desire to associate myself with the remarks of the gentleman in the well in support of this resolution.

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman from West Virginia for yielding.

I want to associate myself with his remarks concerning the recent tragic events at the Olympics in Munich, Germany.

Let me also take this opportunity to express my support for the resolution offered by the gentleman from New York (Mr. CELLER), condemning the killings of the Israeli Olympic team members by Arab terrorists and sending the condolences of this body to the families of the victims.

Mr. Speaker, many of us have spent considerable time in the past few days watching the Olympics games on television. They have provided an example of superlative athletic competition carried on among young men and women representing many nations.

A spirit of comradeship and understanding has prevailed among the participants despite political antagonisms which may exist among their home countries. The Olympic games had given us an idea of what a world based on peaceful competition—rather than violence and warfare—could be like.

That vision has been marred, perhaps indelibly, by the wanton actions of a few extremists. Their barbarisms must be condemned by all peoples everywhere.

It is my hope that this event does not engender further violent acts of retribution. Threats of reciprocal violence against Arab diplomats which have been made by groups such as the Jewish Defense League must not be carried out and every effort made to prevent them. Any such acts would only compound the villainy which already has been perpetrated and sully the heroism of the Israeli victims.

Let us also pray that the Israeli Government practice restraint in its reaction to these tragic killings. Exacting retribution against Lebanon or its other Arab neighbors will not restore the dead to life, but only perpetuate the cycle of violence which so long has plagued the Middle East.

In our expressions of sorrow, and condolence, let us not forget the people of Germany. Two of its sons—a policeman and a helicopter pilot—were killed during the crisis and our sympathy must also go to their families.

The fact that Israelis, Germans, and Arabs died in this clash at the Olympics points up the international character of tragedy. The solution lies not in the retribution of one nation against another but in action through an international forum such as the United Nations. It is my hope that the U.N. will take up the problem of terrorism in its next session and deal with it effectively.

Our own Nation should take the lead in this effort. Terrorism has no place in a civilized world; it must be eliminated.

Our task will not, however, be an easy one. We have seen this week how difficult it can be to achieve agreement among nations on the related issue of airplane hijacking. Nevertheless, we must persevere toward the day when innocent persons need no longer fear for their lives because of the unreasoning hatred, of extremist madmen.

Mr. BIAGGI. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding, and I would like to associate myself with the remarks of the gentleman in the well in support of this resolution. Mr. Speaker, I rise in support of the resolution just offered out of a feeling of great personal sadness that such a heinous crime could take place and out of a feeling of anger that steps have not been taken before this to end the atmosphere of war and killing that has led to this catastrophe.

Numerous times I have stood here in this Chamber calling for action by the President, by the United Nations and by other free world countries to work for peace in the Middle East and in other parts of the world. Yet the killing continues and it is sanctioned by those nations which unscrupulously support anarchists bent on the destruction of their fellowman.

Whenever a nation gives sanctuary to a murderer or a terrorist, a hijacker, or a kidnapper, a drug dealer or extortionist, that nation is encouraging further criminal acts. In recent months we have seen an escalation of violence against innocent parties. Hijackings of jet aircraft have reached record proportions this year. Bombings and terrorists acts have escalated. Now we have witnessed the worst; the Olympics—once sacred for its neutrality—has been converted into a battleground by this political act of aggression.

Those of Jewish faith throughout the world have run the gamut of emotions in the last few days. The successes of Mark Spitz, the young American of Jewish faith who won the unprecedented seven gold medals and set seven world records, has lifted their emotions to the heights. Now this holocaust in the Olympic village has plunged them into the depths of despair.

Certainly no blame can be placed on the people of Germany who in extending themselves to everyone at the Olympics have shown themselves to be the best of host nations. And certainly the actions of Chancellor Willy Brandt in taking personal charge are to be commended.

In the words of the resolution, I extend my deepest sympathy to the people of Israel and to the families of those so tragically lost. Moreover, I pledge my own personal resolve to carry out the final clause of the resolution: to cut off from contact with civilized mankind any peoples or any nation giving support to acts of murder and barbarism. Those who perpetrate such acts are little more than animals or barbarians. And those who sanction such acts deserve even less acknowledgement.

I further urge upon this body to continue its strong support for the state of Israel and for peace in the Middle East and the rest of the world. Let us bring about a lasting peace through the strength of nations—not through the terrorist acts of a few.

Mr. CAREY of New York. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from New York.

Mr. CAREY of New York. Mr. Speaker, I thank the gentleman from West Virginia for yielding to me, and I also wish to identify myself with the remarks of the gentleman in the well.

Mr. Speaker, I rise in support of the Joint Resolution of sorrow and condemnation of the violence at the Olympic games in Munich, Germany.

Mr. Speaker, it is now time for all nations—countries of the free world, the Soviet Union, the People's Republic of China, and developing countries—to join in condemning the outrageous violence perpetrated by the Arab terrorists against the Israeli athletes. At the very least, the International Olympic Committee and the German Government must combine to provide an indemnification to the families of those who were the innocent victims of terrorism.

The brutral horror of 1936 is brought back to us in 1972. The very laudable objective of using Munich as an Olympic site has become a bloody and horrifying contradiction.

At every level—the Presidential, the diplomatic, and, most certainly, in the United Nations—the harboring of terrorist groups must be condemned with sanctions that have meaning and impact. Strict sanctions must be adopted against those countries which continue to arm these madmen and offer them refuge.

Similar criminal acts have been perpetrated against airline passengers, innocent travelers on road and rail, tourists, and leaders of nations seeking peaceful means to solve international problems.

Senseless violence must stop, and our Nation must take the lead in insuring an end to terrorism.

The 11 Israeli martyrs gave their lives for all of us and now it is our duty to give our total support to ending terrorism, especially against the innocents of Israel.

Mr. ANDERSON of California. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from California.

Mr. ANDERSON of California. Mr. Speaker, I thank the gentleman for yielding me this time, and I also rise in strong support of this resolution.

Mr. Speaker, I sadly rise in support of House Resolution 1106, a resolution expressing sorrow for the Israeli Olympic team and condemning the cowardly act of terrorism in Munich.

To me, the Olympic games have represented the ideal of a community of nations coming together in a peaceful pursuit of international competition and understanding. The Olympics have been a dream of a future world where nations could live together in harmony without the threat of violence.

Today, that dream has been shattered.

The Nation of Israel has also represented a dream—a dream of a haven for the Jewish people to come together in forming a nation free from the fear of persecution, violence and hatred.

Today, that dream remains strong, yet saddened by the tragic loss of 11 of their sons.

Innocent blood has once again been spilled reminding us that we must remain on constant guard against the vain and dastardly acts of international degenerates who would wipe the Israeli Nation from the face of the earth.

Those who planned, supported and participated in the senseless massacre at Lod Airport in Tel Aviv, followed by the barbaric murders at the Olympic village in Munich have earned the condemnation and the scorn of every American.

Those who would strike under the cover of darkness at innocent people, rather than stand and fight on equal terms, deserve the censure and condemnation of every person in every society.

Mr. Speaker, the political assassination of 11 Israeli Olympic athletes by a group of international animals was a crime against humanity and we, as a nation, must do everything within our power to eradicate this cancer which feeds upon violence.

Mr. Speaker, the other cheek has been turned once too often—now is the time to say never again.

Mr. KARTH. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Minnesota.

Mr. KARTH. Mr. Speaker, I wish to associate myself with the remarks made by the gentleman from West Virginia.

Mr. BENNETT. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Florida.

Mr. BENNETT. Mr. Speaker, I would like to associate myself with the remarks just made by the gentleman from West Virginia, Mr. STAGGERS.

Mr. Speaker, yesterday, the tragic crime at the Olympics was the most dastardly act of history. It makes one almost ashamed to be a human being that such a thing could have been done. When mankind desperately needs new and better bonds of brotherhood, and when the Olympics were giving us just that, this event, so contrary, makes one cry out in despair. May its horrow and depravity make us each determined that we in our daily lives shall persist to work ever harder for the brotherhood of man, so despicably wounded by this crime against mankind and its aspirations.

Mr. CELLER. Mr. Speaker, I yield to the gentlewoman from Massachusetts (Mrs. HICKS).

Mrs. HICKS of Massachusetts. Mr. Speaker, during this very sad period of mourning, I rise in protest to the barbaric acts committed in Munich, West Germany, which caused the death of Israeli athletes. The whole world is stunned and saddened by these senseless acts of lunacy. At a time when the world's greatest athletes gathered to participate in the Summer Olympics, these acts are even more shocking. The Olympic games represent man's oldest and noblest efforts to foster friendship, understanding, and reconciliation among the peoples of the world. This tragedy rightfully aroused anger at this act of violence perpetrated against a noble nation and the civilized world committed by those who betrayed the spirit of the Olympic games.

To the people of Israel, I extend my profound sorrow and express my sense of outrage at these callous attacks on our brothers from Israel.

Mr. CELLER. Mr. Speaker, I yield to

the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I rise in support of this resolution and associate myself with the remarks of the dean of the House of Representatives, the gentleman from New York (Mr. CELLER) and our other colleagues who have spoken in support of the resolution.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. Mr. Speaker, I thank the gentleman from New York for yielding.

Mr. Speaker, the entire world is shocked and outraged by the slaughter of the fine Israeli athletes by Arab terrorists.

September 5 shall always be remembered as a day of infamy and Black Tuesday in world history. I hope the United Nations will finally face up to their responsibilities and actively condemn and censure those persons and the nation causing this inexcusable and ferocious jungle-type conduct.

Those persons who always deplore capital punishment might have some second thoughts when dealing with these murderers. Can Israel accept the annihilation of 11 of their finest representatives by mere conviction and possible imprisonment of guilty terrorists who slaughter innocent people? I think not.

The eye for an eye philosophy may have a deterring effect on possible future conduct, and this situation cannot be permitted to slide by without positive, strong, firm action.

The President properly called Golda Meir immediately, and all nations offer their sympathy and concern to the survivors of the victims and to all the people of Israel.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from California (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. Speaker, I would like to join with my colleagues in support of this resolution.

It is certainly a low point in the world's quest for peace when terrorism, death, and politics are interjected into the Olympic games. Peace in the Middle East has not been furthered by this act. Certainly, all nation's must join together to prevent those terrorists from destroying the very delicate quest for a solution.

The loss of the Israel athletes is certainly a great tragedy.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, I thank the gentleman from New York (Mr. CELLER) for yielding.

Mr. Speaker, I join in expressing my gratitude to the leadership for bringing this resolution to a vote with such expedition, and I express also the sympathy of all my constituents for those whose lives were so senselessly lost, including those who attempted to protect them, the West German citizens.

Mr. Speaker, it occurs to me and it occurs to all of us quite often that hateful words are akin to hateful deeds. This is no time for hating anybody, but I was particularly distressed to read reports of remarks in the Egyptian press alleging the horrible acts that occurred in the last several hours were the consequence of a desperate people who were driven to these acts.

We have heard that same thing about rapists, murderers, and robbers in our own country and we reject that kind of logic out of hand.

I think that Kipling said it best when he said:

> They only said intimidate and talked and
> wend their way.
> By God the boys who did the work were
> better men than they.

The people who do the hateful talk in the world produce in lesser minds and lesser people the brutish, hateful acts.

So, whereas, this is not a time for hate perhaps it is a time to pause and place some responsibility—and maybe for me, and all the rest of us, to look into our own hearts and wonder if we have ever said a hateful thing that was not necessary and which should not have been said, if we can ever look forward to a time when we would resist such temptation. Particularly, I would make that appeal on the part of my country to the leaders of other countries, whether Egypt or elsewhere—to remember that somebody makes a hateful speech and at the other end human beings lie dead.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from New York (Mr. REID).

Mr. REID. Mr. Speaker, I thank the distinguished gentleman for yielding.

Mr. Speaker, I rise in strong support of the resolution before the House today and I join with all Members in extending our deepest sympathy to the families of those slain in Munich and in a broader sense to the entire family that is Israel.

We have witnessed an act of treachery against mankind at the 20th Olympiad, at an international occasion wherein each country sends its best ambassadors in an attempt to have peaceful competition. This terrible act is unparalleled and should redound across the world as an act against humanity.

Mr. Speaker, I believe three things here are required.

First, I believe it is unconscionable for the Olympics not to end its endeavors at this point. To continue the Olympics and not pay the deepest kind of respect to this tragic action would be a desecration.

Second, I think the United States in particular must show very strong leadership so that, once and for all, all nations who have given sanctuary and comfort, direct or indirect support to violence, to guerillas, and to those who would kill without mercy and without thought will know once and for all that this is something the United States will not tolerate and something the United States is determined to put an end to.

For too long there have been statements out of Cairo saying they could not take responsibility. Yet it is high time that nations take responsibility in the clearest sense and in the fullest meaning of that for actions perpetrated by people sheltered on their soil.

And in case anyone is in doubt on this question, it is very clear that the press release describing the attack by Black September was being distributed in Cairo almost simultaneously with the action itself. I think that speaks volumes.

Finally, aside from the United States taking the leadership to see if we cannot put an end—as we must put an end to hijacking—to this kind of violence, we must recognize that the statesmen of the world have failed to deal with the fundamental refugee question in the Near East. Until we do something to address ourselves to a lost generation and until certain Arab States recognize they must no longer use the refugee question as a political football, we are apt to continue to see repeated violence.

So I hope we will take a longer range view and work to resolve equitably the refugee question, while taking the strongest possible measures against any country that continues to give comfort and sanctuary to those who would wantonly destroy life.

Mr. DAVIS of South Carolina. Mr. Speaker, will the gentleman yield?

Mr. REID. I yield to the gentleman from South Carolina.

Mr. DAVIS of South Carolina. Mr. Speaker, I take this opportunity to associate myself with the remarks of the gentleman from New York. I believe the gentleman has adequately and poignantly stated many of the facets of this problem.

Mr. Speaker, I urge unanimous approval of the resolution.

Mr. REID. Mr. Speaker, I thank the gentleman from South Carolina.

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Maryland (Mr. LONG).

Mr. HARRINGTON. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Massachusetts.

Mr. HARRINGTON. Mr. Speaker, when will the violence end? Once again, the world has been jolted by sudden, shocking murder of innocent people. Once again, millions of Americans have been drawn to their television sets to witness the tragedy of senseless wasting of human life. Once again, the best of humans have been cut down by the worst.

Certainly, this latest crime is most evil for it has been accomplished in one of the few places where men of all nations and ideologies can compete in an atmosphere of friendship and peaceful cooperation. And it is most evil because a nation which has suffered far too much, which has seen its citizens shot down in its airports, slaughtered in its cities, must now endure the killing of its finest young men in a land of bitter memories.

Mr. Speaker, all nations should not only condemn the deeds of the Arab terrorists, but more importantly to take action against those countries who are harboring and supporting these international bandits.

Mr. LONG of Maryland. Mr. Speaker, I congratulate the gentleman from New York, the chairman of the Judiciary Committee (Mr. CELLER), for sponsoring this resolution. I think this is one additional instance of the great leadership the gentleman has demonstrated in this House over the years.

I believe we are all baffled by this latest in a long series of crimes against the little State of Israel, whose only defense has been to build a great nation, a distinguished nation in the face of endless adversity. If this incident, this horrible tragedy, serves any purpose at all, it will be to jolt the nations of the world into finally taking seriously these hijackings and kidnapings.

Mrs. GRIFFITHS. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentlewoman from Michigan.

Mrs. GRIFFITHS. I rise in support of the resolution, and to extend my sympathy to the Israelis, and to hope that out of this tragedy there will be forthcoming a sense of commitment in the world for peace for all.

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Speaker, I thank the gentleman for yielding and rise to associate myself with his remarks and those of the gentleman from Indiana (Mr. JACOBS).

Last night I waited by the television until those fateful words from ABC were spoken, "They are all gone." In my hand was the Evening Star in which the pictures of the Israeli hostages were printed. All gone, in the flower of their lives. A wave of sadness engulfed me which was intensified by the pictures.

"Thou shalt not kill" goes the Biblical commandment. Why was it so cruelly violated?

Let the word go out that we still believe in mercy—that it is good and right. But in order to secure that mercy for prospective future victims, examples must be made of the perpetrators of this act and any other such recurring act.

Mr. HANLEY. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from New York.

Mr. HANLEY. Mr. Speaker, I thank the gentleman for yielding. I want to associate myself with the remarks in support of this resolution.

Mr. Speaker, once again it was the knock in the middle of the night. Once again the mindless terrorists have struck a blow to our Israeli brothers. Once again we can only shake our heads and wonder when this inhumanity to these brave and tormented people will stop.

In moments of shock and horror, it is difficult to put into words the deep emotions swirling inside. To me this act is incomprehensible. It is senseless to their own professed cause as well as being a monumental insult to all the peoples of the world. People such as this should hardly be accorded the dignity of being treated as human beings, because their acts were subhuman. Not only were their acts cruel and merciless, but they themselves were cowardly in their cause and their cause itself bankrupt of any human ideal.

My heart truly goes out to those loved ones of the Israeli martyrs. I can only be reminded of the tragic past and pray to the Lord that such insanity will someday come to an end. All of us, regardless of faith or color, regardless of nation, must live on this earth in peace together. We must work together toward this end or forfeit that which is common to us, our humanity. It is this we must cherish and protect. Life is a great gift, and the reverence for life must someday come to transcend politics.

I can only hope that these remaining Olympic games are dedicated to those who died, and that the people of those games learn well from this tragedy so that the spirit of brotherhood that the games have symbolized is revived and carried in all of our hearts. Not just for a few days, but for our remaining years.

Too many have died in vain for us to forget so quickly.

Mr. DOWNING. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Virginia.

Mr. DOWNING. Mr. Speaker, I wish to associate myself with the remarks of the gentleman in the well.

Mr. Speaker, I share with my colleagues the sadness of this hour. The senseless, premeditated killing of these fine young men is a shocking, despicable act of what must be lunacy.

The Olympic games have always constituted a world forum where young people throughout the world can gather and compete on honorable terms. It offered an opportunity for better understanding among the peoples of the world. Now there is a pall over the image of this great event caused by a few people whose motivations must have come from Satan himself. Any explanation of these happenings is difficult and unsure. Unfortunately, the world seems infested with too many sick people who have lost their desire to live but do not have the courage to die by their own hands. They seize upon the most convenient political controversy, terrorizing and killing innocent victims before they themselves are killed in what they mistakenly deem a "blaze of glory."

To think that people of this ilk have snuffed out the precious lives of these promising young men is a sorrowful thing indeed.

Most nations of the world have joined together in their expressions of sympathy over the consequences of this tragedy, but there are a few nations whose reactions are strange. These countries actually seem to be condoning these acts rather than condemning them. They hold their doors open to give sanctuary to the perpetrators regardless of the crimes they commit. Some kind of retaliatory action should be taken against these few nations, and it seems to me that the Security Council of the United Nations is the place to start. They should not be allowed to continue their membership in that body unless they comply with reasonable rules of civilized behavior.

I extend my deepest sympathy to the people of Israel and especially to the bereaved families of those who have suffered such a tragic loss.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, I appreciate the gentleman from Maryland's yielding.

I wish to join in the commendation of the leadership for bringing out this resolution, and join in sympathy extended to the bereaved.

I certainly am in support of the two finding clauses and the first resolving clause. I do, however, based on our action in the past, sometimes later deemed precipitous when enacted while overwrought with emotion, want to raise a simple point of information about those who have constructed and drawn the second resolve by simply inquiring: What does it mean when it says, "that all means be sought by which we may in the civilized world cut off from contact any peoples giving sanctuary," and so forth? Would this amount to sanctions of those giving sanctuary? Could it mean complete withdrawal and walling off from the civilized world? If so, are we not in a spirit of overwrought sympathy and deepest heartfelt emotion almost going as far as those who have wreaked the despicable and the impulsive crime against mankind? I would simply like an explanation of the second resolving clause.

Mr. LONG of Maryland. Is the gentleman addressing his remarks to the gentleman from New York (Mr. CELLER)?

Mr. HALL. I would hope if the dean of our House had heard me, or those who are around and supporting him, that they could answer that question. My purpose would be served by simply pointing out that it is at least vague in meaning and perhaps overdrawn.

Mr. LONG of Maryland. I yield to the gentleman from New York, and yield back the remainder of my time.

Mr. CELLER. I yield to the gentleman from Pennsylvania.

Mr. GOODLING. I thank the chairman for yielding.

Mr. Speaker, I want to join with others of my colleagues in expressing deep shock and distress over the tragedy that yesterday befell the members of Israel's delegation to the Olympic games at the Olympic village in Munich, West Germany.

Responsible people everywhere cry out against this type of terrorism. Their hearts go out to the families and friends of the victims concerned, and their deep sympathy is extended to Israel.

It is indeed heartening that this tragedy has not put a stop to the Olympic games and that, after due recognition is extended the victims, the games will be continued. This serves notice on those who are inclined toward terrorism that they cannot destroy this spirit of international cooperation, friendly competition, and good will among nations.

There are dangerous currents of violence loose in the world today, and the Olympic games have served as a symbol of world cooperation and peace. In effect, it has been a pageant that has brought the entire world together in friendship, enabling peoples of the various countries to understand the hopes and fears of those of other countries.

The great shadow of tragedy that has fallen on the Olympic games in Munich should serve, then, as a signal to all peoples of the world that they must constantly be on guard against terrorism, for it lurks in all kinds of corners and hides in the hearts of treacherous men. It manifests itself in airplane hijackings, airport attacks, and now it has escalated to international proportions. It is obvious that these terrorists are seized by madness, that they are totally unpredictable, irresponsibles and that they will resort to any devilish means to obtain their evil ends.

The United Nations must do everything in its power to curb and control this menace of terrorism. It must use every authority at its command and all powers of persuasion it possesses to eliminate this terror to decent human beings. The U.S. Ambassador to the United Nations, the Honorable George Bush, should exert every effort to see that the United Nations pursues such a course.

The countries of the world must be urged to confront these terrorists. They must refuse to give them refuge. They must desist from providing them with arms and forbid them from operating in their borders. They must take prompt and strong legal action against them, knowing that only in this way can this sordid type of humanity be stamped out.

If all the countries of the world will cooperate in this regard, they will be able to eliminate a terror that threatens the deep respect and regard that each decent country has for the other. The dark shadow that has recently fallen on the Olympic games will become dissipated, and the countries of the world will be able to meet at future events in an Olympian effort for athletic excellence and international peace, good will and understanding.

Mr. ROSENTHAL. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from New York.

Mr. BAKER. Mr. Speaker, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman.

Mr. BAKER. Mr. Speaker, I rise in support of the resolution offered by the distinguished gentleman from New York, the dean of the House of Representatives.

Mr. Speaker, today is a black day for America and for all civilized nations. Today, we awoke to the tragic news that Arab terrorists have killed 11 representatives of the Israeli nation at the Olympic games.

I join with all men of good will in deploring these murders. And I call for immediate action to prevent future bloodshed.

The responsibility rests with nations who condone to the slightest degree such actions by their nationalists. International violence in all forms, including blatant hijacking of aircraft, can only be suppressed by isolating nations who give aid and comfort in any way to international criminals.

These latest shootings, by a band of armed Arab guerrillas calling themselves the "Black September" group, are the latest in a long list of terrorist acts. Clearly, we cannot tolerate these continuing violations of accepted international codes of conduct.

The recent tragedy in Munich raises questions of great importance to the future of the Olympics.

The games were established to bring together the finest athletes from throughout the world, in friendship and in peace. Over the years, international politics have been allowed to get in the way of sportsmanship.

But never before have political events forced the games to a complete halt.

At the beginning of this year's Olympics, Rhodesian athletes were barred from competition for political reasons. This action set a bad precedent. The Olympics should be open to all—regardless of political ideology. This is not the proper time or the place to display international differences.

The killings in Munich also raise the question of security at future Olympiads.

All nations must share responsibility for adequate precautions to insure the safety of those competing in the Olympic games. The Olympic village should be considered international territory, and as such, should be patrolled by international law enforcement officials. No one host country should be asked to bear the enormous burden of security for future Olympics, in the light of today's world tensions.

Olympic officials have announced the games will resume September 7 following a fitting memorial to the slain Israeli athletes. By resuming the games, we can demonstrate our commitment to international sportsmanship. Despite this great setback, we can show that violence by a few will never stop the progress made through efforts of many toward international peace.

No one can erase the tragedy of what has happened. No one can restore the murdered victims to their loved ones. But, hopefully, this incident will help us to learn new ways of ending bloodshed and finding international peace.

Mr. ROSENTHAL. Mr. Speaker, in the first instance I want to commend the distinguished chairman of the Judiciary Committee, the House itself, and the Speaker, and the leadership, for bringing this very timely matter to the attention of the membership.

Obviously, the American people and Members of this House, their Representatives, are deeply concerned and alarmed, and they, as the resolution suggests, suffer with profound sorrow the action that took place in Munich yesterday.

Many of the previous speakers here today not only expressed their sorrow and alarm, but some expressed their anger at certain nations of the world for having been involved in providing refuge for terrorists that led up to this kind of situation.

I think the gentleman from Missouri raised a pertinent question when he asked, putting it another way. What responsibility do nations in the civilized world have for their part in permitting the perpetration of these dastardly acts?

I suggest to my distinguished colleague from Missouri that what happened is, when governments and nations condone acts of violence and terrorism, they set a climate of approval for these kinds of situations.

In other words, those nations, which border as neighbors to the State of Israel, have given sanctuary to terrorists and have, in a governmental sense, indicated their approval—not their condemnation but their condonation of these acts.

It would seem to me, that when these nations offered refuge for hijackers, when they have offered refuge for those who have publicly acclaimed terrorism as a final resolution of their difficulties, those nations ought to lose their rights in the body of nations, for example in the United Nations.

Specifically, when Syria, Lebanon, and the United Arab Republic have willingly given the hand of friendship to terrorists, they ought to suffer the loss of whatever the membership of the United Nations can bring for those acts.

What I mean to suggest is that these nations have used the vehicle of the Security Council and the United Nations to bring their resolutions of condemnation of the State of Israel.

This may not be an appropriate time to discuss the larger issue, but the issue of what happened at Munich would never have come up if we had previously addressed ourselves to the larger issue.

What I suggest to my distinguished colleague from Missouri is that nations really ought to be expelled from the United Nations, from the civilized world, if we are going to develop a society of peace, understanding, goodwill, and tranquil relations between people.

It would seem to me that the United Nations is going to have to face this issue as to nations which harbor terroristic criminals, and they are going to have to lose the right to vote.

I remember learning in law school that one of the tenets when coming to a court of equity—which really the United Nations is—is that one must come in with clean hands. Nations that harbor terrorists do not meet that requirement.

I believe the gentleman from Missouri addressed himself to the question of what is the responsibility of the civilized world, and I am happy to yield to the gentleman from Missouri.

Mr. HALL. I believe the gentleman misconstrued my question. I hope, on reading the literal RECORD back—and he will note that I have not asked to revise and extend my remarks—he will find that he has done so. My question addresses itself simply to a point of information.

What are "all means" that are intended "to cut off from contact with civilized mankind any people who give sanctuary," or perpetrate these other despicable and repulsive actions?

I quite agree with the gentleman that our United Nations, as ineffectual as it has been and will be under its present regulations, should be the one to whom we can all turn for proper restitution, if there is any such, in the judgment of mankind, for such a repulsive act as we witnessed at Munich.

I quite agree that the other side of the question is the question of sanctuary by adjoining nations.

I am just as strong as the gentleman is against the pogroms against these people through too many generations. Like others I went to war to stop some.

My question still, is a point of information—What is meant in the second resolving clause literally and figuratively? Will this be another Tonkin Gulf Resolution which will come back to haunt us because we have not examined the rhetoric on the first day, fraught with emotion, after this dastardly deed? Will we wall off and seal off offending nations?

I simply want to reflect on what civilized mankind can do "to cut off from all contact," any particular errant nation in any one instance.

Mr. ROSENTHAL. I am going to yield to the gentleman from Illinois, but first let me say that I can only offer my own opinion as to what this means.

I also want to affirm that I did not want to misstate or to misread the gentleman's remarks. I believe the question of responsibility to the civilized world and what this resolution means is a very pertinent inquiry. I, for one, am very pleased the gentleman brought that up.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. ROSENTHAL. I yield to the gentleman from Illinois.

Mr. YATES. I would say to the distinguished gentleman from Missouri that I would interpret the meaning of the resolution as stated in my remarks. I said that I would urge the President of the United States to take all steps as might be necessary to carry out this resolution, by all legal means. I used a phrase like "to mobilize the nations of the world to bring an end to the murders." I do not include acts of war, if that is what the gentleman has in mind.

I had in mind that the President would initiate action in the United Nations, before international agencies such as the International Air Association, that he would seek agreements to stop flights into the lands of nations which harbor hijackers and murderers, that he would take steps to call meetings and assemblies of nations of the world to consider what should be done to stop the murder that is loose.

That is the purpose of this resolution, to obtain action and to urge the Executive to give tangible recognition to the shocking events taking place. Nothing—nothing has been done to date. Something must be done to restore a rule of law between nations by seeking the full cooperation of all nations.

Mr. HALL. Mr. Speaker, with this legislative record, the purpose I sought has been served.

Mr. ROSENTHAL. Mr. Speaker, I yield to the gentleman from California (Mr. BURTON).

Mr. BURTON. I thank the gentleman for yielding.

I would like to commend the gentleman in the well, Mr. ROSENTHAL of New York, for his introduction of this resolution.

Today is a day of mourning. The Olympic stadium, scene of the world's greatest athletic competition was used this day for a memorial service. The Olympic flame still burns but it cannot dispell the darkness which has fallen over the spirit of this Olympiad.

Words are inadequate to express the shock and outrage which I feel, which men of goodwill the world over feel, at that heinous crime which has been perpetrated against the Israeli Olympic team and against human decency itself by Arab terrorists in the past 24 hours.

World opinion must cry out against such deeds. Those who foster terrorists within their borders must bear the responsibility for the acts of those terrorists. The world community, through the United Nations, must condemn this violence and apply necessary sanctions against those who violate not only the sovereignty of Israel and her people but the conscience of all mankind.

The world these days is a very troubled place. The Olympic games have provided the peoples of the world through their countries at least one forum where mankind can get together and compete on honorable terms and to learn a little bit about one another and hopefully to understand one another a little bit better and, therefore, also hopefully, to lay a basis for mankind's resolving its differences amicably rather than by war.

The absolutely unforgivable and mindless terror and killing perpetrated by an element of what is reported to be the Palestinians comes as a shock to every decent man and woman on the face of the earth.

I would hope that not only this House and the other body but also the administration would make not only our views known in terms of words but take whatever effective action is necessary to inhibit and deter any future occurrences of this outrageous nature.

Mr. FINDLEY. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman.

Mr. FINDLEY. Mr. Speaker, it is my understanding that the procedures we are under right now do not permit the consideration of any amendments. It is my feeling that the language of the resolution is not specific enough in regard to the sorrow of the American people concerning the loss of life by the West German policemen as well as the loss of life by the Israeli athletes. Had the procedures permitted the offering of an amendment, I would have offered an amendment to insert after the words "twentieth Olympiad" the words "and two West German policemen" and then in the first resolving clause, after the word "Israel" add the words "and West Germany."

Mr. CELLER. Will the gentleman yield?

Mr. FINDLEY. Of course.

Mr. CELLER. I would think that the wording originally embraces exactly what the gentleman has in mind. It reads as follows:

> The deepest sympathy to the people of Israel and to the families of those who so tragically lost . . .

So that the words are all-embracing and would include the families of the Germans as well as the Israelis.

Mr. FINDLEY. I am sure that construction is possible and I am glad to have the author of the resolution clarify that as being his intent.

Mr. BOGGS. Will the gentleman yield?

Mr. FINDLEY. If I have the time, I will be glad to yield.

Mr. BOGGS. Just so that the RECORD might be abundantly clear.

I can say that it is the intention of the authors of this resolution to express the genuine sympathy and sorrow and all of the other expressions contained in this resolution to the West German police officers and their families, who gave their lives in defense of these athletes. That is absolutely the intention of the resolution, and the gentleman does the House a service by making sure that that is made part of the RECORD.

Mr. FINDLEY. I thank the gentleman from Louisiana. The sorrow to the families of those Germans who are lost by this tragedy is certainly no less keen than to the families of the Israeli athletes.

Mr. Speaker, I yield back the balance of my time.

Mr. DRINAN. Mr. Speaker, will the gentleman yield?

Mr. CELLER. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Speaker, the atrocity perpetrated yesterday by Arab assassins upon members of Israel's Olympic team in Munich consumes humanity with revulsion and fear.

We wonder what terrible characteristic of homo sapiens could it be which can devise and execute brutality of this sort. We wonder whether the counterpart of man's capacity for beauty and ennoblement is a capacity for grotesque destruction not possessed by any other species. We fear that no punishment, no retribution can relate to such an act and that we are powerless to respond.

Decent men of every ideology must join together to condemn and prevent such acts as this. I believe, in the words of the resolution before the House today, that all means must be sought by which nations giving sanctuary, sympathy, or support to such acts as these may be cut off from contact with civilized mankind.

I have previously sponsored legislation which would sanction nations which do not prosecute or extradite air hijackers, and I am fully prepared to support similar legislation under which our Nation would take vigorous sanctions against nations which give comfort to Arab or other assassins.

Mr. Speaker, this is not the first time the Olympic games have been a stage for international political activity. Hitler sought to exploit the 1936 Olympics for his own warped purposes.

Nor, as we all recall with horror, is this the first time Jews have been assassinated in Germany.

Nor, as I remember too vividly from being at Lod Airport in Tel Aviv a few hours after that Arab terrorist atrocity, is this the first, or second, or third, or 10th case of terrorist murder by those who associate themselves with Arab guerrilla groups.

I call on every Arab leader in the United States and throughout the world to follow the example of Jordan's King Hussein and excoriate such acts unequivocally.

I urge the United Nations to place the subject of international terrorism on the agenda of its General Assembly for the most effective remedial action the leaders of mankind can devise.

The families of the 11 assassinated athletes, Israel, and Jews throughout the world have suffered an irreparable loss. I mourn for them and with them. But this is not only a loss for them; it is a loss for all of humanity. If international brotherhood has even a shadow of potentiality, then all men must come together to stop these massacres. There is no place within humanity where such creatures as the assassins of Munich can be harbored.

Mr. Speaker, I insert at this point a thoughtful and moving editorial from today's Boston Globe entitled "The Shocking Crime in Munich":

THE SHOCKING CRIME IN MUNICH

Civilized people all over the earth have reacted with a deep sense of shock, horror and outrage to the murder of two members of the Israeli delegation to the Olympics in Munich murder of 11 members of the Israeli by an Arab guerrilla vengeance squad.

But shock, horror and outrage are not enough. A way must be found to end such banditry. Eleven hostages are dead.

Avery Brudage, president of the International Olympic Committee, was entirely right to order the suspension of the games for 24 hours or until the hostages are freed, as had been demanded by Israeli Prime Minister Golda Meir. To have let the games continue while this crime went unchecked would have been most callous, not to say reprehensible.

But suspending or canceling the games is not enough, either. Nor is it enough for the perpetrators of this ghastly crime—the eighth Arab guerrilla attack against targets in West Germany in 4 years—to be caught and punished. To deter any repetition, the Arab nations themselves, who have allowed the guerrillas to remain organized ought to make unmistakably clear their refusal to allow them an asylum of any kind.

Failure to make this clear would only antagonize world opinion against them and lose what hope they may have for a settlement of the problem of the Palestinian Arabs.

For the Black September organization responsible for the current atrocities represents nothing but its own small and utterly criminal revenge movement. It was the same organization that engineered the massacre last May 30 at Tel Aviv's Lod International airport, supplying money and arms to three Japanese gunmen who killed and wounded scores of passengers. It also assassinated Jordan's Premier Wasfi Tell in Cairo last November.

Granting any of its outrageous demands could have led only to more such attacks.

The guerrillas are, among other things, airplane hijackers and saboteurs. And perhaps not entirely by coincidence, their latest heinous action came even as delegates of 17 nations were meeting in Washington to discuss a new international treaty to deal with air piracy.

Initially at least, at this conference the Soviet Union opposed a United States-Canadian proposal to require signatory nations to suspend air services with any nation that did not punish or extradite plane hijackers or saboteurs. But the chief Soviet delegate did not object to requiring extradition if the requirement were attached to one of the existing three treaties.

By some such method, or by having the United Nations Security Council impose such sanctions, a way has to be found to end all international plane hijacking, and thus to stop such tragedies as the outrage in Munich before they get started.

Mr. METCALFE. Mr. Speaker, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Illinois.

Mr. METCALFE. Mr. Speaker, 3 weeks ago I stood here on the floor of the House of Representatives, talking to members of the U.S. Olympic team. There was a common spirit of togetherness and good will from both sides of the aisle that day as we wished our athletes well and talked anxiously of the XX Olympiad in Munich, Germany.

Today I speak again about the Olympics—not to members of the U.S. Olympic team, but to my colleagues here in the House; and not with the same enthusiasm, but with the solemn knowledge that another country which also wished its athletes well in the Olympics, will not be greeting them when the games are over.

There is so much left to be said and negotiated in settling the whole Middle East conflict, and yesterday's murders in Munich by Arab terrorists make any settlement now seem so far out of reach. And yet, there is nothing that can be said today to quell the exasperation and frustration that was felt yesterday as the world waited in terror to hear the inevitable—the outrageous slaying of 11 members of the Israeli Olympic team.

In all 17 are dead now—two members of the Israeli team killed in the early morning dawn; the other nine killed during an exchange of gunfire with the German police at an airport, where four Arab terrorists were killed, one Munich policeman was killed, and one West German military helicopter pilot. It was indeed an insane 17 hours during the whole terrifying ordeal that has opened up new wounds in this whole Middle East conflict.

The scene in Munich that I heard about in the news yesterday was such a different one than the one I had just left in West Germany not 24 hours before. All of Munich and West Germany then had been in the festive mood of the 20th Olympiad. I had seen athletes from opposing countries embracing in the ecstacy of victory and there were tears of happiness from some whose months and months of training had finally paid off with a gold, silver, or bronze medal.

Now those tears have turned to pain—the pain of knowing that some fellow Olympians will not even have the chance to test their training, which was why they had come to Munich in the first place. Now they will not even be returning home to Israel alive. And suddenly the gold, the silver, and the bronze are less important.

The cheers of the millions of spectators gathered in Munich to watch the games will not be the same now, I know, as the XX Olympiad continues.

My own personal condolences and heartfelt sympathy are extended to the families of the decreased Israeli athletes, the surviving members of the Israeli team, and to all of Israel.

We can only hope now that these outrageous terrorist tactics will help shock the world back to sanity, where such violence will not be bred and will not be allowed to continue.

Mr. CELLER. I yield to the gentleman from Illinois (Mr. PUCINSKI).

Mr. PUCINSKI. Mr. Speaker, I rise in support of this resolution and urge its adoption. The barbaric act of terrorism which occurred in Munich yesterday literally paralyzes the mind from shock and leaves one in total disbelief that man could be so totally brutal to his fellowman.

The adoption of this resolution merely expresses our outrage at this inhumanity, but it will do little to prevent the recurrence of this shocking terrorism.

I believe the time has come when the free world must examine the relationship of these violent acts of terrorism and the Arab republics from which these terrorists stem.

The world can no longer view in silent indignation this violence against humanity itself.

I am calling upon the President and the American people to lead the way in exploring every shred of evidence which suggests that there is some covert relationship between these terrorists and the countries from which they come or between these terrorists and the Arab governments in their respective countries.

These Arab nations can no longer plead innocence for they have taken no steps to curtail this scandalous exportation of terrorism from within their boundaries.

The United States did not hesitate to sever diplomatic relations with czarist Russia in the 1880's, because of the pogroms against Russia's Jewish citizens.

Nor should we hesitate today to impose the most severe economic sanctions and quarantine against these Arab nations that have played the same role—directly or indirectly—in encouraging this terrorism.

I refuse to believe that the world must learn to live with this new violence against humanity. I believe that Egypt, above all, should be singled out for failing to deal in any manner against these terrorists. Syria and Lebanon fit into the same mold and should be likewise quarantined.

The United States should also examine the relationship of Red China to these guerrillas. It is an open secret that Red China is the principal source of financial aid to the Palestinian terrorists and its occurs to me that if the newly carved friendship between Peking and Washington is to have any meaning, Red China will have to use her influence in persuading the terrorists she finances to abandon their outrageous conduct.

Only by acting firmly to stem this wave of world terrorism can American and the free world survive. For indeed, how secure is our own freedom if the 11 Israeli delegates to the Olympics had to give their lives to the recklessness of these terrorists.

Mr. CELLER. Mr. Speaker, I yield to the gentleman from New York (Mr. BADILLO).

Mr. BADILLO. Mr. Speaker, men and women of good will mourn today for the innocent victims of an unthinkable crime committed yesterday at the Olympic Village in Munich. It is appropriate that we mourn. But it is essential that we act.

Society simply cannot afford to continue to permit those who planned this atrocity, the Lod Airport massacre last June, and other terrorist assaults to circulate freely, at liberty to plan and execute further atrocities. They must be found and they must be punished.

How can this be done? The Arab terrorists responsible for yesterday's murders enjoy the safe haven provided by several governments of the Middle East. There is no secret which governments these are: even as today's mourning began, Syria was hailing the Arab murderers as martyrs, and the government of Lebanon, aware of its complicity by openly harboring terrorist groups, was preparing for expected reprisals by Israel. The Black September Movement itself reportedly is financed from Libya.

We can all understand and appreciate the outrage which underlies the movement in Israel for immediate and massive reprisals against the Palestinian terrorists and those nations which encourage and protect them. We must remember that Israel has been under a state of siege from these groups ever since it became a nation. And while the major powers of the world engaged in the politics of oil and spheres of influence, Israel defended herself against those openly pledged to destroy her.

It has long been clear that only firm and concerted action by the nations of the world will bring this campaign of terror to an end. A necessary first step would be an international economic boycott against nations encouraging and supporting Arab terrorist groups and it is appropriate that the United States take the initiative in establishing such a boycott.

We must also press on with the effort to produce strong, uniform international standards for airline and airport protection, for international travelers remain the prime targets of terrorist groups.

Finally, the United States can and must take the unilateral step of immediately cutting off all forms of assistance to nations failing to seek out and prosecute these terrorists.

This is no time for mere wringing of hands and useless rhetoric. Who knows when the next attack will come or who the targets will be? If we wish to memorialize those members of the Israeli Olympic team who died at Munich yesterday, we must make certain that their lives are the last to be lost because of international apathy toward the Arab terrorists.

Mr. BURKE of Massachusetts. Mr. Speaker, I know all the Members of this House share my sadness over yesterday's tragic events in Munich, Germany, the host city during this, the XX Olympiad. Eleven Israeli participants in this year's Olympics were cut short in the prime of their lives, unwitting victims of international politics at its worse at a time and in a place where politics was supposed to be absent. This latest display of the depth of human depravity and man's inhumanity to man must shock the sensitivity of men of good will the world over, whatever their political persuasion and whatever their views about the Middle East controversy. Our hearts go out to the families and to the nation which has endured this tragic loss of some of these best exemplars of that nation's youth.

The reaction in some circles to this tragic turn of events has been to demand the termination of the Olympics as a gesture of world outrage; however, such a reaction it seems to me is to play into the hands of those who perpetrated this dastardly deed and to give them a recognition which they do not deserve. Once the idea gains a foothold, that terrorists and international renegades, whether they be hijackers, bombers, kidnappers, or just ruthless murderers, can bring any nation, much less the world, to a halt then their sick appetites for publicity and power to influence the course of events will be whetted and encouraged. In this case, the guerrillas will have achieved one of their immediate objectives of interrupting an international event which has the attention of the whole world.

At a time like this, it is well to remember what spirit still clings to the tradition of the Olympics, as a period of time set aside when nations often in disagreement and in opposition send their best examples of physical accomplishment to compete, man against man and team against team, in an atmosphere free of international and national politics and considerations. In other words, at a time when the transcendental human element which is so often lost sight of in the human race because of national differences is supposed to reign supreme. None of us are naive enough to feel that any Olympics has ever really lived up to this almost impossible goal but in the very shortcomings and occasional displays of national pettiness one can feel that the world is better off for having tried and the goal looms the nobler for all the shortcomings and failures to achieve it. I am convinced that the world needs this goal before it today more than ever and that there is still much to be gained and little to be lost from continuing the Olympics and in doing so, heighten the disgust and utter revulsion that men the world over, including the Middle East, will feel toward actions of such ruthless depravity. In classic Greek terms, the evil that was perpetrated, the obvious innocence of the victims, the genuine horror of the nations of the world, adds an element to the drama unfolding at Munich which captures for mankind all the forces afoot in the world today—the good and the evil, fate and selfcontrol, victory and defeat, the greatness and the baseness that is life itself.

Mr. O'NEILL. Mr. Speaker, the incidents of yesterday in Munich marring the games of the XX Olympiad are tragic illustration of the savagery and barbarism which a few dedicated fanatics can bring to entire nations, and indeed the world. That such an attack should occur at the Olympic games, one of the last vestiges of true international cooperation and spirit, makes the crime even more heinous. It is fitting and proper for us to mourn the deaths of the 11 Israeli athletes, who came to Munich to compete in contests of skill and strength, not to engage in armed battle with Arab extremists. However, such unnecessary and inhuman carnage cannot be allowed to pass without declaring the need for greater efforts on the part of all nations to curtail and control such terrorist activities.

The Arab nations cannot be excused for their blatant complicity in the murder of the defenseless, unarmed Israeli competitors. It is unfortunate that at a time when Arab-Israeli relations were entering a new phase of hope, the Arab governments thought it unnecessary to take the requisite measures to flush out these deranged radicals. It is inexcusable that while West German officials sought to negotiate for the lives of the Israeli hostages, no assistance of any kind was offered by the Arab world.

Contrarily, the Egyptians announced that they would refuse to discuss the release of the hostages with anyone but the guerrillas, and the Syrian Government has already termed the slain terrorists martyrs. This type of response can only guarantee continued bloodshed and violence.

Until the Arab countries make it abundantly clear that they intend to control and eradicate guerrilla operations stationed within the safety of their borders, reprisals are inevitable, and within the rounds of escalating retaliation: So vanishes the hope of peace in the Mideast.

If we have come to the juncture in history when a few extremists can control the destinies and lives of millions of people then we must take steps to insure that these individuals are never allowed to activate their plans for worldwide anarchy and destruction.

I join my colleagues in mourning for the slain athletes and their bereaved families and I call on the Arab world to indicate through positive action its intention to rid the Middle East and the world of these senseless terrorists.

Mr. MACDONALD of Massachusetts. Mr. Speaker, I sent the following telegram to all rabbis in the Seventh District of Massachusetts:

> The appalling tragedy in Munich has stunned everyone in the civilized world and I want to extend to you and your congregation my deepest sympathy for the death of the Israeli competitors in the Olympic Games.
>
> It is especially bitter that this outrage was committed on the eve of the high holy days, and especially tragic that it was committed against representatives of a brave people who have demonstrated the qualities of independent spirit to which all Americans have responded. We must search diligently and wisely for ways to banish from civilized lands these outlaws who debase human dignity with their killings and kidnappings. We must reject the standard which sanctifies violence and bloodshed and we must elevate the goals of peace and understanding among men of all nations. I pledge you my support in the effort to prevent any recurrence of these terrible crimes.
>
> TORBERT H. MACDONALD,
> *Member of Congress.*

Mr. DULSKI. Mr. Speaker, I join my colleagues in supporting wholeheartedly the pending resolution of condemnation.

The violence at the Olympic games in Munich yesterday was despicable.

Words really are inadequate to describe my sorrow and disgust that this great international athletic event should be marred in any way, let alone by the violent disruption which occurred during those long hours on Tuesday.

There has been no evidence of politics or unrest in the Olympic events themselves. The participants are there for one purpose: To compete in their athletic specialty against the best athletes from around the world. Their goal was victory—for themselves, for their team, and for their country.

Eleven members of the Israeli delegation to the Olympics are dead as a result of the day of terror. What a sickening tragedy.

I commend the leadership for giving first priority to the pending resolution which should be adopted by acclamation.

Mr. SCOTT. Mr. Speaker, the entire House will want to support this resolution. No one believes in senseless killing, certainly when the victims are the cream of the youth of their country.

In recent years we have had domestic tragedies; acts of violence committed without any rhyme or reason; public officials and others the victims of unbalanced minds sometimes brought about by extreme hatred.

This is more than a tragedy for one nation or one people. All the world shares a common concern for lawlessness and a disregard for the lives of others. We must find to way to maintain the rule of law both domestically and at the international level.

I am sure the people of Virginia join others throughout the world in condemning this vicious act and extending our sympathy to the families of those who lost their lives.

Mr. COUGHLIN. Mr. Speaker, as it has come to their ancesters down through the centuries, there was a knock at the door of the apartment where Israeli athletes and coaches were staying at the XX Olympic games in Munich.

That knock followed by the crashing of the door and a barrage of machine gun fired by Arab terrorists set in motion a tragedy of immense proportions which leaves humanity grieved and humiliated.

Eleven Israeli athletes and coaches. the pride of their youth of whom so many others had died in defending their country, are dead in the aftermath of a day of horror and revulsion. The spirit of the Olympic games, where political and nationalistic antagonisms were put aside, is shattered. Even in barbaric days of old, Olympic contestants were provided safe passage to compete in the games.

All the civilized world sorrows—for the families and friends of the dead Israelis, for the depraved murders and kidnappings that demean human life, and for the misguided guerrillas whose actions so irreparably set back the cause for which they seek purported justice.

The knock on that door in Olympic Village reminded us only too forcefully we are a finely-honed razor's edge away from events which could trigger much diwerviolence and bloodshed.

For the German people, atoning for the 1936 Nazi-tained Olympics, the killings came as an even greater shock. In their compassion and good will, they had worked to make the Munich events a new and honorable chapter to remember against Auschwitz, Buchenwald, and Dachau.

For the world community, the glimmerings of a peace agreement between Israel and Egypt abruptly have been dimmed in an orgy of bloodshed. The uneasy truce in the Middle East again faces another setback.

What more can be learned from this tragedy? We have witnessed skyjackings and shootouts, kidnappings, and blackmail, and the horrendous massacre at the Lod Airport.

Regardless of vast political differences, all nations of the world must unite to deny sanctuary to skyjackers, kidnappers, and blackmailers who commit international crimes. The United Nations must end its cynical favoritism of cliques of nations to condemn forcefully and unequivocally the latest outrage, to salvage its fast-sinking prestige and, to seek immediate international agreements for the extradition of criminals.

While Israel and its people grieve, I know they have faced adversity and sorrow before and will find renewed strength and inspiration in the deaths of their countrymen. The spirit of Israel, which so impressed me when I visited there last year, will rise above this terrible grief.

As the Jewish High Holy Days approach with the start of Rosh Hashana at sundown Friday, I join with men of good will everywhere to extend my sympathy to Israel and its citizens on the deaths of these fine 11 young men. I hope and pray that this convulsive tragedy will, in some way, bring much closer the day when nations of the world and conflicting political antagonists can resolve their differences without resort to war and to violence.

Mr. BROTZMAN. Mr. Speaker I rise in support of this resolution. What happened in Munich was a tragic incident perpetuated by a group of madmen. Their actions should be abhorrent to every decent person in the world community. This depravity will accomplish nothing possible for those who unleashed it, and worse yet, it nearly wiped out the small, but gallant team of splendid young Israeli athletes who devoted so many years of their lives qualifying themselves for Olympic competition. We extend our heartfelt sympathy to their loved ones, and to the families of the West German policemen who gave their lives.

Mr. FULTON. Mr. Speaker, the indescribable act of barbarism committed at Munich yesterday has brought tragedy mourned by the entire world.

A group of fanatical murderous bandits, for no sane or rational purpose, committed an atrocity for political purposes as base and vile as one might imagine.

Our hearts and prayers today go out to the families of those innocent Israeli Olympiad performers and their families just as they did yesterday in the future hope that they might be released unharmed.

These were random innocents who were caught in a web of fanatic madness which they had no hand in weaving and for which they had absolutely no responsibility.

Their only crime, in the eyes of their murders, was that they were Israelis, nationals of a nation which has valiantly and vigorously fought to justly defend its political and geographical integrity against full scale invasions and untold military aggressions.

In a political context this tragedy demands an immediate settlement of the Middle Eastern conflict. In recent days there have been reports and indications that a settlement was, until yesterday, possibly imminent. At least the climate was reported to have improved markedly.

The Munich tragedy must not be permitted to destroy this climate though a deterioration would certainly be understandable.

Hopefully it will demonstrate, particularly to the Arab nations, that the fanatical elements within their borders which they seemingly are unable to control do not serve their national interests but militate against them.

The Olympic games will and should continue; not simply in the spirit of free sport but as a memorial to the Israeli athletes and their sacrifice as well as a demonstration that acts of madness will not cower or intimidate peoples throughout the world who hold firmly to the belief that all political or other differences between nations or groups and individuals within nations should be settled by reason, logic and law rather than wanton, merciless and irrational violence.

Mr. FRENZEL. Mr. Speaker, it would be hard to find a person who would not support this resolution. The atrocity at Olympic Village in Munich has shocked and shamed the entire world. The next act of terrorism may take place in our country or on our aircraft.

Arab Nations who harbor, nurture, and finance these guerrilla terrorists must accept the responsibility for their murders and piracy. We, and other nations of civilized world, must draw the line now, or see chaos rule the world.

All possible methods must be used from U.N. sanctions, to unilateral sanctions, to international embargoes on air traffic. Our inaction—our tolerance of guerrilla murders, bombings and terrorism—has only encouraged more terrorism.

This is a fine resolution, but words and resolutions won't do anymore. If this country is not willing to initiate action, and demand similar action from other nations, the resolution will remain just words. I favor the resolution, but I favor, even more strongly, immediate actions which will demonstrate our outrage, clearly and economically, to those Arab nations who have sponsored these acts of terrorism and murder.

Mr. SEIBERLING. Mr. Speaker, • of course, I support the resolution. Surely, it is the least any of us can do. But none of us can help feeling, along with our grief, a deep sense of frustration. It is not only that we cannot restore to life the spirited young men so senselessly cut down at the very peak of their vitality. That is tragedy enough, God knows.

What is especially frustrating, however, is the apparent inability of established institutions to prevent this type of barbarous act that seems to be occurring with increasing frequency. Perhaps, if the recommendations in this resolution are followed, we will be able eventually to start reversing this trend.

But going beyond the prospect of better enforcement measures, surely the time has come for a converted effort by all nations—a "crash program"—to end the festering Palestinian refugee problem. One can hope that a genuine offer of a massive program of resettlement and economic assistance would, if effectively presented, appeal to the mass of refugees and isolate the fanatics and opportunistic politicians who thrive on the refugees' misery and hopelessness. Certainly the United States, which took the lead for all of Western Europe in developing the Marshall plan, should be able to assume leadership in developing a way out of the Palestinian refugee morass.

Mr. Speaker, for years we have tended to believe that a solution of the Palestinian refugee problem could only take place as part of an overall settlement of the Arab-Israeli conflict. But is it not just possible that a massive effort now to resettle the refugees could win a breakthrough toward settlement of the larger conflict? Certainly it is worth a try.

We might even be so bold as to hope that a successful effort to solve this problem could, by its example of fruitful nonviolent action, help bring an end to the violence that is every day cutting down the lives of young and old alike in Indochina, in Northern Ireland, and elsewhere.

If men of goodwill can unite, in this moment of common shock and sorrow, to reassert their common humanity, then truly those dead Olympians shall not have died in vain.

Mr. NIX. Mr. Speaker, the terrorist murders of Israeli athletes in Germany yesterday is an attack on the entire civilized international community.

In 1 day the Olympic games whose history goes back to ancient times when nations declared truces in their wars in order to hold the games, has been endangered as an institution.

In 1 day peace in the Middle East and negotiations for such a peace has been set back years. Such setbacks in the Middle East threaten the peace of all of us.

In 1 day, international travel, communication, and commerce between civilized nations have been endangered because all tourists of every nation are endangered, the irrational followers of causes may pick on the citizens of any nation to gain attention for themselves.

This is an intolerable situation.

If and when the surviving terrorists reveal their intended destination, the civilized international community must be prepared to take steps against that nation who may have given encouragement for such an act.

Piracy was not ended as a threat on the high seas until all nations agreed to treat piracy as an international crime. Such agreements were reached when the nations of the world realized that such acts were a threat to all of them.

The publicly stated determination of the United States to enter into common action with other nations on the diplomatic front can encourage other nations to join with us.

I extend my condolences to the families of the Olympic martyrs. Their loss is a loss to each of us. The world is a sorrier place today because of the events of September 5.

Mr. KING. Mr. Speaker, I rise in support of the resolution introduced by the gentleman from New York (Mr. CELLER) expressing profound sympathy to the families of the Israeli Olympic team who were murdered during the Arab guerrilla attack at the Olympic games in Munich.

The vicious attack by the Arabs was indeed a crime against the world society. The attack has made an indelible blemish upon an ideal that is a symbol to the world—an ideal of nations coming together every 4 years to compete in fairness and good sportsmanship. As far as I am concerned, Mr. Speaker, there can be no conceivable excuse or reason for these murders. There are no differences so great as to justify this kind of wanton disregard for the lives and safety of young men who were in Munich only for the sake of athletic competition.

I join with President Nixon and all Americans in expressing my heartfelt sympathy and condolences to the people of Israel and to the families of the Israeli Olympic team who were murdered in Germany this week.

Mr. Speaker, I also want to express my condolences to the good people of West Germany who worked long and hard to make the 1972 Olympics a showcase to the world. They had succeeded impressively until the outrageous attack by the Arab terrorists. Unfortunately for the Germans, the 1972 Olympics will always be remembered most of all for the terrorists' attack by the Arabs.

Mr. RODINO. Mr. Speaker, I rise in support of House Resolution 1106. Yesterday, immediately upon learning of the initial attack of the Black September terrorist organization and the shocking murder of two members of the Israeli Olympic team, I expressed my deep distress and extreme frustration at this uncivilized brutal behavior. I stated in the RECORD:

> Once again, Arab terrorists have taken innocent lives and used them for protests and for pawn.

But the subsequent events which occurred since 4:30 a.m. have left me unable to merely emphasize my personal alarm and my own sorrow at this tragedy.

Eleven men have been killed. The lives of 11 men have been destroyed by the seething fanaticism of armed terrorism. I therefore join my thoughts and feelings with the sentiments of all those in this Chamber today and am proud to cosponsor House Resolution 1106. The chorus of our voices speaks loud and clear to the rest of the world and I pray that the depth of our commitment and the trembling anger of our words will help bring an end—a final end—to such outrageous acts.

Mr. DERWINSKI. Mr. Speaker, I join in support of House Resolution 1106 which expresses the deep sympathy we all feel at the death of the Israel athletes who were participating in the Olympics at Munich, Germany. The expeditious processing of this resolution by the House leadership is recognition of the feeling in the Congress when we heard of the tragedly perpetrated by the Arab terrorist group.

There is nothing but condemnation that anyone could possibly feel for the actions of such a wild band. I join Members of the House in expressing deepest regrets to the families of the slain Israeli athletes and to all the Olympic participants who are so appalled and shocked by this tragedy.

In addition, Mr. Speaker, I must express my dismay at statements made by officials of the radical governments in Syria and Iraq in which they attempt to defend and legitimatize this barbaric and senseless action by the terrorist group. There can be no doubt of the political and moral bankruptcy of the present Iraqi and Syrian regimes as evidenced by their public pronouncement of their support of the perpetrators of this tragedy.

This tragedy also demonstrates the obstacles that lie in the path of the efforts to produce permanent peace in the Middle East. We are all aware of the continuing diplomatic efforts of the administration to bring about a permanent solution to the Middle East crisis. Certainly, extreme emotionally motivated crimes such as these senseless killings demonstrate the continuing problems that lie ahead.

Mr. Speaker, all the athletes participating in the Olympics have been called upon to renew their dedication to the noble spirit and great traditions of the Olympic program and, certainly, as witnesses to this tragedy they will honor and respect the memory of the slain Israel athletes. They certainly join all of us in the hope and prayer that further tragedies like this, under any circumstances or at gatherings, can and must not take place.

Mr. McCLORY. Mr. Speaker, I rise in strong support of the resolution (H. Res. 1106) offered by my distinguished colleague from New York (Mr. CELLER).

Mr. Speaker, as I join in shocked disbelief of the events in Munich which brought death and terror at the scene of the XX Olympiad—I pray that from this tragedy there may arise a spirit of renewed faith in mankind—and an era of calm.

Mr. Speaker, the treachery evidenced in today's world which has reached a peak in the infamous murders of members of the Israeli Olympic team—is revolting to the entire civilized world.

Mr. Speaker, Jews and Gentiles alike in our Nation mourn the death of those who have suffered from the guerrilla warfare waged in the Olympic village. We mourn for their families—and we extend sympathy to all whose lives are darkened by this stark tragedy.

Mr. STRATTON. Mr. Speaker, like every other Member of this House I am deeply shocked and saddened by the tragic events that have taken place at the Olympic games in Munich during the past 24 hours. I fully favor the pending resolution as an expression of our deep distress and concern as a national legislative body.

The loss of these Israeli athletes and their trainers and coaches in connection with an historic international event intended to encourage friendship and understanding has profoundly upset all Americans.

One searches with extreme difficulty for a formula that would vent this kind of insane terrorism and violence from disrupting the normal procedures of our civilized society. Yet the truth is that so far no such formula has been found. For years now our international airlanes have been harassed by increasingly wild and violent actions, some of them perpetrated by the same group that was responsible for Munich. Yet the nations of the world are still unable to reach basic agreement on how to deal even with international hijackers.

It is equally difficult to know how to prevent this desperate, insane brand of Arab terrorism which has struck again in Munich—without turning the world into a virtual fortress.

But perhaps the enormity of the events in Munich will have in the long run a beneficial result. Perhaps now at long last the whole world will find itself sufficiently revolted by what has happened to begin moving to put an end to the sanctuaries that have thus far given these terrorist groups the chance to operate. Because what happened yesterday in Munich could happen tomorrow in New York or London or Rome. Until now there has been hesitation on the part of many states to believe that these terrorist organizations in their insane drive against Israel posed any real threat to their own security. Yesterday's events have demonstrated how completely wrong that assumption is.

So Mr. Speaker, as we mourn the loss of the Israeli team members in the senseless Munich tragedy, let us hope that their death will prove to have speeded the day when the civilized, law-abiding nations of the world will join hands to outlaw once and for all the senseless, destructive, violent actions of international, outlaw, terrorist groups that brought on this tragedy.

Mr. WILLIAMS. Mr. Speaker, the ancient Greeks gave us the splendid spirit which is the basis of the Olympic games. They also gave us the great tragedies. Yesterday, in a wanton display of total disregard for human life and the Olympic spirit, a band of political assassins merged the high endeavor of the Olympics and the deepest of tragedy in a chain of events that has shaken the world.

There are no words to describe the international feeling of grief following the senseless death of 11 Israel athletes who were brutally murdered. I saw one news account which referred to a "daring commando attack." Mr. Speaker, an armed attack on athletes who have gathered in peace and brotherhood cannot be called daring. It was treacherous, it was cowardly, it was murderous but, it was in no way daring. Even the ancient Greeks respected the Olympic spirit so much that athletes on their way to compete were given safe passage through the ranks of warring armies.

Mr. Speaker, no civilized nation can condone such barbaric behavior, Today, I call upon the Soviet Union to meet its obligations to the community of nations. The Russians have fostered an air of anti-Semitism both within their own nation and throughout the Middle East. They have aided Arab extremists with financial and military aid. Their own actions have buttressed the totally unreasonable demands of Palestinian guerrilla organizations. It must stop. The Communists must exert whatever powers they have to bring these animalistic attacks on unarmed civilians to a stop.

There have been recent recommendations that all international air service be halted to any nation which gives refuge or help to any air pirate. Mr. Speaker, today I suggest that the U.S. Olympic Committee introduce a motion with the International Olympic Committee calling for each nation to repudiate all acts of violence, and, specifically, this repulsive attack against the Israeli team in Munich, which are contrary to the Olympic spirit. I further suggest that any nation which does not adopt this motion and issue a censure against these terrorist acts, and, specifically, the current one, be barred from all future participation in Olympic competition.

Let there be no mistake, the civilized world cannot ignore this situation in hopes that it will go away. We cannot count on the pressure of international world opinion to resolve this question. In recent years we have all seen that Arab terrorists do not care that they are operating contrary to all accepted norms of civilized conduct. They do not hesitate to slaughter innocent civilians wherever they may be. International flights are subject to hijackings or bombings as long as these fanatics are allowed to exist. Innocent travelers are liable to be gunned down without warning. And, now we see that even international gatherings for peaceful purposes are subject to these terror tactics.

Mr. Speaker, mark my words, it will not end. John Donne said it long ago, "no man is an island, no man stands alone." We are all the targets of these terrorists acts, we are all the victims. Thirty years ago the world stood by while unarmed European Jews were being slaughtered. Now, the Arabs are attacking Israelis, but they do not stop from killing innocents, no matter what their nationality or religion. We must band together with all other civilized nations to eradicate this new plague before it strikes terror into every corner of the world.

Mr. BROOMFIELD. Mr. Speaker, the tragedy at Munich is an outrage and an act of piracy against the entire civilized world. We can only hope that magnified as it was by worldwide television coverage and coupled with the growing monotony of violence in Northern Ireland it will serve to open the eyes of the world.

The bloody interruption of the international Olympic games and the desecration of their concept of brotherhood is a direct and bold challenge to all of the organized governments and civilized people of the world.

It calls for an equally direct and clear reply.

Everyone of those governments and peoples must express outrage in the strongest possible language and follow with actions which will isolate and destroy those who act as outlaws against mankind.

Since the Olympic games are an international event the United Nations should take the lead in this action. In the past the U.N. has been quick to condemn Israel and by its actions has given the green light to Arab terrorists and their impersonal violence.

Now is the time for the world organization to take a strong stand against Arab intransigence and Arab support of these emmissaries of violence. This sort of action should have been taken the last time we witnessed such a slaughter just a few months ago in the massacre at the Tel Aviv Airport. The non-Israeli world was characteristically noncommital then and some officials of the Arab world even expressed sympathy with the terrorists.

That is the kind of irresponsibility that encourages further international tragedies of the sort we witnessed in Munich.

The civilized world must clearly condemn these senseless murders for what they are; but we must not make more of them than that.

It would only compound the tragedy to mistake the action of these few psycopaths for the will of millions of nonviolent Palestinians.

It would be an equally tragic mistake to allow this senseless act of violence to affect the steadily improving relations between Israel and the Arab-Palestinian world.

In the past year or two great progress has been made toward peaceful coexistance between Israel and the Arab nations, especially along the Jordan River.

The routine two-way commerce that has developed across that river and the summer visits of some 150,000 Palestinians to Israeli-occupied territories are clear evidence of this progress.

The real message is that kidnapping and murder of Israelis in Munich is not going to win sympathy for the Palestinian refugees in Syria or Lebanon. It is and must be counterproductive and it has in fact, reduced the sympathy which has existed.

There are legitimate grievances among the Palestinian refugees just as there are legitimate grievances among the peoples of Northern Ireland. But violence only delays, not advances, recognition and redress of these grievances.

Mr. PRICE of Illinois. Mr. Speaker, words cannot express the feelings I have over the outrageous killings of the Israeli Olympic team members.

This cowardly and dastardly attack on humanity has no explanation beyond the fact that a few sick minds have reigned terror on an already beleaguered people.

That the Olympic games, the world symbol of intense but peaceful competition, have been reduced to the spectacle of bloodshed and violence is tragic. But the real tragedy is the blatant hostility of the terrorists whose distorted views have taken the lives of men who have worked so hard to represent their nation with honor and dignity.

There is no question that the Games must continue as a memorial to the courageous spirit of the Israeli Olympic team. The games now symbolize the brave dedication of the Israeli athletes to the ideas of peaceful competition and sportsmanship.

What has occurred underscores the importance of the U.S. commitment to Israel. If terror can be inflicted on an Israeli athletic compound at the Olympic village in Bavaria, there is little doubt that Israel's hostile neighbors could feel emboldened. Israel must maintain her security and vigilance and the United States must continue to meet her moral commitment to the integrity of the State of Israel and her noble people.

In closing, Mr. Speaker, I extend my sincere condolences to the people of Israel and the families of the slain Israeli athletes.

Mr. MAZZOLI. Mr. Speaker, in common with all Members of this body, I rise to express my shock and dismay at the mass murder of 11 members of the Israeli Olympic contingent by Arab guerrillas in Munich yesterday. That the setting of the Olympic games should have provided an opportunity for a barbaric act of this kind to be committed, makes the crime all the more incomprehensible and heinous.

More than any other world event, the Olympic games have provided an opportunity for the citizens of all nations to meet in friendship. Athletes from Communist-bloc nations have met in friendly competition with those of the western democracies. And until yesterday, those of Israel and the Arab nations had enjoyed similar experiences.

This tradition of competition among the states and nations of the world in the Olympic games has persisted for more than a thousand years. The memorial service for the 11 slain Israelis, attended by more than 80,000 persons in the Olympic stadium in Munich, testifies to the extent and depth of this tragedy.

It is to be hoped that calls for revenge against the Arab nations as a means of mitigating the loss of the Israelis athletes will go unheeded and that the issue will be resolved in the knowledge that further bloodshed and terror cannot rectify the dastardly act.

Crimes of this magnitude call for action by all the nations of the world—not only in the condemnation of such acts, but in taking the required steps to halt such barbarism. In this instance the Arab nations should be the first to initiate efforts to halt international terrorism.

As has been already been pointed out by some of our colleagues, crimes by guerrilla bands, whether they be murder, piracy, the skyjacking of aircraft, and the taking of passengers as hostages, can be halted only when all nations deny refuge to such criminals. Undoubtedly, it is the knowledge that certain nations will grant sanctuary to them that encourage terrorists to undertake such crimes.

I am hopeful that the United States will take the lead, as we have endeavored to do in the cases of air piracy, to secure the international outlawing of such atrocities.

Mr. ADDABBO. Mr. Speaker, I rise in support of the resolution to express the shock and outrage of this Chamber over the tragic and senseless killings in Munich, Germany. The members of the Israel Olympic team will be remembered and memoralized in many forums in every corner of the world and the passage of House Resolution 1106 will place this body on record in that respect.

Beyond expressing our feelings, however, I hope that we will redouble our efforts to find a way to bring an end to the violence which has characterized world events during the past decade. The mass murder of Jewish people, or any other people, is not only uncivilized but must be met with firm and determined action to prevent any possible recurrence.

Specifically, I am planning to ask the chairman of the House Committee on Appropriations on which I serve, to order an immediate review of all U.S. assistance to nations in the Middle East which harbor or give help to any kind of terrorists. Such a review could lead to legislation requiring that all U.S. economic or military assistance to such nations be terminated immediately upon a determination by the President that a foreign country has failed to cooperate in international efforts to prevent terrorist activities of the type which occurred in Munich this week.

Similar fund cutoffs could also be appied to nations which give sanctuary to skyjackers or others who attempt to cause international terrorism. It is time to make it clear to those nations of the world, particularly those in the Middle East, that decent people in all parts of the world will no longer tolerate the vicious, destructive acts of international madmen. I hope that by taking this action, we will shock the Arab nations into reality and cause them to enter direct negotiations with Israel to bring about a just and lasting settlement of the Middle East crisis.

Mr. ROUSH. Mr. Speaker, I would like to express my deep regret, my profound sympathy, and my serious concern over the recent slaying of the Israeli athletes who came to the Munich Olympics to celebrate international cooperation and found instead a partisan, nationalistic sentiment that resulted in their untimely deaths.

It is a tragic irony. The plot organized and carried out by the Arab terrorists was outrageous. I offer my profound sympathy first to the families of those slaughtered athletes, and then to the courageous people of Israel who sent them to so ably represent their nation. Their future achievements, their contributions have been brutally cut off. My deep regret is that their lives have been needlessly, senselessly, and uselessly taken. The nation of Israel as well as their families suffer an irreparable loss. So do we all.

My serious concern is also for the shock rendered people all around the world who traditionally look upon the Olympics as a unique arena for displaying the nobility of competitive spirit, the physical prowess of men and women from all over the world, and the universal enthusiasm associated with the Olympic games through thousands of years of human development. Instead of celebrating the oneness of mankind, the brotherhood of all demonstrated through athletic competition, the site of the Olympics has been turned into a mass murder scene and a blot upon the history of mankind.

It is my hope that these events will long be remembered as a warning to us all lest a rigidly and aggressively partisan spirit take hold of any; and my hope that the original goals of the Olympic games will not be lost or tarnished. We owe this as a debt to the people of Israel. That we can scarce do without this important contribution to universal human understanding.

Mr. DE LA GARZA. Mr. Speaker, it is tragically true that the horrors of the dark ages are being matched by the cruelties of the 20th century. We think of this as a civilized world, but the concept applies in the face of the fact that this century has brought about two global wars, innumerable attacks on one nation by another, bloody civil conflicts, assassinations of world leaders, and constantly recurring acts of group and individual violence.

Against this background, free men everywhere feel with deep concern the brutal, savage, and inhuman act of the so-called Palestine guerrillas, against the members of the Israeli team to the XX Olympiad. The whole civilized world should condemn this action.

We extend our heartfelt sympathy to the people of Israel, to the families of the fallen martyrs who went to Munich in peace, to compete as free men, and to participate as individuals and as a nation, like the members of our country's team, to further the cause of peace by friendly competition.

Mr. PATMAN. Mr. Speaker, it was some

30 years ago that a great Republican statesman who was a candidate for the Presidency wrote a book called "One World," the theme of which was that all the people of earth are sons of the Father, bound together in one human family and inhabiting one small planet. I have never forgotten the words spoken by this man, Wendel Wilkie, about anti-Semitism in America—he called it a criminal movement and considered every anti-Semite a traitor to America.

The Arab terrorists who killed 11 Israelis in Munich are traitors to all humanity. It was evil and wicked, a murder so shameful that people talking about it unconsciously avert their eyes with a sense of mass guilt. A crime of this magnitude and horror touches each of us with the blood of martyrs, and cracks the shell of hypocrisy like an earthquake whose lethal warning is that our one world is foul with hate. Mr. Speaker, we in America have seen the work of the assassin, we know the anguish of the Israeli people and our hearts go out to them in sympathy.

Mr. Speaker, it is my belief that all the diverse populations of this earth are today united in sorrow and commiseration with this small nation bereaved of its stalwart Olympians, and that with the Lord's guidance we will yet come to an era of universal understanding—One World with liberty, justice, and peace for all.

Mr. PICKLE. Mr. Speaker, there are times that the words of mankind are not adequate to express the emotional reaction to uncivilized acts. We can use the usual words, such as "horror," "shocked," or "repulsed," to refer to the murder of the Israeli athletes, but these words somehow ring hollow.

This is why I want to add my voice in supporting House Resolution 1106.

Because this resolution expresses the collective sense of individuals of highly diverse views, and indirectly, of all Americans, it is more than just words.

All Americans are numbed by the barbarous murder of the Israeli athletes. Our hearts cringe and grow weak at the thought that, when the strongest and most talented athletes of the world come together in friendly competition, the world of hate and violence to destroy them.

Some say that the Olympics are naive in trying to create an atmosphere of universal cooperation and tranquility. Now that the world of hate and violence have brought the spirit of the Olympics to its knees, does this mean that we are to stop seeking our dream of world harmony because such a dream is naive. Let us affirm that it does not.

And let us also affirm that in this maddening world of political assassinations, and of attempts to kill and terrorize whole populations, that the tendency to dismiss murder and sorrow as commonplace will never overcome the ability for people to have collective grief and pain.

Let us pray that these young people are forever remembered in reverence, and in a spirit of rededication to trying to make the dream of the Olympics a reality.

Mr. Speaker, for now, we can only lower our heads and try to show our sorrow—not only has the proud nation of Israel been attacked, but so has humanity.

Mr. BINGHAM. Mr. Speaker, there are times when words seem inadequate to express our feelings. This is such a time.

I share with my colleagues a sense of outrage, indeed a sense of shame, that human beings should be capable of such cruel and senseless evil. One is even tempted to ask whether such creatures deserve to be called human.

One of the tragic ironies of this massacre is that it should have happened in Germany—the scene of incredible and abominable massacres of Jews in the past. In fairness, however, one must salute the gallantry of those German officials who offered to become hostages in place of the Israelis, though such gallantry might well have been unnecessary had German officials in the first place provided proper security for the Israeli team, particularly in the wake of apparent intelligence reports that a terrorist attack was possible.

Supporters of the Arab cause against Israel may essay to absolve the Arab leaders of guilt, arguing that the commandos were members of a small lunatic fringe. Yet it is significant that as of this afternoon—Wednesday, September 6—only King Hussein of Jordan, of all the Arab leaders, has made a statement condemning and disavowing the acts of the terrorists.

I can find only one small grain of comfort in what has happened: certainly the killings by Palestinian terrorists, especially in the setting of the Olympics, will not serve the Arab cause, but will, on the contrary, give rise to worldwide sympathy for the Israelis.

So for the Israelis themselves and their friends, the Munich massacre will only strengthen their resolve to take all feasible steps in the future to thwart the evil designs of such international bandits as the Palestinian terrorists.

Mr. GUDE. Mr. Speaker, yesterday's tragic and shameful events in Munich have stunned and saddened all of us. Our deepest condolences go out to the families and friends of the victims of such senseless killings. Indeed, we must mourn for ourselves as well, for in a larger sense, we shall all bear the burden of this massive blow to the cause of international brotherhood and peace. How ironic it all seems that such an outrage should occur at what is perhaps the one world event which up to this time has symbolized international cooperation and harmony. How horrifying it is that such an outrage might occur at all.

I join with my colleagues in the deepest sense of grief. I join with the President in his repudiation of these international outlaws and murders who take pride in the destruction of life. I call upon the Arab countries who continue to harbor these terrorists to take decisive action against them once and for all. The killing must stop. The hatred and fear must end.

Mr. FLOOD. Mr. Speaker, no words are sufficient to express the feelings of this body, the sorrow and anger mixed, toward what has transpired in Munich; and if I may be permitted a personal note, I am deeply saddened as a member of the human race by these events.

What has transpired, the deaths of 11 innocent men at the hands of armed thugs, will live in infamy. These Israeli men who dedicated their lives to the peaceful pursuit of athletic competition cannot be allowed to have died in vain. The profound feelings of regret we all feel today cannot be allowed to wither into an apathy tantamount to forgiveness for the murderers and their cohorts. This Nation, and the community of nations around the world, must dedicate themselves to eradicating the poison within our midst. It is with this sense of dedication that I support the resolution calling for the civilized world to cut off from contact with civilized mankind any people or any nation giving sanctuary, support, sympathy, aid, or comfort to acts of murder and barbarism such as those just witnessed at Munich. I urge in the strongest possible terms the quick elimination of all means of support for these international outlaws.

If the murderers are brought to trial and justice is meted out in measure to their heinous crimes—it will not suffice us. If the guerilla training camps are disbanded and children returned to the practice of games and not war—it will not suffice us. If the countries which harbor these assassins become pariahs of the international community—it will not suffice us. We shall only be satisfied when all vestiges of the criminals, their crimes, and their apologists are wiped clean from the sullied face of the earth.

Let us not forget, these were men who died needlessly. Men with families, with wives, and children—innocent men who were victims of madness and who were victims of an ancient quarrel which had been distorted into modern insanity by a band of godless fanatics. It is perhaps a sad commentary for us all that the solution is ancient as well as the quarrel. The solution is brought to mind by these words one sage penned long ago:

> And he shall judge among the nations, and shall rebuke many people; and they shall beat their swords into plowshares, and their spears into pruning hooks; nation shall not lift up sword against nation, neither shall they learn war any more.

Mr. Speaker, I say amen.

Mr. BIESTER. Mr. Speaker, within a matter of hours, we have witnessed the heights and depths of the state of world affairs and human interrelationships.

For the past week, we have seen the nations of the world exercising national pride on the playing fields of the Olympic games at Munich. All races, religions and political ideologies have been represented. The competition has been fierce and spirited, but it has been friendly and good-natured. The Olympic games had been reassuring to us all—that the peoples of the world could come together as strangers to compete and then depart as friends. While not distracting us entirely from our search for solutions to the everyday problems that continue to perplex us on both the national and interntional levels, the Olympics had provided a comforting thought—that international rivalries could be measured in seconds run, kilos lifted and points scored rather than in indices of human destruction.

Then, during that tragic 24-hour period in Munich, all the good that this quadrennial event can accomplish—both now and in the future—was jeopardized and challenged by the actions of a group of ultraradical terrorists.

But what is more, the senseless murder of the members of the Israel Olympic team has damaged the fragile piecing together of peace in the Mideast. The failure of most Arab leaders to denounce the action can only serve to make more tenuous all our efforts toward world peace.

The dilemma faced by the authorities at Munich, in attempting to save the hostages without giving into the extremists' demands, is one which is confronting more and more governments. Airplane hijacking has become a key factor in attempts to obtain money or achieve political ends through the use of human hostages. Until the nations of the world agree on international sanctions to deter such extremist groups and misguided individuals from even considering such acts, political blackmail of the sort that struck at Munich is encouraged to continue. It must be made absolutely clear that such actions will not be condoned in any manner by any country. When no haven exists, when no place of escape is available, then, hopefully, this intolerable situation will be no more.

But, Mr. Speaker, it is my belief that what is best in the human spirit will endure. The spirit of international understanding will survive this shock of terror. Also, the force of the tragedy itself, by the horror of the example will lead those who have been its witness to recoil from violence and find a new collective identity and brotherhood in peace in the wake of these tragic events.

Mr. Speaker, one is never certain that he speaks for all of his constituents on any matter of public concern. But in this instance I know each family, each person, in my congressional district would wish me to speak for them in supporting this resolution and to express our condolence and sorrow to the grieving families of these fine men whose memories must live long after the triumphs and contests this week in Munich.

Mr. WIDNALL. Mr. Speaker, about noontime yesterday, during the television commentary from Munich, one of the reporters made a very trenchant observation about the Arab terrorists. Having himself been held prisoner last April by these thugs, he recited the series of hijackings and kidnapings this gang had attempted through the years. He observed that, as hours passed during each of those past incidents, the chances of survival for the hostages and of failure for the thugs increased. For in the end, he reported, the Arab guerrillas never had the courage to be fully committed.

This time these loathsome people repeated their act and again tried to get out of town, their demands unmet. But the police gave them no choice at a nearby military airport. The thugs died, in shooting initiated and ended by the police. These self-appointed revolutionaries who represent no one but their small, sick, and cowardly cadre did not then stop at two deaths, as one of their pack, in a final note of mindlessness, hurled a grenade into a helicopter filled with bound hostages.

A group of gangsters have outraged the world by attempting to defile a contest of athletics which purports to bring people of the world together. They deserve no more mention on the floor of this House than a total condemnation and a warning to their cowardly group that the world rises in revulsion of their goals and their tactics.

These are not revolutionaries, they are murderers. They do not believe in a cause but feed upon the blood of innocents and the terror of captives. We must recognize these Arab terrorists for what they are: a small group of demented murderers. Let their heinous act go not further in its significance and import.

Of course, I support House Resolution 1106, which expresses our deep sympathy for the victims who were members of the Israel Olympic team for their families and for their great nation.

Mr. PEPPER. Mr. Speaker, this Nation must take immediate steps to bring to justice those who give aid and comfort to the perpetrators of such an outrageous act of barbarism as has occurred at the 20th Olympiad.

Eleven fine, young Israeli athletes and their coaches are now dead, victims of a senseless crime. We cannot bring them back to life.

But we can serve notice here and now on any country harboring associates of these villains that they will no longer be permitted to enjoy the respect of the world community of nations.

It is a well-known fact that the Black September terrorists operate out of bases in Egypt and Lebanon. These terrorist bases must be uprooted and the criminals brought to justice. Sufficient pressure must be brought to bear on both countries to see that they take whatever steps are necessary to eliminate these bases of operation.

Today I offer a resolution which would cut off all relations with any country aiding this terrorist group or permitting it to operate. There have been rumors that we may resume diplomatic relations with Egypt, and we do have an ambassador in Lebanon.

This legislation will cut off direct loans and grants to such nations, whether military or economic.

This legislation will prohibit American-owned aircraft and ships from landing or putting into ports of such nations.

This legislation calls on the United Nations to declare sanctions and embargoes against such nations.

This legislation provides that all means shall be sought by which the civilized world may cut off from contact with civilized mankind any peoples or any nation giving sanctuary, support, sympathy, aid, or comfort to acts of murder and barbarism such as those just witnessed at Munich.

Let us set a policy from this day forth that outlaws will find refuge only in outlaw nations.

Mr. GIAIMO. Mr. Speaker, I am joining Representative EMANUEL CELLER and Representative SIDNEY YATES today in introducing House Resolution 1106, a resolution condemning the killing of Israeli athletes by Arab terrorists in the Olympic village at Munich, and extending sympathy from the United States to the State of Israel and to the families of the deceased.

It was with a great sense of outrage that I heard of this news, Mr. Speaker. The previous acts of terrorism perpetrated by this particular Arab group—the hijacking of a Belgian airliner, the assassination of the Prime Minister of Jordan, the multiple attempts to have hundreds of hardened Arab terrorists released from jails in Israel—have all been wrapped in tragedy and have all seemed to originate in warped, sadistic, uncivilized minds.

What can we offer the people of Israel in such times as this? Our official sympathy as a nation, of course, but also our resolve to stand with them—to do whatever has to be done, be it economic, military or diplomatic action, to isolate those people or nations who would give sanctuary or support to Arab terrorists.

I feel in my heart, Mr. Speaker, that this killing was so barbarous, so incredible, that nothing this body or even the Government of our Nation can do will ever erase its memory. So close to the seemingly dormant memories of Dachau and Buchenwald, Munich has again been the scene of a persecution of Israeli people, and there is little of consolation or reparation that we can find.

Our resolve, however, to stand by Israel, and to eradicate the presence and influence of Arab terrorists, must be stronger than ever, and it is that resolve, as well as our official sympathy, which this resolution is intended to foster and strengthen. I urge that it be adopted by this House of Representatives.

Mr. RIEGLE. Mr. Speaker, I find myself at a loss for words to describe the grief I feel over the senseless murder of the Israeli Olympic athletes. I can only join my colleagues here in Congress and the millions of shocked Americans to express my outrage over such terrorist tactics—and my deepest heartfelt sympathy for the families and countrymen of the fine young athletes who died yesterday.

For me, the Olympics have always stood out as a high water mark in international efforts of cooperation and peaceful relations. That they should be marred by politically-motivated lunatics is a tragic development which not only casts a dark shadow over the 1972 Olympics, but also leaves a deep mark of sorrow in the hearts of people all over the world.

The ironic tragedy of this event is that it occurred at a time when there appeared some prospect of a peaceful resolution of the Israeli-Arab differences. So I urge all people in the world to condemn the use of such terrorist activities and to work together peacefully to help solve our urgent international problems.

Mr. ANNUNZIO. Mr. Speaker, it is with heartfelt sorrow that I join my colleagues in the House of Representatives today to express my shock and deep concern over the Olympic tragedy.

The massacre of 11 members of the Israeli Olympic team participating in the XX Olympiad at Munich by the Palestinian terrorists is an act of moral depravity that can be regarded only with universal contempt and revulsion. That the Arab terrorists chose the Olympic games—which over the decades have been regarded as a symbol of world cooperation and friendship—to carry out this violent deed only compounds the tragedy.

For too long Arab terrorists have found refuge and sanctuary in countries such as Syria, Algeria, and others. Those nations that permit this sanctuary share the heavy guilt for the bloodshed that took place yesterday at Munich. The fanatical and tyrannical acts of a band of outlaws can no longer be condoned or tolerated by those countries in the free world which are committed to world peace and tranquillity.

I want to commend my distinguished colleagues, Honorable EMANUEL CELLER, and Honorable BENJAMIN ROSENTHAL, from New York, for their action in introducing a resolution in the Congress today resolving that all means be sought by the civilized world to cut off from contact with civilized mankind any nations giving sanctuary to acts of murder and barbarism such as those we have just witnessed at Munich. I am in complete agreement with these sentiments and urge our Secretary of State to implement this resolution through appropriate diplomatic channels.

With a heavy heart, I extend my deepest sympathies to the people of Israel and to the families and friends of those who so tragically lost their lives at the 1972 Olympic games.

Mr. RHODES. Mr. Speaker, the terrible and tragic events that took place yesterday in Munich are hard to believe and impossible to understand.

In any setting the irresponsible, barbaric acts of the Arab revolutionaries would have outraged the public conscience. Yet, this was not just any setting; this terrorism took place at the Olympic games, where men from all over the world had come to compete peacefully and respectfully in athletic events.

These terrorists desecrated not only the Olympic concept of brotherhood, but also the elementary basics of humanity.

It is particularly obscene that these sick barbarians interrupted an international event that has been a sign of hope for peaceful international exchange. Their acts of terror must sicken and outrage the people of the world.

Whatever actions need to be taken to stop this type of dastardly crime must be taken. Unfortunately, however, whatever is to be done cannot return the victims of yesterday's inexcusable brutality. The victims, dedicated individuals who worked and sacrificed to gain membership on the Israeli Olympic team, are gone. My prayers and sympathy go out to the families of the innocent victims, and to the survivors of the Israeli team, who have lost close friends and teammates.

Mr. DONOHUE. Mr. Speaker, yesterday, I joined with my colleagues in publicly expressing my horror upon learning of the tragic acts of barbarism and murder perpetrated by an armed band of Arab terrorists at the Israeli quarters of the Olympic Village in Munich, Germany.

As the outrage of the tragedy at Olympic Village continued, it was my fervent hope that such senseless terrorism would be speedily resolved without any further loss of life among the innocent and decent members of the Israeli Olympic team and security people involved.

Today, my hope, and the hopes of civilized people around the world were tragically shattered by the announcement that the barbarous actions of the Arab terrorists had resulted in the terrible murder of all nine Israeli hostages.

Mr. Speaker, this baseless crime is a revolting violation of every law of human decency. It is a crime against every nation in the world. The mindless fanatics who have visited this savage intrusion upon the world can only bring shame and outrage public conscience of nations everywhere.

Those who have turned the Olympic games from a drama of wholesome and peaceful athletic competition into a drama of blood and savagery demand that all of us, as civilized people, resolutely determine that never again will innocent persons be forced to pay the horrendous price of such outlawry.

Mr. Speaker, as we express our heartfelt sympathy to the families and loved ones of the innocent victims of this awful crime, it is only right and proper that all nations join with the people of Israel in a resounding declaration that a common and united way must be and will be found to prevent any recurrence of such an inhuman visitation of brutal piracy and murder upon any group of innocent persons in peaceful assembly anywhere in the civilized world.

Mr. GROSS. Mr. Speaker, I join with the many others on the House floor this afternoon in protesting the outrage that has been perpetrated at Munich. I will support the resolution although I regret its final proviso which is too broad in its demand for sanctions.

I believe this is a matter for the President and the State Department. It would have been much better had there been the opportunity to consider at greater length and amend the resolution. However, the murder of innocent people, citizens of Israel and Germany, cannot be condoned under any circumstance and I say again that under the circumstances I will support the resolution.

Mr. McDADE. Mr. Speaker, we have witnessed yesterday the most tragic and despicable spectacle which has ever intruded upon the peace of the Olympic games.

The brutal attack of the Palestinian guerrillas upon the Olympic team of the nation of Israel is deserving of the condemnation of the entire world.

I know every Member of Congress and, indeed, the whole American people will join in extending their deepest sympathies to the families of those Israeli athletes who were so tragically slain and to the families of those who were killed or wounded in the vain attempt to rescue the athletes.

No words could adequately express our feelings at this outrage. We can only mourn with the rest of the world.

Mr. PRICE of Texas. Mr. Speaker, the record of the 1972 Olympics games at Munich, Germany, has been stained with shame and with the blood of 11 young athletes whose only ambition had been to win honor for their nation through peaceful competition on the sports field.

This year, 1972, has been the year when politics have captured center stage at the Olympics. We first witnessed the humiliating and disgraceful expulsion of young Rhodesian athletes, not because they lacked enthusiasm or the spirit of sportmanship, but because their government was branded a leper by others who were in no position to judge.

Yesterday the grief of reasonable men everywhere was added to greatly by the unbelievable and barbaric murder in coldblood of 11 young Israeli athletes who also wished to represent their country at the games.

Mr. Speaker, the Bible warns us that those who live by the sword shall perish by the sword. If we have only violence and hatred to look forward to each time men of different backgrounds and persuasions draw together, how can the world hope for peace?

I join in extending my deepest sympathies to the families of the slain athletes and to their countrymen who have been the victims of a terrible crime. Our words cannot bring back to life those who have been murdered; but can those deaths perhaps shock and shame us into realizing the fragility of the thread upon which world peace hangs and the daily monumental task facing each of us to work and pray for its preservation?

Mrs. HECKLER of Massachusetts. Mr. Speaker, there is, it seems, no sanctuary from horror and blood, even at the Olympic games.

Cannot the nations of the world gather together for sport without the Horsemen of Death taking part?

Cannot Israel exist as a nation, peacefully, as a haven for people too long terrorized, without its right to exist constantly challenged and without its athletes murdered on one of the world's most festive stages?

Cannot Israel participate in the world community without its every effort bathed in blood?

It seems not.

This is the larger meaning of yesterday's barbarism in Munich. This is what we should ponder as we condemn the savagery for what it is.

Pondering this, I propose that the leaders of all the nations gathered in the Olympic Village go there, and before their young people, answer these questions.

I propose they use the spotlight and the place and the moment in history to bring to trial man's violence and to reach a verdict of peace.

Mr. HORTON. Mr. Speaker, I rise to join in supporting the resolution which is before us, offering an expression of national shock at the inhuman acts which occurred yesterday at the Olympic games in Munich. Our sympathy, while sincere, cannot bring back the lives of the

Israeli athletes and the German personnel who died. Our expressions of disgust and anger will not, unfortunately, do anything to change the outlook or the tactics of the Palestinian guerrillas who somehow feel that their terroristic tantrums will avenge the decision of the United Nations nearly 25 years ago to permit the formation of the State of Israel.

The invasion of the Olympic compound and the seizure of members of the Israeli Olympic team will have no good repercussions, not for the institution of the Olympic games, not for the German Government, not for Arab nations which have willingly harbored Palestinian radicals—not for anyone.

Yet, there is a continuing lesson in this brand of Arab terrorism, last exemplified in the senseless attack carried out at Lod Airport in Israel. The lesson is that these people are so bound up, so entranced by the terrorist dogma they have been fed, that they have lost any instincts for survival. They will stop at nothing to kill, to disrupt, or to destroy—even at the risk of certain death for themselves.

The entire law enforcement, crime prevention, and national defense systems of the civilized world are based on the assumption that all human beings will look after their own survival—even one's mortal enemies. But where we must deal with mentalities which feel they have nothing to lose—or worse yet, are anxious to sacrifice their own lives for some twisted cause, the task of preventing death and destruction at the hands of such persons is an overpowering one.

Mr. Speaker, the language of the resolution before us now does suggest one means of dealing with this terrorist insanity. I quote:

> *Resolved*, That all means be sought by which the civilized world may cut off from contact with civilized mankind any peoples or any nation giving sanctuary, support, sympathy, aid or comfort to acts of murder and barbarism such as those just witnessed at Munich and that the Clerk of the House be directed to communicate these sentiments and expressions to the Secretary of State.

The fact that some nations in the Arab world are willing to harbor the very groups who train, arm, and educate these terrorists is anathema to the human conscience. The fact that terrorists such as these who killed the Israeli athletes, and those who slaughtered innocent civilians at Lod Airport are held up as national heroes in some Arab lands is even more despicable.

The only way these terrorists can survive and continue their mission of death is to continue receiving aid and comfort from civilized governments which either support them or willingly look the other way as they carry on their insanity. These governments must be made to feel the brunt of world opinion in the form of sanctions against them in the world community.

The political pressures from within, which have kept Arab leaders from denouncing these terrorists must be equalled and exceeded by political, diplomatic, and economic pressures from the outside world. These countries must be made to pay a price for their willingness to condone the sick heroics of these suicidal Arab terrorists.

I hope, before the impact of the initial shock of this tragedy is lost on the people of the world, that all nations will have some better understanding of the situation that the State of Israel is up against. The people of this small nation must face the prospect of this brand of terrorism every day of every year. Any Israeli citizen, or any Jew, for that matter, may consider himself a potential target of these groups when circumstances fit the whim of the terrorists. This is why it is so vital that any peace which is finally arrived at in the Middle East be one where Israel can be assured of some real security from the death, destruction, and uncertainty which she has been forced to live with and expect since her birth as a nation.

Thus, Mr. Speaker, I will enthusiastically support this resolution, and I will follow up my support by urging the administration to act quickly to seek ways to sanction those nations who have allowed these sick minds to take root and to flourish on their soil.

Mrs. ABZUG. Mr. Speaker, it is difficult to find words to express my feelings in this moment of sorrow and anger. A dozen innocent people—part of the thousands of individuals gathered together for a nonpolitical celebration of international amity and physical endeavor—have become the victims of a senseless and wanton act of violence.

While the act itself was apparently that of a few desperate individuals, there is little doubt that they and their fellows have received and continue to receive aid and comfort from a number of Arab Governments. As the text of this resolution indicates, the United States and the other nations of the civilized world must take action to compel these host countries to put an end to Arab terrorist activities within their borders. As I have previously indicated, our own country can and should take such actions as cutting off direct foreign aid funds, particularly military funds, to such host countries, by prohibiting the entry of their goods into the United States, by prohibiting American-flag ships and planes from landing within their borders, and by seeking sanctions and embargoes on the part of the United Nations.

How many times must we and the rest of the world wring our hands at this sort of banditry before we insist that it be brought to an end? Nor need we answer violence with violence. The steps which I have outlined above are stringent and are certain to have the desired effect, yet all are economic in nature. I think that they are not only advisable, but necessary, and I hope that we will act to implement them as soon as possible. As we mourn this loss, let us make sure that it is the last.

Mr. CELLER. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. YATES. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 346, nays 0, not voting 85, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. CELLER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on this resolution.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 14896, AMENDING NATIONAL SCHOOL LUNCH ACT

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 14896) to amend the National School Lunch Act, as amended, to assure that adequate funds are available for the conduct of summer food service programs for children from areas in which poor economic conditions exist and from areas in which there are high concentrations of working mothers, and for other purposes related to expanding and strengthening the child nutrition programs, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. GERALD R. FORD. Mr. Speaker, reserving the right to object, I could not hear the title of the bill.

The SPEAKER. The Clerk will read the title of the bill.

The Clerk read the title of the bill.

Mr. GERALD R. FORD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and appoints the following conferees: Messrs. PERKINS, PUCINSKI, HAWKINS, MEEDS, QUIE, ASHBROOK, and RUTH.

CONFERENCE REPORT ON S. 3442, COMMUNICABLE DISEASE CONTROL AMENDMENTS OF 1972

Mr. STAGGERS submitted the following conference report and statement on the bill (S. 3442) to amend the Public Health Service Act to extend the authorization for grants for communicable disease control and vaccination assistance, and for other purposes:

CONFERENCE REPORT (H. REPT. 92-1376)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3442) to amend the Public Health Service Act to extend the authorization for grants for communicable disease control and vaccination assistance, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

SECTION 1. This Act may be cited as the "Communicable Disease Control Amendments Act of 1972".

TITLE I—COMMUNICABLE DISEASE CONTROL PROGRAMS

SEC. 101. Section 317 of the Public Health Service Act (42 U.S.C. 347b) is amended to read as follows:

"GRANTS FOR VACCINATION PROGRAMS AND OTHER COMMUNICABLE DISEASE CONTROL PROGRAMS

"SEC. 317. (a) The Secretary may make grants to States and, in consultation with the State health authority, to agencies and political subdivisions of States to assist in meeting the costs of communicable disease control programs. In making a grant under this section, the Secretary shall give consideration to (1) the relative extent, in the area served by the applicant for the grant, of the problems which relate to one or more of the communicable diseases referred to in subsection (h)(1), and (2) the design of the applicant's communicable disease program to determine its effectiveness.

"(b)(1) No grant may be made under this section unless an application therefor has been submitted to, and approved by, the Secretary. Except as provided in paragraph (2), such application shall be in such form, submitted in such manner, and contain such information, as the Secretary shall by regulation prescribe.

"(2) An application for a grant for a fiscal year beginning after June 30, 1973, shall—

"(A) set forth with particularity the objectives (and their priorities, as determined in accordance with such regulations as the Secretary may prescribe) of the applicant for each of the programs he proposes to conduct with assistance from a grant under this section;

"(B) contain assurances satisfactory to the Secretary that, in the fiscal year for which a grant under this section is applied for, the applicant will conduct such programs as may be necessary to develop an awareness in those persons in the area served by the applicant who are most susceptible to the diseases referred to in subsection (h)(1) of the importance of immunization against such diseases, to encourage such persons to seek appropriate immunization, and to facilitate access by such persons to immunization services; and

"(C) provide for the reporting to the Secretary of such information as he may require concerning (i) the problems, in the area served by the applicant, which relate to any communicable disease referred to in subsection (h)(1), and (ii) the communicable disease control programs of the applicant.

"(3) Nothing in this section shall be construed to require any State or any agency or political subdivision of a State to have a communicable disease control program which would require any person, who objects to any treatment provided under such a program, to be treated or to have any child or ward of his treated under such a program.

"(c)(1) Payments under grants under this section may be made in advance on the basis of estimates or by way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of this section.

"(2) The Secretary, at the request of a recipient of a grant under this section, may reduce such grant by the fair market value of any supplies (including vaccines and other preventive agents) or equipment furnished to such recipient and by the amount of the pay, allowances, travel expenses, and any other costs in connection with the detail of an officer or employee of the Government to the recipient when the furnishing of such supplies or equipment or the detail of such an officer or employee is for the convenience of and at the request of such recipient and for the purpose of carrying out the program with respect to which the grant under this section is made. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment, or in detailing the personnel, on which the reduction of such grant is based.

"(d)(1) There is authorized to be appropriated $11,000,000 for the fiscal year ending June 30, 1973, $11,000,000 for the fiscal year ending June 30, 1974, and $11,000,000 for the fiscal year ending June 30, 1975, for grants under this section for communicable disease control programs for tuberculosis.

"(2) There is authorized to be appropriated $6,000,000 for the fiscal year ending June 30, 1973, $6,000,000 for the fiscal year ending June 30, 1974, and $6,000,000 for the fiscal year ending June 30, 1975, for grants under this section for communicable disease control programs for measles.

"(3) There is authorized to be appropriated $23,000,000 for the fiscal year ending June 30, 1973, $23,000,000 for the fiscal year ending June 30, 1974, and $23,000,000 for the fiscal year ending June 30, 1975, for grants under this section for communicable disease control programs other than communicable disease control programs for which appropriations are authorized by paragraph (1) or (2).

"(4) Not to exceed 50 per centum of the amount appropriated for any fiscal year under any of the preceding paragraphs of this subsection may be used by the Secretary for grants for such fiscal year under (A) programs for which appropriations are authorized under any one or more of the other paragraphs of this subsection if the Secretary determines that such use will better carry out the purposes of this section, and (B) section 318.

"(e) The Secretary shall develop a plan under which personnel, equipment, medical supplies, and other resources of the Service and other agencies under his jurisdiction may be effectively utilized to meet epidemics of, or other health emergencies involving, any disease referred to in subsection (h)(1). There is authorized to be appropriated to the Secretary $5,000,000 for the fiscal year ending June 30, 1973, $5,000,000 for the fiscal year ending June 30, 1974, and $5,000,000 for the fiscal year ending June 30, 1975, for costs incurred in utilizing such resources in accordance with such plan.

"(f)(1) Except as provided in section 318 (g), no funds appropriated under any provision of this Act other than subsection (d) may be used to make grants in any fiscal year for communicable disease control programs if (A) grants for such programs are authorized by this section, and (B) all the funds authorized to be appropriated under that subsection for that fiscal year have not been appropriated for that fiscal year and obligated in that fiscal year.

"(2) No funds appropriated under any provision of this Act other than subsection (e) may be used in any fiscal year for costs incurred in utilizing resources of the Service in accordance with a plan developed in accordance with that subsection if all the funds authorized to be appropriated under that subsection for that fiscal year have not been appropriated for that fiscal year and obligated in that fiscal year.

"(g) The Secretary shall submit to the President for submission to the Congress on January 1 of each year a report (1) on the effectiveness of all Federal and other public and private activities in preventing and controlling the diseases referred to in subsection (h)(1), (2) on the extent of the problems presented by such diseases, (3) on the effectiveness of the activities, assisted under grants under this section, in preventing and controlling such diseases, and (4) setting forth a plan for the coming year for the prevention and control of such diseases.

"(h) For the purposes of this section:

"(1) The term 'communicable disease control program' means a program which is designed and conducted so as to contribute to national protection against tuberculosis, rubella, measles, Rh disease, poliomyelitis, diphtheria, tetanus, whooping cough, or other communicable diseases (other than venereal disease) which are transmitted from State to State, are amenable to reduction, and are determined by the Secretary to be of national significance. Such term includes vaccination programs, laboratory services, and studies to determine the communicable disease control needs of States and political subdivisions of States and the means of best meeting such needs.

"(2) The term 'State' includes the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, the Virgin Islands, and the District of Columbia.

"(i) Nothing in this section shall limit or otherwise restrict the use of funds which are granted to a State or to an agency or a political subdivision of a State under provisions of Federal law (other than this Act) and which are available for the conduct of communicable disease control programs from being used in connection with programs assisted through grants under this section."

SEC. 102. The amendment made by section 101 of this title shall apply to grants made under section 317 of the Public Health Service Act after June 30, 1972, except that subsection (d) of such section as amended by section 101 shall take effect on the date of enactment of this Act.

TITLE II—VENEREAL DISEASE PREVENTION AND CONTROL

SEC. 201. This title may be cited as the "National Venereal Disease Prevention and Control Act".

SEC. 202. (a) The Congress finds and declares that—

(1) the number of reported cases of venereal disease has reached epidemic proportions in the United States;

(2) the number of patients with venereal disease reported to public health authorities is only a fraction of those treated by physicians;

(3) the incidence of venereal disease is particularly high among individuals in the 20–24 age group, and in metropolitan areas;

(4) venereal disease accounts for needless deaths and leads to such severe disabilities as sterility, insanity, blindness, and crippling conditions;

(5) the number of cases of congenital syphilis, a preventable disease, in infants under one year of age increased by 33⅓ per centum between 1970 and 1971;

(6) health education programs in schools and through the mass media may prevent a substantial portion of the venereal disease problem; and

(7) medical authorities have no successful vaccine for syphilis or gonorrhea and no blood test for the detection of gonorrhea among the large reservoir of asymptomatic females.

(b) In order to preserve and protect the health and welfare of all citizens, it is the purpose of this Act to establish a national program for the prevention and control of venereal disease.

SEC. 203. Part B of title III of the Public Health Service Act is amended by adding immediately after section 317 thereof the following new section:

"PROJECTS AND PROGRAMS FOR THE PREVENTION AND CONTROL OF VENEREAL DISEASE

"SEC. 318. (a) The Secretary may provide technical assistance to appropriate public authorities and scientific institutions for their research, training, and public health programs for the prevention and control of venereal disease.

"(b)(1) The Secretary is authorized to make grants to States, political subdivisions of States, and any other public or nonprofit private entity for projects for the conduct of research, demonstrations, and training for the prevention and control of venereal disease.

"(2) For the purpose of carrying out this subsection, there is authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1973, and for each of the next two fiscal years.

"(c)(1) There is authorized to be appropriated $25,000,000 for the fiscal year ending June 30, 1973, and for each of the next two fiscal years, to enable the Secretary to make grants to State health authorities to assist the States in establishing and maintaining adequate public health programs for the diagnosis and treatment of venereal disease. For purposes of this subsection, the term 'State' means each of the several States of the United States, the District of Columbia, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of Puerto Rico.

"(2) Any State desiring to receive a grant under this subsection shall submit to the Secretary a State plan for a public health program for the diagnosis and treatment of venereal disease. Each State plan shall—

"(A) provide for the administration or supervision of administration of the State plan by the State health authority;

"(B) set forth the policies and procedures to be followed in the expenditure of the funds paid to the State under this subsection;

"(C) provide that the public health services furnished under the State plan will include the provision of Statewide laboratory services (including dark field microscope techniques for the diagnosis of both gonorrhea and syphilis), which services will be provided in accordance with standards prescribed by regulations, including standards as to the scope and quality of such services;

"(D) contain or be supported by assurances satisfactory to the Secretary that (i) not less than 70 per centum of the funds paid to the State under this subsection will be used to provide and strengthen public health services in its political subdivisions for the diagnosis and treatment of venereal disease; (ii) such funds will be used to supplement and, to the extent practical, to increase the level of funds that would otherwise be made available for the purposes for which the Federal funds are provided under this subsection and will not supplant any non-Federal funds which would otherwise be available for such purposes; and (iii) the plan is compatible with the total health program of the State;

"(E) provide that the State health authority will from time to time, but not less often than annually, review and evaluate its State plan approved under this subsection, and submit to the Secretary appropriate modifications thereof;

"(F) provide that the State health authority will make such reports, in such form and containing such information, as the Secretary may from time to time reasonably require, and will keep such records and afford such access thereto as the Secretary finds necessary to assure the correctness and verification of such reports;

"(G) provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of and accounting for funds paid to the State under this subsection; and

"(H) contain such additional information and assurances as the Secretary may find necessary to carry out the purposes of this subsection.

The Secretary shall approve any State plan and any modification thereof which meets the requirements of this paragraph.

"(3)(A) Grants under this subsection shall be made from allotments to States made in accordance with this paragraph. For each fiscal year the Secretary shall, in accordance with regulations, allot the sums appropriated under paragraph (1) for such year among the States on the basis of the incidence of veneral disease in, and the population of, the respective States; except that no State's allotment shall be less than $75,000 for any fiscal year.

"(B) Any amount allotted to a State (other than the Virgin Islands, American Samoa, Guam, the Trust Territory of the Pacific Islands, and the Commonwealth of Puerto Rico) under subparagrah (A) for a fiscal year and remaining unobligated at the end of such year shall remain available to such State, for the purposes of which made, for the next fiscal year (and for such year only), and any such amount shall be in addition to the amounts allotted to such State for such purpose for such next fiscal year; except that any such amount, remaining unobligated at the end of the sixth month following the end of such year for which it was allotted, which the Secretary determines will remain unobligated by the close of such next fiscal year, may be reallotted by the Secretary, to be available for the purposes for which made until the close of such next fiscal year, to other States which have need therefor, on such basis as the Secretary deems equitable and consistent with the purposes of this subsection, and any amount so reallotted to a State shall be in addition to the amounts allotted and available to the States for the same period. Any amount allotted under subparagraph (A) to the Virgin Islands, American Samoa, Guam, the Trust Territory of the Pacific Islands, or the Commonwealth of Puerto Rico for a fiscal year and remaining unobligated at the end of such year shall remain available to it for the purposes for which made, for the next two fiscal years (and for such years only), and any such amount shall be in addition to the amounts allotted to it for such purposes for each of such next two fiscal years; except that any such amount, remaining unobligated at the end of the first of such next two years, which the Secretary determines will remain unobligated at the close of the second of such next two years, may be reallotted by the Secretary, to be available for the purposes for which made until the close of the second of such next two years, to any other of such named States which have need therefor, on such basis as the Secretary deems equitable and consistent with the purposes of this subsection, and any amount so reallotted to any such named State shall be in addition to any other amounts allotted and available to it for the same period.

"(4) The amount of any grant under this subsection for public health programs under an approved State plan shall be determined by the Secretary, except that no grant for any such program may exceed 90 per centum of its cost (as determined under regulations of the Secretary). Payments under grants under this subsection shall be made from time to time in advance on the basis of estimates by the Secretary or by way of reimbursement, with necessary adjustments on account of previous underpayments or overpayments.

"(d)(1) The Secretary is authorized to make project grants to States and, in consultation with the State health authority, to political subdivisions of States, for—

"(A) venereal disease surveillance activities, including the reporting, screening, and followup of diagnostic tests for, and diagnosed cases of, venereal disease;

"(B) casefinding and case followup activities respecting venereal disease, including contact tracing of infectious cases of venereal disease;

"(C) interstate epidemiologic referral and followup activities respecting venereal disease;

"(D) professional and public venereal disease education activities; and

"(E) such special studies or demonstrations to evaluate or test venereal disease control as may be prescribed by the Secretary.

"(2) For the purpose of carrying out this subsection, there is authorized to be appropriated $30,000,000 for the fiscal year ending June 30, 1973, and for each of the next two succeeding fiscal years.

"(e)(1) Grants made under subsection (b) or (d) of this section shall be made on such terms and conditions as the Secretary finds necessary to carry out the purposes of such subsection, and payments under any such grants shall be made in advance or by way of reimbursement and in such installments as the Secretary finds necessary.

"(2) Each recipient of a grant under this section shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such grant, the total cost of the project or undertaking in connection with which such grant was given or used, and the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(3) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipients of grants under this section that are pertinent to such grants.

"(4) The Secretary, at the request of a recipient of a grant under this section, may reduce such grant by the fair market value of any supplies or equipment furnished to such recipient and by the amount of pay, allowances, travel expenses, and any other costs in connection with the detail of an officer or employee of the United States to the recipient when the furnishing of such supplies or equipment or the detail of such an officer or employee is for the convenience of and at the request of such recipient and for the purpose of carrying out the program with respect to which the grant under this section is made. The amount by which any such grant is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies, equipment, or personal services on which the reduction of such grant is based; and, in the case of a grant under subsection (c), such amount shall be deemed a part of the grant to such recipient and shall, for the purposes of that subsection, be deemed to have been paid to such recipient.

"(5) All information obtained in connection with the examination, care, or treatment of any individual under any program which is being carried out with a grant made under this section shall not, without such individual's consent, be disclosed except as may be necessary to provide service to him. Information derived from any such program may be disclosed—

"(A) in summary, statistical, or other form, or

"(B) for clinical or research purposes, but only if the identity of the individuals diagnosed or provided care or treatment under such program is not disclosed.

"(f) Except as provided in section 317(d) (4), no funds appropriated under any provision of this Act other than this section may be used to make grants in any fiscal year for programs or projects respecting venereal disease if (1) grants for such programs or projects are authorized by this section, and (2) all the funds authorized to be appropriated under this section for that fiscal year have not been appropriated for that fiscal year and obligated in that fiscal year.

"(g) Not to exceed 50 per centum of the amounts appropriated for any fiscal year under subsections (b), (c), and (d) of this section may be used by the Secretary for grants for such fiscal year under section 317.

"(h) Nothing in this section shall be construed to require any State or any political subdivision of a State to have a venereal disease program which would require any person, who objects to any treatment provided under such a program, to be treated or to have any child or ward of his treated under such a program."

TITLE III—PROJECT GRANTS AND CONTRACTS FOR FAMILY PLANNING SERVICES

SEC. 301. Section 1001(c) of the Public Health Service Act is amended by striking out "$90,000,000" and inserting "$111,500,000" in lieu thereof.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3442) to amend the Public Health Service Act to extend the authorization for grants for communicable disease control and vaccination assistance and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

I. AUTHORIZATION OF APPROPRIATIONS FOR COMMUNICABLE DISEASE PROGRAMS

The Senate bill provided a single authorization of appropriations for section 317 communicable disease programs, as follows:

$90 million for fiscal year 1973.
$90 million for fiscal year 1974.
$90 million for fiscal year 1975.
$90 million for fiscal year 1976.
$90 million for fiscal year 1977.

The aggregate amount of the House amendment's authorization of appropriations for section 317 communicable disease programs was—

$85 million for fiscal year 1973;
$85 million for fiscal year 1974; and
$85 million for fiscal year 1975.

The authorizations of appropriations for each of the 3 fiscal years are made in the House amendment in the following manner;

(1) $50 million for grants for communicable disease control programs for veneral diseases.

(2) $10 million for grants for such programs for tuberculosis.

(3) $5 million for grants for such programs for measles.

(4) $20 million for grants for such programs for other diseases.

Up to ½ of the amount appropriated for any fiscal year for grants under one category of programs could be used for grants under other categories of programs.

The conference substitute authorizes appropriations for three fiscal years for communicable disease programs. Authorizations are separately made for the following three categories of communicable disease programs: Programs for tuberculosis, programs for measles, and programs for other communicable diseases. The amounts authorized to be appropriated for each of the three fiscal years are—

(1) $11 million for grants for communicable disease programs for tuberculosis,

(2) $6 million for grants for such programs for measles, and

(3) $23 million for grants for such programs for other diseases. The aggregate amount authorized to be appropriated for each of the three fiscal years is $40 million. No funds are authorized to be appropriated under section 317 for programs respecting veneral disease since the conference substitute adopts the Senate bill's provisions for a separate program of assistance for such programs. The conference substitute adopts

the provision of the House amendment which permits up to one-half of the amount appropriated for any fiscal year for grants under one category of programs to be used for grants under other categories of programs. (See item IX infra).

II. GRANTS TO POLITICAL SUBDIVISIONS

The Senate bill replaces the requirement in existing law that the State health authority must give its approval before a grant may be made to political subdivisions of the State with a requirement that the State health authority must be consulted before such a grant may be made.

The House amendment has no comparable provision.

The conference substitute adopts the provision of the Senate bill.

III. CONSIDERATION OF LEVELS PERFORMANCE IN PREVENTING AND CONTROLLING COMMUNICABLE DISEASES

The Senate bill replaces the requirement in existing law that the Secretary in making a grant is to consider the levels of performance in preventing and controlling communicable diseases with a requirement that he consider the design of the public health program to assure effective performance in preventing and controlling such diseases.

The House amendment has no comparable provision.

The conference substitute requires the Secretary to consider the design of an applicant's communicable disease program to determine its effectiveness.

IV. APPLICATION REQUIREMENTS

The House amendment requires applications for grants to contain such information as the Secretary may require; and, in addition, requires an application for a grant for any fiscal year after fiscal year 1973 to—

(1) set forth the objectives (and their priorities) of each program for which assistance is sought;

(2) contain assurances that the applicant (A) will conduct appropriate programs to develop in persons most susceptible to communicable diseases an awareness of the importance of immunization, (B) will encourage such persons to seek immunization, and (C) will facilitate access by such persons to immunization services;

(3) contain assurances respecting venereal disease programs; and

(4) provide for making certain reports to the Secretary.

The Senate bill has no comparable provision.

The conference substitute is the same as the House amendment, except that to conform to the adoption of a new separate program of assistance for venereal disease programs the required assurances relating to venereal disease programs is omitted.

V. EDUCATION PROGRAMS

The Senate bill provides that the Secretary may make grants and contracts for projects to make persons aware of the consequences of communicable diseases and of the availability of programs for immunization against such diseases. $5 million is authorized for fiscal year 1973 and for each of the next 4 fiscal years.

The House amendment and the conference substitute require applicants for grants to give assurance that they will carry out such programs (see item IV supra).

The conference substitute is the same as the House amendment.

VI. PLANNING FOR EPIDEMICS AND OTHER HEALTH EMERGENCIES

The House amendment directs the Secretary to develop a plan for utilization of Federal resources under his jurisdiction to meet epidemics and other health emergencies involving communicable diseases. $5 million is authorized for fiscal year 1973 and for each of the next 2 fiscal years for costs incurred in utilizing such resources in accordance with the Secretary's plan.

The Senate bill has no comparable provision.

The conference substitute adopts the House amendment.

VII. LIMITATION ON SOURCE OF FUNDS FOR COMMUNICABLE DISEASE CONTROL PROGRAMS

The Senate bill provides that no funds appropriated pursuant to any provision of the Public Health Service Act (other than section 317) may be used for any program for which funds appropriated under section 317 may be used, except that venereal disease programs could be funded under the new section 318 as well as section 317.

The House amendment has no comparable provision.

The conference substitute is the same as the Senate bill except that (1) up to 50 percent of the funds appropriated under section 317(d) may be used for venereal disease programs under section 318 and up to 50 percent of the funds appropriated under section 318 may be used for communicable disease programs under section 317, (2) the limitation is extended to apply to funding of costs incurred by the Secretary in meeting epidemics and other health emergencies (see item VI supra), and (3) the limitation is not to apply in a fiscal year if all funds authorized to be appropriated for that fiscal year have been appropriated and obligated. The conferees intend to prohibit the making of grants under other sections of the Public Health Service Act principally for, or limited for use in, communicable disease control programs. The conferees do not, however, intend to preclude the award of grants under other sections of the Act for use in programs that involve communicable disease programs as ancillary or subsidiary features.

VIII. ANNUAL REPORT

The Senate bill provides that the Secretary's annual report is to cover the effectiveness of all activities (not just those assisted under section 317) for the prevention and control of communicable diseases.

The House amendment revises the reporting requirement to require (1) the report to be submitted on January 1 of each year, (2) the report to contain an assessment of the problems presented by communicable diseases and the effectiveness of the programs assisted in preventing and controlling such diseases, and (3) the report to set forth a plan for the coming year for the prevention and control of communicable diseases.

The conference substitute combines the provisions of the Senate bill and the House amendment.

IX. VENEREAL DISEASE PROGRAM

The Senate bill adds a new section 318 to title III of the Public Health Service Act to authorize the Secretary (1) to conduct and render assistance for research and training in, and for public health programs relating to, the prevention and control of venereal disease, (2) to make project grants for the conduct of research, demonstrations, and training with respect to the prevention and control of venereal disease, (3) to make grants to States for establishing and maintaining public health programs for the diagnosis and treatment of venereal disease, and (4) to make project grants to States and, in consultation with the State health authority, to political subdivisions for the conduct of certain venereal disease prevention and control programs. For the grants described in clause (2) there is authorized to be appropriated $15 million for fiscal year 1973 and for each of the next 2 fiscal years; for the grants described in clause (3) there is authorized to be appropriated $30 million for fiscal year 1973 and for each of the next 2 fiscal years; and for the grants described in clause (4) there is authorized to be appropriated $30 million for fiscal year 1973 and for each of the next 2 fiscal years.

The House amendment contains no separate program for assistance for venereal disease under communicable disease programs.

The conference substitute is the same as the Senate bill except that—

(1) it is made clear that the assistance described in clause (1) of the description of the Senate bill is technical assistance only,

(2) the authorization of appropriations for the project grants described in clause (2) of such description is set at $7.5 million for each fiscal year,

(3) the authorization for the program grants described in clause (3) of such description is set at $25 million for each fiscal year,

(4) the authorization of appropriations for the project grants described in clause (4) of such description is set at $30 million for each fiscal year,

(5) a provision in section 317 protecting the right of persons to refuse treatment under programs for which assistance is authorized is made applicable to venereal disease programs assisted under this section, and

(6) the provision in section 317 placing a limitation on the source of funds for programs is made applicable to funding for the venereal disease programs for which assistance is authorized.

X. PROJECT GRANTS AND CONTRACTS FOR FAMILY PLANNING SERVICES

The Senate bill increases the authorization of appropriations for project grants and contracts for family planning services under title X of the Public Health Service Act for fiscal year 1973 from $90 million to $127,300,000.

The House amendment contains no comparable provision.

The conference substitute adopts the provision of the Senate amendment, except that the authorization of appropriations for fiscal year 1973 is set at $111.5 million.

XI. PROJECT GRANTS FOR HEALTH SERVICES DEVELOPMENT

The Senate bill increases authorization of appropriations under section 314(e) of the Public Health Service Act for fiscal year 1973 from $157 million to $179 million for grants under that section to cover part of the cost of (1) providing services to meet health needs of limited geographic scope or of specialized regional or national significance, or (2) developing and supporting for an initial period new programs of health services.

The House amendment and the conference substitute contain no comparable provision.

MEMORIAL IN HONOR OF SEABEES OF U.S. NAVY

Mr. NEDZI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the joint resolution (H.J. Res. 55) proposing the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of the Seabees of the U.S. Navy, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Page 3, line 3, strike out "Interior." and insert: "Interior, or, if the memorial is erected on public grounds belonging to or under the jurisdiction of the District of Columbia, the government of the District of Columbia."

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN REPORTS

Mr. YOUNG of Texas. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

WHEAT RESEARCH AND PROMOTION

Mr. YOUNG of Texas. Mr. Speaker, on behalf of the Committee on Rules, I call up House Resolution 1093 and ask for its immediate consideration.

The Clerk read the resolution of follows:

H. RES. 1093

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13514) to enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Texas (Mr. YOUNG) is recognized for 1 hour.

Mr. YOUNG of Texas. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Nebraska (Mr. MARTIN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1093 provides an open rule with 1 hour of general debate for consideration of H.R. 13514 for wheat research and promotion.

As wheat production throughout the world increases, our export of wheat products declines. Due to the keen competition the total volume of wheat exported is gradually reducing.

The purpose of H.R. 13514 is to provide a program to expand the market for wheat products for human consumption within the United States.

A wheat industry council would be established, composed of 15 voting members and seven additional members, one of whom shall be a USDA official. The members are to be appointed by the Secretary of Agriculture.

The council will be a nonprofit, nongovernment, tax-exempt organization. Its purpose will be to develop research, education, and promotion plans to expand the use of wheat for human consumption here at home.

Its expenses and costs of administration within the USDA will be paid from assessment funds, to be imposed on each hundredweight of processed wheat intended for human use within the United States: 1 cent per hundredweight the first year and not more than 2½ cents in subsequent years; the amount of assessment to be added as a separate item to invoice by initial and subsequent processors. However, a processor shall not pay an assessment if the buyer certifies that the wheat will not be used within the United States.

The council has authority to collect assessments, including court costs and attorneys' fees, and is to conduct or contract for projects. It will be responsible to and subject to audit by the Secretary of Agriculture.

Processors, who shall serve without pay as collection agents, shall make a monthly report to the council.

It is estimated that approximately $2.6 million will be raised the first year and no more than $6 million in each succeeding year.

Cost to the USDA is estimated at $55,000 per year for each of the next 5 years.

Mr. Speaker, I urge the adoption of the rule.

Mr. MARTIN. Mr. Speaker, I yield myself such time as I may consume.

House Resolution 1093 provides for open rule with 1 hour of debate on H.R. 13514 to establish a program for research and promotion to expand markets for wheat markets.

The bill establishes a Wheat Industry Council composed of 15 voting members and seven additional members, appointed by the Secretary of Agriculture. The voting members must be selected from nominees chosen by the Wheat and Wheat Foods Foundation, a private industry organization representing wheat producers, processors, and end-product manufacturers. The purpose of the Council is to administer the program and collect assessments, which are to be levied on processed wheat. For the first year, the assessment will be 1 cent per hundredweight of processed wheat, which is expected to raise about $2,600,000.

The cost to the Government as a result of this bill is about $55,000 for administrative costs per year. However, it is expected that the Government will be reimbursed from assessments, according to a letter from the Department of Agriculture.

Mr. Speaker, I support this legislation, and support the rule, and urge its adoption.

Mr. Speaker, I yield 2 minutes to the gentleman from California, (Mr. TEAGUE).

Mr. TEAGUE of California. Mr. Speaker, in the past I have supported bills similar to this proposal now before us dealing with other commodities such as cotton, potatoes, and other farm crops. However, all of those bills had an important feature that this bill does not have, and that is that they all provided for a referendum whereby the farmers themselves were given an opportunity to vote whether they wanted to engage in such a program. So, Mr. Speaker, in its present form I am opposed to this bill. I understand there will be an amendment offered that requires a referendum. If that were to be adopted the bill would be greatly improved, although there are some other features that I do not particularly like, and which I will discuss at a later time.

Mr. Speaker, I thank the gentleman for yielding.

Mr. YOUNG of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. PURCELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13514) to enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. PURCELL).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 13514, with Mr. ROUSH in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. PURCELL) will be recognized for 30 minutes, and the gentleman from California (Mr. TEAGUE) will be recognized for 30 minutes.

Mr. TEAGUE of California. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, this speech that I am about to make is really an attack on the bill in its present form.

I very much hope that the bill will be amended in such a way so that some of the remarks I am now about to deliver will not be applicable to the bill in its final form.

Mr. Chairman, I rise in opposition to H.R. 13514.

This bill, which would place an additional and unnecessary burden on the already overburdened pocketbooks of American consumers, is certainly not needed at this time.

We all know that wheat prices are rising and that bread, cookies, cake, and other wheat products are rising right along with them.

Wheat processors in fact have asked the Price Commission for authority to raise prices on these foods even further.

Now the House has before it the opportunity to express itself clearly on the question of whether we are in favor of imposing another $2 to $6 million annually on the consuming public for the purpose of financing further wheat research, sales, and promotion efforts.

I say the answer to that question should be a resounding "No" because of three reasons.

First, the bill duplicates the efforts of an existing wheat promotion and research agency created just 2 years ago by Public Law 91-430. This agency, called the National Wheat Institute, has over $2.5 million now available to it for carrying out the same kind of programs as described by this bill.

The National Farmers Union pointed out this fact during the hearings on the bill when Mr. Barton of that organization said:

> Third, the National Wheat Institute, financed by inverse subsidies on wheat exports, is a functioning agency charged with the same objectives as the agency to be created in the proposed legislation. This group is totally under the control of producers. If there is need for any additional research and promotion, it would be preferable to expand the funds available to the National Wheat Institute rather than to create a rival competing administrative structure with identical objectives.

Second, the bill does not give individual producers or processors the chance to either express their disapproval of the program or to apply for a refund of any assessments made against them.

This feature, which was rejected by the committee on a 19 to 13 vote, makes this program different from the research and promotion programs that now apply to such commodities as potatoes, cotton, dairy products, and marketing order crops.

Mr. William Kuhfus, president of the American Farm Bureau Federation, stated his organization's position on this matter as follows:

> Accordingly, we believe that it would be an injustice to wheat producers to institute the proposed program without a two-thirds favorable vote in a producer referendum.
>
> We also believe that it would be undesirable to depart from the precedent followed in the Cotton and Potato Promotion Acts which provide for refunds to producers who do not wish to participate.

Mr. Joseph Creed, representing the Biscuit and Crackers Manufacturing Association of America, stated his organization's position as follows:

> The Association's membership believes the financing of such a program should be on a voluntary basis or alternatively, if assessments are levied by law, each end product manufacturer should have the option to have his assessment refunded.

Mr. D. M. Mennell, president of the Mennell Milling Co. of Fostoria, Ohio, stated his view as follows:

> Additionally, this bill is unique in that there is no provision for any kind of referendum, and there is no means of escaping the tax if you are opposed to it. Bills similar to this one, such as the recent potato act, contain both of these features.

Yes, Mr. Chairman, this bill denies individual choice—it creates an excise-tax structure in the hands of private citizens which in and of itself is of questionable constitutional validity—and it prevents both farmers and processors from any effective channel of opposition to the plans that the Wheat Industry Council may conceive.

My third and final reason for opposing this bill is that two major farmer organizations, the Farm Bureau and the Farmers Union, which more often than not fail to agree, do agree that the bill in its present form is unsatisfactory.

Thus, if the farmers do not want the bill and consumers derive no benefit from it, why in the world should the House approve it?

I say we should not.

Mr. PURCELL. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, in partial answer to the statements made by my distinguished colleague and my dear friend, the gentleman from California (Mr. TEAGUE), I would say this bill does not in more than the slightest way compare with the cotton checkoff in which the producer is paying a checkoff. In this instance the producer is not paying. In this instance the flour mill is the point where the so-called checkoff is occurring and the money is collected. As far as the amount of money is concerned, that is in the National Wheat Institute. This was a one-opportunity situation in which the money that was created by the inverse subsidy was in the Department of Agriculture, which was one amount of money which was given to the National Wheat Institute for basically the purposes we are speaking of here. This fund does not replace itself and, therefore, would not be a reliable source of money to rely upon.

My distinguished friend, I think, indicated that there were organizations against this. I would like to have the record show the charter members of this organization. I would say that this concept of self-help, this desire to have a united effort in research to show that wheat has the kind of nutrition that it actually has, this effort in order to try to have a complete understanding across all segments of the wheat industry, has been in process for over 10 years.

These are some of the organizations that are for this bill: the National Association of Wheat Growers; Western Wheat Associates, Inc.; the Great Plains Wheat, Inc.; the U.S. Durum Growers Association; the Kansas Association of Wheat Growers; the Montana Grain Growers Association; the Nebraska Wheat Growers Association; the Oklahoma Wheat Growers Association; the South Dakota Wheat Producers, Inc.; the Texas Association of Wheat Growers; Wyoming Wheat Growers Association; Oregon Wheat Growers League; Washington Association of Wheat Growers; Idaho State Wheat Growers Association; Kansas Wheat Commission; Nebraska Wheat Commission; North Dakota State Wheat Commission; South Dakota Wheat Commission; Colorado Association of Wheat Growers; Colorado Wheat Administrative Committee; Oregon Wheat Commission; Washington Wheat Commission; Idaho Wheat Commission. Those are the producers.

The processors, some of which are these: the Bulgur Associates; the Millers' National Federation; National Association of Flour Distributors; National Soft Wheat Millers Association.

Then the end-product manufacturers—some of the organizations that are for this bill are these: Associated Retail Bakers of America; American Bakers Association; Biscuit and Cracker Manufacturers' Association; National Macaroni Manufacturers Association.

Mr. Chairman, these organizations and others have worked on this legislation. They do understand the effect of it.

We have the most universal support across the board in the entire industry of wheat and of the food industry that has ever been seen before.

I would urge the consideration of the facts I have just given.

I reserve the remainder of my time.

Mr. TEAGUE of California. Mr. Chairman, I yield 2 more minutes to the gentleman from Texas for the purpose of answering some questions.

It is not clear to me who is going to pay this $6 million annual assessment if the housewife is not going to pay for it at the grocery store. Can the gentleman please explain to me who is going to pay it?

Mr. PURCELL. Yes, I will be very glad to explain it. The assessment will be at the point where the wheat is milled into flour—either 1 cent or not more than 2½ cents per hundredweight. It will not exceed 150th of a penny.

The figures, I believe, are universally accepted as explaining the relationship of the cost of the wheat to the cost cf the bread, that it takes right at 60 cents per bushel increase in the cost of the price of wheat to legitimately add one penny to the legitimate cost of the wheat in the loaf of bread.

So this is one one-hundred-fiftieth of a penny that is added. This is a long, long way from 60 cents. So it will be paid by the millers. It will be absorbed by them, or it cannot be passed back to the producer, as I view it.

I do not believe it is a legitimate argument to say that the cost to the consumer is going to be of such a nature that it can ever be noticed legitimately.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield for a question?

Mr. PURCELL. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. I thank the gentleman.

I should like to ask this question: I realize this tax or assessment is not going to be put back on the farmer or on the producer of wheat, because this is being charged to the miller, but who is going to pay for the increased cost of the flour they mill?

Mr. PURCELL. As I just said, the actual increased cost of the flour is so infinitesimal that my belief is the miller will pay for it. If it is passed on, again it is so infinitesimal I believe it will not be noticed, because of the necessary increase in the cost of wheat to the tune of about 60 cents a bushel, which would be so much more.

Mr. TEAGUE of California. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. PRICE) for the purpose of directing some questions to the gentleman from Texas (Mr. PURCELL).

Mr. PRICE of Texas. Mr. Chairman, I should like to ask the chairman of the subcommittee this question: In the bill, as we passed it out of the subcommittee, there was an amendment adopted which gave the producer the right to vote. Then the bill went to the full committee, where this was stricken from the bill. That is correct, is it not?

Mr. PURCELL. The gentleman is a member of the committee. His recollection is as good as mine.

Mr. PRICE of Texas. Right. What I wanted to find out was, if the actual producer does not have the opportunity to vote upon this legislation, it would seem to me we were cramming this down their throats without giving the wheat producers the opportunity to vote upon something which affects them.

Mr. PURCELL. I will say to the gentleman, this objection was raised in the subcommittee and again in the committee. In the committee it did not prevail. So the gentleman's views are the same, and the prevailing view of the committee is the same.

Mr. PRICE of Texas. I have a further inquiry, Mr. Chairman.

On page 14 of the bill, in section 17, it says:

> The council shall, subject to the provisions of section 9, develop and submit to the Secretary for his approval, research, education, and promotion (including paid advertising) plans or projects for wheat and wheat foods, to encourage and make more efficient the growing, distribution, and marketing of wheat and wheat foods, and to stimulate expanded sales and uses thereof.

It would seem to me, for legislative history, we should ask: Would this include research in new forms for livestock feed, also? It seems to me we are missing the point here in expanding the use of wheat, as to livestock feed. Will this research constitute promotion of the use for livestock feed?

Mr. PURCELL. I will say to the gentleman, his recollection of the proceedings is as good as mine, but the entire purpose of the bill is spelled out in the early paragraphs of it, for human domestic use.

Mr. PRICE of Texas. Yes. I, for one, would like to consider offering an amendment which would include, research for livestock feeds also after all this research is done, that there be some research done as to use for livestock feed, because of the grain produced above our domestic consumption, almost 14 to 17 percent of the ration in livestock feed is now being fed wheat. I hope that the research, for history here, will show some of this research would go for that.

Mr. PURCELL. I do not know what the research of history would show, but the point of processing is where this money is collected. I do not know of any livestock feed that is made as the result of the milling of flour, other than shorts or by-products. If the gentleman has in mind a bill for the development of wheat as livestock feed, I believe it would have to be done in a different way from what this bill provides.

Mr. PRICE of Texas. I thank the gentleman.

Mr. PURCELL. Mr. Chairman, I yield to the distinguished chairman of the committee, the gentleman from Texas, whatever time he may consume.

Mr. POAGE. Mr. Chairman, I think it should be kept in mind that this legislation is legislation designed simply to develop and publicize the uses of wheat as human food. It is a great human food; it is one of the best human foods, and it has been recognized as the staff of life since Biblical times.

It is still the staff of life. The public should know it, and we should have a way of enabling the public to know it. This bill provides that way.

It does not impose a burden upon anyone. This talk about how this is going to increase the cost of bread is based upon a complete failure to understand the wheat market and the bread market. There is about 2½ cents worth of wheat going into a loaf of bread today that will sell at anywhere from 25 to 30 cents. In other words, less than 10 percent of the cost of a loaf of bread is accounted for by the cost of the wheat that goes into that loaf of bread. This bill at its maximum could only cost 2½ cents per 100 pounds of wheat, and that is about 1⅔ bushels of wheat. In other words, it could cost about 1½ cents per bushel. A bushel of wheat will make about, I believe, 68 or 69 1-pound loaves of bread. If you divide 1½ cents by 68 or 69, you will find how much extra cost is involved in this. It is something so infinitesimal that even the bakers cannot pass it on.

The bakers are supporting this bill. The gentleman from Texas rightly said that the bakers organization is supporting the bill. The processing organization is supporting the bill, because they want the facts known about the uses of wheat and the fact that it is one of our most acceptable food products. They are willing to pay this infinitesimally small cost. When it is divided into the 1.6 billion bushels of wheat that the United States will grow, you will find you will get about one and one one-hundredth of a cent or something of that kind extra per bushel of wheat. It is just so small an amount that you cannot find any way of passing it on without grabbing extreme and excessive profits.

Yet who of you, who of you, have stood on this floor and protested when the transportation of those commodities went up in cost?

I am not kicking about it. Possibly the increases were justified but in the last 2 or 3 years the labor production costs have gone up seven or eight times more than this will cost. Who among you have stood here and protested these various wage increases and who has said that it was robbing the consumer? Who among you have stood here and protested that the wages of somebody who worked in some of the steps that make bread have gone up?

I am not suggesting these increases were wrong. Possibly those rate increases were justified, but who stood here and protested when these wages went up? The cost of a loaf of bread is about one-tenth wheat, about one-tenth other ingredients, and about eight-tenths wages. Who stood here and protested and said that the consumer was being robbed? Here, we are trying simply to see that the advantages of wheat can be made known to the public, and we are told, "Oh, it is going to rob the poor people."

I just want you to bear in mind that this thing is not a raid. It is not a burden on the living costs of some poor people. That thing is an effort to enable the producers of one of our great commodities to present that commodity for what it is as one of our finest food products, in the hope that the public will use more bread, more wheat, more of those commodities that give the most for the money that we spend.

If you want to reduce the actual cost of living of the American people, the simplest way to do it—and I wish that those of you who are concerned primarily with that problem—the simplest way to do it is to present the intrinsic value of wheat products. The United States probably eats less bread per capita than almost any other civilized country in the world. The other countries of the world, or most of them, know the value of bread. We do not.

We ought to learn the value of bread, and when we do, our people are going to find that they can have a better standard of living with a lesser expenditure of funds. That is what this bill intends to provide. This is not an anticonsumer bill. This is a bill that will provide for better distribution of the food resources of the United States.

Mr. PRICE of Texas. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from Texas.

Mr. PRICE of Texas. Mr. Chairman, since you have been very active on this bill, and like you say——

Mr. POAGE. Where does the gentleman get that idea? He is on both the subcommittee and the full committee, and I am not on the subcommittee. Where did the gentleman get the idea that I have been very active? Did I appear before his subcommittee?

Mr. PRICE of Texas. No, but the gentleman is on the full committee.

Mr. POAGE. Did you ever hear me speak on this before the full committee?

Mr. PRICE of Texas. Does the gentleman want me to ask the question or just sit down?

Mr. POAGE. I have the floor. You want to ask a question. I just asked you where you got the idea that I was very active.

Mr. PRICE of Texas. You were out on the committee, Mr. Chairman, as chairman of the committee.

Mr. POAGE. Did you hear me speak on this bill?

Mr. PRICE of Texas. No, I did not.

Mr. POAGE. That is correct.

Mr. PRICE of Texas. All right, then I would like to ask a question. The Farmers Union of Texas says that here in its present form the estimated $2.66 million per year cost of the bill would have to be borne by either the farmers or consumers to the extent that the consumers would pay the bill. They state this is not without any resource on the private Wheat Industry Council which would justify this particular promotion scheme to finance this bill in order that the interests of the producers and farmers may not be adequately protected.

That is the whole objection I have to this bill, that it seems to me we are ramming this bill down the throats of the people without giving them the opportunity to say whether they do want it or do not want it. I just wanted to make those remarks.

Mr. POAGE. I am happy to have the gentleman's remarks, and I would like to make some remarks about what the gentleman has had to say.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I will but not at this moment. First let me make some remarks about what the gentleman said—and I do not know if the gentleman intends to vote for this bill or against the bill. The gentleman has not said. I did not hear his voice in the committee and I do not know where he stands on the bill.

I did not speak on the matter in the committee but I am for the bill. I think the bill is a good bill. I think the bill will enable the American people to have better food for a less expenditure of money than they can get otherwise.

The Texas Farmers Union—or was it the Bureau? Which does the gentleman refer to?

Mr. PRICE of Texas. The Texas Farmers Union.

Mr. POAGE. The Texas Farmers Union is one of those high-class organizations in our State for which I have a very high regard and respect. They are a general farm organization and they seek to give direction to every commodity in the State. I have not observed the wheatgrowers objecting to the bill. The Texas Farmers Union is not a commodity organization. It is a general farm organization, and it finds objection to the bill.

I would not say that the bill could possibly be perfect because I have never known of a perfect piece of legislation to come out of this Congress. After all, we are human beings, and we try to prepare legislation and no legislation is perfect. But I believe that we have a pretty good bill here, and one that I think will do a great deal of good.

The gentleman has suggested that someone has got to pay. Is the gentleman saying that someone has to pay the $1.5 million the referendum will cost out of the 1.6 billion bushels of wheat. Each bushel of wheat weighs 60 pounds, so you can make some sort of a calculation by multiplying 1.6 billion by 60, and you can find how much it adds to the cost of a loaf of bread. The gentleman could hardly figure that, it is so small.

Mr. PRICE of Texas. No, I certainly agree that this is not going to cost the consumers anything, because the processors received increases in their bread prices, and that has raised the cost to the buyers.

Mr. POAGE. Let us find out if the gentleman from Texas believes what the Texas Farmers Union says. He says it will not cost the consumers anything, and he just said that the Texas Farmers Union said it is either going to cost the consumers or the producers. Is the gentleman contending it is going to cost the producers of wheat in Texas a substantial amount of money?

Mr. PRICE of Texas. It says that it is going to assess the producers from 1 to 2.5 cents per hundredweight to produce wheat.

Mr. POAGE. That is all the money involved in this bill, about 1.5 cents per hundredweight which is paid by the processors. That is all the money involved now.

Mr. PRICE of Texas. But it will cost——

Mr. POAGE. Wait just 1 minute. The gentleman is citing as authority that in effect, either the consumer or the producer should pay this. He has said now that the consumer is not going to pay it. Are you saying now that the producer is going to pay it?

Mr. PRICE of Texas. It says here that the council will raise it from an assessment of between 1 and 2.5 cents per hundredweight of wheat intended for human consumption, so that does not cost the producer 1 to 2.5 cents per hundredweight.

Mr. POAGE. Does the gentleman say it is going to cost the producer 2.5 cents per hundredweight?

Mr. PRICE of Texas. That is what it says, the council says so itself.

Mr. POAGE. I am not talking about the council, but it is your contention that the bill will cost from 1 to 2.5 cents per hundredweight?

Mr. PRICE of Texas. That is what the council said.

Mr. POAGE. I know what the council said, but I am talking about what BOB PRICE said.

Mr. PRICE of Texas. Yes, it will, because this thing is just being rammed down the throats, and telling the farmers out there that if you are farming this farm, if you do not want to participate we will jam it down your throats and charge you 2.5 cents per hundredweight.

Mr. POAGE. I will give the gentleman time for further explanation, but is the gentleman saying this will cost the wheat producer 2.5 cents?

Mr. PRICE of Texas. Yes, I think it will.

Mr. POAGE. You think it will? All right, I think it is clear that the processors will pay the bill. It is probably too small to pass on or back.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman.

Mr. GROSS. It certainly is going to cost somebody something—who is it?

Mr. POAGE. Certainly, it is going to cost some $2,600,000 when it gets in full operation.

Mr. GROSS. Well.

Mr. POAGE. That somebody is probably going to be——

Mr. GROSS. Going to be who?

Mr. POAGE. The processor and the baker, both of whom are supporting the bill because they recognize that by this kind of program, they will be able to present their product in a better way to the public and, therefore, have a wider distribution of their products—and it becomes a kind of advertising cost to them, and I have often been told that advertising reduces costs.

Mr. TEAGUE of California. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Chairman, the colloquy just concluded might lead a spectator to the conclusion that this really is not going to cost anybody anything and that it is going to make money for the American people. If there is any substance to that line of argument, maybe we are pikers in providing just 1 cent to 2½ cents per 100 pounds. Maybe we ought to go to 5 cents or 6 cents and really save the American people a lot of money.

It is my feeling that this bill is ill timed. It comes at a very bad time, with wheat prices rising so substantially, and, secondly, it is a costly item that is not beneficial to the American people, whether in their role as consumers or in their role as producers of wheat.

Further, it is my contention that this is a very regressive measure which will, indeed, hit poor people harder than other people in the population.

The distinguished chairman of the committee in his explanation of the bill said it is simply a bill to authorize promotion, education, and research in wheat and wheat uses.

It certainly is that. But this statement would lead to the conclusion that, first of all, there is no money for research and promotion available through an agency of the Federal Government for wheat research and promotion today. That certainly is not true. There is now more than $2 million lying in a public account available for wheat promotion and research that has not been spent and it has been available for almost 2 years.

That raises the question as to whether we should rush into an act like this to authorize still more money for wheat research and promotion given the fact that the National Wheat Council established by authority of legislation passed about 3 years ago by this Congress—that this council has not yet been able to figure out what to do with more than $2 million for wheat research and promotion.

Secondly, we ought to recognize that the force of law is not required to permit the millers of wheat to assess themselves and spend money for wheat research, promotion, and education. They can do it all on their own without the Congress being involved at all. In fact, that very procedure has been adopted with good effect by several organizations. I think of the livestock producers, also of the American Soybean Institute which 3 years ago established a 1 cent per bushel deduction and which has had good voluntary cooperation among its members in raising money for market development for soybeans and soybean products.

So we do not have to pass a law in order to permit the millers of the United States to raise money among themselves for wheat education, research, and promotion.

The other item I mentioned was the effect of this law upon poor people. I do not think anyone will argue against the contention that I will now make—and that contention is that as the income of the family unit goes down, reliance of the family unit on wheat products goes up. In other words, the poorer the family, the more important are wheat products in the diet of that family.

As pointed out in the colloquy just completed, the affluent people do not use wheat products nearly as abundantly as poor people. So the cost of this program, whatever that cost is, and assuming it is passed on to the consumer—certainly a fair assumption—has to go someplace. The millers are now pleading with the Cost of Living Council for an increase of 1 cent to 3 cents per loaf of bread. It could hardly be expected, therefore, that these same millers will absorb another $2 million to $6 million in their balance sheet.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from New York.

Mr. WOLFF. Mr. Chairman, as one who formerly was in the baking business I think I could tell the gentleman where this cost of this program can come from. In the first place included in the distribution cost of bread, there is what is known as a "return" policy. In most stores, if the bread is in a retail store for more than one day it is picked up and returned to the bakery. I believe, if included in this bill, a study should be made of the savings that could accrue alone from the elimination of such a policy, no returns, but reduced prices, we could save the consumers of this Nation a minimum of 1 cent to 2 cents a loaf.

Mr. FINDLEY. I will say in response to the gentleman's comment that I believe a study of the distribution system in this country is highly desirable. We have committees and subcommittees of Congress that can very well undertake such a study, but I think the gentleman will also recognize our private sector is highly competitive at almost every level. I believe if savings could be effectuated by the procedure the gentleman has outlined, it would have been done long ago. But nevertheless I want to acknowledge that a study of this question would be entirely appropriate.

Mr. WOLFF. During World War II this practice was eliminated. If we can save 1 cent or 2 cents a loaf, we can certainly accommodate all the costs of this program.

Mr. FINDLEY. If we can save 1 cent or 2 cents a loaf, let us pass that on to the consumer and forget this costly bill now before us.

Mr. WOLFF. That is correct. Let us pass it on to the consumer.

Mr. FINDLEY. Mr. Chairman, I would like to conclude by quoting a gentleman quoted earlier. Mr. D. M. Mennel, president of the Mennel Milling Co. of Fostoria, Ohio, said in his letter to the committee, printed in the hearing record:

> I question seriously the moral and ethical nature of taxing the consumer for the purpose of persuading that same consumer to use any specific product. It seems to me such a concept can proliferate into further fragmentation of pressures on consumers in behalf of all sorts of products and pressure groups creating higher costs for the consumer, possibly with nebulous benefits.

Mr. Chairman, the question before the House today is this: Do we want to add $6 million to the cost of wheat products, while domestic and world prices for wheat are at high levels?

Domestic wheat prices underwent the biggest 1-month price increase in 25 years in the month ending August 15. The price received by farmers jumped 14 percent from $1.32 a bushel to $1.51—the greatest 1-month increase since October 1947. Just 1 year ago, the price of wheat was $1.28.

The futures market also reflects this price increase. Yesterday, March and May wheat futures closed in the $2.04 to $2.06 range. Just 2 months ago that figure was 25 to 30 cents lower.

This situation has led to a dramatic increase in the price of flour. On July 7, flour was selling for $5.35 per hundredweight. On August 23, it peaked at $6.15 to $6.25. The price remains over $6.

What has caused these prices to increase? In part, we would have to assume the massive sales of wheat to foreign countries has driven prices upward—certainly a desirable situation. The Russian sales have received most of the attention. But other sales have been made to many nations because of the poor crop season in much of the world. As the private domestic companies making the sales have bought in the open market, prices have climbed. Certainly the farmer is entitled to these higher prices. But with costs to consumers climbing—and inflation being the result—there must be a limit. It certainly makes no sense to use the force of law to push wheat—and bread—prices still higher.

The Department of Agriculture unintentionally contributed to this situation by raising the export subsidy on wheat to stabilize world prices. As domestic prices rose, the subsidy was increased. I opposed this policy and presented my arguments to Department officials. The Department of Agriculture has now altered its position and no longer is supporting the wheat exports at the fixed rate.

With rumors of a world wheat shortage, and a possible depletion of U.S. wheat supply, prices, remain high.

What does this have to do with the bill before us today? Last week, the American Baker's Association asked the Cost of Living Council for an immediate, across-the-board increase in bread prices of 1 to 3 cents a loaf. Clearly, the wheat price situation is contributing to the spiraling increase in the cost-of-living.

The proponents of this bill say that the assessment provided in the bill would result in only a fraction of a cent increase cost to end-product manufacturers of wheat products. They argue that this new expense could be absorbed. But with the current high wheat prices and the baker's request for a price increase pending, it is evident that a new expense will not be absorbed. Adding to the baker's expenses can result only in an increase in price to consumers. The inflationary spiral would go on.

I do not question for a minute the extreme importance of wheat products to our diets. We should all consume more than we do. Nor do I question the farmer's right to receive a fair price for the wheat he produces.

It should be noted that the National Wheat Institute, a board established by an earlier farm bill, now has more than $2 million in a public fund earmarked for wheat research and promotion. This money has been available for expenditure for some time, but no decision has been made as to how to spend it. The money for this fund came from a tax on wheat exports that was in effect about 3 years ago. It has been available for nearly 2 years. Only $50,000 has been spent.

Until the Institute has found a prudent way to invest the $2 million, I see no hurry in establishing another research fund.

This bill would only add to the inflationary problem, a problem we can help solve if we make prudent judgments.

Soon, the House Committee on Agriculture will open hearings on wheat prices. Until the time when a report is filed, a bill that would increase wheat prices should not be considered by this House.

Mr. Chairman, I think the bill ought to be rejected.

Mr. TEAGUE of California. Mr. Chairman, I yield 6 minutes to the gentleman from Kansas (Mr. SEBELIUS).

Mr. SEBELIUS. Mr. Chairman, I rise in support of H.R. 13514, the Wheat and Wheat Foods Research, Education and Promotion Act, and strongly urge its passage.

As the Representative of the congressional district that grows more wheat than any State in the Nation, I want to say that the need for this bill goes to the needs of our Nation.

The purpose of this legislation is to provide for a program of research, education, and promotion for market development and to utilize wheat and wheat products to eliminate hunger and malnutrition at home and abroad.

This is landmark legislation since it is the culmination of several years' efforts to develop a program acceptable to: First, wheat producers; second, processors, and third, end-product manufacturers of wheat foods. This proposal, the product of industry discussions since the early 1960's, authorizes these three segments of the wheat and wheat foods industry to work together to establish, finance, and administer a coordinated research, promotion, and education program.

Under the bill, a wheat industry council is to be established composed of 15 voting members and seven additional members. The council is to be established to administer the program and collect assessments. The Wheat and Wheat Foods Foundation will submit to the Secretary of Agriculture the names of 15 nominees and 15 alternates for council voting membership; one-third of each group to be selected from producer, processor and end-product manufacturer members. Terms are 1 fiscal year with eligibility for renomination.

Not less than 90 days prior to the beginning of each fiscal year, the council shall recommend to the Secretary of Agriculture the amount to cover the expenses of the council for the fiscal year. To finance the program, the assessment shall be 1 percent per hundredweight of processed wheat, and in each succeeding year the rate of assessment may be increased in relation to the approved budget needs, but the rate of assessment shall not exceed 2½ cents per hundredweight of processed wheat. It is estimated that approximately $2,600,000 will be raised the first year and the maximum amount for each succeeding year would not exceed $6 million.

I want to specifically point out that this legislation was not reported by the House Agriculture Committee without considerable discussion and debate. The matter of a referendum for program ratification was suggested. However, it was rejected by the committee due to cost estimated at close to $1.5 million, almost the level of assessments for the first year and a burdensome Federal expenditure if the referendum was rejected. Also, a national referendum among 1,700,000 wheat growers would be a cumbersome exercise since there is no "checkoff" on wheat. The interest of the wheat producer is recognized as a one-third partner with processors and end-product manufacturers in the Wheat Industry Council and in the Wheat and Wheat Food Foundation.

The proposed assessment should in no way be a burden to consumers. At the minimum of 1 cent per hundredweight of flour or processed wheat product, or even at the maximum of 2½ cents per hundredweight, the amount per pound of bread is too small to pass on to consumers. There is no way of adding one one-hundred-and-fiftieth of a cent to the price of a pound loaf of bread. Conceivably, however, the cost at some future time could become part of a rising cost "mix"—ingredients, labor, transportation, packaging, and so forth—sufficient to justify an increase in price. As a safeguard, the Secretary of Agriculture has the authority to stop the program at any time he feels it does not serve the public interest.

In view of the present wheat surplus and the concern regarding hunger and malnutrition at home and abroad, it is important that we launch a full-scale wheat utilization program. Research in human nutrition extends to almost all dietary and psychological considerations. Nutritional education on high protein wheat foods will extend to all foods and cannot help but benefit consumers, especially those of low income who rely most heavily on products of wheat.

Despite the proven value of high protein wheat in recommended diets, per capita consumption of wheat foods has dropped more than 50 percent in the past 60 years, from more than 200 pounds per person a year to less than 112 pounds.

Studies being presently carried on show that a diet high in carbohydrates, including cereals, serves to lower the levels of cholesterol which is widely accepted as an index to an individual's susceptibility to heart disease. Further work is urgently needed to reevaluate the role of cereal protein in human nutrition.

Mr. Chairman, in summary, I believe quite strongly that the program envisioned by H.R. 13514 will represent an investment, rather than a cost, on the part of wheat producers throughout the Nation. The investment I refer to not only includes the obvious and primary intent of this program—to revitalize the wheat and wheat foods industry and improve the farm income picture—but I think this program can also be of substantial benefit to our efforts to combat hunger and malnutrition and to assist in providing needed nutritional and dietary research relating to heart disease.

This bill will help the consumer get tastier and more nutritious wheat products and will help the farmer who raises the wheat to feed a growing and hungry world. All I ask is that you give it a chance.

I would like to underline one other question my good colleague from Illinois (Mr. FINDLEY) has raised, and that is the value of a referendum, and I should like to bring it to your attention specifically.

In my district, which encompasses 57 counties, I have approximately 35,000 Farm Bureau members, somewhere around there. I do not know how many members of the National Farmers Union there are in my district. I did want to emphasize this, because it is very important when they say what the national group of any organization says, because we want the grassroots reaction.

Of these 35,000 Farm Bureau members, not one has said one word to me in opposition to this bill. Neither have their State organizations. I think that speaks well on the subject of what the people out there who are working with the problem and the project have to say.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I should like to congratulate the gentleman on his remarks and support him on this legislation.

At a time when America is divided on so many issues, it is indeed encouraging that wheat producers, processors of wheat, the millers, and end-product manufacturers, the bakers, are finding common agreement with unions serving those industries on the urgent need for our approval of the Wheat and Wheat Foods Research, Education and Promotion Act. The legislation represents a new kind of American ingenuity in solving a common problem in the public interest.

The 150,000 members of the Bakery and Confectionery Workers' International Union of America as well as grain millers and maritime trades are very much concerned that H.R. 13514 be passed as reported out by committee.

I have worked with representatives of unions, of industry, and producers on this legislation and know that western New York and Buffalo workers have a vital stake in its passage. Their welfare, job security and future of this great industry are involved.

Not only the bakery and confectionery workers are concerned, but also the grain millers, the maritime trades, and all those concerned with the processing and shipping of wheat. Hopefully we will be able to extend the shipping season on the Great Lakes in order to take greater advantage of the purpose of this act—to provide for research, education, and promotion of expanded markets for wheat.

Devoted men in labor and management have spent 10 years developing a unique concept dedicated to the goal of improving popular diet through research, education, and promotion. The proposed measure gives adequate representation to all concerned—yet serves a pressing, universal consumer need for improved popular diet. The cost of this effort would not be charged to government or to taxpayers, but to the industry itself—through an assessment on processed wheat products; that is, flour in an amount so small—one one-hundred-and-fiftieth of a cent per loaf of bread—that it cannot be passed on to consumers nor back to farmers. Yet the revenues thus accumulated would accomplish untold benefit for those immediately concerned as well as the public—benefits in nutrition research, consumer education, and in the better use of our agricultural bounty.

It is one thing for the wheat producer, the miller, or the baker to cite the urgent need for research, education, and promotion on behalf of wheat products. But it is quite another to hear Dr. Mark Hegsted, professor of nutrition at Harvard and Chairman of the Food and Nutrition Board, National Academy of Sciences, National Research Council. Here is what Dr. Hegsted says:

> Increased cereal consumption in this country would be beneficial and cereals provide the major hope for feeding the world now and in the future. Yet we are grossly unprepared to make many crucial decisions because we simply do not know enough about human nutrition and the role cereal products can play in meeting nutritional needs. Most current research focuses on the negative aspects of cereals in human nutrition. This current tendency to downgrade

> cereals will not be changed unless an appropriate body of knowledge is developed. . . .

Earlier, in testimony on the act, Dr. Hegsted said:

> Cereal products have been taking a beating repeatedly in the public press in regard to their nutritional content. Certainly, much of this criticism is invalid. Nevertheless, this has weakened the confidence of the public in cereal products in general. I think one of the primary problems is that the cereal industry has relatively little ammunition to combat these kinds of attacks.
>
> I think they need an aggressive research program.

Mr. Chairman, what is the promise in the Wheat and Wheat Foods Research, Education and Promotion Act for the public good? Let me quote Dr. Olaf Mickelsen, professor of nutrition, Michigan State University. The key word here is "indicates," meaning simply that signs point in the directions cataloged by Dr. Mickelsen, but more work needs to be done. Dr. Mickelsen says:

> Work carried out in recent decades *indicates* that: (1) wheat has an ameliorating effect on blood cholesterol which may be important in reducing cardiovascular deaths; (2) wheat reduces the incidence of dental caries in children; (3) wheat contains proteins of such high biological value that normal young men can be maintained in excellent health for long periods when wheat is their only source of protein; (4) wheat lowers the blood urea level which may be efficacious in the reduction of renal (kidney) diseases; and (5) wheat provides and economical and adequate means of providing a nutritious diet for large numbers of people now that food is considered a critical factor in human survival.

If Dr. Mickelsen is right—and his view is supported by many other scientists—what more do we need to approve an act already supported by wheat producers, millers, bakers, and macaroni manufacturers—an act in which they would foot the bill for such research? In this day when we ponder billion dollar budgets, the amount involved in the act is not great. But more importantly, it would generate its fund for research, education, and promotion without cost to the Government or the taxpayer.

Mr. Chairman, there are those who may ask—in the light of massive wheat sales to Russia—whether we need this measure providing for a domestic program of research, education and promotion. If anything, the purchases by U.S.S.R. reflect the high regard of wheat in that country—contrasted to the low esteem in which the product is held by many Americans. Russia, according to the press, plans a campaign in this year of drouth and possible famine to remind its citizens of the value of breadstuffs.

The role of wheat as a civilizing influence has long been recognized. Now it again becomes an instrument of foreign policy and international friendship. What better proof do we in this country require to demonstrate the urgent need for our approval of the Wheat and Wheat Foods Research, Education and Promotion Act?

The sale of wheat to Russia does not diminish but rather heightens the points of argument in favor of H.R. 13514. Bread is important in Russia and the rest of the world—as a source of essential nutrients, as a food for both masses and classes, as a cornerstone of good diet. This measure will help make wheat important again in the United States—where per capita consumption has continued to drop—from more than 200 pounds per person 60 years ago to about 110 pounds today—while disease and mortality attributed to such changes in diet have increased.

Mr. Chairman, this measure will help make American wheat important again the world over.

The export potential which is very real to us in Buffalo, points up the great benefits to be derived by opening up and developing the St. Lawrence Seaway as the means to export wheat on a year-round basis from the Great Lakes region.

I think it is also important to point out that the agreement to ship 50 percent of the grain in American bottoms is presently the topic of trade discussions still underway as a result of Secretary Peterson's recent visit to Russia and Poland. On May 11, 1972, in a floor speech I called attention of the remarks of Thomas W. "Teddy" Gleason, president of the International Longshoremen's Association. I said:

> Mr. Gleason's address was particularly timely, in that it expressed his union's concern with possible United States-Soviet trade agreements which may result from President Nixon's planned trip to Russia later than month.
>
> Mr. Gleason won sustained applause when he reported his union has informed the administration that longshoremen will "gladly" work Soviet ships, "if for every ship we work, they will release three prisoners of war."
>
> Thus, this leader of dockworkers joined our President in linking a North Vietnamese Communist response to Soviet influence.
>
> Mr. Gleason also reported that our President was aware of a similar ILA stance when he visited China.
>
> Mr. Gleason declared: "We are not going to work those Communist ships unless we can buy something for our people."
>
> I believe as Mr. Gleason does, that the workers and all the people of this country should obtain the fullest, possible benefits from this trade.
>
> I also support the ILU's effort to win an agreement to ship surplus commodities overseas on "a 50-50 basis," that is 50 percent of the grain and other commodities on ships carrying the American flag and 50 percent on ships carrying flags of other nations.

Mr. Chairman, I shall urge Secretary Peterson to continue to press for this agreement.

Last year, in 1971, not even a million tons of general cargo were exported from the United States directly through the Seaway. We think this probably is one-fifth of potential. If we could just double this tonnage, the value to the U.S. companies involved could be estimated at well over $25 million a year. Professor Schenker* of the University of Wisconsin, in his paper of January 1972, used $24/ton as the savings. His paper shows so clearly other benefits and, in fact, multiplying effects for the Nation derived from these savings.

Again, I think of wheat in terms of its great export potential and think what an open seaway can do for us to reduce the costs of getting our goods to foreign markets and thereby making them more competitive in more places. Here is a real opportunity to enhance our export position and create more prosperity and more jobs in Buffalo and in the country.

Mr. TEAGUE of California. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. HOSMER).

Mr. HOSMER. Mr. Chairman, I rise in opposition to this legislation.

I ask that the Members of the House examine just what is being sought here. What is being sought is authority to contract out to some private council, which is to be created by this legislation, the power to tax—the power to tax anywhere from 1 cent the first year to 2½ cents per hundredweight of wheat after that which passes through the processors.

This is the kind of thing which even back in Biblical days created a tremendous amount of trouble recorded in the Good Book, contracting out to somebody else the sovereign power to tax.

After that is done by the bill before us, it would further compound the felony by contracting out the expenditure. The money which is to be raised under the color of the sovereign power of the U.S. Government being prostituted by some council would then be permitted to be expended by that same nongovernmental body for such purposes within the limits of the legislation as it may see fit. Fifteen percent of the expenditure could conceivably go right smack out the back door to advertising agencies as commissions.

That simply does not make sense.

There is not even a provision in the proposed bill, as the gentleman from Illinois (Mr. FINDLEY) would provide, to let the people who do not want to take part in this flim-flam scheme out of it.

When somebody comes on the floor and says this is not going to cost the Government anything, I say first that in the report it is stated it is going to cost $50,000 or $55,000 a year just to set up this privilege in the private hands of the wheat council to raise and expend millions of dollars. That is the direct cost to the Department of Agriculture. Then there is the cost to the people of this money that is going to be spent, the $2.6 million to $6 million. That is not going to come out of a pump. None of these people in this business will pay it, so it is obviously going to come out of the pockets of the fellow who is the end of the line, the buyer, the consumer. It is another tax on the consumer. It is in the nature of a value added tax that adds no value.

This is a tax we are asked to let somebody who is not even a responsibly elected official impose. I simply cannot see that. Nor can I understand the argument of the gentleman from Kansas that this has something to do with improving dietary practices. If the gentleman wants to practice medicine, let him go to a hospital, and let him practice medicine after he gets a medical degree.

When people tell me that to eat wheat will reduce cholesterol, I can also say that it will lay on fat and do a lot of other things to the body.

---

*Reference: Special Report No. 15, Extending the St. Lawrence Seaway Navigation Season: A Cost Benefit Approach by Eric Schenker.

But neither one of us should be in the Houses of Congress practicing medicine, and we certainly should not be legislating for a program that will let some advertising agency go out to sell something to somebody which might do a lot of medical harm.

I never approved this cotton council thing, but one does not eat cotton.

I never approved this potato council thing, and one does eat potatoes, which makes it worse. But the very worst of all is this Wheat Council thing which is totally dictatorial.

Mr. FINDLEY. Will the gentleman yield?

Mr. HOSMER. I yield to the gentleman from Illinois.

Mr. FINDLEY. There is a precedent for a tax of this sort. The gentleman just alluded to it under the cotton checkoff. However, under the cotton checkoff program the people involved, namely, the producers who have the most direct cost to bear by such a program, are permitted a referendum. Furthermore, they are permitted the opportunity for a refund.

Mr. COTTER. Mr. Chairman, I rise in total opposition to H.R. 13514.

The bill is designed to promote the sale of wheat, but the legislation is particularly ill-timed and seemingly unnecessary. The demand by the Soviet Union for U.S. wheat and the reports of the Chinese interest in purchasing U.S. wheat leads me to conclude that there is very little reason for this wheat promotion program.

Some Members object to this legislation because farmers and grain processors have very little choice in participating in this program. This is a very real concern and one that I share.

My main concern, however, is that the cost of this program will be passed on to the U.S. consumer.

My opposition is further prompted by the bureaucratic foulup over the Soviet grain agreement. This agreement was held by our Government as a constructive means of reducing the U.S. wheat surplus. After the agreement went through, it was discovered that the Soviet Union wanted more wheat than we had available. One result of this shortage was that the price of wheat increased and bakers and flour manufacturers petitioned for an increase in price of such food products as bread, and baked goods. So instead of protecting the American consumer, which should be the highest priority of our Government during the wage-price controls, the Department of Agriculture entered into an open-ended agreement with the Soviet Union without any consideration of the effect on the American consumer.

I have written to Secretary Butz urging him to put unused wheatfields into production. The U.S. taxpayer currently pays over $1 billion to wheat farmers not to grow wheat. Further, I have asked the President to hold up the Soviet wheat agreement until he can assure the U.S. consumer that he will not pay higher prices for bread.

Until I receive concrete assurances from both the President and the Secretary of Agriculture that the U.S. wage earner is protected from higher food prices, I cannot support such programs as embodied in this legislation.

Mr. TEAGUE of California. Mr. Chairman, I have no further requests for time.

Mr. PURCELL. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be known as the "Wheat and Wheat Foods Research, Education, and Promotion Act".

LEGISLATIVE FINDINGS

SEC. 2. (a) Wheat and its products are a basic source of the Nation's total supply of human foods. They are sold on the countrywide market, as wheat or wheat products. Substantial quantities thereof move in interstate commerce from producers to consumers. Recurring periodic surpluses impair purchasing power and financial stability of wheat producers, adversely affect farm credit, disorganize and disrupt the agricultural and general economy of the United States, create uncertainty for consumers, impinge on the general welfare, and burden interstate commerce. The production, processing, manufacturing, and marketing of wheat and its products within the United States directly affect the welfare and security of the Nation.

(b) It has long been found to be in the public interest to have a reasonable balance between the supply and demand for wheat and wheat products produced and sold in this country for use as human foods. Increasing need for food adds a humanitarian dimension and a note of urgency. The distribution, manufacture, and sale of wheat and wheat foods have become major instruments of national policy as well as important factors in the nutrition of consumers.

(c) In order to increase demand for wheat and wheat foods, and to advance the public interest, it is necessary to establish a research, education, and promotion program which will provide:

(1) Research: coordinated and programed to amplify and to extend, without duplication, existing research programs for the purpose of exploring in the public interest such areas as: the nutritional values of wheat and wheat foods and the possibility of new and improved wheat foods which by the nature of research will contribute to knowledge of nutrition in general and understanding of all wheat foods in particular, or increase their value; improved techniques of production and distribution of wheat and wheat foods; and market research, including consumer attitudes.

(2) Education: to communicate existing and new product knowledge, uses, and values in nutrition; nutrition education; in the establishment of school or community nutrition programs; in the preparation and distribution of materials for food editors and writers in all media, leaders of government, and school authorities.

(3) Promotion: including public relations, advertising, trade advertising, merchandising projects, and events and programs for special market areas and market research to determine the most effective methods of presentation of the consumer benefits to be derived from wheat and wheat foods as human foods.

(d) The implementation of such research, education, and promotion will, among other things, (1) contribute to professional and public knowledge, understanding, and appreciation of wheat foods and their relationship to other human foods in approved diet; (2) improve the market for wheat and wheat foods; (3) stimulate appreciation of the need for, and greater use of, wheat and wheat foods as an essential part of a balanced diet; (4) reduce and strive to eliminate the need for regulatory controls on the production and marketing of wheat; (5) help improve the effectiveness of world food programs through better utilization of wheat foods; and (6) contribute to those sectors of the National and State economies dependent in whole or part on the industrial vitality of those associated with the production, processing, and end product manufacture of wheat and wheat foods.

DECLARATION OF POLICY

SEC. 3. It is therefore declared to be the policy of the Congress and the purpose of this Act (1) to authorize and provide for the establishment of an orderly procedure for the development, financing, and carrying out of an effective, continuous, and coordinated program of research, education, and promotion designed to maintain and expand markets for wheat and wheat products for use as human foods within the United States, and (2) to require the Secretary of Agriculture to utilize the services and counsel of industry organizations and groups to the maximum extent in the development and administration of programs of research, education, and promotion under this Act.

DEFINITIONS

SEC. 4. For the purposes of this Act—

(a) The term "council" means the Wheat Industry Council established pursuant to section 5 of this Act.

(b) The term "Department" means the United States Department of Agriculture.

(c) The term "end product" means any product in which processed wheat or wheat grown within the United States is a material or ingredient, and which is intended for use as human food within the United States without further processing other than final preparation thereof for consumption by the ultimate consumer on the premises where sold or final preparation by the ultimate consumer for personal, family, or household use.

(d) The term "end product manufacturer" means any person who produces an end product.

(e) The term "person" means any individual or any partnership, corporation, association, or other business entity.

(f) The term "processed wheat" means any substance produced for use as an end product, or as a component of an end product, by changing wheat grown within the United States in form or character by any mechanical, chemical, or other means.

(g) The term "processor" means any person who during the period of twelve months immediately preceding the date as of which the determination is made (1) produced processed wheat from five thousand bushels or more of wheat or from the equivalent thereof in previously processed wheat, or (2) bought for resale to other processors or to end product manufacturers without further processing processed wheat produced from five thousand bushels or more of wheat.

(h) The term "Secretary" means the Secretary of Agriculture, or any officer or employee of the United States Department of Agriculture who is authorized to exercise the powers and perform the duties of the Secretary.

(i) The term "United States" means the several States and the District of Columbia, but does not include any territory or possession.

(j) The term "wheat producer" means any person who grows wheat within the United States for market.

(k) The term "year" or "fiscal year" means the period from the effective date of this Act to the beginning of the next fiscal year of the United States Government and each fiscal year of the United States Government thereafter.

ESTABLISHMENT OF WHEAT INDUSTRY COUNCIL

SEC. 5. (a) There is hereby established a nonprofit organization to be known as the Wheat Industry Council (hereinafter referred to as the "council") which shall not be an agency or establishment of the United States Government.

(b) No part of the net earnings of the council shall inure to the benefit of any private person, and it shall be treated as an organization described in section 170(c)(2)(B) of the Internal Revenue Act of 1954 and as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under section 501(a) of such Code.

(c) The Council shall be composed of fifteen voting members and seven additional members. One of the additional members shall be the Secretary or an official of the Department designated by him. The fifteen voting members and alternates therefor shall be appointed by the Secretary from nominees submitted for his consideration as hereinafter provided. The additional members shall meet and confer with the voting members of the council but shall not be entitled to vote or hold any council office.

PROCEDURES FOR THE NOMINATION AND APPOINTMENT OF MEMBERS AND ALTERNATE MEMBERS TO THE WHEAT INDUSTRY COUNCIL

SEC. 6. (a) Within thirty days after the enactment of this Act, and not less than thirty days prior to the beginning of each fiscal year in which this Act becomes effective, the Secretary shall request the Wheat and Wheat Foods Foundation, a nonprofit corporation organized and existing under the laws of the State of Illinois, the membership of which is limited to persons who are or who represent producers, processors, or end product manufacturers, to submit the names of fifteen persons for consideration by the Secretary as nominees for appointment to the council as voting members, and the names of fifteen additional persons, each for consideration by the Secretary as a nominee for appointment as an alternate to a designated voting member of the council. Each of said nominees for appointment as voting members or alternates shall be a member of, or an officer, director, or employee of a member of, the Wheat and Wheat Foods Foundation, selected to represent the views and interests of that segment of the industry on whose behalf he was designated, namely producer, processor, or end product manufacturer. Five of the persons so selected as nominees for appointment as voting members of the council and the five persons so selected as nominees for appointment as their alternates shall qualify on the basis of membership in the producer segment, a like number of each on the basis of membership in the processor segment, and a like number of each on the basis of membership in the end product manufacturer segment. Any one or more of said nominees, voting members, and alternates may be a director, officer, or executive committee member of the Wheat and Wheat Foods Foundation.

(b) The additional members, other than the Secretary or his designate, shall be selected at large by the Secretary, two from each of the three segments of the industry referred to in subsection (a) of this section.

APPOINTMENT OF NOMINEES BY THE SECRETARY

SEC. 7. (a) (1) Upon receipt of the request of the Secretary for nominees as provided in section 6, the board of directors of the Wheat and Wheat Foods Foundation is requested to choose fifteen nominees and a like number of alternates for consideration by the Secretary for appointment as members or alternates, as the case may be, to the Wheat Industry Council. If any such nominee or alternate nominee is rejected by the Secretary in his discretion, the Secretary shall request the board of directors of the Wheat and Wheat Foods Foundation to submit the name of another nominee or alternate nominee in lieu of the one rejected, which nominee or alternate nominee, as the case may be, shall be subject to the same eligibility requirements, and shall represent the same segment of the wheat industry (producer, processor, or end product manufacturer), as the nominee or alternate nominee rejected by the Secretary.

(2) An alternate voting member of the council shall act in the place of the member for whom he is an alternate during such member's absence or when designated to do so by the member for whom he is an alternate. In the event both a member and his alternate are unable to attend a council meeting, the voting members of the council present may designate another alternate of the same classification (producer, processor, or end product manufacturer) to serve in such member's place for that meeting. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is selected and has qualified.

(b) A council member shall be appointed to serve for one fiscal year and his term shall expire on the last day of the fiscal year for which he was appointed, except that each member shall hold office until his successor shall have been appointed and shall have taken office. Council members may be removed for cause by the Secretary. Vacancies for unexpired terms on the council shall be filled by the Secretary in the manner herein prescribed for the appointment of members for a regular term. A member shall be eligible for reappointment if again selected for nomination pursuant to subsection (a) of this section.

(c) Members of the council, and their alternates, shall serve without compensation but shall be paid their necessary travel, subsistence, and other expenses incurred in the discharge of their official duties. The Secretary or other officer or employee of the United States appointed to the council shall serve without compensation in addition to that received by him as an officer or employee of the United States, subject, however, to the provisions of section 18 of this Act relating to reimbursement by the council to the Department for actual administrative expenses incurred by the Department.

GENERAL POWERS AND DUTIES

SEC. 8. (a) The council shall meet at least annually and at other times upon call of the chairman. Special meetings of the council may be called at any time upon reasonable notice, as required by its rules and regulations, by a quorum of the members of the council or by the Secretary.

(b) The chairman of the council shall be selected by the voting members of the council and shall hold office at the pleasure of the council or until his membership on the council expires.

VOTING REQUIREMENTS FOR COUNCIL ACTIONS

SEC. 9. A majority of the voting members of each of the three groups represented on the council shall constitute a quorum. All decisions, recommendations, or other actions of the council shall require a majority vote of the voting members present from each of the three groups represented on the council (producers, processors, and end product manufacturers). All such decisions, recommendations and actions of the council shall be subject to approval by the Secretary. The Secretary shall not take any action with respect to any matter concerning which the council is authorized to act unless and until such action receives the requisite approval by the voting members of the council as provided in this section.

AUTHORITY OF COUNCIL TO ISSUE RULES AND REGULATIONS

SEC. 10. The council may adopt rules and regulations governing the manner in which its business may be conducted and its powers exercised.

AUTHORITY OF COUNCIL TO SUE AND BE SUED

SEC. 11. The council may sue and be sued in the same manner, in the same courts, and to the same extent that a corporation may sue and be sued. Notwithstanding other provisions of law, for jurisdictional and venue purposes the city in which the principal office of the council is located will be considered its official residence.

AUTHORITY OF COUNCIL TO ISSUE RULES STATES

SEC. 12. The council may enter into and carry out such contracts or agreements as are necessary or desirable in the conduct of its business, including the borrowing of money for administrative expenses pending the collection of assessments as herein provided. The council shall have no authority to obligate the United States, and none of its notes or obligations shall be guaranteed by or collectable from the United States. Claims against the council shall be enforced only against the assets of the council, and no liability for the debts or actions of the council shall exist against either the United States, or any agency or agent thereof, or any member, officer, employee, or agent of the council in his individual capacity.

OBLIGATIONS AND EXPENDITURES; SETTLEMENT OF CLAIMS

SEC. 13. The council shall determine the character of and the necessity for its obligations and expenditures and the manner in which they shall be incurred, allowed, and paid. It may make final and conclusive settlement and adjustments of any claims by or against the council or of the accounts of its officers, employees, agents, and contractors.

EMPLOYMENT OF PERSONNEL; REQUIREMENT OF PERSONAL BONDS

SEC. 14. (a) The council may appoint such committees and officers and employ such personnel as it may deem necessary for the conduct of its business; establish conditions of employment, discharge, and leave; fix the amount of and pay their compensation; and define their authorities and duties. All such committees, officers, and employees shall be subject to the general supervision and control of the council and its rules and regulations adopted pursuant to section 10 of this Act, and shall be subject to reimbursements for expenses as prescribed in section 7(c) of this Act. The council may require and pay for bonds for employees, officers, agents, or contractors.

(b) Members of the council, other than the Secretary or his designee, and employees of the council shall not be deemed to be Federal employees for any purpose and shall not be subject to the provisions of laws relating to Federal employment.

UTILIZATION OF FEDERAL AND STATE FACILITIES AND SERVICE

SEC. 15. The council may, with the consent of the department or agency concerned, accept and utilize on a reimbursable or nonreimbursable basis, the officers, employees, facilities, services, and information of any department or agency of the United States or of any State or of any political subdivision of any State.

GENERAL POWERS OF COUNCIL

SEC. 16. The council shall have such other powers as may be necessary or appropriate for the exercise of the powers vested in it and the effective performance of the duties imposed on it by this Act.

RESEARCH, EDUCATION, AND PROMOTION PROGRAM

SEC. 17. The council shall, subject to the provisions of section 9, develop and submit to the Secretary for his approval, research, education, and promotion (including paid advertising) plans or projects for wheat and wheat foods, to encourage and make more efficient the growing, distribution, and marketing of wheat and wheat foods, and to stimulate expanded sales and uses thereof in present or new forms for use as human food within the United States. Any such plan or project shall be directed toward increasing the general demand for wheat and wheat foods without reference to private brands or trade names and without specific benefit to any individual or restricted group of producers, processors, or end product manufacturers to the exclusion of other individuals or groups within the industry. Funds collected to finance said plans or projects shall be expended on behalf of, and in proportion to, the assessment on the end products represented by such assessment. No research, educational, or promotional effort shall employ false or unwarranted claims in behalf of wheat and wheat foods nor against competing foods and products. Any such plan or project must be approved by the Secretary before becoming effective.

COUNCIL BUDGET

SEC. 18. The council shall submit to the Secretary for his approval a budget for each fiscal year showing the anticipated expenses and disbursements of the council in the administration of this Act, including the probable costs of research, education, and promotion plans or projects within the scope of section 17 of this Act. The council will include in such budgets only the actual administrative expenses, as determined by the Secretary, which may be incurred in the performance of assigned, necessary services within the Department in connection with the administration of this Act.

AUTHORITY TO INCUR EXPENSES

SEC. 19. The council is authorized to incur such expenses as the Secretary finds are reasonable and necessary to carry out the functions of the council under this Act during any fiscal year. The payment of such budgeted expenses, as well as the costs of the administration of this Act within the Department as provided in section 18, shall be made from funds collected as prescribed in section 20.

ASSESSMENTS

SEC. 20. Not less than ninety days prior to the beginning of each fiscal year, the council shall recommend to the Secretary the amount of the pro rata assessment it determines will be necessary to cover the estimated expenses of the council and the Department in administering the provisions of this Act during such fiscal year. In determining the amount of such assessment the council shall take into consideration the total volume of wheat it estimates will be processed during such year for use as human food in the United States. Subject to the approval of the Secretary, such pro rata assessment shall become effective for such fiscal year on the first day of such fiscal year. Such pro rata assessment shall be imposed on persons designated in section 21 with respect to each hundredweight of processed wheat intended for use, or for end product manufacture for use, as human food within the United States. For the first year of council operations the rate of such assessment shall be one cent per hundredweight of processed wheat; and in each succeeding year the rate of assessment may be increased in relation to approved budget needs, but the rate of assessment shall at no time exceed two and one-half cents per hundredweight of processed wheat. Subject to such regulations as may be adopted by the council as provided in section 21, the amount of the assessment shall be added by the processor as a separate item, so identified, to his invoice for the processed wheat at the time of its sale to another processor or to an end-product manufacturer, and any processor to whom it is sold shall likewise add the amount of such assessment as a separate item, so identified, to his invoice at the time of its sale to another processor or to an end product manufacturer. A processor may accept and rely upon a certificate received by him in good faith from a person to whom he sells processed wheat, certifying in accordance with applicable regulations promulgated as hereinafter authorized, that such processed wheat is not being purchased for use, or for resale for use, or for end-product manufacture for use, as human food within the United States, and upon receipt of such certificate said processor shall be excused from invoicing to said purchaser an assessment with respect to such processed wheat and from paying any assessment with respect thereto.

COLLECTION AND RECORD OF ASSESSMENTS

SEC. 21. The pro rata assessment to be imposed pursuant to section 20 with respect to any hundredweight of processed wheat shall be imposed upon and payable by one of the following persons:

(1) the initial processor or a subsequent processor thereof if the same constitutes, or is a material or ingredient in, an end product produced by said processor; or

(2) the end product manufacturer who purchases the same from a processor for use as a material or ingredient in producing an end product; or

(3) the processor who purchases the same from a processor if he does not resell it to another processor, or to an end product manufacturer, or for use other than as human food within the United States.

The amount of an assessment imposed on an initial processor as provided in clause (1) above shall be due and payable to the council within such time, not to exceed sixty days after the sale by him of the end product produced by him, as shall be prescribed by regulation. The amount of an assessment imposed on an end product manufacturer as provided in clause (2) above or on a subsequent processor as provided in clause (1) or (3) above shall be due and payable to the preceding processor from whom the manufacturer or subsequent processor purchased the processed wheat in respect of which the assessment is imposed, within such time, not to exceed sixty days after such purchase, as shall be prescribed by regulation. The amount of an assessment added by a processor as a separate item to his invoice for processed wheat pursuant to section 20 shall not become due and payable by said processor to the council, or, as the case may be, to the processor from whom he purchased the processed wheat, until after receipt thereof by him from the purchaser to whom it is so invoiced by him. Processors shall serve without compensation as collection agents for the council. Each processor who collects an assessment from a purchaser of processed wheat shall be obligated to remit the same to the council, or, as the case may be, to the processor from whom he purchased the processed wheat. The collection and remittance of the assessment in all cases shall be made, reported, and recorded at such times and in such manner as shall be established by rules and regulations adopted by the council and approved by the Secretary.

FAILURE TO PAY ASSESSMENT

SEC. 22. (a) The council may maintain in its own name a civil action against—

(1) any processor who (A) fails or refuses to invoice any subsequent processor or end product manufacturer for the assessment imposed as provided in sections 20 and 21 of this Act; or (B) fails or refuses to record, report, or remit to the council any assessment as provided in sections 20 and 21 of this Act, or

(2) any subsequent processor or end product manufacturer who fails or refuses to pay the amount of any assessment pursuant to the provisions of this Act,

to recover the amount of any such assessment, and shall be entitled to recover court costs and reasonable attorney's fees in any such action in which the council prevails.

(b) A processor shall promptly notify the council of the failure or refusal of any person to pay to such processor the amount of any assessment made against such person under this Act.

AUTHORITY TO CARRY OUT PROJECTS

SEC. 23. Any approved research, education, or promotion plan or project may be carried out by the council directly or under a contract with an agent or other organization, public or private, including an agent or organization whose officers, directors, employees, or agents are also members, employees, or agents of the council. Any such contracting agent or organization shall be required to maintain accurate financial and other records which will be subject to regular audit and review by the council and the Secretary.

COUNCIL RESPONSIBILITIES

SEC. 24. The council shall be responsible to the Secretary for the efficient and effective performance of its duties and functions, including, but not limited to, the collection, handling, safekeeping, disbursement, and accounting of funds, subject to good accounting practice and regular audit of records by the Secretary; the recording of processing statistics that serve as a basis for collections; contracting for necessary services to carry out the approved program; the employment of qualified personnel; the policing of collections; processing information and disbursements; and other responsibilities of good management.

REPORTS AND RECORDS

SEC. 25. (a) Whenever a program becomes effective as provided herein, each processor shall, at such times as may be prescribed in regulations promulgated by the Secretary, report to the council, in such detail and on such forms as shall be provided by the council, the total hundredweight of processed wheat intended for use, or end product manufacture for use, as human food within the United States in the immediately preceding month, by types designated by the council. Upon request of the council, made with the approval of the Secretary, each processor shall also furnish to the council, in such manner and at such times as it may prescribe, such other information as may be necessary to enable the council to perform its duties under this Act.

(b) Whenever a program becomes effective as provided herein, each processor shall establish books, records, and other information necessary to the orderly and accurate collection of any assessment duly prescribed, and shall thereafter maintain such books, records, and information for a period of three years, the same to be made available for examination by the Secretary or duly authorized persons on request.

(c) All reports and records submitted by processors to the council and received by it pursuant to the provisions of this section shall at all times be in custody of one or more confidential employees designated by the council. No member of the council, nor any employee thereof, nor any employee of the Department, shall disclose to any person, other than the Secretary upon request therefor, any data or information obtained or extracted from such reports and records which might affect the trade, position, financial condition, or business operation of a particular producer, processor, or end product manufacturer, except that such data and information may be combined, and made available to any person, in the form of general reports in which the identities of individual producers, processors, or end product manufacturers are not disclosed. Such data and information may also be disclosed to any extent necessary to effect compliance with the provisions of this Act and the regulations issued thereunder, including publication of the name of the processor or his customer who has refused to comply with the requirements of this Act.

ACCOUNTING AND CARE OF FUNDS

SEC. 26. (a) Moneys collected, handled, or disbursed by the council shall be handled only by persons under bond, and similar bonds shall be required of all persons or agents, accepting council funds or contracts to carry out council activities, programs, or projects approved by the Secretary. Monthly statements of cash account, quarterly analyses of expenditures, and annual financial statements, the latter in the form of an audited report certified to by a firm of certified public accountants, shall be made to the Secretary by the council. Any periodic statement of audit by the Secretary shall be made available to the council.

(b) The confidential employees of the council referred to in section 25(c) of this Act or any other confidential employee appointed by the council shall serve as treasurer thereof and shall receive all moneys and shall countersign, together with one or more members of the council designated by it for such purpose, all checks in disbursement of moneys. Income in excess of expenditures shall be held in United States Government or federally approved depositories for Government funds, or may be invested for the account of the council in short-term United States Government securities as directed by the council. A working reserve of funds may thus be accumulated but it shall not exceed at any time more than the following year's total estimated expenditures of the council. Should such moneys exceed the annual estimated expenditures of the council, the rate of assessment shall be lowered to maintain the amount held in reserve at a level equal to not more than one full year's annual estimated expenditures. Except as provided in section 23 of this Act, no part of such moneys or the net earnings thereon shall inure to the benefit of any member or employee of the council or private person or individual.

PROHIBITION ON USE OF FUNDS TO INFLUENCE GOVERNMENT POLICY OR ACTIONS

SEC. 27. No funds collected by the council under authority of this Act shall be used for the purpose of influencing governmental policy or action.

REGULATIONS AND ENFORCEMENT

SEC. 28. The Secretary is authorized to issue such orders, rules, and regulations as may be necessary to carry out the provisions of this Act and the powers vested in him by this Act.

COURT JURISDICTION

SEC. 29. The several district courts of the United States are vested with exclusive jurisdiction to entertain suits in the name of the United States or the council, without regard to jurisdictional amount, to enforce, and to prevent and restrain any person from violating this Act, or any order, rule, regulation, or agreement made or issued pursuant thereto. Such action may be brought in any district in which such person may be found. A civil action authorized to be brought under this Act in the name of the United States shall be referred by the Secretary to the Attorney General for appropriate action.

ENFORCEMENT AUTHORITY

SEC. 30. Whenever the Secretary has reason to believe that any processor, or his customer, council member, officer, or employee, or a contracting person or contracting agent, or any employee of any of the aforenamed, or any other person or entity subject to this Act, has violated or is violating the provisions of this Act, or any order, regulation, rule, or agreement issued pursuant to this Act, the Secretary shall have the power to institute an investigation. If the Secretary determines therefrom that there is probable cause for institution of a civil action, he shall refer the matter to the Attorney General for appropriate action. For the purpose of any investigation instituted by the Secretary, he is empowered to administer oaths and affirmations, subpena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents the Secretary believes relevant to the inquiry; and, if necessary, to invoke the aid of any district court of the United States, within the jurisdiction of which such investigation or proceeding is carried on, to enforce compliance. Any failure to obey an order of any such court may be punished by such court as a contempt thereof.

PERSONAL LIABILITY

SEC. 31. No member of the council, or any member serving as trustee as provided in section 32 below, or any employee, representative, or agent thereof shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person, for errors in judgment, mistakes, or other acts, either of commission or omission, as a member, trustee, employee, representative, or agent, except for acts of dishonesty.

TERMINATION OF ACT

SEC. 32. (a) Within one hundred and twenty days following the end of five years from the date of enactment of this Act, and, within one hundred and twenty days following the end of each five-year period thereafter (so long as the Act continues in effect), the council shall review the progress made toward attaining the objectives of this Act, whereupon the voting members thereof shall prepare a report of such progress for the Secretary. If the council's report to the Secretary by the voting members thereof does not unanimously recommend the continuation of this Act it shall automatically terminate at the end of such one hundred and twenty days.

(b) Notwithstanding the provisions of subsection (a) of this section, or the amendment or repeal of this Act, in the event of the termination, at any time, of all programs under this Act, the members of the council shall, for the purpose of liquidating the affairs of the council, continue as trustees of all the funds and property then in its possession, or under its control, including claims for any funds unpaid or property not delivered at time of such termination. Any funds collected from assessments and not yet remitted to the council at the time of such termination shall be remitted to the council.

(c) The trustees shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the council and of the trustees, to such person as the Secretary may direct; and (3) upon request of the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person, full title and right to all the funds, property, and claims vested in the council or the trustees pursuant thereto.

(d) Any person to whom funds, property, or claims have been transferred or delivered, pursuant to this section shall be subject to the same obligation imposed upon the council and upon the trustees.

(e) Any funds collected from assessments hereunder and remaining unexpended in the possession of the council or the trustees at or after the termination of all programs, shall be distributed in such manner as the Secretary may direct: *Provided*, That such funds shall be returned on a pro rata basis to the processors who remitted funds to the council, and such processors shall return the funds on a pro rata basis to the other processors or end product manufacturers from whom collected, except that each processor may retain therefrom an amount which will reimburse him for applicable accounting expenses as determined by the Secretary.

PRESERVATION OF RIGHTS

SEC. 33. The termination of all programs under this Act or of any regulation issued thereunder shall not (1) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this Act or any regulation issued thereunder, or (2) release or extinguish any violation of this Act or any regulation issued thereunder, or (3) affect or impair any rights or remedies of the Secretary, or of any other person, with respect to such violation.

SEPARABILITY CLAUSE

SEC. 35. There are hereby authorized to be appropriated thereof to any person or circumstances is held invalid, the validity of the remainder of the Act and of the application of such provision to other persons or circumstances shall not be affected thereby.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 35. There are hereby authorized to be appropriated such funds as are necessary to carry out the provisions of this Act. The funds so appropriated shall not be available for payment of the expenses or expenditures of the council in administering any provisions of this Act.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 6, line 17, strike out the period after the word "market" and insert the following: "and who planted at least 15 acres in the previous year."

Page 29, line 4, strike out the words "35. There are hereby authorized to be appropriated" and insert in lieu thereof the words "34. If any provision of this Act or the application".

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. FINDLEY

Mr. FINDLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY: Page 6, line 24, insert the following new section and renumber subsequent sections accordingly:

"SEC. 5. The Secretary shall conduct a referendum among producers, processors, and end product manufacturers of wheat who, during a representative period determined by the Secretary, have been engaged in the production, processing, or manufacture of wheat for the purpose of ascertaining whether the creation and operation of the Council set forth in this Act is favored or approved. No powers shall be exercised under this Act by the Council unless the Secretary determines that the question of the creation and operation of the Council is favored or approved by not less than two-thirds of the producers voting in such referendum and by processors and end product manufacturers who, during such representative period, have engaged in the processing and manufacturing of wheat and have processed or manufactured more than 50 per centum of the total wheat processed or manufactured during such representative period: *Provided*, That in the event both producers and processors favor the creation and operation of the Council as set forth in this Act, the Council shall reimburse the Secretary for all costs incidental to the conduct of the referendum."

Mr. FINDLEY. Mr. Chairman, this amendment is patterned after similar provisions in other commodity check-off authorizations. I offer it as an effort to make a thoroughly bad bill a little better, but I want to assure my colleagues that I do not feel the acceptance of this amendment makes the bill itself acceptable. It will still be a bad bill for the consumers, and if the attitude of the American Farm Bureau Federation, the farmers union organization, is any guide to the attitude of farmers—and I think it is—it is also a measure that is bad for the farmers as well.

Nevertheless, if this bad legislation ever becomes law, I think it would be a terrible injustice on the part of this body to have the legislation go forward without a provision in it permitting those most directly affected by the check-off which is authorized by this bill to have a voice in either approving or disapproving that check-off.

Now, this provides that two-thirds of the producers who under the terms of the legislation are producers of 15 acres of wheat or more and 50 percent of volume of the processors and end users of wheat must approve of the proposal on establishment of the Council, in other words, before it can have effect. Then it provides further that in the event that approval does not occur, that the cost of the referendum must be borne by the Council. That is paid out of the proceeds of the check-off.

I understand an effort will be made to strike out that proviso, but I hope that that proviso will remain. I think here again it is an act of injustice to the American people to have this benefit which will relieve them of a substantial part of the expense of setting this program into motion, a program that has been advertised as a completely self-financing program. If this proviso is eliminated, I would think——

Mr. PURCELL. Will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Texas.

Mr. PURCELL. I would ask the gentleman what would be his idea as to what would happen if his views were to prevail and the referendum failed. Who would then pay for having the referendum?

Mr. FINDLEY. The long-suffering taxpayers of the United States would pay, and I would consider that an injustice. That is why even with this referendum provision I consider the bill——

Mr. PURCELL. But the gentleman is asking that the Government pay for the referendum.

Mr. FINDLEY. The referendum would of course have to be paid for. If the Council is established and created and has resources as it would under this bill, then I think it is only proper that the Council itself pay the bill, but if the referendum fails to authorize the establishment of the Council, then there is no Council, no fund available to the Council, to cover the cost of the referendum.

Mr. PURCELL. Thank you.

Mr. FINDLEY. Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. SEBELIUS TO THE AMENDMENT OFFERED BY MR. FINDLEY

Mr. SEBELIUS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

> Amendment offered by Mr. SEBELIUS to the amendment offered by Mr. FINDLEY: On page 1 of the amendment, line 16, strike the colon and insert a period and strike out the words "*Provided*, That in the event both producers and processors favor the creation and operation of the Council as set forth in this Act, the Council shall reimburse the Secretary for all costs incidental to the conduct of the referendum."

Mr. SEBELIUS. Mr. Chairman, I do not want any part of the gentleman's amendment; let me make that clear. I think it is a waste of money, a waste of energy, because of the very smallness of it. We are dealing in fractions; we are dealing in fractions of a cent as far as cost of a loaf of bread. However, it is my opinion that the cost of a referendum will exceed the first year collection. Therefore, under my amendment the Secretary would hold the election, as in so many other programs, he would be the one that conducts it, and the cost paid by the Secretary. I think this would satisfy the National Farm Bureau and the National Farmers Union on the subject that they want the farmers consulted about this even though it is a very, very small thing.

The only other thing they mention is the checkoff, and, of course, the checkoff is in such small sums, that all of the little farmers would not ask for theirs back. A large farmer that has 50 or 60,000 bushels, such as out in my district, some of them would want theirs back, and the little man would be paying for it. I would earnestly urge the adoption of the amendment to the amendment to the gentleman from Illinois.

If we are going to have a referendum, let us have it on the basis of fairness, and let it be handled in that manner.

Mr. PURCELL. Mr. Chairman, I rise in opposition to the amendment, and I move to strike the requisite number of words.

Mr. Chairman, I want to associate myself with what my distinguished colleague, the gentleman from Kansas (Mr. SEBELIUS) has just said. I am opposed to the amendment offered by the gentleman from Illinois (Mr. FINDLEY), but the amendment offered by the gentleman from Kansas (Mr. SEBELIUS) to the Findley amendment would make the original amendment much less objectionable.

I would just point out, Mr. Chairman, that for over 10 years every segment of the wheat industry has been working diligently to reach agreement. This is unique in any industry through history, and I think it is particularly unique among the agricultural industry because these people are independent thinkers.

They are from various parts of the country. They have various backgrounds. Yet they have welded together an idea of a system that they are willing to work under. This does not require a referendum that will cost, if I remember correctly, an estimated $1.5 or $1.6 million, about all that the bill itself would ever generate under the first year of operation.

Now there are some farm organizations that are against this bill that have said they would like to have the referendum and I will not repeat and bore the Members by going over the associations, but I think it is safe to say that every wheat growing association in the United States, every milling association in the United States, and all the end-product associations—of course, there are some individual people and companies that have not been totally for this—but this is the nearest thing to a real and absolute agreement that there could be among the members of the agricultural industry that it has ever been my privilege to know about.

So I would say that this suggestion by my longstanding good friend, the gentleman from Illinois (Mr. FINDLEY) should not be adopted. Although he says it is like the cotton checkoff thing, it really is not because in the cotton program the producers are paying the checkoff. In this the producers are not having the money collected from them, and therefore they do not have the concern. I have not had any single individual other than the officers of two of the farm organizations ask me to oppose this bill because of the referendum factor. The membership—those people who are farmers—people who are wheat farmers across this country, whatever organization they may belong to, are in favor of this bill as far as I can ascertain, as it is.

The referendum would be terribly expensive, it would not be handled at the producer level as far as the money being collected is concerned. So I would urge the defeat of the amendment offered by the gentleman from Illinois (Mr. FINDLEY) and would say then that the amendment offered by the gentleman from Kansas (Mr. SEBELIUS) to that amendment would at least be much less objectionable.

Mr. HOSMER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, what is being asked today is what the Wheat Flour Institute and the Millers National Federation and others have been unable themselves to accomplish by their own effort and you are being asked to do it for them by legislative fiat.

They have been trying to get a promotional deal together and some money to promote the sale of wheat products for quite a time and they have not been very successful at it.

Now they come in today and they want you to bail out their failure by passing a law that establishes a wheat industry council that, by Government fiat, goes out and collects money and spends it for these promotional purposes.

What the gentleman from Illinois wants to do is at least to give some of the people involved in the process of producing the country's wheat an opportunity to vote on it. Those who oppose his amendment do not even want to give them that opportunity. They just want you, by law, to do something they have not been able to do already, give them a wheat tax, and put them in a nice niche here to promote a particular product at consumers' expense.

Now I say to you that at least they ought to give us an opportunity for this referendum to decide whether they want to get into this kind of sticky wicket at all.

But more than that, I say that after defeating the amendment by the gentleman from Kansas and adopting the amendment by the gentleman from Illinois, this legislation certainly ought to be defeated. It violates every single instinct and every single, to my mind, constitutional legality that is involved here.

Even though the previous cotton and potato councils were not attacked on constitutional grounds, certainly it is time that somebody ought to get around to thinking about the fundamental constitutional questions involved here and indeed relegate these things back to free enterprise where they belong.

It is getting to be a habit—every time somebody gets into a free enterprise situation where they lose instead of gain, they come to the Congress and want a law passed to take care of them.

The Lockheed loan was such an instance. I voted against it. And there are other proposals brought in here, when a risk was involved, somebody lost on account of the risk, and now they then run to their Congressmen and Senators and want a law passed to bail them out.

These people in the wheat business want a law passed even before they get into deep trouble. What they ought to be doing, of course, is free enterprising in agriculture in this country and getting out of these subsidies programs altogether and let supply and demand come back into balance.

Then we will have the kind of agricultural industry that can make some money and does not need subsidies, crutches, and promotion gimmicks financed by questionable tax gimmicks like the one before us.

Mr. TEAGUE of California. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I would like to very briefly express my conviction once more that as bad as this bill is in many respects, it would be improved considerably if the Findley amendment were adopted providing for a national referendum, so I do support the Findley amendment.

I oppose the Sebelius amendment to the amendment on the grounds that if the referendum is to be held, it ought to be paid for by the wheat council rather than the taxpayers. This whole bill is their idea and they ought to be willing to pay the cost of it. So I support the Findley amendment and oppose the Sebelius amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. SEBELIUS) to the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

The question was taken; and on a division (demanded by Mr. SEBELIUS) there were—ayes 22, noes 33.

Mr. SEBELIUS. Mr. Chairman, I demand tellers.

Tellers were refused.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY).

The question was taken; and on a division (demanded by Mr. PURCELL) there were—ayes 39, noes 13.

So the amendment was agreed to.

AMENDMENT OFFERED BY MRS. SULLIVAN

Mrs. SULLIVAN. Mr. Chairman, I offer a series of amendments, and ask unanimous consent that they be considered en bloc.

The Clerk proceeded to read the amendments.

Mrs. SULLIVAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read. They are all conforming amendments.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Missouri?

Mr. POAGE. Mr. Chairman, the Chair never has ruled on the question, when the question was put, of considering these amendments en bloc. I want to reserve a point of order on that. I have no objection to considering them en bloc if the gentlewoman would drop the one amendment in relationship to page 7 that attempts to establish a private organization as the source of representation for the new members of the council. The rest of the bill places the appointment under the hands of the Secretary and does not give any private organization a right to control any part of the council. By this amendment the one relating to page 7 clearly confines the selection of members of the council, or one-fourth of the council, to those who belong to a particular private organization. I think that is entirely improper, and I would not want to agree to consider that en bloc with the best of the amendments.

The CHAIRMAN. Does the gentleman object to the request of the gentlewoman that the amendments be considered en bloc?

Mr. POAGE. Yes; unless the gentlewoman will withdraw the one.

Mrs. SULLIVAN. I will withdraw my request for unanimous consent to consider the amendments as read.

The CHAIRMAN. The Clerk will read.

The Clerk concluded the reading of the amendments.

The CHAIRMAN. Is there objection to the request that the amendments be considered en bloc?

Mr. POAGE. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard. The Clerk will reread the first amendment.

The Clerk read as follows:

> Amendment offered by Mrs. SULLIVAN: Page 4, line 25, immediately after "groups" insert "and consumers".

Mrs. SULLIVAN. Mr. Chairman, before I proceed with an explanation of these amendments, because every one dovetails into the next one throughout the entire bill, in order to include a consumer group, I would like to answer—if he would like to have it answered—the gentleman's argument that one is a private group and the others are not.

Mr. PURCELL. Mr. Chairman, will the gentlewoman yield?

Mrs. SULLIVAN. I yield to the gentleman from Texas.

Mr. PURCELL. I see no reason why we cannot accept the amendment on page 4, line 25. I have no argument against this.

Mr. FINDLEY. Mr. Chairman, I move to strike the last word.

I want to say that I am very much in sympathy with what the gentlewoman from Missouri is attempting to do here. As I interpret it, she is attempting to bring the voice of the consumer into the deliberations of the council, and that is certainly entirely appropriate because of the effect of this program on consumer prices. I do have concern about the selection of an organization known as Consumers Union, or any other organization, to be the official representative of the consumer.

I do not know much about the Consumer Union. I am sure the gentlewoman from Missouri is much more informed about the organization than I. At this moment, I am not prepared to give official sanction to the Consumers Union as the agency best equipped to select the consumer people to serve on this council.

My reason for striking the last word also is to state that this is a complicated situation because of the interrelationship of these amendments. I am not even sure what the amendment now pending would do.

Because of my concern about the designation of the Consumers Union I am constrained to oppose this amendment and the other amendments. I would, however, support the amendment series of the gentlewoman from Missouri if, instead of the Consumers Union, the executive branch could somehow be identified as the agency to make the selection of the consumer representation. This has been done for similar boards and commissions in the past.

Under the circumstances, having not clearly heard the language and not realizing the various interrelationships of the amendments, I am not able to draft amendments to the amendments. Because of that, with deep regret, I am constrained to oppose the amendment.

Mrs. SULLIVAN. Mr. Chairman, I should like to answer the gentleman.

Mr. FINDLEY. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. Mr. Chairman, the amendments I have offered en bloc do not in any way change the thrust or the purpose of this bill, which is, and I quote:

> To enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States.

My amendments contribute to that purpose and goal. In fact, my amendments seek to improve and fortify this program by trying to insure that the expansion of wheat consumption would be consistent with the nutritional needs of the consumers.

This is new legislation, Mr. Chairman. It does not amend existing law. It provides for the establishment of a council composed of 15 private citizens from three different categories of private groups; wheat producers, wheat processors, and wheat product manufacturers. My amendments add a fourth category of private citizens involved in wheat use who could be represented on this council, and that is, the other consumers of wheat food products. Certainly it is just as necessary to the purposes of this bill to include in it those who buy and eat the products as it is to include those who grow and process them.

Mr. FINDLEY. May I ask the gentlewoman a question?

Mrs. SULLIVAN. Yes.

Mr. FINDLEY. Why has the gentlewoman chosen the Consumers Union to occupy such a prominent role in this process?

Mrs. SULLIVAN. Because it is the only group I know of in the United States which has made a study of consumer needs and consumer problems.

Mr. FINDLEY. But is its membership really sufficiently large so that it could really express the view of the consumer?

Mr. POAGE. Mr. Chairman, I move to strike the last six words.

Mr. Chairman, this is the point I was trying to make with the author of the amendment awhile ago. I find no objection to including consumers in this group. I believe that is a good idea. It is perfectly sound. But the next amendment to be offered by the gentlewoman from Missouri says that the term "consumer" means any person within the United States who consumes wheat or wheat products.

That is a fair definition of "consumer." It is the actual definition of "consumer." Consumers include more than those who belong to any one group. Now, producers of wheat include more than those that belong to any one farm organization. I do not say that the representatives here that represent producers must be members of the Farmers Union or the Farm Bureau or the NFO or any other farm organization, but what we say here is they must be "producers." Period.

Mrs. SULLIVAN. Will the gentleman yield?

Mr. POAGE. I am glad to yield to the gentlewoman.

Mrs. SULLIVAN. Who would choose the wheat producer representatives on the Council?

Mr. POAGE. The Secretary of Agriculture. And I think he should choose your consumers, too.

Mrs. SULLIVAN. Does he know every Tom, Dick, and Harry who produces wheat? He would just take the recommendations of this private foundation; would he not?

Mr. POAGE. He might very well, but still this gives the Secretary the authority to make the selections and not some nonofficial group. I think we must keep our Government within the range of designated authorities. I do not think you can go out and say some group—and I do not care whether it is yours or mine or someone else's—has the right to control and dictate the regulations of any of these programs of the U.S. Government. Of course, any member of any commission is going to belong to something. He may belong to the Knights of Columbus or he may belong to some other organization, but he is appointed not because of his membership in some private organization but, rather, because of his familiarity with and his background in the work for which he is appointed.

Mrs. SULLIVAN. Will the gentleman yield again?

Mr. POAGE. Surely.

Mrs. SULLIVAN. The wheat processors and the producers and the end-product manufacturers are going to recommend names to the Secretary?

Mr. POAGE. Doubtlessly. And so can the consumers group.

Mrs. SULLIVAN. That is exactly what the Consumers Union would do under my amendment. It would recommend names.

Mr. POAGE. Certainly they can.

Mrs. SULLIVAN. The Secretary would make the selections from the names submitted by Consumers Union.

Mr. POAGE. I have no objection to the Consumers Union or Ralph Nader recommending names. But I do not believe the Secretary ought to be instructed by law to say that only members of a certain organization can represent the people of the United States. I just think when we get into that situation we are going to say they have to belong to the Baptist Church.

Mr. HOSMER. Will the gentleman yield?

Mr. POAGE. Yes.

Mr. HOSMER. I think the gentleman should understand that he is not talking about the U.S. Government or any arm thereof. What they are appointing members of here is the Wheat Industry Council, a nonprofit, non-Government, tax-exempt organization. I was bothered in the beginning by this business about the Consumers Union, too. When I examined it and learned of this council being outside the Government, which, incidentally, has the power to tax up to $6 million a year on the production of wheat, then I figured we have let the doors open and the floodgates wide open to anything. So I would suggest that the gentlewoman from Missouri has a perfect right to have the consumers industry or associations or anybody else she chooses to name to be nominees for these appointments to this nonprofit, non-Government, tax-exempt organization.

Mr. POAGE. May I ask the gentleman what is his question. I yielded for a question. What is the gentleman's question? I have been listening attentively.

Mr. HOSMER. My question is does the gentleman know what he is talking about?

Mr. POAGE. I hope I know what I am talking about, but I find I never know——

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. POAGE was allowed to proceed for 2 additional minutes.)

Mr. POAGE. I have found from a good many years of experience that I never know all there is to be known about what is being talked about on the floor.

I find very few Members who do. There are those who feel that they do know all about any subject. I am not one of that group. I do know that the bill as presented proposes to have the Secretary of Agriculture select 15 members. The gentlewoman from Missouri has suggested 20, and I am willing to accept the 20. The Secretary would appoint them. They come from different groups; they do not come from private organizations, and the third or fourth of her amendments would require that this group come from a particularly named private organization. I just think that is a very bad practice for this legislative body to get into, to name private organizations to carry out these programs.

Mr. WOLFF. Mr. Chairman, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from New York.

Mr. WOLFF. Would it be advisable to amend the recommendation made by the gentlewoman in having the people, the consumers appointed by the consumers advising the President?

Mr. POAGE. I think they should be appointed just like the rest of the members are appointed, by the Secretary of Agriculture. I see no reason why they should be appointed differently from the other members of the Council.

I am perfectly willing to accept the gentlewoman's suggestion that we have consumers on this Council, all of her amendments except the one which names the particular group that is going to name one-fourth of the members. If you will bring that amendment into the same rules I am willing to accept all the others.

Mrs. SULLIVAN. The bill now gives the Secretary the right to name the industry members to the Council, but from a list to be submitted to the Secretary by these three private interest groups represented in the Foundation named in the bill. In my amendment, another private group, Consumers Union, would make the nomination of the consumer representatives. The wheat producers and growers and manufacturers are all private groups. The Council set up by the bill is a private group. I thank the gentleman from California for emphasizing that point.

Mr. POAGE. The difference is this: Those are groups that are formed by virtue of the business in which they are engaged, and the lady very fairly defines "consumer" in her second amendment. I think it is a factual definition, and having defined it as being any person in the United States who consumes wheat products, I think it should apply to the rest of the bill.

Mr. LINK. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from North Dakota is recognized for 5 minutes.

Mr. LINK. Mr. Chairman, I find myself pretty much in accord with the amendment offered by the gentlewoman from Missouri. I would hope that we can reach an accord here and take cognizance of the fact that as I understand her amendment it merely provides that Consumers Union recommend appointees to the Secretary of Agriculture in the same manner that the Wheat and Wheat Food Foundation submit names as provided under sections 6 and 7 of the bill.

In that respect her amendment does not substantially differ from the procedure that is outlined in the bill for the process provided for establishing the composition of the Commission.

So, it is on that point that I think there is sufficient safety, to insure that a private organization does not have undue influence in the make up of the council.

If, in the wisdom of the Secretary, he does not find that the recommendations by Consumers Union are acceptable, he does not have to appoint them. In my understanding of the gentlewoman's amendment, it does not carry that the appointees recommended by Consumers Union are necessarily members of Consumers Union, but that Consumers Union be designated as a consumer representative group for the purpose of recommending nominees.

I have personal knowledge of the work, quality, and organization of Consumers Union for many, many years. I am satisfied that they would be an acceptable consumers' group to recommend to the Secretary those nominees who would be available for his consideration in recognizing consumers' interests on the final council that we are setting up here this afternoon.

I would like to be in a position to support this kind of an amendment. I think this is good legislation, and adds to the strength of the total bill.

Mrs. SULLIVAN. Mr. Chairman, would the gentleman yield?

Mr. LINK. I yield to the gentlewoman from Missouri.

Mrs. SULLIVAN. Mr. Chairman, what I object to in this bill is that the consumer pays for this whole prorgam, and let us not kid ourselves about it; he or she pays the bread tax to raise the money to mount the propaganda campaign, and has no say whatsoever in how the money will be spent, what research is to be undertaken, how the facts are to be presented in preparing handout material for food editors, writers, and to all the media, or what advertisements will be purchased to propagandize the consumer benefits. That is the reason that I was asking to have the consumer interests represented.

If I may have the attention of the Chairman for a moment, in this amendment where we say that each of such nominees appointed as voting members or alternates shall be put forth by the Consumers Union, I would not mind changing that, if it would meet his objections, by changing it to the Consumer Federation of America, which is a federation of consumer groups throughout the Nation.

In other words, we want people appointed who we feel will speak for the consumers. The Consumer Federation could provide a list of names to be selected by the Secretary as voting and nonvoting consumer members of this Council.

The Federation has affiliates in most States and in almost every city in the country, representing consumer interests.

I wonder if the gentleman from Texas would object to that?

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. PRICE of Texas. Mr. Chairman, I move to strike the requisite number of words.

I would like to ask the gentlewoman from Missouri (Mrs. SULLIVAN) some questions.

First, why pick out just the Consumers Union? And who are these people? Could the gentlewoman enlighten us on that?

Mrs. SULLIVAN. I could not give the gentleman one name representing the Consumers Union, except that they get out a Consumer's Report every month on the testing that they have made on a myriad of things that are produced, including products. The Consumers Union is a nonprofit corporation, and their money is obtained through the sale of subscriptions to the magazine.

Mr. PRICE of Texas. In all fairness, what would we do about possibly other organizations such as some of the consumers federations of America, and organizations of that nature? Why pick out just this group?

Mrs. SULLIVAN. Because these are the people who have devoted time to study consumers' affairs, and they would be just as appropriate to name members to serve on this council as those who are interested in producing wheat, and the wheat processors.

Mr. PRICE of Texas. Will the gentlewoman from Missouri answer one other question, then? Under her amendment would the consumers' bloc have a vote over specific projects undertaken by the wheat council?

Mrs. SULLIVAN. I think they would have the same vote, their vote would be of the same value as those of the wheat council.

Mr. PRICE of Texas. Would they have the veto power?

Mrs. SULLIVAN. If others had the veto power, this group would have the veto power. They would have the same powers.

Mr. PRICE of Texas. Mr. Chairman, I thank the gentlewoman from Missouri.

Mr. QUIE. Mr. Chairman, I move to strike out the last word and rise in opposition to the amendment.

Mr. Chairman, I see the gentleman from Illinois here who has his referendum amendment adopted. I was wondering if he will now offer an amendment to include consumers as part of the referendum as well, and it would be necessary for two-thirds of them to support it also?

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. QUIE. I yield to the gentleman.

Mr. FINDLEY. I am afraid that would up the cost of the referendum considerably above the $1½ million estimate that has been referred to here today and I would add further that I think the Members of this body actually should see themselves as representatives of consumer interests and vote accordingly when the time for the passage of this bill comes. When that time comes, I hope the vote will be "No."

Mr. QUIE. I have supported the concept of this legislation. I think the concept is good. I know there is some problem about the referendum of producers and processors and manufacturers, and that has been adopted.

But when, as has been indicated, you pick one consumer group to select nominees, I would oppose such an amendment. Consumers should benefit from research of this nature but all consumers should have a voice, not just one group.

It seems to me, from what the Cotton Council has done in research, and what has been done by some of the other fibers and what has been done by the dairy industry, has been of benefit to consumers and not a detriment to them. Wheat certainly is a wholesome food.

I think this is just going beyond an effort to make this a good piece of legislation, but to try and bog it down so that it will never be able to function.

So I would think if people are opposed to the legislation, this might be a way of making certain that it goes down to defeat.

As I said before, I liked the concept of this bill and would have supported it as it came from the committee. My reasons are this:

Never before in our history has there been such widespread interest in food components and nutritive value of various foods. Nutritional needs vary with age. Historically, wheat has been consumed in different products from infancy through old age.

It is being suggested by some eminent nutritionists that wheat contains certain proteins which are of great importance to youth, that wheat can lower cholesterol, and that it is helpful in reducing kidney disease. Unbiased research is necessary to confirm these anticipated benefits.

One of my many concerns is adequate nutrition for schoolchildren. It is ironic that in an age of unprecedented affluence, children suffer some of the effects of malnutrition. It is essential that children and adolescents be taught the importance of eating a proper diet. Having five children of my own, I know how difficult a task it is to convey this information to children.

This bill would authorize the use of funds to try to educate children as well as other age groups of the benefits from eating wheat and wheat products.

Under the language of the bill, the Secretary of Agriculture would have to approve all of the plans and proposals for wheat research, education, and promotion so that the public interest would be protected even though no tax dollars are involved directly.

I favor self-help programs of this type and am pleased that the Wheat and Wheat Foods Foundation comprised of producers, processors, and manufacturers have been able to reach agreement on this self-help program. Members may recall that I opposed the Legal Services Corporation because the selection of the Board of Directors would have been removed from the authority of the President. In that instance, the Board of Directors would have had control over the use of tax dollars. In this instance, the Wheat Industry Council will be using funds assessed upon processors, so I do not object to the method of selecting the Council.

Mr. DE LA GARZA. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I yield to the gentleman from Texas (Mr. POAGE).

Mr. POAGE. Mr. Chairman, I have just been discussing this matter with the gentlewoman from Missouri and the chairman of the subcommittee, the gentleman from Texas, and I believe this thing can be worked out satisfactorily to everyone with the language that the gentlewoman now suggests—of allocating a national association of consumers to make the nominations.

Mrs. SULLIVAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentlewoman.

Mrs. SULLIVAN. I understand that the name "Consumers Union" may not be familiar to everyone in this Congress, so I suggest a change in the amendment to "Consumer Federation of America"—which means consumers and their representatives all over the United States.

I would be perfectly happy to amend my amendment by changing the words "Consumers Union" to "Consumer Federation of America."

Mr. POAGE. I would think, and I understand that is satisfactory with the chairman of the subcommittee, that with that change we could accept all the amendments and do it en bloc.

Mrs. SULLIVAN. Mr. Chairman, I ask unanimous consent to amend my amendment by changing the name from Consumers Union to Consumers Federation of America.

The CHAIRMAN. The Chair would like to clarify the situation.

Pending before the Committee at the present time is one amendment offered by the gentlewoman from Missouri which occurs on page 4, line 25. This is the only amendment presently pending before the Committee.

The Chair will at this time put the question on that amendment.

The question is on the amendment offered by the gentlewoman from Missouri (Mrs. SULLIVAN).

The amendment was agreed to.

AMENDMENTS OFFERED BY MRS. SULLIVAN

Mrs. SULLIVAN. Mr. Chairman, I offer the remaining amendments at the desk and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mrs. SULLIVAN: Page 5, line 5, immediately after "Industry" insert "and Consumer", and on page 6, line 20, strike out "(k)" and insert in lieu thereof "(i)" and immediately after line 19, insert the following new subsection:

"(k) The term 'consumer' means any person within the United States who consumes wheat or wheat products."

Page 6, line 24, immediately after "industry" insert "and consumer" and on line 26, immediately after "industry" insert "and consumer", and on page 7, line 10, strike out "fifteen" and insert in lieu thereof "twenty", on line 11, strike out "seven" and insert in lieu thereof "nine", and on line 13, strike out "fifteen" and insert in lieu thereof "twenty".

Page 7, line 21, immediately after "industry" insert "and consumer", and on page 9, line 1, strike out "(b)" and insert in lieu thereof "(c)", on line 4, immediately before the period insert ", and two from consumers as referred to in subsection (b) of this section", and immediately above line 1, insert the following new subsection:

"(b) Within the same time period specified in subsection (a) of this section, the Secretary shall request Consumers Union, a nonprofit corporation organized and existing under the laws of the State of New York, to submit the names of five persons for consideration by the Secretary as nominees for appointment to the council as voting members, and names of five additional persons, each for consideration by the Secretary as a nominee for appointment as an alternate to a designated voting member of the council. Each of such nominees for appointment as voting members or alternates shall be selected and put forth by Consumers Union on the basis that he or she is qualified to serve the legitimate interests of consumers of wheat products, in his or her capacity on the Wheat Industry and Consumer Council. Any one or more of such nominees, voting members, and alternates may be a director, officer, or executive committee member of Consumers Union."

Page 9, line 8, strike out "is" and insert in lieu thereof "and Consumers Union are", on line 9, strike out "fifteen" and insert in lieu thereof "twenty", on line 12, immediately after "industry" insert "and consumer", on line 15, immediately after "foundation" insert "or consumers Union, whichever is applicable,", on line 19, strike out "segment of the wheat industry" and insert in lieu thereof "classification", and on line 20, strike out "or" and immediately after "manufacturer' insert, ", or consumer", and page 10, line 4, strike out "or" and immediately after "manufacturer" insert ", or consumer".

Page 11, line 18, strike out "three groups" and insert in lieu thereof "four classifications (producer, processor, end-product manufacturer, or consumer)", on line 21, strike out "three groups" and insert in lieu thereof "four classifications", on line 22, strike out "and", and on line 23, immediately after "ufacturers" insert ", and consumers".

Page 1, above line 1, amend the title to read as follows: "A Bill to enable wheat producers, processors, end-product manufacturers, and consumers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States, to the extent consistent with nutritional needs of consumers."

Mr. ABBITT (during the reading). Mr. Chairman, the amendments having been read one time, I ask unanimous consent that they be considered as read and printed in the RECORD.

The CHAIRMAN. The Chair will advise the gentleman that there has been a change in one of the amendments.

Mr. ABBITT. I did not know that.

The CHAIRMAN. Is there objection to the request that the amendments be considered en bloc as read?

The Chair hears none.

The Chair would like to clarify this once more. Is there objection to the request that the amendments be considered en bloc?

Mr. GROSS. Mr. Chairman, reserving the right to object, I should like to ask the gentlewoman by how many members will her amendment increase the Council?

Mrs. SULLIVAN. Five members, the same as the other three groups.

Mr. GROSS. Would that raise the total number to 25 or 30, or how many?

Mrs. SULLIVAN. From 15 to 20. There are three groups now represented under this bill, and this would raise the number to one more group and five more members.

Mr. GROSS. In total what does that make?

Mrs. SULLIVAN. Twenty.

Mr. GROSS. Are there not others that would associate with the Council?

Mrs. SULLIVAN. No. To my knowledge there are just 15 members under the present bill to be appointed by the Secretary.

Mr. GROSS. How much money is it going to take to fund this Council?

Mr. POAGE. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Texas.

Mr. POAGE. There are 15 voting members and seven not voting. They are represented as members of the Council but they do not have a vote.

Mr. GROSS. I do not care whether they vote or not. What I am trying to get at is this: If the council is increased is it going to cost more and will we be confronted with a bill to increase the Federal contribution to this thing?

Mrs. SULLIVAN. If the gentleman will yield, I cannot answer that question for the gentleman from Iowa, but I do not think it will increase the contribution of the Government to this Council.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Missouri that the amendments be considered en bloc?

There was no objection.

PARLIAMENTARY INQUIRY

Mrs. SULLIVAN. Mr. Chairman, I have a parliamentary inquiry.

Must I again ask unanimous consent to change the name Consumers Union to the name Consumers Federation of America?

The CHAIRMAN. The Chair had understood that the gentlewoman had made the change before she submitted the amendment. Has the gentlewoman made the change in her amendment?

Mrs. SULLIVAN. I did make the request. I do not know if I did it at the proper time.

The CHAIRMAN. Will the gentlewoman send it to the desk?

The Clerk will report the portion of the amendment that the gentlewoman is asking unanimous consent to change.

The Clerk read as follows:

Amendment offered by Mrs. SULLIVAN: Page 7, line 21, immediately after "industry" insert "and consumer", and on page 9, line 1, strike out "(b)" and insert in lieu thereof "(c)", on line 4, immediately before the period insert ", and two from consumers as referred to in subsection (b) of this section", and immediately above line 1, insert the following new subsection:

(b) Within the same time period specified in subsection (a) of this section, the Secretary shall request Consumers Union, a nonprofit corporation organized and existing under the laws of the State of New York, to submit the names of five persons for consideration by the Secretary as nominees for appointment to the council as voting members, and names of five additional persons, each for consideration by the Secretary as a nominee for appointment as an alternate to a designated voting member of the council. Each of such nominees for appointment as voting members or alternates shall be selected and put forth by Consumers Federation of America on the basis that he or she is qualified to serve the legitimate interests of consumers of wheat products, in his or her capacity on the Wheat Industry and Consumer Council. Any one or more of such nominees, voting members, and alternates may be a director, officer, or executive committee member of Consumers Union.

The CHAIRMAN. Is there objection to the unanimous consent request?

Mr. PRICE of Texas. Mr. Chairman, reserving the right to object, I should like to ask the gentlewoman, what is this organization? Who are these people? And of whom do they consist? How are they different from the Consumers Union?

Mrs. SULLIVAN. The Consumer Federation of America is made up of consumer groups all over the United States. They do have meetings. They formed a national federation called the Consumer Federation of America. They devote a great deal of time and study to consumer affairs, and what their relation is to the Consumers Union, I do not know.

Mr. PRICE of Texas. I thank the gentlewoman.

The CHAIRMAN. Is there objection to the unanimous-consent request?

There was no objection.

Mrs. SULLIVAN. Mr. Chairman, I have some very serious doubts about this legislation in its present form and that is why I have prepared and offer a series of amendments which would bring the consumer interest into this program. Right now, it is there in name only in that the consumer is the target of a promotion campaign authorized by the bill. The bill would set up a $6 million fund, paid for by consumers and collected under Government auspices as a kind of bread tax, to be used to brainwash the consumer about wheat products.

I am not in a position to know if the wheat industry at this point needs the stimulus of a $6 million a year government-sponsored advertising campaign to get consumers to buy more wheat products. I do know that wheat prices have risen about 30 percent recently because the Russians are interested in buying huge amounts of American wheat. So we already face a significant rise in bread prices and prices of other foods containing wheat. The Nixon administration lets all of these farm commodity price increases pass on through to the consumer without any hindrance under price control regulations. Now this bill would add an additional $6 million a year to consumer prices of wheat products in order to set up an advertising and public relations program to get consumers to buy more wheat products—so that increased demand for wheat can then bring about an additional increase in wheat prices.

CONSUMER PAYS FOR PROGRAM BUT HAS NO SAY IN IT

What I object to most is that the consumer, who pays for this whole program—he or she pays the bread tax to raise the money to mount the propaganda campaign—has no say whatsoever in how the money will be spent, or what research is to be undertaken, or how the facts are to be presented in preparing handout material for food editors and writers in all media, or what advertisements will be purchased to propagandize the "consumer benefits" from increased consumption of wheat by the American consumer.

The interests of the sellers of wheat in expanding sales are not necessarily to the best interests of consumers. When an industry spends its own money to promote a commodity, that is their business. But when they assess what amounts to compulsory Federal bread tax on the public in order to promote wheat product sales, with the Government forcing the collection of this tax for a private enterprise group, then we have a right to insist that the money be spent only for the dissemination of honest information.

GIVING CONSUMER A VOICE IN USE OF FUND

Hence, my amendments change this proposed 15-member Wheat Industry Council into a 20-member Wheat Industry and Consumer Council, give consumers equal representation with wheat farmers, millers, and bakers—five from each of four groups instead of from three groups—and would have the consumer representatives selected by the Secretary of Agriculture from a list submitted to him by the Consumer Federation of America, in the same way he selects the 15 industry representatives from a list provided by the Wheat and Wheat Foods Foundation, a private organization. Consumers Union is the largest consumer membership group in the country—and one which has expertise and laboratory facilities and objective knowledge of food technology and nutritional information.

As the information I will place in the record clearly indicates, some of the proponents of this promotional enterprise to brainwash the consumers about wheat products intend to use this Council to combat nutritionists, whom they define as food faddists and quacks, on the nutritional value of white bread as now constituted. Let me say that not everyone who questions the value of today's commercial white bread is a "food faddist" or "quack." But in view of the attitude expressed in the hearings, it is imperative that we have qualified consumer representatives on the board supported by this bread tax, to make sure the information disseminated is factual, and scientifically honest.

Mr. Chairman, I urge adoption of these amendments to channel the money raised under the proposed bread tax into worthwhile consumer-oriented activities.

SELECTION OF COUNCIL MEMBERS

H.R. 13514 as presently written provides that the Wheat and Wheat Foods Foundation, a nonprofit Illinois corporation, would submit the names of 15 nominees and 15 alternates to the U.S. Secretary of Agriculture, five of which would represent producers, five processors, and five end-product manufacturers. The Secretary of Agriculture would appoint these people to the Council or, if he rejects one or more of them, would request submission of additional names from the Wheat and Wheat Foods Foundation.

My amendment provides for nomination and appointment of the consumer representatives in a similar way, except that the names of consumer members and alternates would be submitted by Consumers Federation of America rather than the Wheat and Wheat Foods Foundation which has no consumer membership. The Consumer Federation of America is a nonprofit, tax exempt organization with affiliates throughout the Nation. The Consumer Federation is an appropriate organization to nominate consumer representatives for the Wheat Industry and Consumer Council, comparable to the Wheat and Wheat Foods Foundations for representatives of the three industry segments.

My amendment also adds two nonvoting consumer members to the Council, to balance the two nonvoting members from each of producers, processors, and end-product manufacturers already provided in the bill.

INCREASING THE PRICE OF BREAD

Consumers have a vital interest in H.R. 13514—and therefore should be directly represented—for at least two reasons.

First, it is clear that consumers will be paying the cost of the research and advertising program under this bill, in the form of higher prices for bread and other wheat products. Although the program will be financed by a collection from processors of up to 2.5 cents per hundred weight of processed wheat, there is little question that the processor firms will pass along this cost to the consumer.

It is estimated that $2.6 million will be raised the first year, and this is expected to increase to $6 million in subsequent years. The proponents of the bill say that this would increase the prices to the consumer of bread and other wheat foods only by a small amount.

At a time when the price of food is increasing faster than virtually any other item in the Consumer Price Index, should we load even a small increase onto the price of bread and other basic foods unless it can be clearly justified? Perhaps more to the point, do we dare add another increase to food prices at this time without giving the consumer any voice in deciding how this higher cost in foods can be expected to contribute to improved nutrition or some other desirable objective?

ASSURING OBJECTIVE INFORMATION

Second, consumers have an interest in the type of research and promotion that will be carried out pursuant to this bill.

During the hearings held May 3 on H.R. 13514 by the House Agriculture Committee, a number of witnesses from wheat grower organizations, processors, and bakeries claimed that this legislation could serve consumers by documenting and publicizing the nutritional value of wheat foods. This is of course plausible. But without consumer representation on the Council, which will decide what kinds of specific research and promotion to undertake, how do we know that legitimate interests of consumers will be taken into consideration at all?

Indeed, in the absence of consumer representation, how can we be sure the result will not be research and promotion designed to defend and expand sales of wheat producers per se, regardless of how consumers would be affected?

That consumer interests might be ignored is suggested by a statement made in the May 3 House Agriculture Committee hearing by Walter W. Dolch, representing the Associated Retail Bakers of America:

> Food faddists and quacks circulate unfounded attacks on white bread. Even some scientists report experiments from which they draw erroneous conclusions unfavorable

to wheat foods. If we have the research and educational capabilities possible under this act, I doubt that an enlightened public would give credence to such statements and reports.

Mr. Dolch is a director and member of the executive committee of the Wheat and Wheat Foods Foundation, and in that capacity might well be among those suggested for membership on the Wheat Industry Council which would administer the wheat promotion program under H.R. 13514. Certainly, with this type of orientation represented, the Council must also include consumers to afford balanced decisions on the kinds of promotional activities to be carried out.

DEPARTMENT OF AGRICULTURE QUESTIONS OBJECTIVITY OF GROUP

The U.S. Department of Agriculture itself has raised serious questions about the structure of the Wheat Industry Council in this bill. Under Secretary of Agriculture J. Phil Campbell, in a letter of May 2 addressed to Chairman POAGE of the Agriculture Committee, questioned the wisdom of delegating governmental powers to a strictly private agency—the Wheat Industry Council—as this bill would do.

Under Secretary Campbell also said:

> There also is a question as to whether the proposed delegation to the [Wheat and Wheat Foods] Foundation adequately recognizes the interests of non-members of the Foundation who might now or in the future be directly affected by the program. Authorizing legislation for other commodity research and promotion programs contains provisions for public hearings, referenda, and assessment refunds. This bill does not contain such provisions.

Although the Department of Agriculture did not explicitly recommend that consumer representation be included, consumers' interests would certainly be among the most conspicuously affected interests without membership on the Foundation.

Mr. Chairman, if the sponsors and supporters of this bill have the nutritional interests of consumers in mind, then they should be willing to accept my amendments so that consumer interests are explicitly protected. In any event, I am confident that the Members of the House—mindful of the extreme pressures on the consumers' food budget at the present time—will insist that the consumers' voice be heard in any wheat promotion program authorized by this bill.

My amendments will assure the consumer such a voice, and I urge their adoption.

The CHAIRMAN. The question is on the amendments offered by the gentlewoman from Missouri.

The amendments were agreed to.

AMENDMENT OFFERED BY MR. WOLFF

Mr. WOLFF. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. WOLFF: Page 21, line 2, after "SEC. 24." insert "(a)", and between lines 12 and 13 insert the following:
>
> (b) The council shall undertake a study with respect to (1) the effect of total wheat sales by the United States on the wholesale and retail prices of bread within the United States; and (2) research (under item 5, page 4) to determine feasible methods by which world wheat program subsidies may be reduced or eliminated. The council, within one year after the date on which the members of the council are initially appointed pursuant to section 7, shall report to Congress on the results of the study required by this subsection.

Mr. PURCELL. Mr. Chairman. I have had an opportunity to examine this amendment and I, for the chairman of the committee, accept this amendment.

POINT OF ORDER

Mr. TEAGUE of California. Mr. Chairman, I rise to make a point of order against the amendment.

The CHAIRMAN. The Chair will hear the gentleman on his point of order.

Mr. TEAGUE of California. Mr. Chairman, the point of order is that this amendment, the proposed amendment, seems to be clearly nongermane. The fundamental purpose of the proposed wheat council is to conduct research, to engage in advertising and promotion of wheat and wheat products. The proposed amendment here goes beyond the fundamental purpose of the bill a long, long way and gets into problems that are not a part at all of H.R. 13514, and therefore seems clearly to be nongermane.

Mr. WOLFF. Mr. Chairman, the gentleman who made the point of order indicated that the bill intended to enable wheat producers, processors, and end-product manufacturers to engage in an updated program of research. This is exactly what this amendment purports to do. In addition, the bill itself is intended to promote, maintain, and expand markets. Markets are groups of people that are willing and able to buy.

All that we are trying to find out here are ways and means by which we can expand markets for wheat and wheat products, and to find out what relationship there is with matters that are outside the general control of our own, to be able to bring into focus the effect of this upon total wheat sales.

As Members will note, the amendment as it was originally set up perhaps did not conform. However, I have adjusted the amendment in order to conform to the research under item (5) on page 4, which includes world food programs. The item (5) indicates that we will help improve the effectiveness of world food programs through better utilization of wheat foods. My amendment intends to do just that.

The CHAIRMAN (Mr. ROUSH). The Chair is prepared to rule.

The Chair has had an opportunity to examine the amendment offered by the gentleman from New York. The amendment offered by the gentleman from New York has included in it a study with respect to the effect of total sales by the United States on wholesale and retail prices, and refers to feasible methods by which subsidies might be eliminated.

The Chair would call attention to the title of the bill before the committee, which is:

> To enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States.

The Chair would also call attention to section 2, on page 4, subparagraph (5), which has the following language:

> Help improve the effectiveness of world food programs through better utilization of wheat foods;

The Chair rules that the amendment offered by the gentleman from New York is germane, and overrules the point of order.

The gentleman from New York is recognized for 5 minutes in support of his amendment.

Mr. WOLFF. Mr. Chairman, the amendment which I offer today is prompted by what appears to be a developing pattern of increased American export wheat sales. Recently there has been a great deal of concern about the terms of the just concluded United States-Soviet grain agreement. I myself spoke out here in this Chamber almost 1 month ago on the potential of this agreement to raise our domestic bread prices.

Now, grave doubts have been raised about the integrity of the negotiations themselves which lay the foundations for the $750 million grain deal. I was pleased to note that my able colleague from Texas (Mr. PURCELL) last week announced that he plans to have his subcommittee investigate the circumstances surrounding the Soviet wheat sale agreements. Many questions that have been raised certainly need to be answered. I might add that the Department of Agriculture has yet to reply to my almost 1-month-old request for a report of the impact which the pact might have on our own market.

My amendment is very straightforward and I think it will serve as a useful guide to the work of the Wheat Industry Council which the bill would establish. The amendment calls for the Wheat Industry Council to make a study of the effect of wheat exports on domestic bread prices at both the wholesale and retail levels. It also provides that the Council undertake a study of the feasible methods by which export subsidies might be reduced or eliminated.

Mr. Chairman, it seems to me that a bill which creates the machinery charged with establishing, financing, and coordinating a program of research, education, and promotion to expand markets for wheat should address itself to these two questions, namely, the effect upon U.S. domestic bread prices and U.S. export subsidies.

The current situation in which the consumer and the taxpayer wind up effectively footing the bill of an export grain agreement twice—by paying higher bread prices and contributing their tax dollars toward the payment of subsidies—is, I feel, unfair and unworkable.

Adoption of my amendment would solicit the input of the Wheat Industry Council which might help to make future export grain sales—and some are clearly in the offing—more economically sound on the domestic front. In creating this Council, which is of prime importance to the wheat industry itself, enactment of this amendment would very clearly stress the importance of protecting the people who in one way or another will ultimately pay for its work, the consumer and the taxpayer. For these reasons, I urge my colleagues to join in support of this amendment.

Mr. TEAGUE of California. Mr. Chairman, I rise in opposition to the amendment.

It seems to me to be a most unlikely eventuality that a group of consumers, advertising men, and scientists who would constitute the membership of this Wheat Council with perhaps a few farmers thrown in is really equipped to deal with such a highly difficult and technical subject as our whole wheat export program. I have no doubt these questions may need review, but I do not believe this is the group to do it.

Therefore, I feel very definitely this proposed amendment should be rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. WOLFF).

The question was taken; and on a division (demanded by Mr. WOLFF) there were—ayes 23, noes 50.

So the amendment was rejected.

Mr. GROSS. Mr. Chairman, I move to strike the eighth word.

Mr. Chairman, I should like to ask someone who is knowledgeable with respect to this bill why the council is provided with an unlimited number of confidential employees.

Mr. PURCELL. If the gentleman will point out the place in the bill he is referring to, I would be glad to try to answer his question.

Mr. GROSS. It is page 22, line 9, under paragraph (c), wherein it provides:

> All reports and records submitted by processors to the council and received by it pursuant to the provisions of this section shall at all times be in custody of one or more confidential employees designated by the council.

Mr. PURCELL. Well, I will just say that this is the normal way of any business carrying on its business. They would not want it to be in the custody of anyone in whom they did not have confidence.

Mr. GROSS. And going to page 23 of the bill, with regard to funds, it is stated that the funds accruing to the council will also be in the custody of confidential employees.

Mr. PURCELL. I certainly would not want unconfidential employees.

Mr. GROSS. Is there no Government money involved in proposal?

Mr. PURCELL. Not that I know of.

Mr. GROSS. In any provision of the bill, especially under either paragraph (c) or paragraph (b)?

Mr. PURCELL. The only Government money involved is to set this up and to have the Secretary have the oversight to see what he wants. The money that is to be used by this is generated by the industry.

Mr. GROSS. Who audits the books?

Mr. PURCELL. I am sure that those who audit all books of agencies set up by this Congress.

Mr. GROSS. Since Government funds are involved in the support of this program, is there any provision that the General Accounting Office may take a look at the books?

Mr. PURCELL. I am sure that there is; yes, sir.

Mr. GROSS. In this bill?

Mr. PURCELL. I do not know whether it is in this bill. I do not think we have to have provision in every bill for the General Accounting Office to look at books under laws this Congress grants.

Mr. GROSS. If the money is to be entrusted only to confidential employees, how would the General Accounting Office get a look at the financial operations?

Mr. PURCELL. If the gentleman would yield, I just stated that this is the provision, as far as I know, that every organization in any way similar to this is set up.

I am not being facetious when I say that we are just contending that the employees of this group, this Commission, this organization shall be those that handle the business of it.

Mr. GROSS. Is there any intent now on the part of the gentleman or the House Agriculture Committee to establish a corn industry council? There is presently no corn industry council, and it is one of the largest food crops in the country and in the world, for that matter.

Mr. PURCELL. Is the gentleman saying corn industry council?

Mr. GROSS. Yes. Are you thinking of proposing a check off on corn farmers?

Mr. PURCELL. Well, they have sources of use in a broader sense than wheat has had. The gentleman from Iowa is very fortunate to have mainly the livestock feed industry, the alcohol industry, and things other than what the wheat industry has had.

If the gentleman is interested in an institute similar to this for corn, we would be glad to consider his request.

Mr. GROSS. I will say to the gentleman from Texas that I am not at all interested in a checkoff for corn farmers. Let me say to the gentleman that I have listened intently this afternoon to all of the debate on this bill, and I have yet to hear a good, substantial reason for a checkoff on the products of wheat farmers for the purposes as stated in this bill. I am not at all convinced of its merits. I will vote against the bill, because I am against checkoffs, compulsory or otherwise, for farmers.

If there is some necessity for a checkoff, let the processors of wheat make that checkoff on their own industry and do their own promoting. Why should there be any compulsion saddled on the producers? And I am not in favor of any Federal aid for administration of this promotion. This country needs a Wheat Industry Council, financed by the Federal Government and consumers, about as much as the Russians need a vodka industry council or the people of Japan need a zaibatsu industry council.

Mr. Chairman, I hope this bill will be defeated.

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. GONZALEZ: On page 24, after line 16, add:
>
> SEC. 27a. No person working for the United States Government in any capacity having to do with the production, consumption, or regulation of food products shall commence employment, direct or indirect, with a private, for private enterprise engaged in the production or consumption, purchase or sale, of such regulated commodities for a period of two years after his separation from the government.

POINT OF ORDER

Mr. TEAGUE of California. Mr. Chairman, I have not had the opportunity to read the amendment, but nevertheless I make the point of order that it is not germane, as I understand the reading of the amendment.

The CHAIRMAN. The Chair would ask the gentleman from California to state the reasons for his point of order.

Mr. TEAGUE of California. Mr. Chairman, I have not seen the amendment, but it seemed to deal with the subject of conflict of interest, which is not in any way involved in this bill.

The CHAIRMAN. Does the gentleman from Texas desire to be heard on the point of order?

Mr. GONZALEZ. Yes, Mr. Chairman; I would.

Mr. Chairman, I would like to say first that I do apologize for not having sufficient copies for the two sides, but the amendment itself is very simple. It is indeed a conflict of interest amendment. It would do the same thing in the area of governmental employment in the Office of the Secretary of Agriculture that we do for the Department of Defense.

We have laws regulating the employment by Government personnel that have been engaged in the procurement of contracts from going to work for a private firm within a stated period of time after their separation from the Government. That is all I am attempting to do with regard to Government employment.

With respect to the point of order on germaneness, on page 24, section 28, we talk about the Secretary. Now, this secretary is not a private secretary, it is the Secretary of Agriculture whom we are talking about. And under this act he is authorized to issue such orders, rules and regulations as may be necessary to carry out the provisions of this act, and the powers vested in him by this act.

If it is germane for the Secretary of Agriculture to have enforcement powers over the portions of this legislation that we are enacting, then what is wrong with him having enforcement powers showing clearly that the Congress does not approve of any Government employee who by virtue of his employment is in direct contact with private enterprise, and then when he leaves he does so under questionable circumstances, under the best of situations.

Mr. GERALD R. FORD. Mr. Chairman, if the gentleman from Texas will yield, let me say that on the substance I do not think I have any objection to the content of the amendment, none whatsoever, but because we were unable to have a copy of the amendment prior to the submission of it, I am not clear on how broad it is. Does it go beyond wheat sales and wheat promotion? Is it going to restrict the officials in the Department from having those who are not connected with wheat sales getting employment?

I must say that the language is somewhat difficult for us to understand in order to discuss the substance as well as the germaneness of the amendment.

Mr. GONZALEZ. If the distinguished minority leader, the gentleman from Michigan (Mr. Gerald R. Ford), thinks it advisable, perhaps we could call for a second reading of the amendment. I do not believe it is that broad. I think it is broad enough to make it uniform in its applicability. I think it clearly states the intention of the Congress, and I do not think it would in any way be objected to by those who in good faith would like to promote wheat and wheat products, or other food products.

So, Mr. Chairman, I would ask unanimous consent that we have a second reading of the amendment.

Mr. Chairman, I ask unanimous consent that the amendment be reread.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk reread the amendment.

The CHAIRMAN. For what purpose does the gentleman from Michigan (Mr. Gerald R. Ford) rise?

Mr. GERALD R. FORD. Mr. Chairman, after having heard the amendment reread, I would like to be heard further on the point of order made by the gentleman from California (Mr. Teague).

The CHAIRMAN. The gentleman from Michigan is recognized.

Mr. GERALD R. FORD. Mr. Chairman, I think it is absolutely crystal clear that the amendment is not germane to this proposal before us at the present time. It has a far broader application than the basic intent of this particular legislation. It covers all employees of the Department of Agriculture, and as a matter of fact of the Government. So it is not just limited to the Department of Agriculture. For that reason I think the proposal is not germane under any circumstances under the rules of the House.

The CHAIRMAN. Does the gentleman from Texas wish to be heard on the point of order?

Mr. GONZALEZ. Yes, Mr. Chairman.

I wish to emphasize that this act, if we approve of it, brings the Government in and it clearly states in section 28:

> Sec. 28. The Secretary is authorized to issue such orders, rules, and regulations as may be necessary to carry out the provisions of this Act and the powers vested in him by this Act.

My amendment is not any broader than is required to cover not only this circumstance, but will have uniform applicability with respect to employment in this particular section having to do with production, consumption and regulation, and particularly regulation of food products.

I think if we had clearly emphasized this doctrine, we could have saved ourselves the embarrassment and pain of the Billy Sol Estes deal, for instance, which would have been clearly within the confines of congressional policy. I think this will clearly and fundamentally point out to any Government employee, particularly in the regulated field that he shall be in the same premise as Department of Defense employees.

The CHAIRMAN. The gentleman is arguing the substance of his amendment and is not addressing himself to the point of order.

Does the gentleman wish to be heard further on the point of order?

Mr. GONZALEZ. I thought I was arguing on that.

The CHAIRMAN. In the opinion of the Chair, the gentleman was arguing the substance of his amendment and was not addressing himself to the point of order.

Does the gentleman wish to be heard further on the point of order?

Mr. GONZALEZ. Yes, Mr. Chairman; I would like to do that.

If the Chairman please, I would like to add that my amendment is germane—as germane as section 28 inasmuch as in our legislation we are bringing in the Secretary of Agriculture to enforce and to carry out the will of the Congress, as expressed in this particular bill.

The CHAIRMAN. The Chair is prepared to rule. The ruling will be brief.

The purpose of the bill before the Committee is to provide a program for research, education, and promotion to maintain and expand markets for wheat. This is to be implemented by regulations issued by the Secretary of Agriculture.

The gentleman's amendment goes beyond the purpose of the bill, in the opinion of the Chair. It goes to all persons working for the U.S. Government in any capacity and encompasses all food products.

This prohibition against employment is a matter which should properly be under the jurisdiction of another committee of the House of Representatives. For these reasons the Chair is constrained to rule that the amendment is not germane and the point of order is sustained.

Mr. GONZALEZ. Is the Chair amenable to reason?

The CHAIRMAN. The Chair is a reasonable man, but the Chair has ruled and the reasonable ruling stands.

Are there any further amendments? If not, under the rule the Committee will now rise.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Roush, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 13514) to enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States, pursuant to House Resolution 1093, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. TEAGUE of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 122, nays 234, not voting 75, as follows:

So the bill was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Brasco against.

Mr. Jones of Tennessee for, with Mrs. Abzug against.

Mr. Blatnik for, with Mr. Vanik against.

Mr. Dingell for, with Mr. Dent against.

Mr. Long of Louisiana for, with Mr. Ryan against.

Mr. Nichols for, with Mr. James V. Stanton against.

Mrs. Mink for, with Mr. Green of Pennsylvania against.

Mr. Colmer for, with Mr. Rooney of New York against.

Mr. Dowdy for, with Mr. Hawkins against.

Mr. Evins of Tennessee for, with Mr. Carney against.

Mr. McClure for, with Mr. Dow against.

Mr. Jones of Alabama for, with Mr. Railsback against.

Mr. Galifianakis for, with Mr. Mills of Maryland against.

Until further notice:

Mr. Pepper with Mr. Wiggins.

Mr. Rostenkowski with Mr. Anderson of Illinois.

Mr. Dorn with Mr. Bow.

Mr. Ashley with Mr. Broomfield.

Mr. Aspinall with Mr. Camp.

Mr. Davis of Georgia with Mr. Davis of Wisconsin.

Mr. Corman with Mr. Smith of California.

Mr. Mikva with Mrs. Dwyer.

Mr. Miller of California with Mr. McDonald of Michigan.

Mr. McMillan with Mr. Edwards of Alabama.

Mr. Sisk with Mr. Fish.

Mr. Shipley with Mr. Ruppe.

Mrs. Hansen of Washington with Mr. Wyatt.

Mr. Hathaway with Mr. Mosher.

Mr. Hull with Mr. Halpern.

Mr. Gallagher with Mr. McEwen.

Mr. Fuqua with Mr. Scherle.

Mr. Baring with Mr. Floyd.

Mr. Charles H. Wilson with Mr. Lujan.

Mr. Mailliard with Mr. Pelly.

Mr. Peyser with Mr. Mathias of California.

Mr. Scott with Mr. Vander Jagt.

Mr. Springer with Mr. Whalley.

Mr. THOMPSON of New Jersey and Mr. LATTA changed their votes from "yea" to "nay."

Mr. SYMINGTON changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MARIHUANA MUST NOT BE LEGALIZED

(Mr. BEVILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, several proposals have been made in Congress in recent months designed to legalize the possession of marihuana.

I strongly oppose these proposals. Each year literally thousands of young people in the United States die from an overdose of drugs. Many of these young people started on marihuana and went on to harder drugs.

I believe marihuana is dangerous and legalizing its possession will lead to a wider use by our young people.

Even if you accept the argument that only 1 percent of marihuana users go on to heroin, this would still constitute a tremendous problem since there are now millions using it. It is estimated that as many as 12 million Americans have used marihuana in recent years.

In a report to the second session of the 91st Congress, the House Select Committee on Crime stated:

> No rational or sensible approach to the narcotic and dangerous drug problem can slide over the subject of marihuana use. Admittedly, the number of people from whom our committee has heard was limited. But of the hundreds of young people who have offered their comments, we heard from only one young narcotic dependent or dangerous drug abuser who had not first started his or her habit or abuse by experimenting with marihuana.

It is now unmistakably clear that the United States will not be able to conquer the rising danger from drugs without a deep commitment from the public and a firm, direct approach from elected officials.

We must root out this threat to society, to the family and to the individual. We must redouble our efforts to shut off the supply and growth of marihuana in this country. This is the only way we can eliminate this serious problem.

ANNOUNCEMENT AS TO VOTE

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DANIELSON. Mr. Speaker, on Tuesday, Septtmber 5, 1972 I was unable to return to Washington, because of business in my district, and therefore I missed roll No. 350 and roll No. 351.

On roll No. 350, a record vote on the conference report to accompany H.R. 13089, I would have voted "yea", if I had been present. This measure will provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation.

If I had been present and voting, on roll No. 351, I would have voted "yea". This was the vote on the conference report on H.R. 12350, to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964.

OMNIBUS PENAL REFORM ACT OF 1972

(Mr. DELLUMS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DELLUMS. Mr. Speaker, last spring I introduced the Omnibus Penal Reform Act of 1972. The bill consisted of original legislation built around what I felt was the most progressive proposals for penal reform introduced in Congress. I sent copies of the bill to nearly 100 Federal prisoners as well as to criminal lawyers and experts in penology and requested that they all review the proposal and make suggestions for improvement.

The response to this mailing was incredible; many Federal prisoners said it was the first piece of legislation which realistically confronted the problems of penology in the United States today. At the same time, the prisoners, due to their uncanny insight into the true nature of the prison system, made many suggestions to close loopholes, improve language, and to make the bill much more effective. Experts in penology and criminal lawyers were able to be most helpful and commented on both the form and content of the bill.

Consequently, the act has been thoroughly revised by the legislative staff. It now represents, I believe, the most workable, progressive, and comprehensive piece of penal reform legislation to be introduced in the House of Representatives.

Many penologists and prison authorities say prisons have changed—that prisons are for rehabilitation, not for punishment. Despite these claims, rebellions at Attica, San Quentin, Soledad, and virtually every other major penitentiary have aptly demonstrated they are wrong. Prisoners across the land continue revolting against brutalizing and inhumane conditions. The sad truth is that in many instances prisons are no different today than at the turn of the century. For example, the Federal Government operates one of its largest institutions at Atlanta. It was built in 1910, and is just as oppressive today as then. Certainly, it is not an atmosphere in which rehabilitation could take place.

We must realize that no person is made more fit to function as a member of society through systematic corporal punishment. And despite claims to the contrary, such punishment exists in prisons today. I have seen the scars. We must also realize that prisoners are entitled to every human and moral right as members of free society. Confinement in a penitentiary is certainly punishment enough and is in itself a most extreme act of retribution by society. Any prisoner will tell you that the sexual and psychological tortures one goes through in prison leave their mark stamped indelibly on the individual's pysche.

Prisons—the backbone of the criminal justice system—reek of injustice and inhumanity. They also have a very definite class characteristic—there are very few white collar criminals in penitentiaries. White collar criminals responsible for millions—if not billions—of dollars worth of crime annually are not in prison. Prisons are full of people who have committed $10 or $15 robberies; prisons are full of people who told me that in order for them to survive in what they see as a most oppressive economic atmosphere they went outside the law to provide food and shelter for their families. For them, prisons are the final defense in the maintenance of a social order that insures the affluence of certain segments of society at the expense of others.

And exploitation does not stop when one reaches prison—it increases. Prisoners are paid minimal wages—they perform virtually slave labor for the Government, which receives a handsome profit in the process. The U.S. Penitentiary at Atlanta—the oldest and most experienced are here—has the highest average sentence per prisoner in the Federal system. It is here where the Federal prison industry produces a major share of its products. We are told that there is extensive rehabilitation in the process—rehabilitation that somehow takes place on outdated machinery that has little or nothing in common with machinery in outside industries. We should ask why such an extensive "rehabilitation" program should be in an institution where the average prisoner is serving a 20 or 30 year or life sentence, instead at institutions where prisoners are serving 2 or 3 year sentences and could benefit from training programs. The situation at Atlanta cannot help but make one wonder if prison authorities are more concerned with making a profit from the exploitation of captive and free labor than with the rehabilitation of the prisoner population.

It is my sincere hope that Congress will see fit to pass this legislation. The uprisings and tragedies we have experienced in our Nation's prisons clearly demonstrates the need for a massive overhaul of the system. If we are truly concerned with penal reform, we must treat the causes, and not the symptoms of the problem.

I would like to extend my most sincere thanks to those people who made valuable contributions to the development of the act: staff members Lee Halterman, Ron Allen, David Long, and Chris Ramer; Frank Callahan and George Mische of the National Coordinating Committee for Justice Under Law; Irby Sprouse and Willie Harris of USP Atlanta; attorneys Fay Stender and Patti Roberts; and to all the others whose efforts made this bill a reality.

At this time I would like to submit to the record a summary of the revised Omnibus Penal Reform Act of 1972.

SUMMARY

The "Omnibus Penal Reform Act of 1972" is divided into eight titles. Five sections expand and solidify prisoners' rights, two titles are concerned with reorganization of the United States Board of Parole, and one title restores voting rights of felons once they have successfully completed their sentence. If passed into law, each title would independently represent a major progressive change in penological practices. However, despite this independent nature, each title highly complements the other sections of the measure.

TITLE I MINIMUM STANDARDS

Establishes the National Prison Standards Administration, as an independent agency in the Executive branch. The Administration would promulgate and enforce rules to insure minimum standards in prisons, including:

No discrimination on grounds of race, sex, language, religion, national or social origin, wealth, or political beliefs.

Establishment of living quarters taking into account prisoners age, sexual preference and criminal record; adequate and private sanitary facilities and minimum standards with respect to cubic content of air, floor space heating and ventilation in living quarters.

Adequate medical, psychiatric and dental care; pre-natal care for women.

Minimum standards for food preparation and service.

Restrictions on corporal punishment and solitary confinement.

Written regulations of appropriate prison behavior which will be provided to every prisoner upon admission.

Restriction on prison authorities from inspecting incoming mail except for the purpose of detecting contraband. Mail to government officials, courts, or attorneys to be serviced only by employees of the United States Postal Service.

Allowance of at least three visits a week, and that visitors need not be on an approved list.

Unimpeded availability of newspapers, periodicals, radio and television; media not to be restricted for ideological reasons.

Protection of prisoner property.

Comprehensive vocational training, rehabilitative and work release programs.

Restrictions on nature of prison work and establishment of maximum work hours.

Title I also provides up to a five year/$5000 sentence for prison authorities who deprive or attempt to deprive a prisoner of rights granted under this title. Such a provision provides prisoners with a minimum assurance that their rights will be protected.

TITLE II MINIMUM WAGES

Provides for minimum wages equal to the highest minimum wage rate in effect under Section 6 of the Fair Labor Standards Act of 1938 for all Federal prisoners working in prison industry. Also gives prisoners the right to form unions for the purpose of collective bargaining regarding their employment.

TITLE III FAMILY VISITATION

Provides at least 12 days of furlough a year for prisoners with satisfactory conduct records.

TITLE IV COMMITMENT AND TRANSFER

Instructs the Attorney General to designate as initial place of confinement the institution nearest the person's place of residence suitable for inmates of the prisoner's classification, and stipulates that no transfer shall be made to another place of confinement solely for punitive reasons unrelated to a clear and present danger to the physical safety of the transferred prisoner, other prisoners, or of prison officials and employees.

TITLE V FEDERAL PRISONERS IN STATE INSTITUTIONS

Provides protection under federal prison regulations for all federal prisoners quartered in state or local institutions.

TITLE VI REENFRANCHISEMENT

Reenfranchises felons to vote in Federal elections after they have successfully completed their term of sentence, probation or parole.

TITLE VII PAROLE

Restructures the Parole Board into a national board and five regional boards. This decentralization of parole powers will bring the prisoner closer to the individuals who make parole decisions. Also provides that the boards proportionately reflect the racial and ethnic composition of the prison population.

Gives the prisoner the right to examine all documents that were used in the parole determination hearing. This enables the prisoner to more readily ascertain why parole was denied or why certain restrictions were placed on the parole.

Sets up provisions for goodtime allowances for parole. The longer a parolee maintains good conduct, the shorter the term of parole.

Entitles the parolee to an attorney at revocation hearings and the opportunity to confront and cross-examine witnesses, as well as stipulating that there be a full and complete hearing record.

TITLE VIII STATE PLANS

Provides federal assistance to the states for improvement of state parole programs and to develop and operate community oriented for the supervision of and assistance to parolees.

THE ECONOMY AT MIDYEAR

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. BROWN) is recognized for 15 minutes.

Mr. BROWN of Ohio. Mr. Speaker, the Joint Economic Committee recently issued its report on the 1972 mid-year review of the economy.

It is the opinion of the minority members of that committee that the new economic policy, instituted just over a year ago, has succeeded in stimulating economic growth and in reducing inflation.

Because we believe that this performance speaks for itself, we confine our views to a brief discussion of the general economic situation and some of the principal economic indicators. I include the minority views in the RECORD at this point:

THE 1972 MIDYEAR REVIEW OF THE ECONOMY REPORT OF THE JOINT ECONOMIC COMMITTEE—CONGRESS OF THE UNITED STATES, AUGUST 28, 1972

MINORITY VIEWS ON THE 1972 MIDYEAR REVIEW OF THE ECONOMY

I. Introduction

In our views on the Committee Report on Price and Wage Control published approximately 3 months ago, we asked certain questions regarding the success of the New Economic Policy in stimulating employment and economic growth and reducing inflation. In our opinion, the answers to those questions are becoming increasingly obvious. We now have available economic data for almost a full year period under the NEP. Because the strength of our economic performance in the last 6 to 9 months is so clear, in these views we wish to let this performance speak for itself, discussing the general economic situation and some of our principal economic indicators briefly, and forgoing all too common election year rhetoric regarding the economy.

II. Employment and unemployment

From second quarter 1971 to second quarter 1972, total civilian employment increased by 2.4 million persons, one of the largest four-quarter rises in employment on record. In the last 2 months, this exceptional growth in total employment has been reflected in the overall unemployment rate, which has dropped substantially, from 5.9 percent in May 1971, where it had held for several months, to a level of 5.5 percent in June and July. The 3 percent rate of rise in employment from second quarter 1971 to second quarter 1972 is higher than the largest increases recorded in the 1960's and may be compared to the increase at an annual rate of 0.1 percent recorded in the four quarters preceding the adoption of the New Economic Policy last August.

We believe that continued expansion should enable us to reduce the overall unemployment rate further by the end of this year, to the neighborhood of 5 percent, inasmuch as the factors which caused a stable unemployment rate over the last year in the face of extraordinary growth in employment are expected to abate somewhat. Specifically, further large reductions in the Armed Forces are not now contemplated. Also, growth in the total labor force may be expected to return to a more normal level, since many of those persons who are drawn back into the labor force as economic conditions improve have already reentered the job market.

III. Inflation

In the last 6 months we have seen a substantial drop in the rate of increase in consumer prices. For the month of June 1972 the rise in the Consumer Price Index (CPI) was 0.1 percent, seasonally adjusted. The annual rate of change for second quarter 1972 was 2.2 percent, down substantially from the 3.6 percent annual rate of increase in the first quarter of the year. The progress made under the Economic Stabilization Program in combating inflation is apparent upon a comparison of the price increase record in the 10 months since August 1971 with the 8-month period prior to inauguration of the New Economic Policy. In the first 8 months of 1971, the CPI rose at a seasonally adjusted annual rate of 3.8 percent, compared with an increase at an annual rate of 2.7 percent since last August. The rate of change on an annual basis in the price of food dropped from 5 percent in the pre-August period to 3.3 percent from August 1971 through June 1972.

The Wholesale Price Index has also showed a smaller rate of increase in the post-August 1971 period. In the first 8 months of 1971, the annual rate of increase in the WPI, as seasonally adjusted, was 5.2 percent, compared to an annual rate of increase of 4 percent from September 1971 through July 1972. The annual rate of increase in prices of industrial commodities dropped from 4.7 percent in the earlier period, to 2.8 percent in the past 11 months. On the other hand, in the 8 months prior to the start of the Economic Stabilization Program, from January through August 1971, prices of farm products, processed foods, and feed rose at an annual rate of 6.5 percent, seasonally adjusted, compared with an annual rate of increase of 7.2 percent in the 11-month period from September 1971 through July 1972.

During July 1972 industrial commodities rose in price by only 0.2 percent. However, prices of farm products and processed foods and feed rose 1.8 percent. In the 6-month period which ended in July 1972, the all commodities WPI rose at a seasonally adjusted annual rate of 5.2 percent, with the rise in the last 3 months of the period almost double that in the first 3 months. This acceleration was attributable entirely to sizable increases in prices of food products in May and June and, especially, July. However, with 30 percent more heavy cattle on hand today compared with a year ago, increased supplies of meat in the months ahead are expected to be reflected in an easing of prices.[1]

IV. Real wages and productivity

The sharp growth in employment and progress against inflation have been accompanied by very encouraging gains in real wages and productivity. From 1965 to 1970, the spendable weekly wages of the average production worker rose substantially. However, his real wages declined, the dollar increases being entirely consumed by inflation. Since the beginning of 1971, this trend has been reversed, with real wages rising over the last 18 months. From June 1971 to June 1972, the real spendable weekly wages of the average production worker rose by 4 percent, as compared to an average annual increase of only 1.3 percent between 1960 and 1968.

As for productivity, recent large increases in output per man-hour have greatly improved prospects of returning to price-cost stability in the U.S. economy. Over the past three quarters, productivity increases in the private nonfarm economy have averaged about 5 percent at an annual rate—double the long term average rate of about 2½ percent from 1950 to 1970.

Because of the more rapid gains in productivity, unit labor cost—the cost of the amount of labor needed to produce a given amount of goods or services—has increased over the past three quarters in the private nonfarm economy at an average annual rate of only 1½ percent even though compensation per man-hour climbed at a rate of 6½ percent.

For the second quarter alone, the results were even more dramatic. The combination of smaller increases in wages, due to the administration's wage-price guidelines, and a large gain in productivity brought a slight decline in unit labor costs—the first since 1965. This stabilization of unit labor cost in the second quarter was accompanied by a significant reduction in the rate of inflation. The implicit price deflator for the private nonfarm economy, a broad measure of prices, increased at an annual rate of only 1.8 percent in the second quarter.

In the late 1960's, the combination of small productivity increases and large wage increases brought substantial increases in unit labor cost. As a result, prices rose sharply. Productivity started advancing at a faster pace with the economic recovery of 1971; the 3.7 percent increase that year was the largest in 7 years.

Part of the gain in 1971 was due to cost-cutting efforts by business firms following slower sales growth in 1970, and part was due to the general expansion of the economy that enabled business to operate at a higher and more efficient level of production. Thus, productivity gains usually are above average during expansionary periods. In the long run, however, productivity depends primarily on machines and other productive facilities, the education, motivation, skill, and experience of the labor force, and technological progress through research and development.

In the immediate future, continued above average gains in productivity can be expected as the economy continues to expand at a rapid pace. Moreover, new plant and equipment will be coming on stream at a faster rate. This should reinforce the cyclical increases in productivity.

V. 1972 economic performance

So far this year the economy has shown great strength. In second quarter 1972, the Department of Commerce has estimated that Gross National Product rose at an annual rate of 9.4 percent in real terms, while prices, as measured by the implicit price deflator for GNP, rose at an annual rate of 1.8 percent. These figures may be compared with first quarter 1972, in which real output increased at an annual rate of 6.5 percent, and prices rose by 5.1 percent. The increase in real output in the second quarter was the largest since 1965. Similarly, prices, as measured by the GNP implicit price deflator, rose at a rate in the second quarter that was the lowest in over 6 years (excluding the period of the price-wage freeze).

From the third quarter of 1971 through the second quarter of 1972, real output has increased at an annual rate of 7.5 percent; this compares to an increase in real GNP of only 2.2 percent in the full year between third quarter 1970 and 1971. The annual rate of increase in real output in the first half of 1972 at 7.8 percent makes it very likely that the $100 billion target increase in Gross National Product during 1972 will be met.

The relative strength of the current recovery is apparent from the table below.

Real GNP, six quarters after trough [1]

Recoveries following recessions of:	*Percent*
1954	7.2
1958	5.5
1961	8.9
1970	8.1
Average	(7.4)

[1] Percentage increase from previous cyclical peak.

Examination of some of our principal economic indicators shows, in our opinion, and in the opinion of the economic forecasting community generally, that the strong economic growth experienced in the last three quarters will continue.

---

[1] Senators Miller and Pearson state: "It seems only fair to point out that only 16 cents per consumer dollar is being spent for food—compared to 20 cents 12 years ago."

Leading Indicators

In the last 6 months, the index of leading economic indicators has risen from 133.1 to 142.5, an increase of more than 7 percent, or 14 percent on an annual basis. The rise in the index in the last year, from July 1971 through June 1972, from 125.5 to 142.5, translates to an annual rate of gain of 13.5 percent. This record gives no hint that the present expansion may be ending or past its peak.

Manufacturing Activity

Manufacturing activity in the first 6 months of this year evidenced an expanding economy. In second quarter 1972 manufacturers' total new orders for goods were 14.5 percent above the level of second quarter 1971 and 3.3 percent above first quarter 1972. In the important durable goods category, new orders in the second quarter of this year were a very strong 19.6 percent above the same quarter in 1971 and 5.2 percent above first quarter 1972. Nondurable goods, although not this strong, were still good. Total second quarter 1972 nondurable new orders were 8.8 percent above second quarter 1971 and 1.2 percent above first quarter 1972.

Manufacturers' shipments were also up strongly. Second quarter 1972 total manufacturers' shipments were 10.2 percent above second quarter 1971 and 2.8 percent above first quarter 1972. The durable goods component of total shipments was even stronger, with second quarter 1972 total shipments running at a level 11.6 percent above second quarter 1971 and 3.8 percent above first quarter 1972.

Very encouragingly, manufacturing inventories are beginning to show strength. The June rise in manufacturers' inventories of $697 million was the largest gain in more than 2 years. This 0.7 percent gain in a single month followed a May rise in inventories of 0.4 percent. These fairly substantial back-to-back monthly increases followed a period of approximately a year and a half in which inventories were relatively stable. A rise in inventories has been long awaited as an indicator of business confidence that a sustained general economic expansion is underway. We believe that the May and June inventory performances reveal that business is exhibiting such confidence.

Industrial Production

Industrial production, at the end of the first half of 1972, had risen for 8 months in a row. In June 1972, the index of total industrial production stood at 113.3, as compared to an index of 105.6 in August 1971, when President Nixon inaugurated the new economic policy. The change from August 1971 through June 1972 was equal to 8.7 percent at an annual rate. From the end of 1971 through June 1972, industrial production has increased at an annual rate of 9.6 percent.

Housing

Private housing starts played a strong role in the vigorous economic performance so far this year. From January through June, housing starts averaged almost 2.4 million on an annual basis. The strength of this figure is apparent upon a comparison with the projected housing starts for 1972, 2.2 million, made by the Council of Economic Advisers at the beginning of the year. The performance to date is more than 8 percent above that projection, and 9.3 percent above the annual rate of housing starts in the last 6 months of 1971. Additionally, housing activity in the first half of this year ran at an annual rate 23.6 percent above the rate of housing starts in the first half of 1971. Although the May and June, 1972 starts, at annual rates of 2,331,000 and 2,298,000, respectively, are somewhat below the average for full half year, they are both substantially above the CEA projection for the full year. We expect demand for new housing to remain at a high level through the rest of 1972, with satisfaction of this demand aided by readily available mortgage money.

Construction Awards and Expenditures

In the first 6 months of 1972, construction contracts showed good strength, the level in the value of construction contracts rising to 15 percent above that in the first half of 1971. This 15-percent increase represents an average monthly gain of nearly $1 billion over the 1971 period. During the month of June, residential building contracts rose 26 percent above the year earlier level, to $4.38 billion from $3.46 billion in June 1971.

New construction expenditures have also been strong. Total new construction expenditures during June, at a seasonally adjusted annual rate of $123.3 billion, were up 0.7 percent from May's $122.4 billion. The June level was 13.6 percent above June 1971's $108.5 billion adjusted annual rate and 6.7 percent above December's 1971 $115.6 billion.

Retail Sales

Consumer confidence is also up. Although retail sales have remained somewhat changeable from month to month, the underlying trend in the last several periods has been encouraging. Total retail sales in the second quarter of 1972 ran at a level 3.2 percent above total sales in first quarter 1972, and 9.1 percent above sales in second quarter 1971. In the important durable goods category, total second quarter 1972 retail sales were 3.6 percent above total first quarter 1972 sales and a strong 13.0 percent above second quarter 1971 sales. The nondurable goods performance, although not as strong, was still good. Total second quarter sales were 2.7 percent above first quarter 1972 sales and 7.0 percent above second quarter 1971 sales.

During July, according to Department of Commerce preliminary figures, total retail sales rose to $37.36 billion from June's $36.67 billion, a rise of 2 percent in 1 month. Total July sales were 11 percent above those of July 1971.

Consumer Installment Credit

In the 10 full months since the inauguration of the New Economic Policy for which data is available, consumer installment credit outstanding, which is a sensitive barometer of public confidence in the economy, has shown exceptional strength. From September 1971 through June 1972, the average monthly increase in total consumer installment credit outstanding has been $1.09 billion. June 1972's increase of $1.33 billion was the fourth gain in a row of more than $1 billion and the third highest monthly increase ever recorded, falling behind only May 1972's record $1.44 billion rise and March's $1.36 billion increase.

The outstanding strength in this area is apparent upon comparing the more than $1 billion average monthly increase from September 1971 through June 1972 with the performance in the first 8 months of 1971. From January through August 1971, total consumer installment credit outstanding, as seasonally adjusted, rose monthly only an average $494 million, or less than half of the September 1971–June 1972 average. Given the exceptional performance from March through June of this year, when the average monthly increase in total installment credit outstanding was in excess of $1.3 billion, we believe that consumer confidence and the purchasing activity which that confidence stimulates will fuel further our already very strong economic expansion.

VI. Conclusion

The real test of economic policy is not whether we can create instant, perhaps short-lived, wealth for a few Americans, but rather whether we can create sustainable, long-term levels of prosperity and full employment. The test cannot be met by following the path of instant prosperity, but rather by setting long-range goals and constantly striving to attain them. We believe that the trends now underway show promise of fully meeting that test, and of ushering in a new era of responsible decisionmaking in economic policy.

THE OLYMPIC TRADGEDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ROBISON) is recognized for 5 minutes.

Mr. ROBISON of New York. Mr. Speaker, to paraphrase, it is the best of times and the worst of times; it is the season of light and the season of darkness. During the first 10 days of the XX Olympiad we had everything before us—young people of all races and nations living the lofty ideal of brotherhood during one of those rare periods when human beings put away their worst instincts and, for a short time, live as the great philosophers say they should. And, then, we had nothing before us in the wake of another terrible atrocity, another media event, which starkly reminded us that there is no hallowed ground in our time.

This morning's news that the XX Olympiad will continue is a consoling note for me, a fit memorial to the 11 Olympians who are now dead. The games may now be more a ritual of mourning than a joyful coming together; yet this is a more appropriate tribute to the slain Israelis than the silence of empty playing fields. If the people of the world cannot isolate 16 days in every fourth year for a time of peaceful competition, they can, at least, resolve that murderous anarchy will not blunt the redeeming spirit which seeks that peace.

Mr. Speaker, we found a new sadness yesterday. It was, perhaps, more painful than the many others that have come during these last several years, because we are now sure that it will come again. For me, and for a billion other witnesses throughout the world, yesterday was the "worst of times" in an age which tries so desperately to be the "best of times." But it is necessary to continue to try, and it is that decision that gives us a new sense of purpose, and of hope.

TRIBUTE TO THE LATE FRANK MEYER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. GERALD R. FORD) is recognized for 5 minutes.

Mr. GERALD R. FORD. Mr. Speaker, every member of this House knows how important it is to have a capable and loyal office manager. On Friday, August 25, death took Frank Meyer, who had been my administrative assistant for 17½ years. Frank was the finest of administrative assistants, and—more than that—he was a splendid human being.

I was not alone in my high regard for Frank Meyer. Everyone who knew him, including the President of the United States, looked upon him as an outstanding individual. A message from the President to Frank's family was read at the funeral service, and it spoke for everyone who had come into contact with Frank and knew of his tremendous attributes.

Frank's great ability and his deep integrity were known to the men and women at the Grand Rapids, Mich., Press, as well as to others of my constituents, and so it was appropriate that the Press should pay tribute to Frank editorially in the days after his death. With the permission of the House, I would like to insert that editorial tribute to Frank Meyer at this point in the RECORD. The editorial follows:

[From the Grand Rapids (Mich.) Press, Aug. 29, 1972]

The Man Behind the Man

Frank A. Meyer had been teaching history and government for 17 years at Grand Haven's Central Junior High School when he decided to take advantage of an opportunity to work in Rep. Gerald R. Ford's office for a year. For Frank Meyer this was the golden opportunity to check theory against practice. He found the experience fascinating and after teaching another year he returned to Washington, in 1955, to become a permanent member of Ford's staff.

When Mr. Meyer died here unexpectedly last Friday, while visiting the congressman's local office, Ford said that in his judgment he "was the finest administrative assistant on Capitol Hill."

We can believe it. Affable and efficient, scholarly but not pedantic, Frank Meyer was one of the easiest of men to meet. If it was in his power to answer a question or fill a request, he did so promptly and cheerfully. He was rarely seen or heard by the constituents of Ford's district, but we are sure that Ford would be the first to attest that it was Frank Meyer who made his office run as if it were hooked up to some atomic clock.

He was one of the hundreds of men and women who labor in anonymity to keep Congress functioning. Whenever we found ourselves tempted to refer scornfully to the thousands of federal employes in Washington as "bureaucrats," we remembered that Frank Meyer was one of them; perhaps one of the finest but not unique. He, too, represented the people in the Fifth District.

CHARLES RUPPERT SPEAKS OUT ON BEHALF OF PRIVATE EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

Mr. KEMP. Mr. Speaker, yesterday a friend and constituent of mine, Charles J. Ruppert, of Buffalo, N.Y., testified in behalf of the Parents' Council of Independent Schools and the Federation of Home School Associations of the Diocese of Buffalo in favor of legislation to provide a tax credit for tuition payments to private elementary and secondary schools.

He presented an excellent case for promoting freedom of choice in our system of education and for providing a measure of tax relief to the parents of children in private schools.

I have cosponsored legislation for an income-tax credit plan which would allow parents of a nonpublic school child to deduct from their final tax liability an amount equal to one-half of the tuition paid up to an overall limit of $500 per dependent. By providing assistance directly to the parents of schoolchildren and not the schools, I believe that this tax-credit concept is consistent with constitutional criteria.

Mr. Speaker, I include the text of Mr. Ruppert's statement which I feel is an important contribution to the hearing record and which deserves the attention of my colleagues in the Congress:

Oral Testimony of Charles J. Ruppert at a Public Hearing Before the House Committee on Ways and Means

Mr. Chairman, Honorable ladies and gentlemen:

I am Charles J. Ruppert and I am speaking on behalf of the Parents' Council of Independent Schools and the Federation of Home School Associations of the Diocese of Buffalo. These organizations represent over 100,000 parents of approximately 70,000 children in the non-public schools in the Western New York area. I am Secretary and past-President of the Parents' Council of Independent Schools and father of eight children, all of whom have been or are presently being educated in the Buffalo Catholic School System.

I would like to speak briefly on the necessity of maintaining freedom of choice in education, secondly, the economic problems afflicting parents who exercise this choice by sending their children to non-public schools and, thirdly, the urgent need for financial relief for parents via some form of tax credit.

While our Constitution and courts have guaranteed us this freedom of choice, it is more and more becoming an economic impossibility to exercise this choice. The need to preserve this freedom of choice is highlighted by the fact that in many underprivileged areas, parents choose to send their children to nonpublic schools. As an example, in a recently consolidated Inner City parochial school in the City of Buffalo, approximately 80% of the 800 students are non-Catholic and their parents are paying $60 per year to exercise this freedom of choice. The non-public schools provide a diversity which our educational system would otherwise lack. They not only provide knowledge but also a system of values which inform the moral and ethical choices one must make throughout his life.

The more one appreciates the quality of education provided by the typical non-public school, the more urgent their preservation becomes. In the Diocese of Buffalo, for example, standard tests demonstrate that children in Catholic elementary schools exceed the national average by an ever-increasing margin as they progress from kindergarten through grade eight. This phenomenon occurs despite the fact that the distribution of IQ's among the student population is normal.

Inasmuch as a pluralistic society has been part and parcel of this country since its very inception, it is absolutely necessary that a realistic freedom of choice in education be maintained. It appears that Russia and the United States are the only two countries that discriminate against non-public schools.

The economic problems afflicting parents who exercise this freedom of choice of education by sending their children to non-public schools continue to mount. These parents make many sacrifices to support the two school systems. For the average working man and the underprivileged this freedom of choice is fast disappearing. The inflationary pressures afflicting non-public schools with a resultant increase in the cost of tuition is fast making the exercise of this precious freedom an economic impossibility for more and more parents. Mothers are going to work, fathers are working two jobs, and discrimination is occurring within families where some children are sent to non-public schools and others must attend the public schools because of a shortage in family funds.

Present unemployment rates of 11% in Niagara County and 9½% in Erie County serve to compound these economic problems.

All Americans are enjoying the benefits produced by both school systems but the fact that some Americans are penalized by exercising this freedom of choice offends the American spirit of fair play. For example, it costs the Catholic community in New York State approximately $172 million a year to operate the parochial schools. In New York State alone, it would cost taxpayers over $400 million to absorb the students in these schools.

In the span of five years, it has been necessary to increase tuition in our diocesan high schools from $150 to $400, further increases in tuition are inevitable. More and more, the average family can no longer afford to send their children to non-public schools. The average per pupil cost in the Buffalo Diocese is $216 in the elementary schools and $550 in the secondary schools. This is well below the average per pupil expenditure of $1,400 in New York State's public schools. Obviously, a tax credit of only a few hundred dollars would help restore balance to our plural educational system.

It is therefore our recommendation that some form of tax credit be given directly to the parents. It is my understanding that over fifty tax credit bills have been submitted to this Committee and it is our hope and prayer that you will see fit to recommend one that most suits our immediate needs.

It is also our recommendation that tax credit for tuition be extended only to the parents whose children attend schools meeting State and Federal educational standards and conforming to the Civil Rights Act of 1964. All the non-public schools represented by our organizations have been approved by the New York State Education Department. It is not our intention, now or in the future, to expect government to support the entire cost of tuition for non-public schools. However, we must keep in mind that time is of the essence and too little or too late could be chaotic.

In closing, I wish to thank this Committee for your interest and concern and I trust you will submit a tax credit bill that will enable us to maintain our freedom of choice in education.

Mr. Speaker, as Mr. Ruppert indicates, we may be facing a demise of most non-public school education in the United States within not too many years if current trends continue or accelerate. Many public school systems are currently in the throes of a financial crisis stemming principally from the fact that local and State revenues have not kept pace with spiraling costs. However, to the extent that financial difficulties have affected most school systems in recent years, they have affected private schools—which have no tax base—even more.

More than 5.2 million boys and girls are currently attending elementary and secondary schools which are not a part of the public school system, and it has been estimated that if most or all private schools were to close or turn public, the added burden on public funds by the end of the 1970's would exceed $4 billion per year in operations, with an estimated $5 billion more needed for facilities. As Mr. Ruppert points out, in our State of New York alone, it costs the Catholic community in New York State approximately $172 million a year to operate the parochial schools, but it would cost over $400 million to absorb these students into the public schools.

As an advocate of strengthening our commitment to public education, I also believe that Congress must protect and encourage the private option. The private option should not be available only to the wealthy. That is not the American way.

And America is richer for the diversity of those groups which prefer a distinctive schooling.

The private and parochial elementary and secondary schools of America make an essential contribution to pluralism in our society and provide an alternate and vital choice in our system of education. Private schools of various kinds are able to draw upon financial resources not available to public institutions—and which would not otherwise be available to education. They provide diversity, choice, and healthy competition to traditionally public education and serve the public purpose by providing the means for a substantial group of Americans to express themselves socially, ethnically, culturally, and religiously through education institutions. Our private and parochial schools and colleges add a dimension of spiritual value to education which is invaluable to the moral fiber of the Nation itself; and in my view, it would be a tragedy of the first magnitude if tax-supported State schools were to drive private institutions out of existence.

Without question, respect for the doctrine of church-state separation and restraints placed on private school aid by court decisions in interpreting provisions of the Constitution have greatly limited available options. However, the first amendment to the Constitution, which enjoins the separation of church and state, also specifies that nobody shall be prevented from exercising his right to freedom of religion. Forcing a parent to take his child out of private school, because he cannot afford to support two separate school systems is an obvious infringement of the right to religious protection under the first amendment itself. I feel it is essential that we maintain the integrity of the doctrine of church and state and that the State should be neutral in its dealings with religion, but nonetheless the doctrine of separation does not require that the State be hostile to religion. The tax credit approach appears to be constitutionally permissible, and I hope that the Ways and Means Committee soon reports out a measure that will meet the challenge of rescuing our hard-pressed private schools.

OLYMPIC TRAGEDY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. McKinney) is recognized for 5 minutes.

Mr. McKINNEY. Mr. Speaker, like most Americans, I have been an avid spectator the past week, enamored with a young little Russian named Korbut and proud of a tall lanky American named Wottle. For me, there was not only a national pride but a universal pride in all men, in all nations.

The events of September 5 remind us again that nothing is sacred within the sphere of world politics, not even on the Mount Olympus which we keep reserved for our best athletes. If we reflect on the events of the week leading up to this tragic event we can single out instances when politics overrode fairness, ideology overrode judgment. Unfortunately, it is the young who suffer—the greatest resource of any nation.

The XX Olympics were too beautiful. The feeling of brotherly love and pure competition was too real to believe. For once, we were given a chance to share intimately the triumph of victory and the agony of defeat. And once again, we must bear the burden of a few fanatics who have taken something beautiful away from us.

As German Chancellor Willy Brandt proclaimed yesterday, it is hard to consider the possibility that we should continue "to play games" in the aftermath of this tragedy; but, at the same time, should we stop such an event to satisfy the perpetrators of this infamous deed?

Although I have no real power in this matter, I feel that the games should continue because they symbolize the only hope we have, our young people; the young people who embody the dedication which is needed to overcome the injustice of this world. And finally, the Olympics bring to every man, be he American or Kenyan, Russian, or Hungarian, the pride in self and country which ultimately is the key to all hopes for the world peace.

ACTS OF INSANITY AT OLYMPICS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. Fish) is recognized for 5 minutes.

Mr. FISH. Mr. Speaker, the shock and outrage I feel today at the enormity of the act perpetrated in Munich by the lunatic Black Septemberist Palestine group is impossible for me to express. It is difficult for me to remember when I have felt more outrage, or more helplessness in my outrage.

Man can cope with sanity as it tends to follow logical patterns which we can all understand. But acts of insanity such as the massacre of the Israeli athletes, outside of the realm of human reason as they are, tend to develop not understanding, but helpless shock.

Mr. Speaker, like so many of my colleagues, my sympathy goes out not only to the people of Israel who suffered this tragic loss—a loss made doubly shocking in a nation so small and so close knit—but also to the German people. For this, the XX Olympiad was to Germany a symbolic welcome back into the international brotherhood of nations—the first Olympic games held in that country since 1936. It was planned, and until this tragic occurrence, was developing into a meeting of joy and splendor. Therefore, in this tragic hour, my heart goes out also to the people of Germany.

But today I also sorrow for the world. The rising tempo of these sporadic acts of bloody terror is only too apparent to us all. The terror of plane hijacking, the massacre at the Lod airport, the bloodshed in Northern Ireland, all indicate a rapid rise in anarchist madness sweeping our earth. Yesterday, it was the Israeli athletes who were the victims of this madness.

Tomorrow it could be some other group, some other people. It could be Americans or Russians or French or German.

Therefore, Mr. Speaker, I call upon the leaders of this Nation to join with the leaders of all other nations both through direct efforts by our Government and through the United Nations, to develop an international program to root out this bloody sickness.

These terrorist bands do not spring from nowhere. They must receive arms. They do receive support. They do have havens of sanctuary. We must cut off this support; we must end these sanctuaries.

Therefore, I urge that every sanction short of war be taken against any nation which harbors or refuses to cooperate in this needed international effort to end the activity of these international bands of madmen. For after witnessing the development of guerrilla tactics on a national scale for two full decades, we today are spectators of the horror of international guerrilla warfare.

Air piracy can be ended. Terrorist activities on the international scene can be ended. But such an end can only be brought about through international cooperation and effort.

Mr. Speaker, let us in this Nation, as a memorial to those tragically dead Israel athletes, dedicate ourselves to this task. Let us act firmly and swiftly as we would to prevent a rabies epidemic. For just as mad dogs cannot be permitted to run loose in the streets, these international mad dogs cannot be allowed to roam our world.

DEPRAVITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. Wyman) is recognized for 5 minutes.

Mr. WYMAN. Mr. Speaker, words are inadequate in the aftermath of the outrage at Munich. The brutal abduction and slaughter of innocent Olympic participants by Arab terrorists was an act whose savagery has stunned the minds of civilized men the world over. Such barbarity cannot be tolerated. Nothing can excuse the senseless taking of innocent lives. Justice for the three surviving terrorists should be swift, firm, and final.

To the families of the victims, both Mrs. Wyman and myself extend our prayers and our deepest, most heartfelt sympathy in their tragic loss.

Every positive step must be taken to apply all possible sanctions against any nation granting sanctuary or asylum to such murderers. In this it is good that President Nixon has directed Secretary of State Rogers to immediately initiate action to obtain international agreement on the application of such sanctions.

BICENTENNIAL CHAIRMAN'S COMPANY GETS PRICE BREAK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Aspin) is recognized for 10 minutes.

Mr. ASPIN. Mr. Speaker, Norton Simon Inc., whose chief executive officer David Mahoney is the Chairman of the American Revolution Bicentennial Commission received a rare price exception soon after the wife of a top Price Commission official submitted a proposal to the American Revolution Bicentennial Commission.

It is impossible to determine whether ARBC Chairman David Mahoney's company received this price break because of his connection as ARBC Chairman. But there is strong evidence that something stinks here.

It is clear that employees of Norton Simon Inc. attempted to use Mr. Mahoney's position as ARBC Chairman to influence the Price Commission's determination of Norton Simon's request for a price increase in excess of the Price Commission's guidelines.

Mr. Speaker, I believe an investigation by both the Justice Department and by the current Congress is warranted. As many of my colleagues know the House Judiciary Committee is planning a series of hearings on the whole controversy surrounding the American Revolution Bicentennial Commission. I am sure that the committee will also wish to consider documents and information I am publicly releasing today.

Mr. Speaker, I am placing in today's RECORD documents which reveal that on April 4, 1972, Norton Simon Inc. applied for a price exception to the Price Commission in Washington for one of its subsidiaries, the United Can Co. As I am sure my colleagues know price exceptions for large corporations like United Can are considered rare.

On May 17, Mrs. Joyce Leanse, wife of Jay Leanse, the head of the Price Commission's Office of Price Exceptions, submitted a proposal for involving the aging in the bicentennial activities by having them make souvenirs. Mrs. Leanse, who is a consultant to the National Council on Aging, sent her proposal to the ARBC through Robert Glickman, one of Norton Simon's top executives. Mrs. Leanse wrote that her proposal would have excellent PR potential."

At this point Mr. Glickman forwarded Mrs. Leanse's proposal to Mahoney's secretary with the following note:

> Joyce Leanse is the wife of Jay Leanse, head of the Price Commission's Office of Price Exceptions and someone with whom Don Surdoval has been in contact.

Mr. Surdoval is the comptroller of Norton Simon Co. who apparently was in charge of getting the price exception for the company.

Mr. Mahoney's secretary, Mrs. Irene Mack, then sent the proposal to Harry C. Allendorfer, Jr., the Director of the Bicentennial Commission Executive Secretariat, with the following note:

> Please treat this with TLC (tender loving care). Norton Simon needs the Price Commission's good will.

On June 2, 15 days after Mrs. Leanse had originally sent her proposal to Glickman, Norton Simon's request for a price exception was approved and the company on July 28 received an approval for a 2.9-percent price increase in the price of cans.

I have learned Mrs. Leanse's proposal is presently being seriously considered by the Bicentennial Commission.

Apparently some of Norton Simon's executives believe that Mr. Mahoney's position as ARBC Chairman can and should be used for the profit of their own company. If the bicentennial celebration is to be a truly nonpartisan affair the administration says it wants, then it cannot become a tool for bestowing favors upon individual corporations.

The material follows:

[Decision and order of the Price Commission, Washington, D.C.]

REQUEST FOR EXCEPTION

Name of petitioner Norton Simon, Inc.
Re United Can Co.
Date of filing April 4, 1972.
Case No. EP 1382.

1. On the basis of examination by the Price Commission of the facts submitted by the above company in connection with its Request for Exception; and

2. On the basis of the determination by the Price Commission that (a) The company has historically adjusted prices at different times to reflect material (metal) cost increases and non-metal cost increases; (b) The price increases approved by the Commission January 21, 1972, reflect only the increased cost of materials (tinplate); and (c) The facts and circumstances demonstrate that the Economic Stabilization Program would inflict a serious hardship by not allowing the company to request recovery of non-metal cost increases incurred prior to the date of the last price increase, but after March 15, 1971:

It is hereby *Ordered*, That the Request for Exception to 6CFR 300-12 defining "allowable costs" be approved, thereby allowing the petitioner to request on Form PC-1 a price increase which reflects non-metal cost increases incurred after March 15, 1971.

BERT LEWIS,
Executive Director.

Date. June 02, 1972.

MAY 23, 1972.

Mrs. JOYCE LEANSE,
Consultant on Senior Centers, The National Council on the Aging, Inc., Washington, D.C.

DEAR JOYCE: I was pleased to receive your letter this morning.

The idea sounds intriguing and I've sent it directly to Dave Mahoney's office where I know the matter will receive prompt attention.

We had a nice visit with the Eshman's and presume you did too. Let's not give up on trying to get together. Best to Jay.

Cordially,

ROBERT GLICKMAN.

IRENE: As I mentioned to you, Joyce Leanse is the wife of Jay Leanse who is head of the Price Commission's office of Price Exceptions and someone with whom Don Surdoval has been in contact.

BICENTENNIAL COMMISSION,
Washington, D.C.

Capt. HARRY C. ALLENDORFER, Jr.,
American Revolution Bicentennial Commission, Washington, D.C.

Capt., please treat this with TLC. Norton Simon Inc. needs the Price Commission's good-will.

Thanks,

IRENE.

THE NATIONAL COUNCIL ON
THE AGING, INC.,
Washington, D.C., May 17, 1972.

Mr. ROBERT GLICKMAN,
Norton Simon Inc.
New York, N.Y.

DEAR BOB: Noting an article in today's paper which identified David J. Mahoney as chairman of the American Revolution Bicentennial Commission, I am taking the liberty of sending you a first draft of a prospectus the Subcommittee on Aging of the Interagency Craft Committee (representatives from government and private agencies interested in crafts, recognized by President Nixon) presented to the larger group just yesterday incorporating an idea related to the Bicentennial (see page 6).

Responding to a suggestion that the Bicentennial Commission is concerned about an adequate supply of souvenirs made in America, and also being aware of the focus of the Bicentennial on American handcrafts, but in addition recognizing that American Craftsmen tend to be reluctant to produce souvenir items, the National Council on Aging is recommending that Senior Center members and other older persons participating in craft programs throughout the United States could very well be the "manufacturers" of a sizable portion of the quantity of souvenirs necessary to meet the needs of the Bicentennial celebration.

The involvement of older persons in preparation for the Bicentennial seems an appropriate association—one that might have excellent P.R. potential. National Council on the Aging provides a logical vehicle for the implementation of this involvement because of our extensive constituency among Senior Centers and other agencies providing services for older people.

I would appreciate your comments and/or action with regard to presenting the document to Mr. Mahoney for his consideration.

My best to Sue. Hopefully, we will get together soon.

Sincerely

(Mrs.) JOYCE LEANSE,
Consultant on Senior Centers.

MEMORANDUM

To Members of the Interagency Craft Committee.
From Joyce Leanse, Chairman, Subcommittee on Aging.
Date: May 16, 1972.

The Subcommittee on Aging of the Interagency Craft Committee met on two occasions to consider the merit of and direction for a proposal to incorporate the talents of older people in craft programs, as well as to extend and improve the quality of these programs and the products thereof.

There was general agreement regarding the value and importance of a coordinated effort which would focus on older persons and their contribution to handcrafts as well as upgrade present programs.

The Subcommittee agreed for the Chairman to develop a prospectus to be submitted to the Interagency Craft Committee. We respectfully solicit your further comments, ideas, and recommendations for action—especially with regard to the resources available from your respective agencies.

INTRODUCTION

One of the major issues facing the nation today is the problem and the potential of its older people. Currently there are 20 million aged individuals; that is to say, every tenth American is 65 or older. The recently held White House Conference on Aging identified income as one of the most pressing needs of older persons in America—one quarter of the elderly do live in poverty and their numbers are increasing. Poverty of the pocketbook, however, is not the only deprivation suffered by this group. Their loss of work role or child-rearing role leaves them with a purposelessness and meaninglessness that robs them of a sense of dignity and self-worth. Older people also suffer from loneliness as their circle of family and friends is diminished by the passing of time. Limited mobility and lessened physical stamina coupled with the lack of economic resources exacerbates the negative consequences of the aging process creating an almost self-fulfilling prophecy of society's attitude toward its older population—they are a problem. But older persons also represent a potential for America. They provide a vast reservoir of talent, skill, and knowledge that has yet to be fully appreciated, let alone tapped.

The National Council on the Aging believes that the development and extension of the American Handcrafts Industry can both uncover the potential of the elderly in our nation and assist in meeting some of their problems to the mutual advantage of the industry and older persons.

OLDER PEOPLE AND HANDCRAFTS—A NATURAL RELATIONSHIP

There is a natural association between older persons and handcrafts. Having been raised prior to the extensive use of production-line products and also during a time when the ability to produce handmade items was a component of everyone's education passed from parent to child, older people represent a valuable resource for a variety of crafts techniques and information. Those who were foreign born bring a rich heritage in handwork adding to our traditional skills. Many older people are exceptionally competent in such crafts as knitting, weaving, crocheting, metalwork, and woodwork, and there are few elderly men without background in some manual trade and few older women without manual skills developed through "housewifery" if not actual trade. Their interest in maintaining these handskills is demonstrated by the extensiveness of craft programs in Senior Centers and other programs for older persons. However, though ubiguitous, these craft programs need further development to better meet both the economic and psychologic needs of older people.

SENIOR CRAFT PROGRAMS TODAY

At the present time craft programs for older people tend to be recreational and diversionary and only incidentally related to economic development. Few groups recognize the paucity of their programs—even for recreational purposes. Too often the focus of the activity is on busywork with the same simple articles being made over and over again. There seems to be little consideration of the psychological gain to the participants when the program is rich and varied. The existence of this situation reflects the limitations of program directors, not older people. When high standards of workmanship and design are encouraged, not only are they met, but much greater satisfaction is achieved by the participants. Most of the instruction readily available to older people, however, is deficient in both inspiration and technique. Yet the country abounds with qualified craftsmen, including older people themselves, capable of meeting these needs—A link must be established.

ECONOMIC DEVELOPMENT OF CRAFT PROGRAMS

The economic gain to be realized from senior craft production has been slow to materialize. To be sure most senior craft programs are in facilities with a counter available for display and sales purposes, some even have boutiques or special outlets for sales, and they all conduct or participate in seasonal bazaars or fairs to which the public is invited to purchase the handmade items. But the real business of selling has been sadly neglected.

Among the major problems of all craft programs, in Senior Centers and otherwise, is the lack of managerial and entrepreneurial skills. Yet, there are older people today, retired from business and professions, extremely knowledgeable and talented in these areas. To develop links between these able persons and the craft programs which need them not only helps to meet the deficiencies of the programs, but puts to use business experience gained over a lifetime.

THE CRAFT INDUSTRY AND THE ELDERLY

William R. Seymour, Farmers Cooperative Service, USDA, in summarizing the importance of the craft industry notes:

(a) The availability of under-utilized physical and human resources in rural areas

(b) Craft production is readily adaptable to differing local circumstances and economic settings

(c) New and expanding markets for crafts

(d) Added income is realized by the individual craftsmen and their communities, and

(e) The desirability of preserving our heritage as expressed through crafts and rural arts.

Each of these points underscores the need for further involvement of older persons in craft programs. In rural and urban areas as well, the elderly represent a vastly underutilized human resource. In addition, the Senior Centers where they gather have the potential to become craft production centers for the economic benefit of the individual producers and the communities in which they live. The adaptability of craft production permits the development of a cottage industry for the home-bound or more isolated individuals as well as assembly-type efforts for the less creative persons. As older persons contribute to the growing market for crafts they swell the constituency rosters for the private and government agencies which serve the industry and add to the ranks of those who advocate for supportive legislation. And finally, it would seem appropriate for the elderly to be a part of the preservation of a heritage to which they have contributed so much and to which they have much yet to give.

A NATIONAL CRAFT PROGRAM FOR OLDER PEOPLE

There are mutual benefits to be realized from an association between older persons and the crafts. For the craft industry to realize the full potential of the vast reservoir of talent, skills, and knowledge of older persons relevant to craft production and entrepreneurial development and for the elderly to gain the full psychological, social, and economic benefits of viable, well-managed craft programs, a comprehensive coordinated national program must be effected.

The National Council on Aging, a private non-profit voluntary agency providing training, technical assistance and consultation to organizations concerned with the field of aging is interested in working with a consortium of government and private agencies which can contribute to such a national program.

NCOA, through its National Institute of Senior Centers and the professional staff of its field offices in each of the federal regions, is in contact with over 2,000 Senior Centers throughout the country as well as numerous OEO Senior Opportunity and Service Programs, Model City Agencies, and Tribal Councils. Utilizing this extensive network of agencies in the field of aging, NCOA is presently working with the Office of Economic Opportunity, the Department of Housing and Urban Development and the Department of Labor to focus their programs so they will have a greater impact on the needs and concerns of older people.

A similar approach with crafts would help to assure older people and the handcraft industry that mutually beneficial programs would be developed. At the present, training programs are conducted for craftsmen, but they are not as widely available as is needed. These could be further developed and made more generally available utilizing resources of the Department of Education and the Department of Agriculture's Farmers Cooperative Service and Extension Services.

A national coordinating effort could provide also the necessary linkages which would enable individual programs to avail themselves of the skilled craftsmen in their areas unknown to them, retired persons with relevant business knowledge and training (SCORE has indicated interest in further developing this component of the program), as well as potential marketing outlets, contacts, etc. A "talent bank" within each Senior Center and other older person programs could be developed, and if funds were available, could be coordinated at a regional or national level facilitating the use of such information.

Among the problems frequently mentioned when extensive marketing of crafts is considered are those of quality, quantity, and production time. Regional or national coordination could assist in meeting these problems in a variety of ways. Designs could be developed and then the products produced in multiple sites including the homes of individuals, Homes for the Aged, Community Mental Health Facilities, Senior Centers, etc. To facilitate quality control, kits could be distributed with the pre-designed, pre-cut materials. (The packaging of these kits could be a further economic development component of the craft program.) The availability of many programs producing a similar item would contribute to making and meeting quantity and production time obligations.

Such an approach would not appeal to all craft producers—certainly not the true craftsmen. But, as noted previously, not all older persons are talented craftsmen, though most have manual skills, and there are sufficient numbers of these older people presently making handmade items simply as busywork, whose efforts could be redirected to give them increased satisfaction as well as some monetary reward.

An example of how this program might be applied responds to the expressed need of the Bicentennial Committee for American-made souvenirs. It has been suggested that American craftsmen do not like to create souvenirs, yet, it would seem inappropriate for the souvenirs sold for the Bicentennial to be other than American made. Many Senior Citizens, however, would be thrilled to participate in the preparation for the Bicentennial. It even seems appropriate for them to have such a role. Not only do they themselves represent a part of our country's heritage, but this heritage is cherished by them. The project could be coordinated by National Council on the Aging with the Bicentennial Commission and other appropriate agencies including those which would have the necessary funding resources.

NCOA recommends that a pilot project be developed in one of the federal regions to test a coordinated effort to improve and extend craft programs for older persons and to make available and better utilize the talents of older people in these programs.

STATEMENT RE MURDER OF 11 MEMBERS OF ISRAELI OLYMPIC TEAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. ROONEY) is recognized for 5 minutes.

Mr. ROONEY of Pennsylvania. Mr. Speaker, today the world we live in seems to be a cruel and savage place where the most intelligent inhabitants periodically revert to horrible barbarism.

On a day when countries were to join together in friendly international competition in sports, the nations of the world can only unite in paralyzing grief over the brutal murder of 11 members of the Israeli Olympic team. This callous and bloody attack on the Israeli athletes will come to be viewed as an attack on civilization itself. It will, in all probability, beget violent retaliation in other parts of the world. It validates the maxim that among men, nothing is sacred, and leaves a residue of desperate sorrow.

All too often are we subjected to the ferocity of madmen and fanatics. The world recoils in shock and anger. A degree of tranquility returns only to be shattered by the gunfire of the next assassin, terrorist, or madman.

I would like to take this opportunity to extend my deepest sympathy to the families of the dead Israeli Olympians. I am sure that my remarks reflect the somber attitude of my constituency in Pennsylvania.

MUNICH TRAGEDY AND THE NEW YEAR

The **SPEAKER** pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. COTTER) is recognized for 5 minutes.

Mr. **COTTER**. Mr. Speaker, on Friday, the New Year, 5733, begins a year of special significance for the Jewish people and the Jewish Nation. This year the proud Nation of Israel will celebrate its 25th anniversary.

This New Year, however, begins in sadness. The horror of the Olympics, in which 11 Israelies were senselessly murdered has deeply etched the conflict of the Middle East in the conscience of the world. If there is any solace to be had from this tragic event, it is that the world now more fully understands how the Nation of Israel is daily fighting for its existence.

The people of Israel have surmounted formidable obstacles in developing this proud nation. It is a testament to the viability of Israel that people from all over the world overcame tremendous, even inhuman, obstacles in immigrating to Israel. All official governmental restraints designed to impede immigration to Israel should be resolved.

The burdens placed on the families of the slain Israeli athletes cry out for vengeance and retribution, yet I am hopeful when the deep and justifiable passions of the moment subside that this tragedy of Munich will impel both the Israelies and the Arab people to work for a lasting peace.

I know that I express the hopes of my colleagues that this New Year which begins in sadness will bring in the peace and tranquility that both the people of Israel and the people of the Middle East desire and need.

I fervently hope and pray that the year 5377 will be a year of peace for the entire world.

I heartily endorse the resolution before us today, condemning such horrible acts and urging that all nations refuse to grant sanctuary to these international terrorists.

THE TRAGEDY AT MUNICH

The **SPEAKER** pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MURPHY) is recognized for 5 minutes.

Mr. **MURPHY** of Illinois. Mr. Speaker, the senseless slaughter of members of the Israeli Olympic team is an appalling example of man's inhumanity to man. Men who dedicated years of their lives to athletic excellence lost ther lives to fanatics driven by a cause that is incomprehensible to rational men.

The killings were flagrant violations of the spirit of Olympic brotherhood so evident in Munich during the weeks of competition. Thousands of athletes from around the world competed without regard to race, religion, or national origin. They met in good faith with malice toward none expecting to remember the days in Munich as the highlight of their young lives. They now will leave Germany deeply saddened and undoubtedly hardened by the events of these last few days.

The Israelis were used as bargaining chips in an effort by Arab terrorists to regain Arab prisoners. Until men recognize that all human life is precious—Arab and Israeli, South Vietnamese and North Vietnamese, Indian and Pakistani—inhumane acts such as the Munich tragedy will continue.

THE CONTINUING FAILURE BY THE AGRICULTURE DEPARTMENT TO PROPERLY FUND THE ADMINISTRATIVE REQUIREMENTS OF THE FARMERS HOME ADMINISTRATION

The **SPEAKER** pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE), is recognized for 15 minutes.

Mr. **BURKE** of Massachusetts. Mr. Speaker, I am resorting to the unusual step of calling the attention of the Members of this House to a serious situation which has been plaguing the Massachusetts delegation in the Congress for sometime and that is the continuing failure by the Agriculture Department to properly fund the administrative requirements of the Farmers Home Administration, not only in Massachusetts but, indeed, throughout New England.

The timing of my presentation today is no accident. It follows by 1 or 2 working days the arrogant display of callous disregard for the economic well-being of New England by the same Secretary of Agriculture in steamrolling through Congress a hastily drafted, poorly conceived bill whose main objective was to suspend the operation of export controls on hides. The New England delegation voted practically as a man against this bill and against giving veto power to a Secretary of Agriculture who has again and again in his handling of the food price controversy and the hide situation displayed that his primary loyalty is to any section of the country but New England.

This man who seems to be in Washington for the sole purpose of carrying the brief for powerful cattle interests rather than administering his Department for the benefit of all the country including the consumers who are being gouged with skyrocketing food prices, the factory workers of New England who must earn their living working in the once proud shoe and leather industry, the families who must buy shoes for their children especially at this time of the year as school begins again. These people have a right to expect that a Government department as powerful and as heavily staffed as the Agriculture Department will protect their interests as well as the interests of the powerful farm and cattle lobby.

Because of the complete unwillingness of the Secretary of Agriculture to understand the problems which plague an urbanized, highly populated area such as New England and not run his Department solely for the interest of other sections of the country, I am afraid as a New England Congressman I am left with little alternative to focus my attention increasingly—daily if necessary—on the countless ways in which the Department of Agriculture discriminates against the economic interest of the citizens of my region.

Fellow colleagues, a few years ago, a man whose campaign for the Presidency did not seem to get very far made headline news in a memorable way when it was pointed out to him that his policies seemed to ignore the economic interests and political attitudes of New England. His angry comeback was that the country as a whole would be much better off if someone sawed New England off and floated it out to sea.

Mr. Speaker, that man never went on to become President and not surprisingly, carried not one New England State. However, I am afraid that subsequent victorious candidates seem to be adopting his fabled retort as their own policy. I can think of no better example of this policy of ignoring the interests of the New England section of this Nation than the policies pursued increasingly by the Department of Agriculture.

For several years now, as I indicated, the New England delegation has been in continuing contact with the Department of Agriculture over the need to increase the administrative appropriations for the Farmers Home Administration. This is the agency which is entrusted with administering the principal program of aid to low- and moderate-income urban and rural residents who wish to live in rural areas. Believe it or not, there are rural areas in New England, even in an industrial State like Massachusetts. As a matter of fact, 208 towns of the Commonwealth's 351 communities are eligible beyond question for farmers home loan services.

Mr. Speaker, there are over 1.7 million families and unrelated individuals in our commonwealth with an adjusted annual income of $9,500 or less who are potentially eligible to seek assistance under the Farmer Home program as this program has been developed and expanded by succeeding Congresses since 1949. I am not saying that all of these cases would qualify after applications were reviewed but what I am saying is that a paltry three county offices for the whole Commonwealth of Massachusetts and four loan officers serving a total State population of over 5 million is clearly inadequate to handle the workload in Massachusetts.

For some months now, the backlog in applications in the three county offices in Massachusetts have been running at a rate of 550 applications. If a family applies today for a housing loan in one of these county offices, it must wait over 7 months for processing. In the usual situation, families have become resigned to waiting 1 to 2 years for a loan with only the assurance that they are a "basically eligible borrower." The plight of these families becomes even more poignant when it is remembered with the Farmers Housing Administration is their only hope for home loan or home repair since the regulations stipulate they must be unable to obtain credit elsewhere.

Many of the towns in Massachusetts should be eligible for assistance from the Farmers Home Administration for the vital program of sewerage facilities, yet none of the 209 potentially eligible towns in Massachusetts are likely to receive this assistance since water and sewage grants and loans require a lengthy application and planning procedure. As a matter of fact, the situation is not much better in the other New England States. One office in Monteplier, Vt., is expected to service administratively an entire five-State area with smaller funds than any other State office. Yet, no other State office in America is asked to administer farmers home programs in as many as five States.

Mr. Speaker, I find it repugnant that five New England States receive barebone, totally inadequate administrative funding for this program. The only possible explanation that five New England States find themselves ranking 42d, 44th, 48th, 49th and 50th in the Nation in amount of administrative funding received is that it is no accident but seems to be the result of a deliberate policy decision. The $90,000 received by Connecticut, $82,000 received by Massachusetts, and the $44,000 received by Rhode Island in 1971 for administrative purposes suggests this is no way to run a program like the farmers home program.

Mr. Speaker, there seems to be an all-too-clear corollary between the amount of administrative funding received and the amounts of loans that were made. It is just the way it works out—if a State does not have funds to administer the program the loans are just not made.

The comparison with other States is, indeed, discouraging. The northeast section of the country including Maine and such heavily populated states as New York, New Jersey, and Pennsylvania received only 7.16 percent of the administrative funds under this program in 1971, while the north central section received 27.50 percent and the south received a lopsided 51.03 percent. In sharp contrast to Massachusetts, North Carolina, a highly rural state with a smaller total population than Massachusetts received more administrative funds in 1971 than all states but two.

These funds supported 153 loan officials who made loans to 6,872 families totaling $92,320,000. The situation is even more incredible when one realizes that the agency, in both North Carolina and Massachusetts, makes its housing loans to families with an average adjusted income of approximately $6,000. In Massachusetts, census data indicate that there are 376,288 families and unrelated individuals who earn about this amount while in North Carolina, there are only 208,349 such families and unrelated individuals. While one never expects things to be equal or perfect in Government, I certainly think that this situation is so unequal as to be intolerable to a Congressman from Massachusetts.

There is no question that the problem here stems from the Department of Agriculture's outdated conception of its principal function as the spokesman and guardian for States with a high percentage of rural population. Thus, in the process, the Department has managed to ignore the fact that the intent and purpose of the Farmers Home Loan Administration has been changed since its inception so as to specifically include families in urban areas desiring to leave especially crowded inner cities and relocate in rural areas. This is no longer a program only for farmers. It is one thing to read the statutes; but to look at the way in which the Agriculture Department is administering this program, it is clearly a program run for and by farmers.

Mr. Speaker, I am tired of seeing Massachusetts ranked in the top 10 States in the Nation in terms of contributions to Federal revenue but at the bottom of the list in terms of return from the Federal Government under Federal programs. Nowhere is this more noticeable than in programs administered by the Department of Agriculture. The taxpayers of Massachusetts from my congressional district are sick and tired of footing a disproportionate share of the bill for farm subsidy programs and programs like the one I have been discussing today. And yet, when we try to be included under these programs, we find ourselves deliberately excluded from the proceeds.

Mr. Speaker, no one will ever convince me that the Agriculture Department expects Massachusetts to participate fully in this program when it gives us four loan officers to cover the whole State. I do not expect Massachusetts or New Hampshire or Connecticut or Rhode Island to be at the top of any rurally oriented program. But I do expect them to be given a fair chance to participate when the citizens of these States clearly qualify under the terms of the enabling legislation for a Federal program. Fair is fair and I am tired of seeing New England get the short end of the stick.

No one can accuse us of being quick to criticize in this particular situation. For years, we have been negotiating, discussing, writing with the Agriculture Department in an attempt to seek administrative relief and some recognition that we exist and have constituents who qualify under these programs. But to date, we have been ignored. As a matter of fact, the Secretary of Agriculture has yet to respond to presentations made in July about the inequities of this program.

Mr. Speaker, unless and until Massachusetts and the rest of New England have a delivery system capable of making the Farmers Home Loan program available to the residents of their area, the impression will continue to be fostered by the powers that be in the Agriculture Department that New England really is not interested in this program. It is a vicious circle when low funding is justified on the grounds that very few loans are made in New England.

Very few loans will be made in New England until increased funding is available. I just hope that today I might break some of this continuing vicious, narrow, circular logic which feeds on itself in presenting these facts to you. It is time that the Secretary of Agriculture woke up to the needs of his national constituency and stopped slavishly guarding the special interests he seems to think he was appointed to represent in Washington.

WHAT'S RIGHT WITH AMERICA? HERE'S ONE ANSWER

(Mr. SAYLOR asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SAYLOR. Mr. Speaker, a seemingly popular criticism of our society today is that we have produced a culture of dissident youth who are degenerates and drug orientated. This degradation must cease and a realization made that a majority of junior citizens should not be categorized for the actions of a radical minority.

This subject was recently called to my attention in reviewing the actions of 16 members of the Youth Fellowship of the Elton United Methodist Church of Elton, Pa., an area of my congressional district of Pennsylvania which I am proud to represent. These young adults traveled to a small community, Phillippi, in West Virginia, to offer material and spiritual assistance to peers and elders afflicted with the scourge of poverty and destitution.

The counselors for this group were Scott and Karen Lehman, both college students. Neither desired any recognition for their achievements. Scott described his desire to remain anonymous by saying—

> Why can't we just go down and do what we set out for, to help these people because we want to, without a big hallaboloo?

I will not offer any rhetorical appraisal of the efforts of these students, but I will allow their mother's description of them to serve as a description of many young people in this country:

> No violence, no sit-ins, just hard work and a love for their fellow man and a desire to help make life a little easier for someone less fortunate.

The following article from the Johnstown Tribune Democrat of Johnstown, Pa., offers a more detailed description of the efforts of these young people in my District and I believe my colleagues will find it of interest.

ELTON YOUTHS WILL ASSIST AT MISSION

The Youth Fellowship of the Elton United Methodist Church leaves for a special kind of vacation on Sunday: They are going to Phillippi, W. Va., to stay at the Heart and Hand Mission House for a week. While there, they will do some construction work, distribute clothing and help wherever they are needed.

The young people, ranging in age from 12 to 18, have been planning the project for two years. They have sold Christmas candy and submarine sandwiches and have held other events to raise money for the trip.

"Imagine kids working like slaves just to go down and do more work," said the Rev. John Sass, their pastor.

TAKING CLOTHING

Besides willing hands for working, the group will take clothing for distribution at the mission house. The young people will reside in the mission's church and do their own cooking.

The group will travel in a rented bus driven by Mrs. Alice Oldham of Elton. Mrs. Oldham has been a licensed bus driver for four years. Mrs. Eleanor Kinsey of Walters Avenue, director of the Youth Fellowship, will accompany the group as will Miss Karen Lehman of Elton, an adviser.

MONAGAN AMENDMENT AIDS DRUG FIGHT

(Mr. MONAGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MONAGAN. Mr. Speaker, after more than a year of controversy and legal battles, the alleged Paraguayan drug trafficker Auguste Ricord has been extradited to the United States, and is now awaiting trial in New York. This extradition marks an important victory in the U.S. war against narcotics. It is a victory in which the Congress, through section 481 of the foreign aid program, played a major role.

Section 481, which I offered in committee, calls for a halt in aid to any nation which fails to cooperate in combating international drug traffic. In April of 1972, I wrote to Secretary of State William Rogers to express my concern over the delays in the Ricord case. Mr. David M. Abshire, Assistant Secretary of State for Congressional Relations, informed me at that time that the text of section 481 had been "communicated" to the Paraguayan Government.

After further delay in Paraguay, this "communication" was strengthened through the visit to that country of Mr. Nelson Gross, the State Department's senior adviser for international narcotics control. As Mr. Gross later confided, he unequivocally advised Paraguayan officials that some $11 million of U.S. aid would be terminated under section 481 if Ricord were not extradited. Shortly afterward, the extradition decision was delivered. Section 481 clearly provided the crucial leverage in this case which had stymied the United States for over a year. It is to be hoped that the Ricord trial will unearth additional links in the international network which brings illegal heroin to the United States.

The Ricord case will, of course, not dry up the supply of drugs now available to pushers. Experience has shown that as one source is severed, a new connection quickly fills the vacuum. And as the recent report by the Cabinet Committee on International Narcotics Control concluded—

> The development of multilateral drug control efforts has been slow largely because of widely varying national attitudes toward the drug problem.

These differences can be, and are, skillfully exploited by the illicit international trader.

What the Ricord case does show is that section 481 provides a diplomatic tool which works. It is a tool which alone will not halt drug traffic, but which will play an important role in dealing with the drug menace. The Ricord extradition is a small, but important first step. It has put drug traffickers on notice that they may no longer be able to hide behind the indifference of their government.

PRESERVATION OF PUBLIC LANDS IN AMERICA

(Mr. ROUSH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ROUSH. Mr. Speaker, throughout the United States, a rising chorus of public opinion is being heard to save and restore the natural features of America's public lands. Few if any outdoor uses equal the proportionate increase of the demand for wilderness experiences. My own State of Indiana, while lacking large areas typically found in the West, began to preserve intact the finest small vestiges of nature found on State lands when the general assembly enacted a measure drafted by the Indiana Izaak Walton League to create an Indiana system of nature preserves. Similar in principle to wilderness preservation, about 30 areas within the State's lands have by now been dedicated as nature preserves, since enactment of the law in 1967. The Izaak Walton League and other conservationists in Indiana are now encouraging the managers of our one national forest, the Hoosier, to identify, and begin restoration toward wilderness preservation, a suitable portion of these Federal lands. The U.S. Forest Service has this executive authority, and virtually all of America's conservation organizations are urging the Forest Service to use it as the most immediate step toward enlarging the national wilderness preservation system—particularly in the heavily populated Eastern States.

There are, of course, a number of areas in the Eastern States within the national forest system which now qualify for preservation under the Wilderness Act of 1964, a law it was my privilege to support when this great national policy was originally enacted. Mr. Speaker, it is mystifying to me that while the Wilderness Act has been law for some 8 years now, the Forest Service has suggested few areas of public lands under its jurisdiction in the Eastern States for wilderness preservation. It should be noted that many lands in these States managed by agencies of the Department of the Interior have become designated wilderness areas, and many others are now pending. The Bureau of Sport Fisheries and Wildlife now has 12 areas totaling 43,000 acres of designated wilderness in the East; eight additional areas totaling 380,000 acres are pending before Congress, and six more areas totaling 58,000 acres are under wilderness study. The National Park Service has recommended two areas encompassing 194,000 acres for wilderness designation, and seven more areas totaling nearly 3 million acres are under wilderness study in eastern national parks.

But we have seen no such action within our national forests of the Eastern States. In my opinion, there is no justification for this lack of action. The 1964 Wilderness Act has all of the instrumentalities needed for application to Eastern as well as Western States, and it would serve little purpose to balkanize America into arbitrary eastern and western regions with a different preservation or restoration policy in each, as proposed by some. If additional legislation parallel to but separate from the 1964 Wilderness Act is needed, it should not be framed to fragment the process whereby the Congress creates a national wilderness preservation system.

For these among a number of reasons, I was most pleased when a bill to create 11 wilderness areas in the Eastern States was introduced in the other body by the chairman of the Interior Committee. I was pleased also that the Senator from Indiana, VANCE HARTKE, was among the cosponsors, and that the measure, S. 3792, enjoyed bipartisan support through cosponsorship of Senator BUCKLEY.

In that same spirit, my colleague, ELWOOD HILLIS and I introduced a companion bill to that offered by Senator JACKSON. Our bill would create 11 areas of wilderness within the national forest system. I particularly emphasize that these are Federal lands owned by all of the people of the United States, including the 4.5 million citizens of Indiana. Led by the Indiana Izaak Walton League, I am well aware that many thousands of Indiana residents are deeply concerned that we are rapidly losing the wilderness qualities that still remain in the Nation, and especially the heavily populated eastern region. These qualities are being lost for at least two reasons: We have not moved as rapidly as we should in identifying and designating adequate Federal land areas under the 1964 act; and the rapidly growing demand has produced considerable wear on the inadequate system that has thus far been created. Indeed, there are only 2 years left for the administration to complete the national study of potential wilderness areas specified in the Wilderness Act we passed 8 years ago. I feel it is unfortunate that the administrations under both of our most recent Presidents have not produced recommendations at a suitable pace to fulfill what we had in mind in 1964.

It is also our hope that with this bill as a stimulus, additional areas will be added in the Interior Committee and that the Forest Service will be encouraged to set aside other areas by executive authority that can be added to the national wilderness preservation system at the earliest possible future date.

It has been said by a few that eastern U.S. forest lands do not qualify for wilderness designation because, first, most of them are less than the 5,000 acres suggested in the 1964 act; and second, most of them are too disturbed to meet the quality test of this act.

It is my interpretation of the act, supported by the overwhelming preponderance of the Nation's citizens' conservation organization including the Indiana Izaak Walton League, that neither of these arguments are valid in considering the 11 areas we propose for designation. The smallest, 6,000 acres, more than meets the size test; but even if it were less than 5,000, the Wilderness Act provides an alternative criterion that a proposed area merely be "of sufficient size as to make practicable its preservation and use in an unimpaired condition." Within that context, sites of just a few acres have already been designated as wilderness in the Eastern States. As for the question of disturbance prior to designation, the 1964 act is adequately flexible in its language that a proposed area "generally appears to have been affected primarily by the forces of nature." The Congress has already given meaning to this provision in creating wilderness areas that have been partially disturbed, and even a few that include permanent incompatible structures. That is not to say we have approved of such disturbance in the past, and certainly not in the future; but it is an acknowledgment that we are no longer dealing in perfect choices. There is in fact hardly an area of America anywhere that does not bear some imprint of our civilization. But we must preserve what we can, restore by careful stewardship some of the best that has already been disturbed, and act with the sense of urgency and priority we intended when we enacted the wilderness law of 1964.

WHY DID MIKE BALL HAVE TO DIE?

(Mr. HECHLER of West Virginia asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HECHLER of West Virginia. Mr. Speaker, on June 14, 1972, Thomas Michael Ball was crushed to death by a roof fall at Franklin No. 25 mine of the Hanna Coal Co. at New Athens, Ohio.

Why did Mike Ball have to die?

The official fatality report of the Bureau of Mines states that he "never received a formal course of instruction designed to train him in the performance of his duties as a shot-firer and timberman," adding as a cause of the fatality that "the victim with only 12 days underground mining experience being permitted to work alone while installing temporary roof support in face areas." The report also scored "the general laxness on the part of management, its supervisors, and employees to follow sound proven roof support and roof testing practices" and also "management's failure to enforce the company's approved roof control plan and other policies designed to eliminate substandard conditions and practices which result in roof-fall accidents."

ANOTHER CONSOLIDATION COAL CO. FATALITY

The Hanna Coal Co. is a division of Consolidation Coal Co., owned by Continental Oil. Here is a mine employing 423 men, of whom 391 worked underground, with a daily average production of 6,700 tons of coal. This is no fly-by-night concern, but should be a modern, careful, and responsible mining operation where reasonable care is exercised in an occupation which is known to be the most hazardous in the Nation. The Bureau of Mines fatality report states:

> An examination of the operator's accident record book revealed that 13 accidents attributed to falls of roof, rib, or face have occurred at this mine in 1972.

The report went on to state:

> In the April and May reports, unsafe acts, inadequate maintenance of working places, hazardous methods or procedures, and unsafe positions of workmen were listed as the causes of accidents during these two months. During the first 6 months of this year, 12 fatalities have occurred in 11 mines wholly owned or operated by the Consolidation Coal Company.

Mike Ball was only 22 years of age when he died. Right after he graduated from Cadiz High School in his hometown of Cadiz, Ohio, in 1968, he joined the Navy and put in 14 months of meritorious service in the Vietnam combat area.

LIFE OF ONE HUMAN IS PRECIOUS

People are shocked by the headlines of disasters like Farmington, Hyden, Buffalo Creek, and Blacksville. But the world little notes nor long remembers the death of one human being. Yet the passing of Mike Ball symbolizes everything that is terribly wrong with the coal industry, the Bureau of Mines, which should be enforcing the Mine Safety Act, and the present leadership of the United Mine Workers of America, whose officials seem more concerned with clinging to their office and their ill-gotten funds instead of a day-to-day insistence that the law must be enforced.

I have personally called to the attention of John Corcoran, the president of Consolidation Coal Co., the parent company controlling the Hanna Coal Co., the shocking facts concerning Mike Ball's death. Mr. Corcoran's answer to the August 11 letter below—which I wrote him was marked "Personal and Confidential" so I am not at liberty to release its contents. I can only conclude that little will be done beyond rhetoric. Why must this brutal negligence continue?

NO ANSWER FROM DEPARTMENT OF THE INTERIOR

Four weeks ago, I asked the Secretary of the Interior—see below August 10 letter—to invoke sections 109 (b) and (c) of the Federal Coal Mine Health and Safety Act of 1969 and prosecute the Hanna Coal Co. for its deliberate failure to protect its employees and for violations of the 1969 law. The Secretary of the Interior has not seen fit to acknowledge or respond to my August 10 letter. I sent a copy of that letter to the U.S. Attorney General, who responded in typical bureaucratic fashion that the case was still in the Department of the Interior.

Who is protecting the coal miners of this Nation?

MAKING THINGS EASIER FOR COAL OPERATORS

Who is insuring that more Mike Balls will not continue to be killed?

On August 29, 1972, the Department of the Interior issued a special press release which stated that henceforth assessments for violations of the Mine Safety Act would be imposed in the field. What was the official reason? Here it is in the unvarnished language of the Department of the Interior. "This would insure that assessment officers are more accessible to coal mine operators who wish to protest proposed assessments."

POLITICIZING THE BUREAU OF MINES

In 1969, the Congress gave the Nixon administration the power to protect coal miners and enforce mine safety. We gave them the power to impose fines up to $10,000 for safety violations. Then the White House put a Republican fundraiser and politician named Edward D. Failor in charge of collecting these assessments. Failor had never been near a coal mine. He had spent his political life raising campaign contributions from oilmen, industrialists, and bankers who control the coal mining companies. They paid Failor a salary of $36,000—as much as the Director of the Bureau of Mines. And he did his work well for the special interests, reducing assessments by $2.7 million by the end of 1971, according to the General Accounting Office. The Pittston Coal Co., owner of the mine which caused the Buffalo Creek disaster, had 15 of 37 assessment cases covering mine safety violations reduced by nearly $130,000. Now that the Republican campaign has started, Edward D. Failor has officially left the Bureau of Mines to join the Committee for the Reelection of the President, where he will be assessing for campaign purposes those companies whose mine safety assessments he so skillfully reduced.

PRODUCTION MORE IMPORTANT THAN PROTECTION

On July 29, a big groundbreaking ceremony was held over at Beckley, W. Va., for the new $13.5 million Federal Mine Health and Safety Academy. All the top brass of the Bureau of Mines were there plus Assistant Secretary of the Interior Hollis M. Dole. There was a frantic internal argument within the Bureau of Mines and the Department of the Interior as to whether a critic of mine safety practices like Congressman HECHLER should be even invited to listen at this ceremony. They were afraid I might ask some questions about the curriculum or be critical in public. They solved the problem by shunting me off the platform and making sure I did not speak at the ceremony where the big shots were celebrating their concept of progress in coal mine safety. To top it off, Assistant Secretary of the Interior Hollis M. Dole had the gall to tell his mine safety audience in Beckley that the No. 1 problem facing this Nation is the energy crisis and the Beckley area was really helping solve this energy crisis by maintaining a high production of coal.

PRIORITY SHOULD BE ON MINER'S SAFETY

The preamble to the Federal Coal Mine Health and Safety Act of 1969 states:

> The Congress declares that the first priority and concern of all in the coal mining industry must be the health and safety of its most precious resource—the coal miner.

I charge that this priority is being ignored by the Bureau of Mines and the coal industry. It is all very well to spend $13.5 million to build a Federal Mine Health and Safety Academy. But what academy is going to train Hollis Dole that the safety of the coal miner demands top priority? What academy is going to train the top officials of the Bureau of Mines in the strict enforcement of the mine safety law? What academy is going to train the White House to keep the fundraising politicians out of the assessment of mine safety violations? What academy is going to train the officials of the Hanna Coal Co. not to send young men like Thomas Michael Ball to die needlessly?

It does little good to pass a strict mine safety law unless those who enforce the law really believe in it. The only way to prevent tragedies like the loss of Thomas Michael Ball is through a complete change in attitude by the Bureau of Mines, the coal industry, and the present leadership of the United Mine Workers of America.

SEQUEL TO THE BECKLEY GROUNDBREAKING

A little over a month following the groundbreaking for the Federal Mine Health and Safety Academy, Assistant Secretary Dole was scheduled to return on August 31, 1972, to address the first graduating class. Included in his prepared remarks was this incredible statement:

> You must reconcile the requirements for mine safety with the need for efficient production.

I always thought the first priority should be placed on the safety of the individual coal miner. Yet, Secretary Dole's speech to the new safety graduates put a great deal of emphasis on the "energy crisis" and the need for higher production, capped by the outrageous statement that mine safety must be "reconciled" with efficient production.

Because of illness, Secretary Dole did not make it to Beckley, so his prepared speech was given by Paul Zinner, Assistant Director for Planning, U.S. Bureau of Mines.

The text of Secretary Dole's address and other documents are appended:

Remarks of Paul Zinner, Assistant Director for Planning, U.S. Bureau of Mines, Substituting for Hollis M. Dole, Assistant Secretary of Mineral Resources, Department of Interior, Before First Graduating Class of the Mine Health and Safety Academy, Beckley, W. Va., August 31, 1972

It is a pleasure to return to Beckley and join in the ceremonies which attend the graduation of the first class to enter the Mine Health and Safety Academy. Those in the audience who are veterans of the groundbreaking ceremony a month ago will remember that it truly appeared that the Good Lord didn't want the event to take place—at least not on the 29th of July. I suppose that one of the few benefits of that wild downpour was the fact that a lot of words that were intended to be said that day—including some of mine—never got out of the speakers' coat pockets. I do not remember just what I actually did say then, and I'm sure that no one else does either. But one of the things I intended to say was that the fine new buildings which will one day be the home of the Beckley Academy will serve as a specific reminder of the vitality of the political process in our open society. Dedicated men and women of both parties recognized a problem, and joined in the actions that were needed to effect a solution. I am grateful that they did so, and I am delighted to be here for this glad occasion.

The Mine Health and Safety Training Program, of which this class is an essential part, answers a deep and longfelt need, recognized and articulated by both the Federal Coal Mine Health and Safety Act and the Metal and Nonmetallic Mine Safety Act. Both directed the Secretary of the Interior to expand the function of mine health and safety education and training—an effort which the Administration of President Nixon has actively and wholeheartedly supported.

The members of this class are the product of the formal institute for the teaching of mine health and safety practices which resulted from those Acts. Over the years, thousands will follow in their footsteps to form the vital corps of inspectors and safety engineers so critical to the growth and performance of our mining industries.

It is hard to realize just how vast our mineral requirements are going to be in another 20 or 30 years. Between now and the close of this Century—and that is only 28 years away—we are going to need 22 billion tons of coal; 3½ billion tons of iron; 90 million tons of copper; 33 million tons of lead. Demand for uranium can be expected to expand by 8 times. All in all, our mineral requirements in the Year 2000 are expected to be 4 times what they are in 1972.

To meet this challenge the scale of mining operations must be expanded greatly. Vast amounts of capital will have to be raised; technology for both extraction and processing must be improved; problems of access to better deposits must be solved; the environmental and social costs of mining and mineral processing must be reduced to the practical minimum; skilled and professional manpower must be recruited and trained in numbers far exceeding those to which we are accustomed.

But by far the greatest challenge—because unless we successfully meet it nothing else will be of any consequence—is the matter of mine health and safety. I suggest that quite apart from the obvious humanitarian considerations, there are the most practical reasons why our mines—especially our coal mines—must be transformed into safe and healthful places to work. The survival of the mining industry depends on it. One of the most persistent problems the coal industry has had to contend with is a chronic shortage of workers—especially young workers—underground. The pay is good. Most coal mining is done in regions of relatively high unemployment. Yet the industry has rarely in recent years been able to satisfy its full requirements for mine labor. And the average miner is a man in his late forties or early fifties which means that the mine force is superannuated by at least 10 to 15 years.

If there is to be the expansion in mining activity that the Nation requires, tens of thousands of new young workers must be persuaded that there is a future for them in mining. And we can start by removing the threat to their lives, health, and safety that mining has historically entailed.

This is why the Training Program is of such immense importance. It represents a clean break from the empirical, improvised, on-the-job training efforts which have been the mainstay of the inspector training program. Here in Beckley, we shall have a place where a formal, integrated curriculum can be developed which will cover *all* essential aspects of the practice of mine health and safety. We shall have here the resources and the commission to develop new knowledge in these fields, to propagate and publish that knowledge; to develop a body of doctrine which will serve as the basis for the uniform practice that is so sorely lacking in our present inspection programs. Ever since it was recognized as a serious objective, mine health and safety has suffered from the piecemeal, random harvest of discrete bits of knowledge which appeared to have some utility to the program. In the vernacular of the young, Beckley represents at long last, a chance to get it all together.

I am deeply gratified to note the presence of so many younger men in this, the first graduating class. We need many, many more. Our present crops of mine inspectors reflects the problem of the aging work force I have already commented on with regard to the miners themselves. This is no criticism of the competence of our older inspectors. It is an observation that walking, crawling, and climbing throughout a mine is a job for young men, rather than for those who by long years of service have earned the right to less demanding conditions.

This first class—26 in number—is but a sample of a greatly enlarged training and education effort which will eventually encompass a student body of some 600. While the basic core of this group will be Bureau of Mines employees, a susbtantial number of spaces—up to 250—will be available for State mine safety agencies and for the mining industry itself. When the new building is completed sometime in 1975, the Academy will be able to turn out inspectors at the rate needed to supply the expanding requirements for this unique and vital capability.

To you who are about to begin your careers as mine safety inspectors I have a few words of counsel. My first observation is that the circumstances of your employment will cast you in a difficult role, not only in your relationship with mine management, but with union officials and the individual miners themselves. Yet men's lives will literally depend upon the quality of your judgment and the vigor of your enforcement actions. You can make no compromise which in any way permits a needless hazard to those whose health, lives, and safety are your responsibility. Having said this, I must add that you should not deport yourselves as adversaries of those with whom you must deal—you must avoid at all costs the pointless, futile, self-defeating game of Cops and Robbers with mine management. Your business is leadership in mine safety. You must reconcile the requirements from mine safety with the need for efficient production. It is not a question of either/or. The requirement is for both, and your capacity for leadership will be tested by it. For the law not only specifies diligent attention to mine health and safety, it demands as well that private enterprise be fostered and encouraged to develop the mineral resources of the Nation for the benefit of its people.

Your mission is therefore to help the miner, his union, and his employer to accomplish the mining operation with the least possible injury and danger. You are there not only to inspect, but to instruct, and your success in the former will be directly in proportion to your success in the latter. For in the last analysis, accidents are caused by carelessness, by error, by ignorance, and the day-to-day control of these rests with the individual worker, with the union, with management, not the inspector who enters the mine perhaps no more often than 3 or 4 times a year.

An inspection draw a picture of conditions as they are at a given moment. It can call attention to past errors and present deficiencies. It has no way of controlling the events that take place the next day, the next week, or the next month. Only those who operate the mine can do that.

My second charge to you as career inspectors is to shun the persistent illusion that has been shared by management, by union leadership, by the miners themselves, and by the general public: namely that mining is inherently a dangerous occupation, and that death and injury are a normal part of the cost of doing business. This illusion may have been valid in the past, but it is now totally at odds with reality. There is *nothing inherent* in mining operations that dictates a lifetime of peril to those engaged in them. We have the knowledge and capability *now* to make the miner's life at work as safe as it is in his home. But realizing this objective will take a reversal of this false and fatalistic notion that the problem of mine safety is beyond solution. Let the reversal begin here, in Beckley, in this Training Program, with this graduating class. Beyond this, there must be a closely coordinated, resolute set of actions on the part of all connected with the mining business: inspectors, miners, union officials, company management, State and Federal regulatory agencies, and extending to the schools where the practice and profession of mining are taught. Everyone has a piece of the action. Everyone bears some responsibility.

Mine safety is *not* an impossible dream. Together we can make it a reality.

BACKGROUND ON THOMAS MICHAEL BALL

Born in Cambridge, Ohio, March 22, 1950. His father was a Wage and Hour investigator with the U.S. Department of Labor. Mike was the youngest of four children, who are Mrs. Sue Bollman (Age 30, living in Denver, Colorado; phone 303–756–7990); Joe, 25; and Cathy, 24 (an accountant living in Cleveland.) Joe's phone number is 614–942–2228.

In 1960, the Ball family moved to Cadiz, Ohio, a proud little town which is the county seat of Harrison County. Cadiz is in the center of a strip-mined area, where the Hanna Coal Company is king. Like most strip-mined areas, the town and county both declined in population in the 1960's. The 1970 population of Cadiz is 3,060, down 6.1% from 1960. Harrison County declined—5.5% in population from 1960, there being only four counties in the state with a greater decline in that decade.

Cadiz was designated as the "proudest small town in America" in 1938 when a group in Hollywood sought out an American town with a population under 5,000 having the most illustrious roster of famous sons. Cadiz boasts of being the birthplace of Clark Gable, the home of President Lincoln's Secretary of War, Edwin M. Stanton, the abolitionist Bishop Matthew Simpson, and John A. Bingham, who served 16 years in Congress and was a post-war minister to Japan . . . The population of Cadiz is 11.4% Negro, and 15.4% over 65 (Ohio has only 9.4% over 65). Cadiz is located southwest of Steubenville, about 25 miles from the Ohio River.

Mike was quiet, well-behaved, somewhat introspective, and serious-minded. He played end on the varsity football team at Cadiz High School, where he graduated in 1968. He was interested in photography, and loved to hunt for grouse, groundhogs, and rabbits. He was about six feet tall, with a moustache and thick, black, wavy hair.

During his senior year in high school, he enlisted in the Navy, received a standard 120-day deferment to finish and graduate from high school, and went into the Navy on July 1, 1968. He was sent to Great Lakes Training School and wound up 16th in a class of 90, many of those above him having college backgrounds. His original ambition was to be a Marine "green beret", but his mother argued strongly against this. But he got his wish to be associated with the Marines when he was sent to Camp Lejeune for training in the fleet marine medical school, where he wound up 58th in a class of about 300.

In January, 1971, Mike was sent to Vietnam, where he served as a medic attached to the 3rd Marine Division. He also took parachute training in Okinawa. He returned home on emergency leave when his father suffered a stroke in March, 1972. His father died on May 26, 1972, and Mike went to work at the Franklin No. 25 mine of the Hanna Coal Company in New Athens, Ohio, about 11 miles from Cadiz.

Mike left about 6:45 every morning for the drive to New Athens. His brother Joe had been working at the preparation plant at the same mine. Mike hated the idea of working underground, but the pay was $42 a day, and he figured he could raise enough money to help his mother and perhaps save during the summer so he could quit and start college in September.

He had no training or instructions for his job as shot-firer and timberman. After seven days on the job, he was assigned to work alone without supervision.

REPORT OF FATAL COAL MINE ROOF-FALL ACCIDENT, FRANKLIN NO. 25 MINE, HANNA COAL CO., DIVISION OF CONSOLIDATION COAL CO., NEW ATHENS, HARRISON COUNTY, OHIO, JUNE 14, 1972

(By Paul J. Gregor)

INTRODUCTION

This report is based on an investigation made pursuant to the provisions of the Federal Coal Mine Health and Safety Act of 1969 (83 Stat. 742).

A roof-fall accident that occurred about 12:30 p.m., Wednesday, June 14, 1972, near the face of No. 52 room, 2 left section off main west, Crabapple extension, resulted in the death of Thomas M. Ball, shotfirer and timberman. Ball, Social Security No. 272–44–5348, was 22 years of age, and had 12 days of underground mining experience, all at this mine. He was single.

The Bureau of Mines was notified of the accident and death at 1:45 p.m. on June 14, 1972, by a representative of the Hanna Coal Company, Division of Consolidation Coal Company. An investigation by the Bureau of Mines was started the same day.

This report is based on information obtained by interrogating company officials and employees and from investigations at the scene of the accident which reportedly had not been disturbed.

GENERAL INFORMATION

The Franklin No. 25 mine, at New Athens, Harrison County, Ohio, is being developed in the Pittsburgh No. 8 coalbed, which averaged 60 inches in thickness in the areas being mined. A total of 423 men was employed. Of this total, 391 worked underground on 1 maintenance and 2 coal-producing shifts a day, 5 days a week. The daily production averaged 6,700 tons of coal, loaded in 1 continuous-mining and 8 conventional mining sections. The Crabapple extension of the mine is a recently developed area in another hill and interconnected to the older part of Franklin No. 25 mine by a track haulageway, and 6 of the 9 mining sections were operating in this area.

The method of mining in the Crabapple area consisted of driving 10 main entries 16 feet wide on 50-foot centers; room entries 14 feet wide in sets of 3 on 42-foot centers, and rooms 18 feet wide on 29-foot centers to a depth of 300 feet. Pillars were not recovered.

Coal and a 10 to 12-inch draw rock that overlayed the coalbed were broke down with compressed air utilizing an airdox shell 3½ inches in diameter which ruptures a shear strip when an air pressure of 10,500 pounds is reached. The draw rock was loaded with the coal.

The immediate roof in the accident area consisted of approximately 5 feet of unconsolidated shale and limestone, and the primary roof was massive limestone of an undetermined thickness.

The approved roof control plan for conventional mining in 18-foot rooms required 84-inch roof bolts, 3 abreast, to be installed, on 3-foot centers crosswise, 54-inch centers lengthwise, and to within 5 feet of the uncut face. A similar plan was in effect for 20-foot wide rooms except that roof bolts were to be installed on 4-foot centers crosswise. A minimum of 4 temporary roof supports was required to be set in sequence on not more than 5-foot centers, with 3 of the supports to be set from left to right and the fourth support to be set in the center of the working place not more than 5 feet inby the No. 2 temporary roof support. The first 3 of these supports were to be installed not more than 5 feet inby permanent supports prior to roof bolting operations or the performance of any other work inby the last permanent supports. A copy of the plan was posted on the bulletin board in the bath house. The present roof control plan was approved on January 14, 1972. The roof in the Crabapple area at the time of the approval was similar to the roof in the older part of the mine, therefore, a separate plan was not deemed necessary.

The investigation was conducted by Bureau of Mines personnel, and those persons furnishing information and/or present during the investigation were:

HANNA COAL CO.

Jesse L. Shepperd, Vice President—Underground Mines.

William Trump, General Superintendent—Underground Mines.

Joseph E. Turkal, Sr., Assistant General Superintendent—Underground Mines.

C. William Parisi, Safety Director—Consolidation Coal Company.

Julius Olzer, Chief Inspector—Consolidation Coal Company.

Lewis Jesalosky, Safety Director—Hanna Coal Company.

James M. Faunda, Superintendent.

Dominic Capers, General Mine Foreman.

Dewey Piccin, Safety Engineer.

William Faunda, Safety Engineer.

Donald J. Kidd, Section Foreman.

Victor Bernardi, Section Foreman.

George J. Kanopsic, Assistant Mine Foreman.

UNITED MINE WORKERS OF AMERICA

William S. Howard, Safety Coordinator—District 6.

Walter Ludwig, Safety Committeeman.

Steve Skukan, Safety Committeeman.

John Yemich, Safety Committeeman.

Glenn Donaldson, Roof Bolter Operator.

OHIO DIVISION OF MINES

Henry C. Roberts, Deputy Mine Inspector (Roof Control).

UNITED STATES BUREAU OF MINES

Robert T. Davis, Subdistrict Manager.

Ronald Keaton, Safety Specialist—Washington, D.C. Office.

Gerald Young, Coal Mine Inspection Supervisor.

Francis S. Wood, Federal Coal Inspector.

Paul J. Gregor, Federal Coal Mine Inspector.

The Hanna Coal Company is a Division of Consolidation Coal Company, and the Continental Oil Company is the present organization. The management structure for the mine consists of a superintendent, mine foreman, assistant mine foreman, shift foreman, and a section foreman for each coal-producing section.

James M. Faunda is the designated official in charge of health and safety for the mine. Lewis Jesalosky is the Safety Director and is in overall charge of health and safety for Hanna Coal Company. C. William Parisi is the Safety Director for all Consolidation Coal Company mines. The company is a member of the Holmes Safety Association, and weekly safety meetings are conducted with the employees. The company has established employee training programs in first aid, methane detection, roof-control, and the use of self-rescuers. However, supervisory personnel were the only employees who had received classroom training in roof-control and methane detection. A mine rescue team is maintained at the mine. Dewey Piccin, Safety Engineer, attended a Bureau of Mines class designed to train instructors in roof and rib control, coal mine ventilation, first aid, self-rescuers, and methane detectors. The operator's program of training and retraining personnel to carry out functions of the Federal Coal Mine Health and Safety Act of 1969 has been submitted to the Bureau of Mines.

Representatives of management stated that all new employees received initial instructions from the safety engineer, and the employee's immediate supervisor about the hazards associated with underground coal mining. A new inexperienced employee spends the first day of employment observing general mining practices in the company of his immediate supervisor. He then begins to participate in the work activities helping experienced miners, but is not to be permitted to work alone until he has received three weeks of training and experience.

The investigation disclosed that the initial training program for inexperienced employees was not followed inasmuch as Ball (victim) was assigned duties which required him to work alone, beginning the eighth day of his employment. Ball had never attended a formal training program designed to train him in the performance of his duties as a shotfirer and timberman. The extent of his training was that which was gained through actual experience and verbal instructions received while working 7 days under the supervision of Victor Bernardi, 1 day from Don Dombroski and 4 days from Donald Kidd, Section Foreman. Kidd stated that although he was the immediate supervisor on the section at the time of the accident, Ball had only worked under his supervision 4 days due to a transfer in supervisory personnel in which Kidd replaced Bernardi as Section Foreman on the 2 left section. Kidd also stated that if he had been aware of Ball's inexperience he would not have permitted him to work alone while installing temporary supports.

Kidd, Bernardi, and Dombroski were certified by the State of Ohio, Division of Mines and each had several years mining experience. Their supervisory experience ranged from 2 to 5 years. All three supervisors have received training in first aid, methane detection, roof and rib control, and the use of self-rescuers in training classes conducted by the company.

The last regular Federal inspection of the mine, a combination health and safety inspection, was completed April 10, 1972, and subsequent spot inspections were made at monthly intervals.

DESCRIPTION OF ACCIDENT

The 2 left main west section crew, under the supervision of Donald Kidd, Section Foreman, entered the mine at 7:30 a.m., Wednesday, June 14, 1972, and arrived at the working section about 8:10 a.m. Kidd made an examination of the working places and in his opinion no hazardous conditions existed although he was aware of the absence of roof coal in various areas throughout the working section.

Ball (victim) had shot down six cuts of coal before going to lunch at 11:30 a.m. Shortly thereafter, Kidd, passing by the "dinner hole", was questioned by Ball as to what duties he was to perform after lunch. Kidd then instructed him to install temporary roof supports in No. 53 room. Shortly after lunch Kidd made a visual examination of the roof in No. 53 room where Ball and Ronald Carter, roof bolter operator, were setting temporary roof supports. He considered the roof to be normal and he did not issue Ball any specific instructions except that he was to proceed to No. 52 room to install temporary roof supports. At approximately 12:15 p.m. Kidd examined the face of No. 52 room (scene of the accident) for methane and other hazardous conditions. He stated that he could not observe the condition of the roof near the face due to the fact that the loading machine was in the place and it had not been cleaned up. From what he observed the roof appeared normal, but he made no test by the sound and vibration method. After the fall of coal was cleaned up in No. 52 room, the loading machine operator did not set any temporary room supports prior to leaving the room inasmuch as this was normal procedure at the mine.

At 12:30 p.m. Glenn Donaldson, roof bolter operater and eyewitness, was tramming the roof-bolting machine into No. 52 room to install roof bolts. He stated that he observed Ball standing on the right side of the place with his back toward the face, either holding or attempting to install a post. When he got within approximately 15 feet of Ball, he saw the roof fall, striking Ball. He immediately ran to summon aid.

Kidd was near the loading point when he heard Donaldson call. He ran into the room and began to help the loading crew and Donaldson remove the rock which was on Ball's head and shoulders. The rock was removed with the aid of posts used for leverage and Kidd then instructed crew members to get a stretcher, while he attended Ball. He stated that he was unable to detect a pulse, and while crew members transported Ball to a mine car, he called the mine office to summon a doctor and an ambulance. The New Athens, Ohio, Volunteer Fire Department responded to the call and was awaiting with an emergency vehicle at the Crabapple portal when Ball was brought to the surface. He was taken to the Harrison Community Center at Cadiz, Ohio, where he was pronounced dead at 1:05 p.m. by Dr. Lawrence Wu. Death was attributed to a fractured skull.

The investigation revealed that the roof which fell measured 9 feet 4 inches in width by 8 feet 4 inches in length, and the thickness of the fallen rock varied from 0 to 11 inches. The rock broke when it fell and the portion lying on Ball (victim) was 5 feet 6 inches in width, 5 feet in length, and ranged from 5 to 11 inches in thickness. Ball had installed one temporary roof support 6 feet 2 inches from the left rib and 7 feet 7 inches in by the last complete row of roof bolts. The height and width of the working place was 6 feet 5 inches and 18 feet, respectively.

The distance between the last complete row of installed roof bolts and the back of the undercut in No. 52 room was 17 feet 3 inches and indicated that the loading machine operator had been either inby the last row of roof bolts or in a hazardous zone near the last bolts during clean-up operations. The operating controls on the loading machine, as measured with a tape, were 14 feet 6 inches from the tip of the gathering arms. The mining machine used in 2 left main west section was equipped with a 10-foot cutter bar.

During the investigation, the roof was observed to be wet due to moisture deposited by the warm humid air entering the mine and cracks were observed in the immediate roof strata and in the voids from which roof material had fallen. There was loose roof between the installed roof bolts, and ribs were overhanging at many locations throughout the working section. Temporary roof supports that had been installed in No. 51 room, adjacent to the scene of the accident, were set haphazardly in that temporary supports were either installed at roof cavities or wherever they could conveniently be installed. In addition, observations in the face areas of three working places revealed draw rock overhanging the faces and incomplete bolting patterns. In the No. 52 room, a single roof bolt had been installed in the center of the room 4 feet inby the last complete row of bolts. Reportedly, the flanking roof bolts needed to complete this row of bolts had not been installed due to draw rock overhanging the face.

An examination of the operator's accident record books revealed that 13 accidents attributed to falls of roof, rib, or face have occurred at this mine in 1972. These accidents resulted in three lost time injuries in addition to the fatality. In the April and May reports, unsafe acts, inadequate maintenance of working places, hazardous methods or procedures, and unsafe positions of workmen were listed as the causes of accidents during these two months. During the first 6 months of this year, 12 fatalities have occurred in 11 mines wholly owned or operated by the Consolidation Coal Company. These deaths resulted from 6 unintentional roof and rib falls, 5 haulage accidents (2 occurred at surface operations), and 1 machinery accident. Certainly, these accident records show clearly that a greater effort will have to be exerted by corporate officials, company officials, mine management, and employees to prevent mine injuries.

The mine was undergoing a roof control evaluation and training survey at the time of the accident. A summary of hazardous conditions and practices observed during the survey are as follows: The employees were lax in examining and testing the roof before installing temporary roof supports. The majority of the men installing temporary roof supports were shotfirers with very little experience in the face areas. Some of the recently hired men stated that they had not been instructed in the proper method of roof-testing. In many instances temporary roof supports were installed more than 5 feet inby permanent supports, widely spaced, installed loosely, and not of proper length. Several corners had been cut off leaving exposed roof which was not adequately supported. Cap blocks were not utilized in some instances where tender roof conditions existed, especially where the roof coal was missing. Several rooms had been driven in excess of the maximum 20-foot width specified in the approved roof control plan. Some roof-bolting machine operators were observed applying too much thrust on the roof-bolt wrench against the bearing plates resulting in a variance of the applied torque. Inadequately supported roof was observed at various locations in the active sections of the mine. The hazardous conditions and practices observed were corrected before the survey was concluded.

Based upon the hazardous roof conditions and practices observed during the accident investigation, and the summation of the roof control evaluation and training survey, it was the consensus of the Bureau of Mines investigators that the approved roof control plan was not being complied with and the company's roof control program was definitely inadequate. In view of this, the company's roof support plan is currently being revised and will be submitted for approval as soon as the revisions are completed.

CAUSE OF ACCIDENT

The general laxness on the part of management, its supervisors, and employees to follow sound proven roof support and roof testing practices precluded the detection of a dangerous roof condition and its ultimate failure. Although not listed in chronological order, this roof fall and death were a result of a culmination of:

1. Installed temporary roof supports being in many instances more than 5 feet apart, more than 5 feet inby permanent supports, of improper length, or loosely set,

2. Thomas M. Ball (victim) having never received a formal course of instruction designed to train him in the performance of his duties as a shotfirer and timberman,

3. The victim with only 12 days underground mining experience being permitted to work alone while installing temporary roof support in face areas,

4. Management's failure to enforce the company's approved roof control plan and other policies designed to eliminate substandard conditions and practices which result in roof-fall accidents,

5. The failure of management to establish a procedure by which trainees are readily identifiable and the lack of communication between the safety department, supervisory personnel, and employees relative to

the type, extent, and control of training new employees before they are required to work alone, and

6. Management's failure to analyze and utilize the data logged in the accident record books in the prevention of injuries from roof-falls.

REQUIREMENTS

1. Management shall comply with the approved roof control plan in its entirety which shall include the training of all underground employees in safe roof support procedures.

2. Employees shall not be permitted to work alone in underground areas of a mine until their work habits have been thoroughly evaluated by management. Consideration should be given to establishing a training period of at least 6 months duration for all inexperienced employees.

3. Supervisors and employees shall comply with company rules which prohibit unsafe conditions and practices relating to sound proven roof support principles.

4. A definite program or procedure shall be established so that trainees can be readily identifiable by visual observation.

5. Working faces shall be "squared up" and overhangs eliminated to facilitate the installation of roof bolts according to the approved plan.

6. Management shall analyze all accident reports to determine the causes of accidents and take positive action when it is evident that a trend in unsafe practices, conditions, and work habits have developed.

NOTICES AND ORDERS

Violation—Section 75.200

The roof control plan was not being complied within No. 52 room, 2 left off main west section. Temporary roof support was installed a distance of 7 feet 7 inches in by the last row of permanent supports. A Notice of Violation No. 1 P.J.G. was issued June 15, 1972, on Form 104(b) requiring that this violation be abated by 11:00 p.m. on June 16, 1972. This violation was abated on June 19, 1972, when meetings were held with section employees and the roof control plan was explained to them by the safety engineer.

Imminent danger—Section 104(a)

A fatal roof-fall accident has occurred in the 2 left section off main west. This closure order is issued pending the completion of an investigation to determine the cause of the accident and means to prevent a similar occurrence.

Action taken

Order No. 1 P.J.G. was issued on June 14, 1972, on Form 104(a) requiring that all persons, except persons referred to in Section 104(d), be withdrawn and prohibited from entering the 2 left off main west section. The roof was scaled, overhangs were pulled down, and additional roof bolts were installed throughout the working places in the 2 left off main west section where fragile roof conditions were observed during the investigation of the fatal accident. The Order was terminated on June 19, 1972.

Respectfully submitted,

Paul J. Gregor,
Federal Coal Mine Inspector.

Washington, D.C.,
August 10, 1972.

Hon. Rogers C. B. Morton,
Secretary of Interior,
Department of the Interior,
Washington, D.C.

Dear Secretary Morton: On June 14, 1972, a roof fall at the Franklin No. 25 mine of the Hanna Coal Company, a division of Consolidation Coal and Continental Oil companies, at New Athens, Ohio, occurred killing Mr. Thomas M. Ball—a shotfirer and timberman.

Mr. Ball was, according to the Bureau of Mine's fatality report only "22 years of age" when he died. The report also states that he had a mere "12 days of underground mining experience, all at this mine" when he died.

The Bureau's report states:

"The company is a member of the Holmes Safety Association and weekly safety meetings are conducted with the employees. The company has established employee training programs in first aid methane detection, roof-control and the use of self-rescuers. *However supervisory personnel were the only employees who had received classroom training in roof-control and methane detection.*

* * * * *

"Representatives of management stated that all new employees received initial instructions from the safety engineer and the employee's immediate supervisor about the hazards associated with underground coal mining. A new inexperienced employee spends the first day of employment observing general mining practices in the company of his immediate supervisor. He then begins to participate in the work activities helping experienced miners, *but is not to be permitted to work alone until he has received three weeks of training and experience.*

"The investigation disclosed that the initial training program for inexperienced employees was not followed inasmuch as Ball (victim) was assigned duties which required him to work alone beginning the eighth day of his employment. Ball had never attended a formal training program designed to train him in the performance of his duties as a shotfirer and timberman. The extent of his training was that which was gained through actual experience and verbal instructions received while working 7 days under the supervision of Victor Bernardi, 1 day from Don Dombroski and 4 days from Donald Kidd, Section Foreman. Kidd stated that although he was the immediate supervisor on the section at the time of the accident, Ball had only worked under his supervision 4 days due to a transfer in supervisory personnel in which Kidd replaced Bernardi as Section Foreman on the 2 left section. *Kidd also stated that if he had been aware of Ball's inexperience he would not have permitted him to work alone while installing temporary supports.*" (Italic supplied.)

According to the Bureau's report the Superintendent of the Mine, Mr. James M. Faunda, "is the designated official in charge of health and safety for the mine," pursuant to section 107(d) of the Federal Coal Mine Health and Safety Act of 1969, not the Hanna Coal Company's Safety Director, Mr. Lewis Jesalosky.

1. Please explain why this lesser company official is so designated under the statute.

The Bureau's report also states that Hanna's "program of training and retraining personnel to carry out functions" of the 1969 law "has been submitted to the Bureau of Mines."

2. (a) I would appreciate your advising me when this "program" was "submitted" to the Bureau, and when the Bureau expects to approve or reject it.

(b) Also, please advise me of the procedures followed by the Bureau of Mines for notice and public reviewing of such programs particularly by miners and their representatives.

Finally, the report lists the "Cause of Accident" as follows:

"The general laxness on the part of management, its supervisors, and employees to follow sound proven roof support and roof practices precluded the detection of a dangerous roof condition and its ultimate failure. Although not listed in chronological order, this roof fall and death were a result of a culmination of:

1. Installed temporary roof supports being in many instances more than 5 feet apart, more than 5 feet in by permanent supports, of improper length, or loosely set;

2. Thomas M. Ball (victim) having never received a formal course of instruction designed to train him in the performance of his duties as a shotfirer and timberman;

3. The victim with only 12 days underground mining experience *being permitted to work alone* while installing temporary roof support in face areas;

4. *Management's failure* to enforce the company's approved roof control plan and other policies designed to eliminate substandard conditions and practices which result in roof-fall accidents.

5. The *failure of management* to establish a procedure by which trainees are readily identifiable and the lack of communication between the safety department, supervisory personnel, and employees relative to the type, extent, and control of training new employees before they are required to work alone, and

6. *Management's failure* to analyze and utilize the data logged in the accident record books in the prevention of injuries from roof-falls." (Underlining supplied.)

This is a shocking litany of management's deliberate failure to protect its employees, insist on proper safety practices and procedures, and to obey the requirements of the 1969 law. In my opinion, the Hanna Coal Company and its officials should be prosecuted under section 109(b) and (c) of the law for these failures. I am today sending a copy of this letter to the Attorney General and urging him to do so promptly. A copy of my letter to him is enclosed.

The Hanna Coal Company's poor record of training is not unique in the coal industry. Other coal mine operators are as equally negligent as Hanna. This is clearly shown by the following data derived from some of the Bureau's accident records:

1. Two welders, age 20 (6 months mining experience) and 26 (9 months mining experience) crushed to death on January 8, 1972, at Peabody Coal Company strip mine in Kentucky.

2. A maintenance man, age 19 (with 26 days experience) killed on January 10, at an underground mine of the C & W Mining Company in Ohio.

3. Scoop operator, age 25 (5 months and 11 days experience) killed on January 19 at the Young Branch Coal Company in Virginia.

4. Surface construction worker, age 29 (8 months experience), electrocuted on March 20 at the Wolf Creek Collieries, Inc., Mine No. 4, in Kentucky.

5. Scoop operator, age 21 (10 months experience) injured on March 27 and died on March 31, in an underground mine of the Island Creek Coal Company (Pondfork A. Mine) in West Virginia.

6. Underground laborer, age 37 (4 months experience) killed on May 6 at the Johns Creek Elkhorn Coal Corp., No. 2, in Kentucky.

7. General laborer, age 48 (4 months experience) injured on July 26, and died two days later, at the Eastern Association Coal Corporation (Delmont Mine), in Pennsylvania.

And, of course, Mr. Thomas Ball.

This is only a sample of inexperienced miners who have been killed at coal mines. There are many other examples of miners with longer mining experience who are killed only after a few days or weeks on the job.

It must be obvious to Bureau officials—it certainly is to me—that coal operators are negligent in training miners *before* they enter the mine and *before* they are allowed to perform normal mine duties. Yet little has been done to halt this unsafe practice.

I urge that the Bureau take immediate steps to correct this situation. If the present standards and regulations are not adequate for this purpose, they should be quickly changed. The current situation is intolerable.

Sincerely,

Ken Hechler.

Washington, D.C.,
August 10, 1972.

Hon. Richard Kleindienst,
Attorney General of the United States, Department of Justice, Washington, D.C.

Dear Mr. Attorney General: Enclosed is a copy of a letter I have today sent to the Secretary of the Interior concerning the recent death of Mr. Thomas M. Ball, at a Hanna Coal Company mine in Ohio.

The letter clearly indicates that criminal prosecution is warranted against the company and its officials under sections 109 (b) and (c) of the Federal Coal Mine Health and Safety Act of 1969. I strongly urge that you promptly institute such proceedings.

You should also note the Bureau's fatality report on Mr. Ball states as follows:

"An examination of the operator's accident record books revealed that 13 accidents attributed to falls of roof, rib, or face have occurred at this mine in 1972. These accidents resulted in three lost time injuries in addition to the fatality. In the April and May reports, unsafe acts, inadequate maintenance of working places, hazardous methods or procedures, and unsafe positions of workmen were listed as the causes of accidents during these two months. During the first 6 months of this year, 12 fatalities have occurred in 11 mines wholly owned or operated by the Consolidation Coal Company. These deaths resulted from 6 unintentional roof and rib falls, 5 haulage accidents (2 occurred at surface operations), and 1 machinery accident. Certainly, these accident records show clearly that a greater effort will have to be exerted by corporate officials, company officials, mine management, and employees to prevent mine injuries."

Sincerely,

Ken Hechler.

Department of Justice,
Washington, D.C., August 23, 1972.

Hon. Ken Hechler,
House of Representatives,
Washington, D.C.

Dear Congressman: Reference is made to your letter of August 10, 1972, to the Attorney General requesting that the Department of Justice promptly initiate proceedings against the Hanna Coal Company of Ohio for violations of the Federal Coal Mine Health and Safety Act of 1969.

In response to our request for information in this matter, the Solicitor's Office, Department of the Interior, advised that the Bureau of Mines' report of the accident has been referred by the Bureau to the Solicitor's Office for evaluation. We are further advised that the Solicitor's Office has requested the Bureau to conduct additional investigation into some aspects of the evidence discussed in the report.

As you can certainly appreciate, it would be virtually impossible for us to properly review and evaluate a matter for criminal prosecution under the Act without the benefit of the Bureau's investigative report, expertise, and intimate knowledge of the facts. Should evidence of willful violations of the Act be indicated in the Bureau's report, we are confident that Interior will refer such evidence to this Department for evaluation. In this event, you may be assured we will give the matter our immediate attention.

Sincerely,

Henry E. Petersen,
Assistant Attorney General.

Washington, D.C.,
August 11, 1972.

John Corcoran,
President, Consolidation Coal Co.,
Pittsburgh, Pa.

Dear John: On June 14, a roof fall occurred at the Franklin No. 25 mine, New Athens, Ohio. The mine is owned by the Hanna Coal Company, a division of the Consolidation Coal and Continental Oil companies.

The Bureau of Mines report on the roof fall states that it "resulted in the death of Thomas M. Ball, shotfirer and timberman," and that he was 22 years old and had only "12 days of underground mining experience, all at this mine."

Consol's safety director and chief inspector were present during the investigation of this roof fall.

The report states:

"An examination of the operator's accident record books revealed that 13 accidents attributed to falls of roof, rib, or face have occurred at this mine in 1972. These accidents resulted in three lost time injuries in addition to the fatality. In the April and May reports, unsafe acts, inadequate maintenance of working places, hazardous methods or procedures, and unsafe positions of workmen were listed as the cause of accidents during these two months. *During the first 6 months of this year, 12 fatalities have occurred in 11 mines wholly owned or operated by the Consolidation Coal Company.* These deaths resulted from 6 unintentional roof and rib falls, 5 haulage accidents (2 occurred at surface operations), and 1 machinery accident. Certainly these accident records show clearly that a greater effort will have to be exerted by corporate officials, company officials, mine management, and employees to prevent mine injuries." (Italics supplied.)

This record does not include the 9 deaths that occurred at your Blacksville mine in West Virginia on July 22.

It is shocking to learn that one of the Nation's leading coal producers is responsible for nearly one-fourth of the coal mine fatalities in the Nation so far this year. Last year, Consol had the dubious distinction of ranking second in the Nation in coal mine fatalities. Then, of course, there is the nonfatal injuries for which statistics for 1971 and 1972 are apparently not yet available.

Desipte your recent disclaimer concerning the Bureau's release of "statistics" of violations at Blacksville, I think that this record does "indicate a callous disregard of the law" and "unsafe conditions" at Consol's mines.

But this horrible record is understandable when one reads the Bureau's findings concerning Mr. Ball's death. They are:

"The general laxness on the part of management, its supervisors, and employees to follow sound proven roof support and roof testing practices precluded the detection of of a dangerous roof condition and its ultimate failure. Although not listed in chronological order, this roof fall and death were a result of a culmination of:

1. Installed temporary roof supports being in many instances more that 5 feet apart, more than 5 feet inby permanent supports, of improper length, or loosely set;

2. Thomas M. Ball (victim) *having never received a formal course of instruction designed to train him in the performance of his duties as a shotfirer and timberman.*

3. The victim with *only* 12 days underground mining experience being permitted to work alone while installing temporary roof support in face areas;

4. *Management's failure* to enforce the company's approved roof control plan and other policies designed to eliminate substandard conditions and practices which result in roof-fall accidents.

5. The *failure of management* to establish a procedure by which trainees are readily identifiable and the lack of communication between the safety department, supervisory personnel, and employees relative to the type, extent, and control of training new employees before they are required to work alone, and

6. *Management's failure* to analyze and utilize the data logged in the accident record books in the prevention of injuries from roof-falls." (Italic supplied.)

If the miners of this Nation knew of this record and could vote on retaining or not retaining Consol's current managament team, I feel certain that they would vote to throw that team out of office.

By failing to properly train and retrain employees, to instill in all their employees, a sense of safety consciousness, and, most importantly, to insure that *all* Federal and State safety rules are fully observed, Consol officials are clearly negligent and should be replaced. Consol needs management people who will devote greater personnel time and effort to health and safety than production. This means *all* Consol mine officials whatever their title—not just the Safety Directors. Until this is done, I predict that Consol will continue to lead or nearly lead the Nation in mine deaths.

I urge that you personally take charge of Consol's health and safety program and initiate steps to drastically reduce injury and fatality rates at *all* Consol mines for the remainder of this year and thereafter.

I would be interested in learning what actions you take or plan to take to achieve this.

Sincerely,

Ken Hechler.

WORLD ORDER STRATEGY COMMITTEE, MEMBERS OF CONGRESS FOR PEACE THROUGH LAW

(Mr. DRINAN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. DRINAN. Mr. Speaker, I have the honor to chair the World Order Strategy Committee of our bipartisan, bicameral organization, Members of Congress for Peace Through Law MCPL now has 134 members—32 Senators and 102 Representatives, from both parties and every region of the country.

The World Order Strategy Committee was created by MCPL several months ago for the purpose of examining the basic assumptions on which American foreign policy is based.

Our committee is very fortunate to have 13 exceedingly able and dedicated members—public servants who believe that a careful review of the fundamental questions of how to obtain peace through law is a necessary enterprise. They are Senators Alan Cranston, of California; Harold Hughes, of Iowa; and Bob Packwood, of Oregon; and Representatives Richard Bolling, of Missouri; Paul Findley, of Illinois; Donald Fraser, of Minnesota; Paul McCloskey, of California; Patsy Mink, of Hawaii; Henry Reuss, of Wisconsin; Fred Schwengel, of Iowa; John Seiberling, of Ohio; and Charles Whalen, of Ohio. We have six Republicans and eight Democrats in all.

Our committee has undertaken an inquiry into the following fundamental questions:

SEVEN FUNDAMENTAL QUESTIONS

First. What kind of international political order do you want your grandchildren to inherit?

Second. What is U.S. national security?

Third. Is the balance of power concept consistent with international peace and national security?

Fourth. Is the policy of deterrence an

adequate response to our need for security?

Fifth. Does U.S. foreign policy contribute to the ability of peoples to select governments of their own choosing?

Sixth. How do existing disparities among nations in wealth and human well-being affect U.S. national security?

Seventh. What should be the fundamental principles of U.S. foreign policy?

These are obviously questions of exquisite difficulty. The process of arriving at even tentative answers will be long and arduous. However, we believe these questions must be asked and discussed very seriously if world order is ever to be more than an idle dream.

COMMITTEE HOLDS HEARINGS

To begin our inquiry, the committee held a series of six hearings. Each of the six distinguished citizens who testified reflected on the fundamental questions. The contributions of Prof. John Kenneth Galbraith, Hans Morganthau, and Robert W. Tucker, Dr. Richard J. Barnet, Norman Cousins and C. Maxwell Stanley to our work were so outstanding that I would like to bring their statements to the attention of all of our colleagues.

The hearings of the World Order Strategy Committee are open to the public and every Member of Congress is invited to attend and join us in discussion with the witnesses.

On behalf of the committee I welcome the assistance of all Congressmen and Senators as we continue to seek new, practical answers to the fundamental questions which the United States and mankind must answer if we are to survive.

A brief biographical sketch of each of our witnesses to date, and summaries of their statements follow:

JOHN KENNETH GALBRAITH

Professor John Kenneth Galbraith was born in Ontario, Canada and was educated at the University of Guelph, the University of California and Cambridge University in England. Assistant Professor of Economics at Princeton University, 1939–40, he also served as Economic Advisor to the National Defense Advisory Committee, 1940–41. Between 1941 and 1943, he was at the Office of Price Administration, first as Assistant Administrator in charge of the Price Division and then as Deputy Administrator.

He was a Member of the Board of Editors of *Fortune* magazine 1943–48 and was Director of the Office of Economic Security Policy, Department of State in 1946. He has served as Chairman of the Americans for Democratic Action and as U.S. Ambassador to India, 1961–63. A Visiting Fellow of Trinity College, Cambridge University, 1970–71, he is currently Paul M. Warburg Professor of Economics at Harvard University, where he taught from 1934–39 and from 1948 to the present.

His numerous publications include *A Contemporary Guide to Economics, Peace and Laughter* (1971), *Who Needs the Democrats and What It Takes To Be Needed* (1970), *How To Control The Military* (1969), *Ambassador's Journal* (1969), *How To Get Out of Vietnam* (1967), *The New Industrial State* (1967, second edition, 1971), *The Affluent Society* (second revised edition, 1969), *Economic Development in Perspective* (1962), *American Capitalism, the concept of countervailing power* (1952, second revised edition, 1955), and *Beyond the Marshall Plan* (1949).

STATEMENT BY PROF. JOHN KENNETH GALBRAITH, BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS OF CONGRESS FOR PEACE THROUGH LAW, JUNE 27, 1972

(1) There is advantage in being compelled to state the basic problem of our foreign policy in brief compass. This is a field where meaning is ordinarily disguised by words, the more words the better the disguise. It is one reason why discussion of foreign policy tends to be intellectually inferior even to the more suspect forms of sociology. Its reputation is saved principally by the circumstance that those who discuss foreign policy have a superior social position, more self assurance, a lesser awareness of what they do not know, and somewhat better tailoring.

(2) The effects of American foreign policy in the last quarter century have been regionally very diverse. Western Europe and Japan were the areas of failure and war in the first half of this century. Here, on the whole, the policy has been a success. Economies have been strong; nationalism has receded. We are now suffering competitively in relation to these parts of the world. That, however, has been the consequence of incompetent economic management here at home. In Singapore this week, former Secretary of the Treasury John Connally was generous enough to say that he thought that Britain had a sound economy. He was wise not to mention the state of the American economy from which he had just taken the precaution of detaching himself.

(3) In relation to the Communist states things have also improved in these last years. For this we must give credit to the recent initiatives of Mr. Nixon. They have moved us perceptibly away from the cold war terror which so effectively enthroned the military and so extensively destroyed civilian reason in the fifties and sixties. (It was unreason, it must be added, which Mr. Nixon had previously done much to enhance.) Our great need in relation to the Soviet Union is to avoid the risk of further confrontation. We cannot continue to depend on the insane assumption that the Russians will always back down. And the further need is to negotiate an effective arms limitation agreement. We cannot afford another arms limitation like last which (in the Administration view) is only acceptable if associated with a large increase in arms expenditure. Arms limitation of this kind could only be treated adequately by the late Lewis Carroll.

(4) The area of our misfortune in foreign policy in the last twenty-five years has been in the Third World. This—at the Bay-of-Pigs, in the Dominican Republic, in Bangladesh and above all in Laos, Cambodia and Vietnam—has been the theatre of all our disasters. Here, repeatedly, we stumbled. It is obvious that something is very wrong with our policy toward this part of the planet—unless, of course, the disasters were really a succession of righteously conceived initiatives all misconstrued as mistakes by the American people. However popular in Washington at the time and still in the memoirs of those involved this is a proposition it would be unwise to accept.

(5) The source of our disasters was the belief that we had a special mission to put down Communism in the Third World. Our policy in Asia, Africa and Latin America, beginning in the late forties, was based firmly on the premise that this was our mission. It was, perhaps, the most disastrous conception since the Crusades. The effort was unnecessary, impossible of accomplishment and deeply wounding to ourselves.

(6) The task was unnecessary because, questions of who endowed us with this unique moral responsibility apart, it makes little difference whether a poor rural country calls itself communist or not. It is poor and rural before it does so; it will be mostly poor and rural afterward. It could be that there is more hope of change under the Communists. If so, it is a hope that we would not be wise to frustrate. As to the impossibility of influencing the inner life of these countries, that is surely the lesson that we have learned in Vietnam. Few can believe that the hundreds of billions we have spent, the tens of thousands of lives we have lost will much change the course of history in that country. In the end the people we are fighting—the people who have so manifestly demonstrated their vitality—will be the people who will dominate the country. The people we are supporting will have either changed sides or joined their bank accounts in Paris and Switzerland.

(7) I am a little uneasy about those who ascribe our effort to save the Third World from Communism exclusively to economic interest. Stupidity and the tenacity of the military and civilian bureaucracy in pursuing whatever error on which they are engaged, are forces of greater power than we commonly admit. Markets in the Third World countries are unimportant as compared with those of Europe, Canada and Japan. Raw materials will continue to flow in from these countries regardless of political developments. And as we (and the Germans) learned in World War II, substitutes can almost always be found. The error was, rather, one of misapprehension. To the successful men who ran our foreign policy in the years following World War II and their military and academic acolytes, Communism seemed a malignant and pervasive thing. They understood little about it (it is not something you encounter in a corporate law practice) but they knew it to be bad. Unless averted, it would take over all nations including eventually our own. This was also a period when it was sound personal strategy to denounce Communism on all occasions of public ceremony. And, as always, many were persuaded by their own speeches. Finally it was the further assumption of Mr. Acheson and Mr. Dulles and Mr. Rusk and their compatriots in the Establishment that an economic and political system that, undeniably, would have been unpleasant for them—and Americans in general—must also be unpleasant for everyone in the world. In fact for the poor peasant or the landless laborers or the marginal urban worker in the Third World it makes little difference what his government calls itself. It is his knowledge, affirmed by the experience of centuries, that whatever happens he, most probably, will get kicked ———. He does not respond much to lectures on liberty. He is effectively enslaved by his poverty—and by the landlords, tax collectors, money lenders, thieving officials and other predators who keep him so enslaved. No one has so little freedom as the men who must struggle to stay alive. That we have been able to do little to persuade poor people to accept the American mistrust of Communism is not surprising.

(8) That our effort has been deeply damaging to ourselves need hardly be stressed. What the Vietnam War has cost us in lives and money is a staple in our oratory. So also is the political and social division that it has caused. We are now beginning to see how this useless enterprise has corrupted and demoralized the armed forces—especially the Army. We note with varying degrees of grief that our political graveyards are filled with the carcasses of the men who guided or defended the War. Even our successful wars have caused great strains. An unnecessary and unwinable one produces not strain but desolation.

(9) But even more attention must be paid, I believe, to the effects of our anti-communist preoccupation on our government. Over the quarter century that we were concerned with swatting Communists, we created a vast bureaucracy for that purpose—military formations, military missions,

intelligence missions, other assorted and clandestine spooks, a vast convocation of persons committed to proving by propaganda, technical instruction, capital assistance or pius example that we and not the Communists were the wave of the future, and an even more vast planning, recruiting and supervisory apparatus here in Washington. I do not deplore all of this activity. The aid and information effort responded to a generous and compassionate instinct that is the best feature of our foreign policy and our life. But much reflected a hard-nosed conviction that Communism was a simple operational conspiracy that could be watched and countered and eventually defeated by essentially military means. Much of our military establishment is related to this task in the Third World. We do not need aircraft carriers for countering Soviet carriers. The Soviets have none. We need them for the kind of work they are now doing in Vietnam. The bureaucracy created for protecting the Third World against Communism by whatever the euphemisms that task is described—is not only large and expensive but, given its size, complexity and secrecy, it is all but impossible to control. No one effectively controls the CIA as it chases the Communist across Laos—or even inquiries as to what Laos means to us.

(10) Thus the lesson. There is plenty to do in the developed world. But the first task of our foreign policy is to reform and reform drastically our policy in the Third World. Our effort to keep Communism out of the Third World is unnecessary, impossible, impressive only in its capacity for self-inflicting wounds. More than words are required. The bureaucracy is involved. We must disestablish the military formations, the military missions, the military bases, the military aid, the intelligence operations which are primarily related to keeping Communism out of Asia, Africa and Latin America. That bureaucracy will not give up without a struggle—or without inventing some imaginative names for those who suggest such sensible action. However, let us not be without a response. The response is to inquire what those who defend past and existing policy have accomplished with the lives and the money they have used up with such abandon.

(11) On the affirmative side it must be our policy to recognize all governments in the Third World and make no distinction between those that are bad and those that are good. (I am puzzled as to why, with all the journeys to Peking and Moscow and Warsaw it is never possible to make a brief journey to Havana. Are Communists only tolerable when they involve a nice trip?) And we must extend to those nations that are serious in purpose and non-larcenous in tendency all the material and technical help that a rich country properly affords its poorer neighbors. This we must do but this is all we do. I invite conservatives to reflect this is no radical policy. The more grandiose ambitions of these past years were an aberration. This policy takes us back to an earlier and more sensible relationship. Where the poor lands are concerned we return to the policy of the Good Neighbor.

(12) The countries of the Third World are no more ready for Communism than for capitalism. (Marx would have been appalled by the idea of experimenting with Communism in India or Indonesia or any country of Africa). But one point must be made and with all candor. It cannot be assumed that all countries of the Third World will eschew communist experiment. Probably some will try it. The practical consequence will be more terminological than real. There is no magic by which Communism suddenly makes countries strong and powerful. But this is not the point. The point concerns our own course of action. We have no special license or obligation to intervene. There is nothing we need do about such a decision and nothing we can do about it. And we now know that it will make things much worse both for the country in question and for ourselves if we try to do something about it. This conclusion is not based on theory. It is, alas, based on a quarter of a century of solid and disastrous experience.

HANS J. MORGENTHAU

Professor Hans J. Morgenthau, born and educated in Germany, practiced law there before coming to the United States in 1937. He has taught in Europe and at universities in the United States, including the University of Chicago (1943–71). He was at the Princeton Institute for Advanced Studies in 1958, at the Washington Center for Foreign Policy Research, 1958–60, and was a senior fellow at the Council on Foreign Relations, New York in 1966.

He has been a consultant to the Department of Defense, 1963–65, and to the Department of State, 1949–51 and 1963 to the present. Director of the Center for the Study of American Foreign Policy from 1950 to 1971, he is currently Leonard Davis Distinguished Professor of Political Science at the City College of the City University of New York.

Among his many publications are *Science: Servant or Master?* (1972), *Truth and Power, Essays of a Decade* (1970), *The Origins of the Cold War* (with Arthur Schlesinger, Jr. and Lloyd C. Gardner, 1970), *A New Foreign Policy for the United States* (1969), *Politics in the Twentieth Century* (1962, 2nd edition 1968), *The Purpose of American Politics* (1960), *Dilemmas of Politics* (1958), *In Defense of the National Interest* (1951), *Principles and Problems of International Politics* (with Kenneth W. Thompson, 1950), *Politics Among Nations* (1948, 4th edition, 1967), and *Scientific Man versus Power Politics* (1946).

HIGHLIGHTS OF TESTIMONY OF PROF. HANS J. MORGENTHAU, BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS OF CONGRESS FOR PEACE THROUGH LAW, JUNE 29, 1972

If one looks at international politics from a global, long-range perspective, one is compelled to conclude that the foreign policy of the United States, as that of all other nation states, has become obsolescent. The modern technologies of transportation, communications, and warfare have rendered the nation state as obsolete as a principle of political organization as the first industrial revolution of the steam engine did feudalism. The foreign policies of individual nations, if they were determined with perfect rationality, would have to seek a government whose reach would be commensurate with the actualities and potentialities of modern technologies, that is, a world government.

The continuation of national foreign policies, oblivious of these actualities and potentialities is not only irrational, but it also undermines the legitimacy of national governments. For these governments derive their legitimacy from their ability and willingness to protect and promote the life, liberty and pursuit of happiness of their citizens. Yet national governments, in full possession of the implements of modern technology, have become the main threat to those individual values for the sake of which they are supposed to have been established. Thus national governments, far from supporting national security in terms of the integrity of the nation's territory and institutions, have become the main threat to national security.

As long as we live in so irrationally a world, we must make the best of what we have in order to minimize the threats not only to our liberty and pursuit of happiness but to our very physical survival. The balance of power has been the main instrument to preserve at least a modicum of peace and order in the world. While I am aware of its defects, I am also aware of what the world would be like without it. It would either sink into complete anarchy, or fall victim to totalitarian world conquest. Thus a balance of power policy is indispensable as long as the ultimate goal of a world government is out of reach.

What has been said of the balance of power applies also to deterrence. It is a highly dangerous instrumentality, which might well prove to be ineffective in the long run. But in a world of sovereign nation states it is the main device for the mutual restraint of nuclear powers.

Since the foreign policy of the United States with regard to the domestic development of other nations has essentially supported an anticommunist status quo, it has contributed to the ability of peoples to select governments of their own choosing only insofar as these peoples are willing to choose non-communist governments. In other words, we made a choice and then supported the peoples concerned insofar as their choice coincided with ours or, as Vietnam clearly shows, we have tried to impose our choice upon the people.

I do not believe that the existing disparities among nations in wealth and human well-being affect directly United States national security. The reasons for these disparities are diverse and complex, and the United States has only a very limited capacity for diminishing them. These disparities may indeed become the source of local political conflicts. But such conflicts will not affect American security adversely if the United States takes care not to get involved in them.

I find it impossible within the compass of this statement to elaborate the fundamental principles of United States foreign policy. I have tried to do this in *A New Foreign Policy for the United States*, of which a revised edition will be published at the beginning of 1973.

RICHARD J. BARNET

Richard J. Barnet is a graduate of Harvard College and Harvard Law School. After serving in the U.S. Army as a legal officer specializing in problems of international law, he studied foreign and military policy as a Fellow of the Harvard Russian Research Center. During the Kennedy Administration he served in the Department of State and the U.S. Arms Control and Disarmament Agency and was a consultant to the Department of Defense. In 1963, Mr. Barnet was one of the cofounders and is now a codirector of the Institute for Policy Studies in Washington, an independent research and education center devoted to the study of public policy.

Among his publications are *Roots of War* (1972), *Can The United States Promote Foreign Development* (1971), *The American Manifesto: what's wrong with America and what we can do about it* (with Marcus G. Raskin) (1970), *The Economy of Death* (1969), *Intervention and Revolution: The United States in the Third World* (1968), and *Security in Disarmament* (edited with Richard A. Falk) (1965).

STATEMENT BY DR. RICHARD J. BARNET BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS FOR PEACE THROUGH LAW, JULY 25, 1972

There is much confusion today about the terms "isolationism" and "internationalism". Both simple rationality and morality dictate that the US do what it can to promote an international environment in which war, poverty and exploitation of the weak by the strong are ended. Such a global focus is necessary because the overshadowing problems that face mankind are inherently global. Neither pollution nor war can be kept within national boundaries. There are practical reasons why even the greatest nation cannot continue to flourish in a world environment in which millions of people around the world are fighting a losing battle for survival. That the strategy for making it to the twenty first century must transcend the nation-state is obvious. No longer able to defend its territory against nuclear weapons, the nation-state, even the most powerful nation-state, is obsolete.

At the same time it seems increasingly clear that the "internationalism" practised by the United States in the last generation has been ill-conceived. It has increased conflict among nations. It has led to a militarization of foreign policy, not only among the great nations but increasingly, as a consequence of competition over the Third World, among the new nations as well. It has weakened the United States by encouraging our leaders to take on global tasks that were inherently impossible, such as the maintenance of a client state in South Vietnam, and, by diverting energy and resources from the reconstruction and strengthening of American society, the ultimate source of national security, it has led to a loss of confidence in ourselves.

The new internationalism from which a more hopeful world order can evolve must start with a much more honest notion of the role the US is playing in the world and a less grandiose picture of the role Americans can play.

The essence of the old internationalism was that the US was the global problem solver, that Americans had a mission to manage social change around the globe for the mutual benefit of ourselves and the rest of mankind. Amidst the rubble of World War II, with much of the world destroyed and America miraculously unscathed, that was an easy illusion to acquire. But the reality is that we do not know whether the American candidates to run Vietnam, Brazil, Greece, Nigeria, Congo or Chile are better or worse for the people of those countries than the alternatives we have spent so much money and destroyed so much to prevent. I personally believe that in almost every case they have been worse. But even if we could be really sure that the American model of development was the answer the costs in imposing American solutions would make the management of social change around the world impossible.

A new internationalism that could help us to evolve toward a rational global order would recognize that not only is the United States unable to play the role of problem solver but that as the world's most powerful producer and employer of armaments and the consumer of half the world's consumable resources we are a major part of the problem. The United States cannot force change around the world, except temporarily and at great cost, but it can exert enormous influence by what it does and by what it seeks.

The Number One Nation sets the tone of international relations. What we have told the world by what we do is that the massive accumulation of armaments is indispensable to greatness and that matters of face and prestige are more important than whether hundreds of thousands of people live or die. We tell the world daily by what we do that we regard international law as irrelevant whenever it appears to forbid some military operation we have decided to undertake whether it be fire storms, crop destruction, population relocation, or the bombing of dikes. We can hardly expect that other nations, less powerful and more desperate, will exercise greater restraint whenever their "vital interests" are deemed to be involved.

The first principle of a new internationalism would be a drastic cutback on the use of force in the promotion of day to day foreign policy. The most important function of disarmament and a significant reduction of the military budget would be to signal to the world that the United States has adopted, not a new "profile," but a new policy of downgrading the use of force and coercion in the conduct of foreign relations.

If the United States is to deemphasize military force in its dealings with the outside world we will have to transcend old ways of thinking about foreign policy. To a great extent, we have conceived of international relations as a gigantic game, a deadly one to be sure, but a game nonetheless. We have assumed that if we are able to exercise control over some country in Asia, Africa, or Latin America we have "won" and the Russians have "lost." The exercise of control has often been an end in itself rather than the concrete purposes for which control is sought. The new internationalism would take seriously some of our traditional rhetoric about promoting self-determination. Instead of treating any potential independent weak country as a "power vacuum" which must be filled by US power before someone else gets there, the goal of policy should be to preserve and protect independence. We should challenge the Soviet Union and other great powers to competitive non-intervention and declare that colonialism and foreign domination of any kind are the most serious obstacles to political and economic development.

The preservation of cultural traditions and of the possibility of diverse forms of political experimentation are vital to global survival. Americans do not win if struggling nations throw over their own cultural traditions because of the pervasive influence of our own. Still less do we win if the Cubans, North Vietnamese, or the Chileans fail in the experiments they are undertaking. It is still the policy of the United States to complicate the life of countries which undertake social experiments that appear to reproach the American Way of Life. We know so little about what is necessary for economic and political survival into the twenty first century that we should encourage and nurture all efforts at decolonization and development, not seek to destroy them. There is no reason why revolutionary communist governments in Cuba, North Vietnam, or other countries constitute threats to US national security except the fact that we have engaged our prestige to prevent them from pursuing their own national policies. There is nothing to suggest that posing a military threat to such regimes has a liberalizing effect upon their policies.

A new internationalism, then, would be premised on a much more relaxed attitude about internal political and economic development around the world. It would mean ending assistance to repressive regimes in the hope that we are thereby avoiding "something worse". According to the old internationalism "stability" was probably the most important goal of American foreign policy. But in a world on the brink of mass starvation, in which old structures perpetuate misery and despair and the widening gap between rich and poor, "stability" is a death warrant in many parts of the globe. The United States can never demilitarize its foreign policy unless we are prepared to accept, even to welcome, radical change in areas of the world where there is no rational alternative.

Finally, a new internationalism would recognize an obligation on the part of the world's most powerful nation to enter into a process for the redistribution of wealth and power on a global scale. The renunciation of extreme interventionist policies would already begin such a process. But the United States must face the fact that present consumption patterns pose a basic obstacle to a just and peaceful international order. There is a conflict of interest between the people of the developed countries, especially our own, and the people of the poor countries that cannot be glossed over. To deal with this conflict it will be necessary, I believe, to develop new attitudes toward the operations of international business and towards the control of technology.

NORMAN COUSINS

Norman Cousins, editor of *World* Magazine, was educated at Teacher's College, Columbia University. Before assuming the editorship of *The Saturday Review*, which he held from 1940 until 1971, he was Educational Editor of *The New York Evening Post*, 1935–1936, and Managing Editor of *Current History* Magazine, 1936–1939. He has been both President and Honorary President of the United World Federalists and has been President of the World Association of World Federalists since 1965. A recipient of the Eleanor Roosevelt Peace Award, 1963, and a speech writer for several Presidents, Cousins was also Co-Chairman of the National Committee for a Sane Nuclear Policy, 1957–1963, and Co-Chairman of the Citizens' Committee for a Nuclear Test Ban Treaty in 1963. He was instrumental in developing the "Hiroshima Maidens" program, which provided for US medical treatment of victims of the Hiroshima atomic bombing and training for Japanese plastic surgeons.

Among his many publications are: *Present Tense* (1967), *In Place of Folly*, (1961), *Dr. Schweitzer of Lambarene* (1960), *Who Speaks for Man?* (1953), *Talks with Nehru* (1951), *Modern Man is Obsolete* (1945), and *The Good Inheritance* (1941).

STATEMENT BY NORMAN COUSINS, BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS OF CONGRESS FOR PEACE THROUGH LAW, AUGUST 1, 1972

Since the end of the Second World War, U.S. foreign policy has gone through a series of unworkable assumptions or theories in the effort to achieve security.

The first theory was that we could have security through monopoly of nuclear power. The military head of the Manhattan District Project made the flat statement that the Soviet Union, "which couldn't produce the equivalent of an Ingersoll watch, would be unable to produce a nuclear bomb within twenty years." This confident analysis was made in 1946. Within two years, the Soviet Union was preparing to detonate its first fission weapon.

The collapse of the theory of nuclear monopoly led to the theory of nuclear supremacy. This theory was badly dented when the Soviet Union was the first to develop a thermonuclear explosive to fit into its missile delivery system. Included in the Soviet nuclear arsenal today are bombs with 400 times the destructive force of the nuclear bomb that destroyed Hiroshima.

Next came the notion of "massive retaliation." We served notice that any country that intended to launch a surprise attack on the U.S. should know we had a "second-strike capability" that would enable us to devastate the country of the attacker in a matters of hours. The trouble with this theory was that what we were actually taking about was a mutual suicide pact. For a nuclear exchange would probably be a total one in its effects. Another difficulty with the "second-strike capability" argument was that the military scientists in this country and elsewhere were busy devising the means for crippling such capability by a potential enemy.

All these notions of security come under the heading of "balance of terror." Whether with respect to monopoly, supremacy, or deterrent, they all have a common origin in the theory of overwhelming military force. But the "balance of terror" theory is deeply flawed. It assumes that a potential enemy will be so impressed by the harm that may be done to him that he will exercise restraint in his own policy. The theory, however, doesn't work too well with irrational men in power who are unmoved by the threat of man-made holocausts. Would Adolph Hitler, that last night in the Berlin bunker when the entire city was on fire, have hesitated to press a button that would have cremated the entire human race—if such a button had been available to him? The singular fact that has not yet impressed itself on the human mind is that responsibility and high office do not necessarily go together, and that it has sometimes happened that the higher the station in government, the greater the madness.

In any event, the "balance-of-terror" assumption is about to be wedded to an equally unworkable and ancient theory known as the "balance of power." Over the past few months, a series of statements from the top foreign policymakers in government indicate that we are embarked on a new "balance of power" course. What kind of "balance of power?" It is possible that the new design envisions a new relationship between the United States and China. The fascination such a combination holds for its architects in the U.S. is that it could bring together the most populous nation in the world with the most powerful. This new configuration would have the effect, its proponents believe, of containing the Soviet Union on virtually every level. A supposed side benefit is that it might help provide leverage against the explosive economic expansion of Japan.

Seeking security through a balance of power, however, is like seeking security through an arms race. Nothing remains static. The nation or nations against which a balance of power is sought try to shift the balance in their own favor. Already, there are dynamic signs that the Soviet Union is trying to offset a Sino-American relationship by forging new ties to the members of the European community. The NATO concept, the main purpose of which was to contain the Soviet Union, never became a fully functioning reality. Its most serious weakness was that the nations involved came to feel they were more the adjuncts of U.S. foreign policy than full partners in an enterprise designed to meet their intrinsic needs. The current formation of a European Community enjoys a natural historical flavor and offers the realistic prospects of economic and even political benefit. Such a development, in the minds of most of its members, is far more appealing and sensible as a design for living than NATO—even though the U.S. has gone to great pains to emphasize there is no conflict or inconsistency between the two.

Be that as it may, the present trend in Europe is away from and not towards the United States—a fact that the Soviet Union is not ignoring, especially in view of the new rapport between the U.S. and China. This does not mean that the Soviet Union in very short order will seek to become a full-fledged member of the European community. But it is by no means far-fetched to suggest that new patterns or economic exchange and cooperation may be pursued between Western and Eastern Europe. Despite the ready use of the term "East" in the United States to describe the U.S.S.R., the Russians have always regarded themselves historically as Europeans—a proposition which finds no disagreement from the Chinese. Looking back on the predatory assault of their country by outsiders, the present Chinese leaders make no distinction between Russia, England, France, or any other Western nation.

The central question, of course, is whether a new balance of power is likely to work. Balance-of-power advocates draw a large degree of encouragement from their interpretation of the history of the Congress of Vienna which, in their view, provided several decades of stability. The trouble with this view is that it neglects a large amount of history leading up to it and an equally large amount of history leading away from it. The Congress of Vienna set a historical stage for the massive eruption that came much later and that was known as the First World War. In the long-term perspective of history, the balance-of-power approach to world politics has been pockmarked by innumerable wars. The documentation is to be found in sources as diverse as Thucydides, Gibbon, and Machiavelli.

The greatest single difficulty with the Congress of Vienna argument, however, has to do with scale. The arena today is not Europe but the entire world. Not sixty million people but three billion people are involved. The weapons at the disposal of international lawbreakers are not manually operated cannons but explosives that can shatter entire cities and produce gross alterations in the conditions that make life possible.

What distinguishes the world situation today from Europe at the time of the Congress of Vienna is that war at one time could be regarded as an acceptable instrument of foreign policy; victory conferred benefits that could be obtained in no other way. But "victory" as a concept had an entirely different meaning at that time from what would happen in a nuclear war. Can a nation consider itself victorious if two-thirds of the enemy's population has been killed compared to one-third of its own, or if four-fifths of an enemy's cities and industrial capacity have been devastated compared to two-fifths of its own? What meaning is to be attached to "victory" if a blanket of radioactivity covers the world, enfeebling life, poisoning land and water, and condemning future generations to a fragmented and twisted existence?

The notion of security through balance-of-power—like war itself—is outworn, unworkable, chaotic, and infinitely combustible. If our foreign policy is to work, it must deal with new realities.

The first reality is that security can be achieved not through the pursuit of force or the use of force but the control of force.

The second reality is that the conduct of nations outside their own boundaries must be regulated in the common interest.

The third reality is that such regulation calls for the creation of a world organization capable of defining and enforcing acceptable standards of international behavior.

The fourth reality is that a world organization now exists. That organization is called the United Nations.

The fifth reality is that the United Nations has been an adjunct to the foreign policies of the member nations, rather than an organization capable of transcending the policies of those members. It is not yet an instrument for dealing with points of conflict involving the foreign policies of major nations.

The sixth reality is that the most important business on earth today is the development and conversion of the United Nations into a world organization that can represent the world's peoples in all the ways that are essential to a planet that is both a single life-support system and a single geographic unit. Whether with respect to world breakdown because of war, environmental poisoning, exhaustion of resources, or overcrowding, the overriding need today is for a workable and responsible world approach to world problems.

The seventh reality, finally, is that security for the American people is not separable from security for the Russian people or the Chinese people or the Nigerian people or any other. Any plan for peace for the American people begins with a fatal flaw if it is not broad enough, quite literally, to embrace the world.

The politician or statesman who understands that all peoples now share the same history is in the best position to serve his own people. Only those statesmen who can see the whole are qualified to deal with the parts.

ROBERT W. TUCKER

Robert W. Tucker is a Professor of Political Science at the School of Advanced International Studies and a Research Associate with the Washington Center of Foreign Policy Research in Washington, D.C. In addition, he is a Professor of Political Science and Director of the Committee on International Studies at the Johns Hopkins University in Baltimore, Maryland. A graduate of the United States Naval Academy, Dr. Tucker received his M.A. and Ph. D. from the University of California in 1946–49. Prior to coming to Johns Hopkins in 1954, Dr. Tucker taught at Washington State College, Stanford University and San Francisco State College. He also served for a numbers of years as a member of the staff of the Naval War College.

Among his publications are: *A New Isolationism: Threat or Promise?* (1972), *The Radical Left and American Foreign Policy* (1971), *America and the World* (1970), *Nation or Empire? The debate over American foreign policy* (1968), *Force, Order and Justice* (with Robert E. Osgood) (1967), *Just War and Vatican II; a critique* (1966), *The Just War; a study in contemporary American doctrine* (1960), and *The Law of War and Neutrality of the Sea* (1957).

STATEMENT OF PROF. ROBERT W. TUCKER, THE JOHNS HOPKINS UNIVERSITY BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS OF CONGRESS FOR PEACE THROUGH LAW, AUGUST 2, 1972

I appreciate the opportunity to appear before the World Order Strategy Committee of Members of Congress for Peace through Law. The Committee is to be commended for undertaking this fundamental reassessment of United States foreign policy. For too long inquires into the guiding assumptions of American foreign policy have been neglected largely because of the prevailing conviction that the validity of these assumptions was self-evident. As such, they did not require serious examination and debate. Differences might arise from time to time over the wisdom of a particular application of these assumptions but not over the assumptions themselves.

It is significant that even the events of very recent years—above all, the Vietnam war—have not led to widespread and critical questioning of the guiding assumptions of American foreign policy. For the most part, the disaffection and opposition the war gave rise to did not go to the nerve roots of our policy. The debate the war provoked seldom led critics to ask the fundamental questions this Committee has set out. In particular, the debate over Vietnam only seldom raised the basic question that I should like to concentrate upon in these brief remarks: What is United States national security?

However difficult it may be to give a satisfactory answer to this question, the importance of the question itself scarcely need be labored. In the post World War II period the principal justification of American foreign policy has rested on the assumption that America's role and interests in the world by and large reflected the necessities of national security. To be sure, these necessities might on occasion be misinterpreted. They might on occasion be distorted through exaggeration, as critics found them to be in Vietnam. Nevertheless, the assumption that our role and interests have on the whole been required by the demands of national security remains largely unchallenged to this day.

This is not to say that the essential rationale of American foreign policy has been explicitly cast solely in terms of our vital self-interests as a nation. On the contrary, the distinguishing mark of this rationale has been its fusion of the self-interested and the altruistic, of realism and idealism. Thus in what is now the historic expression of the policy of containment, the Truman Doctrine, President Truman declared that a willingness "to help free people to maintain their free institutions and their national integrity against aggressive movements that seek to impose upon them totalitarian regimes . . . is no more than a frank recognition that totalitarian regimes imposed on free peoples, by direct or indirect aggression, undermine the foundations of international peace and hence the security of the United States." The assistance to Greece and Turkey, which formed the immediate purpose of President Truman's address, was to be understood in these terms as was the effort to reconstruct and defend Western Europe. The American intervention in the Korean conflict followed along similar lines, as did the subsequent expansion of American commitments in Asia. So, too, the intervention in Vietnam has been justified by successive administrations both in terms of America's security interests and in terms of the freedom and self-determination of the South Vietnamese people.

Despite the apparent consistency of the rationale given for American foreign policy, it is clear that the altruistic side of that rationale has in recent years markedly declined in significance. There is no need to review once again the developments that have led to this decline. Suffice it is to say here that well before the Vietnam intervention the attempt to represent American policy as vindicating the principles of freedom and self-determination had worn rather thin. A claim that initially had been persuasive when applied to Western Europe subsequently was only seldom persuasive—or even plausible—when applied elsewhere. If American policy cannot fairly be charged with the deliberate subversion of these principles, it just as clearly cannot be credited with promoting them at the expense of other interests. To the question the Committee poses—Does United States foreign policy contribute to the ability of peoples to select governments of their own choosing?—the answer must probably be on balance no. The reason for this is not a devotion to traditional, and frequently repressive, regimes for their own sake but rather a devotion to stability—which is all too often a euphemism for the status quo—and a conviction that such regimes are least likely to challenge American interests, whether strategic or economic. In a word, despite our persistent profession of commitment to freedom and self-determination, we have behaved very much as other great yet conservative powers have behaved throughout history.

The point has been frequently made that the expansiveness of America's postwar conception of its security is not so much the result of equating security with traditional notions of the balance-of-power as it is of equating security with an international environment receptive to the nation's institutions and interests. On this view, the roots of the aberration that ultimately led to a Vietnam were implicit in the Truman Doctrine with its insistence that security is a function not only of a balance-of-power between states but of the internal order maintained by states, and not only by some states but by all states. The Truman Doctrine, with its presupposition of a world in which America would be the preponderant power able to impose, if necessary, its vision of order and stability on those who might seek to challenge that vision, thereby equated America's security with interests that clearly went well beyond conventional security requirements.

Although there is much to be said for this view, it is a mistake to conclude that once the vision of the Truman Doctrine is abandoned we will thereby cease to identify our global role and interests with our security. If the present Administration has not abandoned the outlook expressed in the Truman Doctrine, it has certainly modified this outlook very substantially. The marked de-emphasis on the ideological commitment of past years has, if anything, gone beyond the demands of most conventional critics. Yet it cannot be said that this change has resulted either in a substantially modified view of our role and interests in the world or in our propensity to equate our role and interests with our security. Thus a successful outcome of the conflict in Vietnam continues to be seen as indispensable to American security. More broadly, the maintenance of the postwar structure of American commitments is still equated with the maintenance of the nation's security.

Is the latter equation persuasive or even plausible? It would not seem so. Certainly, it would not seem so if by security we mean primarily physical security—security against direct attack. Whereas only a generation ago it was reasonable to see America's security, including her physical security, largely in terms of conventional balance-of-power calculations, today that view is no longer reasonable. Whereas a generation ago it was plausible to find in alliances an indispensable hedge against an uncertain future, today the indispensability of alliances is no longer plausible. The principal reason for this change, this radical change, in the conditions of American security is clear enough. For the state that can now destroy any other state or combination of states, nuclear weapons have conferred what has heretofore proven unachievable—a surfeit of deterrent power.

It is indeed the case that in the extreme situation the great nuclear power is absolutely vulnerable with respect to its great adversary. But this ultimate vulnerability cannot be significantly reduced—let alone removed—by any alliance the great nuclear power may form—or retain. In other than the extreme situation, nuclear weapons confer a degree of security on their principal possessors that great powers seldom, if ever, enjoyed in the past. Provided that America maintains the strategic forces necessary to deter attack, alliances cannot enhance a physical security that is no longer dependent on what transpires outside the North American continent. Thus a Soviet Union in control of Western Europe would still not be a Soviet Union posing a markedly greater threat to America's physical security than the Soviet Union of today. However undesirable the other consequences of so extreme, and improbable, a situation, its consequences for security would not be comparable today with what they would have been a generation ago when security was calculated primarily in terms of geographic position, manpower, industrial concentration, etc.—that is, in terms of conventional balance-of-power calculations.

If retention of the postwar system of comments is to be justified in terms of a narrow concept of security, the grounds for doing so must be other than conventional balance-of-power calculations. Can these grounds be found in the nuclear proliferation that would presumably attend a substantial contraction of American commitments? There is no gainsaying the argument that, all other things being equal, the greater the number of states possessing nuclear weapons the greater the chances of a nuclear conflict. States that do not have nuclear weapons cannot be tempted to use them. The relevant question here, however, is not whether nuclear proliferation increases the chances of nuclear conflict, but whether this increase is such as to have any practical significance for America's security.

The answer to this question depends upon the assumptions that are made about the character of American security interests and, more generally, the nature of a nuclear peace. If it is assumed that America retains unchanged her present interests, then proliferation is indeed likely to increase the danger of America becoming involved in nuclear conflict. But this assumption establishes a vital American security interest in non-proliferation only by begging the question of how our vital security interests should be defined. If the assumption that America retains her present interests is not made, the threat to American security arising from the further spread of nuclear weapons must depend very largely upon the argument that nuclear peace is indivisible.

The argument for an indivisible nuclear peace obviously cannot be based upon historical evidence. A nuclear peace may prove at least as divisible as any other peace men have known. Given the expected consequences of employing nuclear weapons, it may in fact prove even more divisible. Nor is it only the hazards of entering a nuclear war that may henceforth be expected to militate in favor of a divisible peace. Yesterday, peace was indivisible to the degree that an imbalance of military power was the possible (even the probable) price of choosing isolation from a conflict involving the other major states. Today, peace is divisible to the degree that a balance of deterrent power would be at worst unaffected, and at best improved, by choosing isolation from a nuclear conflict involving other nuclear powers.

In a system governed by a conventional balance of power, the fear of being isolated was, with rare exception, synonymous with the fear of vulnerability to attack by superior forces. Thus, the conclusion was drawn, and hardened into dogma, that peace is indivisible, that the principal military powers must be all at peace or all at war. In a system governed by a balance of deterrent nuclear power, however, the fears of isolation and vulnerability to attack are no longer synonomous. To this extent, we must reverse what has come to be one of the received truths of the age, namely, that nuclear weapons have created a "community of fate." Instead, the effects of these weapons have been to make peace more divisible than it has been in a very long time.

If America's physical security no longer depends upon retaining the postwar structure of commitments, is this structure nevertheless required for our material well-being? With respect to the economic dimensions of security, the orthodox view—and, indeed, the radical view as well—is that our economic involvement abroad has become critical to our national well-being and that for this reason alone we must retain substantially intact the postwar structure of commitments. Yet the evidence does not bear out the argument of America's dependence on her foreign economic interests in the sense that without these interests the American economy could not function as presently constituted. And even if this presumed dependence were accepted as a fact, it does not follow that the abandonment of our postwar role would thereby result in the sacrifice it is assumed that the preservation of these interests is in turn dependent upon preserving the present structure of America's political-military commitments in the world. In the undeveloped states, what threat there is at present to America's economic interests is not likely to be turned away by persisting in a policy of alliance and intervention. If anything, our recent experience in the Third World points to the conclusion that the future costs of pursuing an interventionist policy will outweigh by far any reasonable expectation of material benefit.

At any rate, it is not in the undeveloped and unstable areas that this nation's economic interests are increasingly concentrated but in the developed and capitalist countries. Clearly, these interests would be placed in jeopardy if one were to assume the control of Western Europe and Japan by hostile powers. This altogether improbable contingency apart, there are no persuasive grounds for believing that our economic interests in the developed states rest on our present political-military role. These interests primarily reflect reciprocal economic advantage rather these advantages are no longer apparent, there is little evidence to support the view that our alliances will continue to provide an indispensable incentive to compromise on issues of trade, investment and monetary reform. Indeed, what evidence there is points to the rather peripheral significance of our alliances as a means of obtaining economic leverage.

Although neither our physical integrity nor our material well-being preclude a substantial modification of, even a radical change in, the global role we continue to play, it may nevertheless be argued that the maintenance of this role is required for the vitality and integrity of our institutions. Security cannot only be seen in its physical and material dimensions; it must also be considered in a more subtle and intangible, though no less important, dimension. Thus, America's global role and the system of American commitments have been, and continue to be, justified on the grounds that they are necessary to prevent the prospect of a world in which America's political, economic, and cultural frontiers, of a world in which societies that share our culture, institutions and values might very possibly disappear. In such a world, it is argued, America would find it difficult, if not impossible, to realize her promise as a nation.

It may be readily conceded that a world from which America was shut out would inevitably affect the vitality of our institutions and the quality of our domestic life. The question that must be raised, however, is whether this prospect is indeed likely, or even plausible, if the nation were no longer to play the role it has played for the past quarter of a century. To those who take the position that it is only the American presence and American power which hold back the forces of darkness, the answer is self-evident. Yet those who take this position must in effect deny, even while they may formally acknowledge, the vast changes in the world that have occurred since the last great war, changes that have not only transformed the bases of America's physical security but of our security in the greater-than-physical sense as well.

In large part, the changes in America's greater-than-physical security are the consequence of constraints that have emerged to limit the use of force, particularly by the great powers. In their mutual relations, it has long been apparent that the great nuclear powers are inhibited by the common realization of the dangers inherent in direct confrontation. In their relations with the weak, the strong are also increasingly inhibited, however, by the ever rising costs of employing force. As against a population determined to resist, the costs of military conquest and pacification have become exorbitant. They have become exorbitant not only because of the politicization of peoples but because of the growing conviction that force is no longer a legitimate instrument of national policy save when employed in self-defense or in pursuit of liberation from an alien and oppressive rule.

These constraints clearly do not justify the conclusion that force is no longer a usable instrument of national policy. They do support the view that the utility of force has sharply declined and that it has done so in a very brief period. Moreover, that decline has occurred concomitantly with, and partly facilitated, the emergence of a world that shows every sign of becoming more pluralistic. In consequence, the fear that could once be seriously entertained—the fear that a hostile power or combination of powers might succeed in uniting a world from which America would be effectively shut out—can no longer be seriously entertained.

If these considerations have merit, the time has surely come when the inflated view we have long taken of our security requirements must be seriously challenged. It is not American security—whether in its physical or greater-than-physical sense—that a drastically reduced American role in the world would jeopardize but American influence. The price of substantial change in American foreign policy—and this must above all mean change in the structure of American commitments—is to be found in the prospect of a world in which American influence, though still considerable, would markedly decline.

It is this prospect of a reduced American role that successive administrations have insistently identified as a threat to the nation's security, just as it is the same prospect that has prompted the pursuit of an interventionist policy. The determination not to lose America's preponderant position in the world continues almost undiminished today, despite the novel methods employed of late to preserve this preponderance. Novel methods aside, however, it is the reluctance to accept a more modest role that largely accounts for opposition to substantial change in alliance relationships. It is the same reluctance that largely accounts for the devotion to "partnerships" without equality, "regionalism" without dominant regional powers, and change without instability.

Would the realization that the nation had settled for a far more modest role in the world prove internally debilitating? In the wake of a war that has had corrosive domestic effects, the question may appear to many as absurd. It is by no means so. There is nothing self-evident about the conviction, so central to isolationist thought in the past, that places an almost consistently negative assessment on the domestic effects of foreign policy. But if the relationship between foreign and domestic policy is not always negative, the experience of recent years affords a striking illustration of the circumstances in which it will be so. Although the domestic effects of the Vietnam war are often exaggerated out of all proportion, the undisputed point remains that Vietnam has had debilitating effects at home. Even if it is assumed that the future costs of maintaining America's present role and interests in the world will not prove as exorbitant as the war in Vietnam, these costs will still prove considerable. For the world is more recalcitrant today than ever. It is also more unmanageable than ever before because the restraints on the use of power by the would-be guardians of order are greater than they have ever been.

C. Maxwell Stanley

C. Maxwell Stanley was born in Corning, Iowa in 1904. He received both his B.S. and M.S. from the University of Iowa. He received the Alfred Nobel prize in 1933. He was President of the United World Federalists between 1954 and 1956, and again between 1964 and 1966. He has been a member of its council since 1947. He is also a member of the World Association of World Federalists and was chairman of its council from 1958 to 1965. He is currently on the National Board of Directors of the United Nations Association of the U.S.A.

Mr. Stanley is Chairman of the Board of Stanley Consultants Inc., and of HON Industries, Inc. He is President of The Stanley Foundation and has chaired over 30 gatherings, including twelve Strategy for Peace Conferences and seven Conferences on the United Nations of the Next Decade, in this capacity.

He has just returned from a June trip to the Soviet Union, where he and his wife Betty spent three weeks at the invitation of the USSR Academy of Sciences. He delivered several addresses and spoke with leaders of several Soviet institutes.

He is the author of *Waging Peace: A Businessman Looks at United States Foreign Policy, The Consulting Engineer*, and numerous articles in professional journals.

STATEMENT OF C. MAXWELL STANLEY BEFORE THE WORLD ORDER STRATEGY COMMITTEE OF MEMBERS OF CONGRESS FOR PEACE THROUGH LAW, AUGUST 9, 1972

My name is C. Maxwell Stanley. I am a professional engineer and Chairman of the Board of Stanley Consultants, Inc., international consultants in engineering, architecture, planning, and management. I am also Chairman of the Board of HON Industries Inc., a leading manufacturer of metal office furniture and material handling equipment. For over a quarter of a century, I have been deeply concerned with the foreign policy of this country, particularly as it relates to world peace and security. I have been active in several private organizations, seeking to influence a more enlightened foreign policy for the United States. I have traveled widely and have participated in numerous international conferences concerned with world organization. In addition, I am President of The Stanley Foundation, which for many years has encouraged study and education aimed at strengthening international organization. In this capacity I have chaired over thirty gatherings, including twelve Strategy for Peace Conferences concerned with US foreign policy and seven Conferences on the United Nations of the Next Decade. I have written and spoken extensively on these matters and am author of the book "Waging Peace," captioned "a businessman looks at United States foreign policy."

In responding to your invitation to testify before this committee, I speak as an individual, seriously concerned about the inadequacies of the foreign policy of my country.

Mr. Chairman, the first question listed in your communication inviting me to testify was, "What kind of international political order do you want your grandchildren to inherit?" May their legacy be a world where "nations shall learn war no more" and where they may live in human dignity with the peoples of the world of every race, creed, and color. This legacy demands an international political order that assures secure peace with freedom, justice, and hope—not only for my grandchildren, but for all grandchildren.

I urge the United States to act with boldness and urgency to achieve such an international political order, responsive to our great heritage of "life, liberty, and pursuit of happiness." To do so we need a viable and consistent national strategy to gain the desired international political order, plus the will and determination to implement the strategy. Unfortunately, neither the will nor the strategy exists in the United States today. Despite recent important steps taken to lessen international tensions, we have no long-range strategy. Our leaders' rhetoric about peace and freedom is too seldom translated into action proposals for United States foreign policy. This situation is neither partisan nor unique to the present or past administrations.

The changing climate

Although an adequate strategy must start with today's realities, it must also be compatible with the probable world climate in the decades ahead. Neither the frustrations of the post-World War II era nor nostalgic recollections of former generations provide suitable guides for the years ahead. The accelerating pace of science and technology, together with the collapse of colonialism, have brought about startling changes in the nature of the world community. The influence of these two major factors has been intensified by the political and economic decisions of many nation states. Hence, we dare not rely on our postures and policies of the past: we must reach to the future.

In my judgment the following trends must inevitably shape world affairs in the decades ahead. These are current trends already noted and examined by scholars and observers of the international political scene.

The number of actors on the world stage has increased dramatically. With the collapse of colonialism, the number of sovereign nations has increased from 67 at the end of World War II to more than 140, with others on the horizon. Though considered sovereign and equal, they vary greatly in population, economic and social development, and political power and sophistication. Their interests and concerns are equally disparate.

The impact of nuclear deterrence is eroding. Though second strike nuclear capability may restrain any temptation of a superpower to launch a nuclear strike, it exerts minimal restraint upon the use of force by non-nuclear weapon states. They, too, recognize that the superpowers dare not use these weapons against each other nor any other nation lest the conflict escalate to a nuclear holocaust. Nuclear deterrence will become obsolete as a mechanism to preserve world order.

Global threats to the quality of life, and perhaps life itself, are enlarging. Burgeoning populations drain the earth's resources and contribute to the deterioration of the global environment. Rampant pollution of sea and air knows no national boundary. The finiteness of the earth's resources places limits on its life-support capability. Such threats can only be dealt with on a global basis.

The gap between the affluent and the poor nations is expanding. Despite two generations of emphasis on economic and social development, most developing nations are falling further behind. This fact is documented in a recent analysis released by the United Nations.[1] Though living standards continue to rise in the developed countries, most developing nations are hard pressed to maintain standards with their rapid population growth. The so-called North-South confrontation may soon displace the East-West confrontation which has paralyzed international cooperation the last 25 years.

The economic interdependence of nations is growing. Both developed and developing nations are increasingly dependent upon vast networks of commerce, trade, and communication. Their economies are affected by the erratic action of an inadequate monetary system. Long before the world's population reaches the 7.0 billion predicted for the year 2000, shortages and imbalances of the world's resources will become evident. The world increasingly constitutes a single ecosystem, as well as a single biosystem.

Bipolarity is waning. Though it will prevail for some time, the winds of change are blowing. New centers of power are emerging: the People's Republic of China, Japan, and the European Economic Community. Various middle powers are exerting greater influence on specific issues. The developing nations exert political, and sometimes moral, power when they concur and work together on specific issues. As bipolarity wanes, the United States and the Soviet Union will be less dominant in world affairs.

Security

But what will constitute security for the United States of for any other nation in the decades ahead? Security is without question the fundamental purpose of a foreign policy. The concept of national security has historically been closely linked to military power. Nations have sensed security when their land, sea, and air forces were of sufficient strength to deter or repel attack from their presumed enemies. Alliances and balances of power have been arranged and advantage has been taken of geographical position. In weighing security, nations have also judged both the sincerity and the military power of allies.

National security in the last analysis is a judgment, a state of mind, however it is evaluated. Major elements in such a judgment include assessment of threat of invasion or military challenge, as well as the degree of confidence a nation has in the world community. Powerful nations have, on occasion, widened the objectives of national security to include the ability to roam the seas and the skies unhampered, and the freedom to intervene in the affairs of lesser nations in pursuit of their own national interests. Hence, a close relationship often develops between national security and unrestrained exercise of national sovereignty, at least by powerful nations.

Historical concepts of national security will be outmoded due to the impact of science and technology in the changing climate of the decades ahead. The power and instant deliverability of nuclear weapons are rapidly undermining the foundation upon which national security has previously rested: the threat and use of national military power. Those possessing nuclear weapons recognize they cannot be used—that nuclear war must be avoided. Because these weapons provide license of total destruction, all-out war as a practical instrument of national policy is outdated. *Increments of usable political power, as well as national security itself, are not necessarily measured by the possession or expansion of nuclear power.* Incremental additions to nuclear strength are not meaningful additions to national security when nuclear arsenals are already stocked with excessive overkill.[2]

Concurrent with the demise of nuclear deterrence as an adequate cornerstone for national security, resort to balance of power politics is likewise increasingly less effective. *Balance of power manipulations with nuclear weaponry are uncertain, dangerous, and destabilizing.* They tend to undermine adherence to the Nonproliferation Treaty, accelerate the race for more sophisticated weapons, and foster a continuing climate of suspicion and fear.

Security in the decades ahead requires a new approach compatible with changing conditions. Security cannot be assured solely through national military power; no nation can be secure unless all are secure.

The historic dependence upon military power for national security is inadequate for still another reason. *It has no capacity to cope with non-military threats.* burgeoning population, rampant pollution, and diminishing resources. National security can be undermined by deterioration of the global environment or by imbalances between population, resources, and desired quality of life. Hence, concerted worldwide action against these common enemies of all peoples is important to our national security. It is irrational to presume we can advance toward secure international political order without dealing effectively with these problems.

Acceleration of economic and social development of the developing nations is also related to the security of the United States. Failure to achieve visible and viable progress often causes unrest and conflict within these nations. Such occurrences often invite intervention from without and lead to indirect major power confrontations, or worse. The resulting instability and chaos in an increasingly interdependent world is hardly conducive to security.

Moreover, the cooperation and support of these less fortunate nations are essential to the achievement of desired objectives of the developed nations: peace and security and effective global responses to environmental threats. The developing nations are far more concerned with their more immediate problems of economic and social development. *As developed nations assist them* in the achievement of their goals, *they are more likely to cooperate* in the establishment of an alternate security system and a viable plan to attack nonmilitary global threats.

One other aspect of national security should be mentioned: the domestic climate within our country. Until we put our house in order, our credibility abroad will suffer. Other nations cannot understand our failure to cope with several of our trying problems. *Though we are envied abroad for our great affluence, we are pitied for our inability to use our human and natural resources* to eliminate poverty, to cope with our deteriorating urban centers and congested transportation systems, to judiciously restore law and order, and to redirect domestic resources from massive military investments to the provision of equal opportunities in housing, education, employment, health, and civil liberties for all Americans. Were we to more adequately deal with these matters, we would not only restore much of the good will we once enjoyed but also expand our own self-confidence—both important elements to national security.

Criteria for tomorrow's world order

The international political order of tomorrow, to be acceptable to nation states, must effectively deal with the needs and aspirations of the peoples of the world. A tolerable world order should:

1. Provide security to all nation states against aggression and the threat of military force.

2. Permit self-determination by each nation state in its idealogical, cultural, governmental, and economic affairs; i.e., freedom for diversity.

3. Provide the means for the peaceful and just resolution of controversies between nation states and between the nationals of various states.

4. Deal effectively with the mounting global threats to the quality of life, and perhaps life itself.

5. Enhance and, as necessary, regulate trade, commerce, communication, and interchange among nation states.

6. Promote a reasonable pace of economic and social development.

7. Advance respect for human rights and dignity with greater justice.

An international political order fulfilling these criteria will be quite different from the present system in which nation states exercise unlimited sovereignty and unilateral decision-making. Vast and effective international cooperation must be marshaled and focused upon the urgent, long-term, expanding needs of the world community.

Pragmatically, *global problems must be managed as they arise.* Prompt decision and positive action in the interest of many must not be stalemated by the opposition of few. *The needs of the world community must be several, even though at times they conflict with the perceived short-term interests of some nations.* The world community must act in its common, enlightened self-interest to assure peace and security, even as it eliminates the use of war. It must effectively cope with the threats that jeopardize quality of life upon this earth.

Effective institutions on the world level are an essential prerequisite to the vast international cooperation required to meet the above criteria. Such institutions need sufficient autonomy or sovereignty to permit prompt decision and effective action within broad guidelines and policies established by the world community. To maintain peace and security, some degree of police authority seems desirable. To peacefully resolve controversy, juridical mechanisms must function. To be relatively independent, a reliable source of revenue is called for. Greater effectiveness is demanded of world organization than that now provided by the United Nations. Handicapped by lack of autonomy, by one nation-one vote representation, and by the veto, the United Nations has great difficulty in reaching decisions promptly and acting effectively in the interests of the world community.

---

[1] *Statistical Yearbook for 1971*, United Nations Publishing Service, New York, New York.

[2] For comments supporting this position, refer to the text of the congressional briefing by Dr. Henry A. Kissinger, Assistant to the President, June 15, 1972.

The challenge before nation states is to modify the United Nations and/or create other organization. Required authority must be delegated and controlled without undue encroachment upon national sovereignty. Unfortunately, this challenge must be answered soon for time is of the essence. We dare not await the development of broader world community sufficient to support some form of federal world government with limited powers, although this may likely be the ultimate solution.

More effective world organization must be established soon through treaties or through the legislative processes now available in the United Nations. In this manner new units may be established to deal with specific functions—i.e., an ocean regime—or better UN procedures and mechanisms may be developed. In either case, workable decision-making processes must result and sufficient authority must be delegated.

The creation of the required institutions will be a herculean task, raising questions concerning autonomy, sovereignty, authority, and representation. Every reasonable effort should be exerted to achieve the required institutions through revision and modification of the United Nations. *Nothing less than effective institutions can* provide the mechanisms and procedures needed to *assure international peace and security and deal with other global problems.*

Strategy

Any effective strategy for US foreign policy will, of necessity, be dual in nature. It must incorporate a strong thrust toward desired new patterns of international political order. But as achievement of these new patterns requires time, a suitable strategy should also deal with current issues and crises within the confused parameters of the nation-state system.

Basic Policy

Agreed fundamental objectives are mandatory to give direction to strategy. Several of these might be:

Establish as US policy the early achievement of an acceptable alternate security system capable of assuring secure peace with freedom, justice, and progress, preferably, but not necessarily, through the strengthening and improvement of the United Nations.

Expand and continue research, both private and governmental, on all aspects of the creation and operation of such an alternate security system. This will develop details of the desired international political order, support proposals an negotiations, and react to emerging attitudes and postures. Why not a minimal appropriation of perhaps ten percent of the current cost of military research and development?

Advocate and support the achievement of an alternate security system through available diplomatic and public channels and seek new ones. No other activity warrants higher priority. Why not designate an Under Secretary of State, adequately staffed, to assume full-time responsibility for this activity?

Develop bipartisan support, strong and continuing, for the creation of an international political order capable of assuring our national security. The President and his administration, the Congress, and the public must all lend support. Isn't bipartisan support for new patterns toward peace and security as important as that now enjoyed by the military establishment's efforts to maintain peace through force?

Action

The ten following action proposals would contribute to an international climate more favorable to world organization and deal with specific problems pressing for resolution. These actions would improve the credibility of the United Nations and raise the probability of revising it into the more effective and viable organization the world is waiting for. These recommended actions should be undertaken cooperatively with other nations supporting such concepts.

1. *Normalize diplomatic and trade relations with all nations regardless of their ideology.* Expanded contact and trade could provide considerable economic benefits and contribute to a more stable international order.

2. *Check and reverse the arms race.* The accords of the recent Moscow summit encourage SALT II. This opportunity and others should be pursued diligently to advance not only arms limitation but arms reduction and first steps toward disarmament. More nuclear and near-nuclear weapon nations should be involved in negotiations. I have long believed the United States could provide potent leadership through the judicious use of independent initiatives such as limited reduction of arms and/or military budgets. Such arms limitation and reduction is vital to achievement of better world order.

3. *Use and support the United Nations to the fullest extent practicable.* Although the United Nations has substantial weaknesses, it is what nations made it and is the only world organization in existence. The United Nations can be strengthened and made more effective within its present Charter. We do the world and ourselves a disservice when we bypass, neglect, or downgrade this organization.

4. *Work for the creation of a viable ocean regime.* The world has a fleeting opportunity to avoid a race to "colonize the seabeds" by acting promptly to establish a global ocean regime, preferably associated with the United Nations. Preserving freedom of the seas and conserving its resources—the common heritage of man—requires acceptable global management. An effective regime would be a positive contribution to world order.

5. *Continue support for an effective United Nations role in pollution matters.* Initial steps taken at the recent Stockholm Conference on the Human Environment need to be augmented and expanded along the lines proposed by our State Department.

6. *Enlarge the peacekeeping capability of the United Nations.* Great strides can be taken to make UN peacekeeping, peacemaking, and conflict resolution more effective. A UN peace force would be found indispensable if agreement were reached on guidelines for its deployment and management.

7. *Resolve the financial issues of the United Nations.* The organization is sadly hampered by its current uncertain and inadequate sources of revenue. The total UN budget for 1970 was but $1.1 billion, miniscule compared to the $204 billion the world spends on its armed forces. Independent sources of revenue should be explored: the financial issue is critical.

8. *Support the International Court of Justice.* As a strong advocate of a rule of law on the world level, the United States should be in the forefront of those using and advocating greater use of the World Court. Repeal of the Connally Reservation would be a good start.

9. *Reconstruct our approach to economic assistance for the developing nations.* We need a sensible and adequate program, giving special attention to the transfer and availability of science and technology and to the multilateral approaches through United Nations specialized agencies and cooperatively with other nation states. Economic aid should be completely separated from military aid.

10. *Expand support for stabilization of global population.* Quality of life for the world's citizens will be jeopardized if populations continue to grow at alarming rates. United Nations and multilateral programs, including vast research programs, warrant enlarged support to curb population growth rates.

Dedication

The creation of an effective international political order will be a difficult and trying task, requiring a change in deeply entrenched patterns of national action at home and abroad. Extreme nationalism must be subdued and the sensible use and limited delegation of sovereignty exercised. Moreover, the establishment of this new order will be time-consuming—no instant creation has surfaced. Massive acts of persuasion, together with broad educational programs, will be essential, again both at home and abroad.

It is my judgment, however, that there is more support for such action than we realize. The inadequacies of the present system of international politics are increasingly recognized, as is the seriousness of the hazards confronting the world.

My numerous contacts with world diplomats, statesmen, and scholars convince me that numerous middle and lesser powers would enthusiastically join in positive action toward an effective international political order were they convinced of great power support. President Nixon's visits to the People's Republic of China and to the Union of Soviet Socialist Republics indicate some willingness to break out of shackles that have deadlocked world affairs for the last two decades. On a June visit to the Soviet Union as a guest of the USSR Academy of Sciences, I sensed the doors had been opened slightly, inviting greater cooperation. A careful and patient nurturing of these beginnings offers hope that we dare not overlook. One could be cautiously optimistic, if the nations of the world, and particularly the great powers, were to recognize that their common interest in a safe and sane world could be achieved through a more effective international political order.

But if the United States is to take advantage of these tenuous opportunities, we must successfully challenge several preconceived concepts and postures. Until this is done, the will and dedication essential to provide leadership toward a better world political order will not be developed. Until our President and his administration publicly challenge archaic concepts of world politics and our Congress rises above deep-seated prejudices and fears to investigate and legislate toward these ends, the United States will be less than a positive force for a new and adequate international political order. Such leadership would force debate on the issues, leading to a positive strategy. Though efforts to develop a new international political order must be supported by the public, *initiative and dedication to do so must originate with the elected leadership of this country.*

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. VANDER JAGT (at the request of Mr. GERALD R. FORD), from September 6 through September 18, on account of appointment as the personal representative of the President to attend the official opening of the Yugoslavia World Trade Fair.

Mr. CARNEY (at the request of Mr. O'NEILL), for September 5 through September 15, on account of official business (investigation of the Committee on Interstate and Foreign Commerce).

Mr. CORMAN, for Wednesday, September 7, 1972, on account of official business.

Mr. Yates, for tomorrow, September 7, to attend funeral of dear friend.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Goldwater) and to revise and extend their remarks and include extraneous matter:)

Mr. Brown of Ohio, for 15 minutes, today.

Mr. Robison of New York, for 5 minutes, today.

Mr. Gerald R. Ford, for 5 minutes, today.

Mr. Kemp, for 10 minutes, today.

Mr. McKinney, for 5 minutes, today.

Mr. Fish, for 5 minutes, today.

Mr. Wyman, for 5 minutes, today.

(The following Members (at the request of Mr. Denholm) and to revise and extend their remarks and include extraneous matter:)

Mr. Gonzalez, for 5 minutes, today.

Mr. Aspin, for 10 minutes, today.

Mr. Rooney of Pennsylvania, for 5 minutes, today.

Mr. Cotter, for 5 minutes, today.

Mr. Murphy of Illinois, for 5 minutes, today.

Mr. Burke of Massachusetts, for 15 minutes, today.

Mr. Eilberg, for 10 minutes, on September 7.

Mr. Annunzio, for 10 minutes, on September 7.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Hechler of West Virginia and to include extraneous matter notwithstanding the fact that it exceeds two pages of the Congressional Record and is estimated by the Public Printer to cost $977.50.

Mr. Drinan and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the Record and is estimated by the Public Printer to cost $1,402.50.

(The following Members (at the request of Mr. Goldwater) and to include extraneous material:)

Mr. Riegle.
Mr. Esch.
Mr. Derwinski in three instances.
Mr. Gerald R. Ford.
Mr. Shriver.
Mr. Broomfield in five instances.
Mr. Whitehurst in two instances.
Mr. Lent in three instances.
Mr. Hosmer in two instances.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 16. An act to amend title 18 of the United States Code to provide civil remedies to victims of racketeering activity and theft, and for other purposes; to the Committee on the Judiciary.

S. 2087. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968 to provide a Federal minimum death and dismemberment benefit to public safety officers or their surviving dependents to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 9323. An act to amend the Narcotic Addict Rehabilitation Act of 1966, and for other purposes; and

H.R. 12350. An act to provide for the continuation of programs authorized under the Economic Opportunity Act of 1964, and for other purposes.

BILL PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H.R. 13089. An act to provide for acceleration of programs for the planting of trees on national forest lands in need of reforestation, and for other purposes.

ADJOURNMENT

Mr. DENHOLM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p.m.), the House adjourned until tomorrow, Thursday, September 7, 1972, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2306. A communication from the President of the United States, transmitting an amendment to the request for appropriations transmitted in the budget for fiscal year 1973 for the Department of Health, Education, and Welfare (H. Doc. No. 92–351); to the Committee on Appropriations and ordered to be printed.

2307. A communication from the President of the United States, transmitting proposed supplemental appropriations for the legislative branch for fiscal years 1972 and 1973 (H. Doc. No. 92–352); to the Committee on Appropriations and ordered to be printed.

2308. A letter from the Deputy Assistant Secretary of the Army (Research and Development), transmitting a list of all contracts for Army research and development in the amount of $50,000 or more which were awarded during the period January 1 through June 30, 1972, pursuant to section 4 of Public Law 557, 82d Congress; to the Committee on Armed Services.

2309. A letter from the secretary, Foundation of the Federal Bar Association, transmitting the audit report of the foundation for the fiscal year ended September 30, 1971, pursuant to section 14 of Public Law 662, 83d Congress; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. H.R. 15859. A bill to amend the Public Health Service Act to authorize assistance for planning, development and initial operation, research, and training projects for systems for the effective provision of health care services under emergency conditions; with amendments (Rept. No. 92–1375). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee of Conference. Conference report on S. 3442 (Rept. No. 92–1376). Ordered to be printed.

Mr. ANDERSON of Tennessee: Committee on Rules. House Resolution 1108. A resolution providing for the consideration of H.R. 16188. A bill to amend the Immigration and Nationality Act, and for other purposes (Rept. No. 92–1377). Referred to the House Calendar.

Mrs. GRIFFITHS: Committee on Ways and Means. H.R. 14386. A bill to continue until the close of June 30, 1974, the existing suspension of duties on certain forms of copper; with amendments (Rept. 92–1378). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLS of Arkansas: Committee on Ways and Means. H.R. 16299. A bill to provide for a 2-year extension of the existing treatment provided for accrued vacation pay (Rept. No. 92–1379). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Interior and Insular Affairs. H.R. 16012. A bill to authorize the Secretary of the Interior to construct, operate, and maintain various Federal reclamation projects, and for other purposes; with an amendment (Rept. No. 92–1380). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARING: Committee on Interior and Insular Affairs. H.R. 11449. A bill to provide that the United States disclaims any interest in a certain tract of land (Rept. No. 92–1381). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARING: Committee on Interior and Insular Affairs. H.R. 10857. A bill to authorize the Secretary of Agriculture to exchange certain national forest lands within the Carson and Santa Fe National Forests in the State of New Mexico for certain private lands within the Piedra Lumbre Grant, in the State of New Mexico, and for other purposes (Rept. No. 92–1382). Referred to the Committee of the Whole House on the State of the Union.

Mr. BARING: Committee on Interior and Insular Affairs. H.R. 9018. A bill to modify the boundaries of the Santa Fe, Gila, Cibola, and Carson National Forests in the State of New Mexico, and for other purposes; with amendments (Rept. No. 92–1383). Referred to the Committee of the Whole House on the State of the Union.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. Report on an inquiry into freight car shortages (Rept. No. 92–1384). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL of Virginia:

H.R. 16531. A bill to provide for medals of recognition for all police and firemen in the District of Columbia; to the Committee on District of Columbia.

By Mr. DELANEY:

H.R. 16532. A bill to amend title 38 of the United States Code to provide that any social security benefit increases provided for by Public Law 92–336 be disregarded in determining eligibility for pension or compensation under such title; to the Committee on Veterans' Affairs.

H.R. 16533. A bill to require States to pass along to public assistance recipients who are entitled to social security benefits the 1972 increase in such benefits, either by disregarding it in determining their need for assistance or otherwise; to the Committee on Ways and Means.

By Mr. DELLUMS:

H.R. 16534. A bill to establish minimum prison and parole standards in the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. FRASER:

H.R. 16535. A bill to amend the Internal Revenue Code of 1954 to provide that in the case of a dependent 62 or more years of age the support test shall be satisfied if the taxpayer contributes $1,500 or more to the support of such dependent; to the Committee on Ways and Means.

H.R. 16536. A bill to amend the Social Security Act to provide that the Secretary of Health, Education, and Welfare (in the case of the old-age, survivors, and disability insurance program or the medicare program) or the appropriate State agency (in the case of any of the public assistance or medicaid programs) shall be liable for attorney's fees incurred by an individual in successfully challenging a decision which denies him the benefits or assistance, or reduces or limits the benefits or assistance, to which he is entitled under such program; to the Committee on Ways and Means.

By Mr. FRELINGHUYSEN:

H.R. 16537. A bill to authorize the Secretary of the Interior to establish the Thaddeus Kosciuszko Home National Historic Site in the State of Pennsylvania, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FULTON:

H.R. 16538. A bill to exempt parts and accessories to be used on local transit buses from Federal excise tax; to the Committee on Ways and Means.

By Mr. HECHLER of West Virginia:

H.R. 16539. A bill to provide for the establishment of the Thaddeus Kosciuszko Home National Historic Site in the State of Pennsylvania, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 16540. A bill to provide for accelerated research and development in the care and treatment of autistic children, and for other purposes; to the Committee on Ways and Means.

By Mrs. HICKS of Massachusetts:

H.R. 16541. A bill to provide that a certain percentage of money received by the United States from royalties and rentals of any seabed within the national jurisdiction of the United States shall be paid to the State of the United States adjacent to any such seabed and that a certain percentage shall be distributed to other States of the United States, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. KOCH:

H.R. 16542. A bill to protect nondisclosure of information and sources of information coming into the possession of the news media; to the Committee on the Judiciary.

By Mr. KUYKENDALL:

H.R. 16543. A bill to amend the Social Security Act to provide that future increases in retirement or disability benefits under Federal programs shall not be taken into consideration in determining a person's need for aid or assistance under any of the Federal-State public assistance programs; to the Committee on Ways and Means.

By Mr. MANN:

H.R. 16544. A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to provide increased penalties for distribution of heroin by certain persons; to the Committee on Interstate and Foreign Commerce.

By Mr. METCALFE:

H.R. 16545. A bill to amend the Public Health Service Act to improve the program of medical assistance to areas with health manpower shortages, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. PUCINSKI:

H.R. 16546. A bill to revise the Welfare and Pension Plans Disclosure Act; to the Committee on Education and Labor.

By Mr. ROGERS (by request):

H.R. 16547. A bill to amend title 38 of the United States Code to provide that any social security benefit increases provided for by Public Law 92–336 be disregarded in determining eligibility for pension or compensation under such title; to the Committee on Veterans' Affairs.

By Mr. ROUSH (for himself and Mr. Hillis):

H.R. 16548. A bill to further the purposes of the Wilderness Act of 1964 by designating certain lands for inclusion in the national wilderness preservation system, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. STEPHENS:

H.R. 16549. A bill to suspend the duty on cyclohexanone oxime until the close of December 31, 1972; to the Committee on Ways and Means.

By Mr. COLLIER:

H. Con. Res. 691. Concurrent resolution expressing the sense of Congress with respect to the withdrawal of American troops from South Vietnam, and for other purposes; to the Committee on Foreign Affairs.

By Mr. RODINO:

H. Con. Res. 692. Concurrent resolution expressing the sense of the Congress with respect to the discriminatory schedule of exit fees recently decreed by the Soviet Union as part of a campaign against Jews seeking to emigrate to other countries; to the Committee on Foreign Affairs.

By Mr. THOMPSON of Georgia (for himself, Mr. Bray, Mr. Kuykendall, Mr. Podell, Mr. Symington, Mr. Scheuer, and Mr. Kemp):

H. Con. Res. 693. Concurrent resolution expressing the sense of Congress that the United Nations should impose sanctions against countries harboring terrorists; to the Committee on Foreign Affairs.

By Mr. CELLER (for himself, Mr. Boggs, Mr. O'Neill, Mr. Gerald R. Ford, Mrs. Grasso, Mrs. Abzug, Mr. Rooney of New York, Mr. Eilberg, Mr. Halpern, Mr. Koch, Mr. Mikva, Mr. Podell, Mr. Rosenthal, Mr. Scheuer, Mr. Wolff, Mr. Yates, Mr. Fascell, Mr. Giaimo, Mr. Boland, Mr. Pucinski, Mr. Evans of Colorado, Mr. Edwards of California, Mr. Sikes, Mr. Harrington, and Mr. Nix):

H. Res. 1106. Resolution expressing the sense of the House on the tragic killings of Israeli Olympic team members at the 20th Olympiad at Munich.

By Mr. CELLER (for himself, Mr. Bingham, Mr. Nix, Mr. Sarbanes, Mr. Thompson of Georgia, Mr. Rodino, Mr. Brasco, Mr. Biaggi, Mr. Morgan, Mr. Danielson, Mr. Symington, Mr. Edmondson, Mr. Flood, Mr. Monagan, Mr. Reid, Mr. Carey of New York, Mr. Hays, Mr. Badillo, Mr. Drinan, and Mr. Annunzio):

H. Res. 1107. Resolution expressing the sense of the House on the tragic killings of Israeli Olympic team members at the 20th Olympiad at Munich; to the Committee on Foreign Affairs.

By Mr. PEPPER:

H. Res. 1109. Resolution expressing the sense of the House on the tragic killings of Israel Olympic team members at the 20th Olympiad at Munich; to the Committee on Foreign Affairs.

By Mr. SIKES:

H. Res. 1110. Resolution expressing the sense of the House with respect to the murder of the Israel delegates to the Olympic games; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LONG of Maryland:

H.R. 16550. A bill for the relief of the estate of Peter Boscas, deceased; to the Committee on the Judiciary.

By Mr. MANN:

H.R. 16551. A bill for the relief of Renato M. Dioquino; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

H.R. 16552. A bill to donate certain surplus railway equipment to the Hawaii chapter of the National Railway Historical Society, Inc.; to the Committee on Government Operations.

By Mr. ROGERS (by request):

H.R. 16553. A bill for the relief of Charles P. Bailey; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

TESTIMONY OF DR. EUGENE LINSE

HON. JOSEPH E. KARTH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. KARTH. Mr. Speaker, the House Committee on Ways and Means has been holding hearings on a matter of importance—H.R. 16141—a bill that would allow tax credits for parents of children attending private elementary and secondary schools.

I am pleased that a distinguished member of my congressional district, Dr. Eugene Linse, the president of Citizens for Educational Freedom, testified before the committee on a vital section of H.R. 16141, title II.

I believe the testimony of Dr. Linse is of particular significance as we consider this important legislation. With that in mind I now place in the RECORD his testimony and commend it to our colleagues:

TESTIMONY BY EUGENE LINSE, PH. D.

As President of Citizens for Educational Freedom, I thank you for this opportunity to testify in regard to Bill H.R. 16141. CEF membership and its Board of Directors include citzens of every race, creed and color. CEF has a 13-year record of support for nonpublic education.

Without question, CEF endorses the philosophical position of the President and the many Members of Congress who have endorsed this Bill. My testimony today is therefore directed primarily to Title II of H.R. 16141.

Why aid such parents? Because nonpublic schools that these parents choose:

(1) provide freedom of choice; learn a benchmark of our American ideology;

(2) offer friendly and helpful competition to the public schools; beneficial to both republic sectors of American education on every level;

(3) they supplement the public system and educate 5 million children, and save the taxpayers 3 billion dollars annually, as Professor Kraushaar has noted in his new book;

(4) respond to the needs of minority groups in some of the large metropolitan areas these schools enroll one-third of all the students and are a stabilizing factor in changing neighborhoods of the poor and lower middle class families;

(5) most of these nonpublic schools in addition to the three R's also stress spiritual and moral values in fashion not permitted to Government-operated schools.

Far from being diverse over the course of our history, these schools have contributed to a wholesome variety in the educational enterprise of this country and are an essential part of the school system. They have helped us to avoid Government monopoly in education.

Congress, by amending the higher education bill a few weeks ago, found a way to strengthen the position of nonpublic schools. All institutions of higher learning, including those sponsored by various religious denominations, now benefit in capital expenditure provisions and in a generous system of grants available to students in any of these colleges and universities, up to $1,400 per student.

As yet something similar has not been done for parents whose children attend nonpublic Elementary and Secondary Schools. Members of both political parties recognize this need. Both are currently advocating the concept of educational tax credits as a Constitutional way of aiding these parents who now face the difficult task of meeting increasing tuition costs. H.R. 16141 possesses elements found in all 41 bills on tax credits that have been introduced in Congress while they differ in details, they all have the same purpose: help these parents by giving them at least some credit for their educational expenses. H.R. 16141 opposes the $200 tax credit per pupil. A much more realistic figure would be $400 per pupil less than 50 percent of the current expenditure alone in public education in the poorest of states.

Tax credits, except for educational expenses, are not a new idea the Federal Government currently permits credit for a variety of reasons, such as, for retirement incomes, for business investments, and certain types of foreign taxes.

The Government allows large corporations credit for business expansion. Theologically a loss in Federal revenue is incurred in granting such credits actually, through the creation of more employment by expansion, Government income is increased in succeeding years through taxes received from such corporations and their employees. Another example is the credit granted to retired persons. Here the purpose is to help our Senior Citizens remain self-supporting.

Tax credits for expenses paid to nonpublic schools are very similar in nature. A limited, reasonable amount of tax credit will help parents who wish to have their children attend such schools. The Supreme Court ruled in 1925 that parents have this right but today many of these parents, after paying their share of taxes for public schools, are financially unable to exercise this right.

How shall we summarize this argument? Nonpublic schools are a necessary part of the Nation's educational system by providing competition and diversity, they are a safeguard against monopoly, perhaps even against inefficiency, and save taxpayers 3 billion annually. Further, whether children attend a church-related school or a public school is a moot question as long as the school meets educational requirements and observes the regulations of the 1964 Civil Rights Act.

Are tax credits Constitutional? We answer: President Nixon thinks so, the Presidential Commission thinks so, the large number of you Congressmen and your colleagues think so, some leading constitutional lawyers think so. The Supreme Court has never objected to the idea of tax credits in principle while rejected other forms of assistance.

From these recent decisions, it is evident that the following criteria must be found in any Act which provides aid: (1) the Act must have a secular purpose; (2) the primary effect of the Act must not inhibit or advance the cause of religion; (3) the Act, in its implementation, must not involve "excessive entanglement" of Government and religion. Tax credits legislation meets all of these criteria:

(1) the secular purpose is clearly the education of children in those fundamental skills required of all citizens;

(2) the primary effect of Title II of H.R. 16141 is to help parents exercise their Constitutional rights of selecting schools for their children. The Bill neither helps nor hurts religion, while a failure to enact such legislation may inhibit the free exercise of religion. The Supreme Court has stated in the 1963 Sherbert Case: ". . . No State may exclude individual Catholics, Lutherans, Mohammedans, Baptists, Methodists, nonbelievers, Presbyterians, or members of any faith because of their faith or lack of it, from receiving the benefits of public welfare legislation."

(3) there is no entanglement of Govrenment with religion in this Act; there is nothing different here than in any tax credit or deduction currently allowed in law.

I wish to thank you for this opportunity to present position of Citizens for Educational Freedom on pending tax credits legislation.

CATCH 22, INDIAN STYLE

HON. ALAN CRANSTON

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Wednesday, September 6, 1972

Mr. CRANSTON. Mr. President, on February 2, 1972, I introduced a bill (S. 3113) to declare that the United States holds in trust for the Bridgeport Indian Colony certain lands in Mono County, Calif.

I am extremely pleased that the Interior and Insular Affairs Committee, meeting in executive session this morning, ordered S. 3113 favorably reported. I hope the Senate will move quickly to pass this bill.

The lands described in S. 3113 constitute a small, 20-acre tract of vacant public domain land, now managed by the Bureau of Land Management, adjacent to the town of Bridgeport in Mono County, Calif. The intended beneficiaries of S. 3113 are the 60 members of the Bridgeport Indian Colony. The bill enjoys the support of the townspeople of Bridgeport, and has been endorsed by the Mono County Board of Supervisors in a unanimous resolution adopted on January 18, 1972. In addition, Congressman Harold T. Johnson, of California, whose district includes Mono County, has introduced legislation identical to S. 3113 in the House of Representatives.

That, in a nutshell, is a description of S. 3113. Yet, it does not begin to tell the whole story. I should like to take a few minutes, Mr. President, to provide the Senate with some historical data relating to California Indians, in general, and the Bridgeport Indian Colony, in particular. I should also like to discuss briefly some of the issues raised by S. 3113 which so concern the Department of the Interior that it has recommended against enactment at this time.

Mr. President, the history of the Federal Government's relationship with California Indians is one of promises unfulfilled and responsibilities ignored. Most California Indians are landless today because the United States refused to ratify 18 treaties negotiated between 1851 and 1852 by three Federal agents and the majority of California Indians. These treaties would have granted some 8.5 million acres of land to native California Indians in exchange for their agreement to relinquish claim to all other State lands. And to add insult to injury, the unratified treaties were lost in the Senate's secret archives until 1906 when they were discovered accidentally by a clerk.

In the meantime, Congress, in 1853, enacted a California Land Title Registration Act which required registration on penalty of forfeiture. Most Indians were illiterate, and most were living in remote areas. The result was the loss of those lands which had not already been surrendered in reliance on the treaties. The Dawes Allotment Act of 1887 shattered the last remnants of Indian land. And the final blow to California Indians came in 1953 when Congress established an official policy of termination; that is, ending the trust status of the land and, thus, eliminating Federal Indian services for the people. The Rancheria Act of 1958, which applied only to California, has resulted in the termination of 36 rancherias and 1,500 Indians.

The Bridgeport Indian Colony consists today of some 60 members, all of whom are descendants of Indians who have continuously occupied their present site since before the white man came to California. Despite this continuous occupation, the General Land Office, predecessor of the Bureau of Land Management, issued a patent under the Desert Land Act to a non-Indian in 1914 which included the site then and now occupied by the Bridgeport Indians.

This patent was granted in spite of an explicit requirement prohibiting the granting of a land patent on land occupied by Indians.

The Bridgeport Indians have continued to occupy the site, although the lands are presently "owned" by several non-Indian heirs and grantees of the original patentee. Early in 1968, one of the "owners" formally demanded that the Indians vacate "his" portion of the tract. Through the intervention of California Indian Legal Services, eviction proceedings have been held in abeyance but time is growing short. The cloud of eviction proceedings hanging over the Bridgeport Indian Colony is but another instance of the wrongful taking of lands continuously occupied by native Americans and a further erosion of the meager land base of California Indians.

That the Bridgeport Indians had their lands illegally taken from them is beyond dispute. The question then is one of reparations.

The simplest and fairest solution, in my judgment, is to provide the Bridgeport Indian Colony with a new land base. This solution would enable the Bridgeport Indian families to begin to build a new, secure life without challenging the non-Indian families which claim title to the land the colony now occupies.

The transfer of the small, 20-acre tract of unoccupied and vacant public domain land described in S. 3113 would not involve land acquisition costs for the Federal Government.

Housing is perhaps the most critical problem facing the families of the Bridgeport Indian Colony. Twelve of the 19 Indian families now occupy totally substandard housing. Eleven of the families have no sanitation facilities or running water, but must use dilapidated outhouses and share two outside water faucets which freeze during the winter where temperatures often dip to —30° in the Sierras. Five homes have only wood-burning stoves for heat. Three families have no refrigerators. Seven live in marginally adequate trailers or houses.

To make matters worse, Mr. President, only three of the 19 families have a fully employed member. The rest are unemployed. The average educational attainment of adults in the community is eighth grade.

The colony's desire to improve its living conditions is the chief reason for my bill. The land is situated adjacent to the town of Bridgeport, and convenient hookups for utilities, water, and sewage are available. Securing a trust land base will enable the colony to devote its considerable energies and meager resources to obtaining adequate housing.

Mr. President, the Department's report on S. 3113 recommends against enactment of my bill at this time, pending completion of a study of other situations in which tribes are seeking lands beyond their present reservation boundaries. The Department has also reiterated its general policy not to provide Federal trust land to unrecognized tribes.

It is my conviction that deferring action on S. 3113 until the Department gets around to completing some vague study is just a stalling tactic. The Bridgeport Indian situation has already been studied. We know the facts. And we have got a solution that appears to be acceptable to all parties involved. Why wait for another study? If the administration is as committed to the principle of "self-determination" as President Nixon indicated in his July 8, 1970, message to Congress, then let us proceed. The Bridgeport Indian Colony is ready to take affirmative steps to determine for themselves a better, brighter future. Delay in the transfer of a mere 20 acres of public domain land is all that stands in their way.

Finally, I would like to speak to the question of Federal "recognition." As I understand it, an Indian is recognized by the Federal Government as an Indian if he is a member of a tribe or band which has a Federal trust land base. To be recognized means eligibility for the special Federal Indian services of the Bureau of Indian Affairs and the Indian Health Service. Recognizing the importance of this, I inquired about how a tribe or band not now recognized gains the treasured status of Federal recognition. How? By living on Federal trust land. And how does a group of landless Indians obtain a Federal trust land base? Only by being recognized.

And so, Mr. President, we have come up against Catch 22, Indian style. As you may recall, Catch 22 in Joseph Heller's well-known novel specified that a concern for one's own safety in the face of real and immediate dangers was the process of a rational mind. Thus, Orr, who was crazy, could be grounded. All he had to do was ask. But as soon as he asked, he would no longer be crazy and would have to fly more missions. Thus, he could never be grounded.

The Bridgeport Indians are up against the same kind of absurd logic. The Department is saying to them that they cannot have a trust land base because they are not now recognized, but they cannot be recognized until they have a trust land base.

Mr. President, the 60 members of the Bridgeport Indian Colony are faced with eviction from the lands they and their ancestors have always occupied. They have no place to go. They have asked for our help. They are supported by the local townspeople, the Mono County Board of Supervisors, their U.S. Representative, and their two U.S. Senators. The land transfer will not involve any outlay of Federal money, and it will solve a tangled land title dispute for the Indians as well as for the non-Indian owners.

The Department, in recommending against S. 3113, has shown little understanding of the unique situation of the Bridgeport Indians by forcing them onto the merry-go-round of a Catch 22.

I am delighted that the Interior Committee took a positive position on S. 3113, and I hope the Senate will be as generous.

HOW VIETNAMIZATION UPSET RUSSIA'S PLANS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. CRANE. Mr. Speaker, both during the Korean war and during the current war in Vietnam many critics, both in our own country and abroad, have repeatedly advanced the view that those on our side were unenthusiastic about the war effort, were not as committed as the enemy, and could not hold their own in battle. These arguments were set forth as a basis upon which to call for American withdrawal and, in effect, surrender to the enemy. If our allies will not fight, the argument has gone, then we should not fight for them.

The fact is that during the Korean war our allies fought bravely. The enemy soldiers, men we were told were devoted to the Communist ideology, refused to return to their own country when the war ended and repatriation efforts were initiated to exchange prisoners. It turned out that these men fought not because of their ideological disposition concerning communism, but out of fear. Given a choice, they chose freedom. The arguments of the critics about Korea were clearly proven to have been false.

Now their arguments concerning Vietnam are being proven equally false. Our allies in South Vietnam are fighting bravely and are succeeding in defeating enemy efforts. For some reason, their valor and bravery has not been heralded in the press. Critics do not like to be proven wrong and they attempt to keep the evidence of their inaccuracy from the public, at least as much as it is possible to do so in a free society.

After a recent visit to Vietnam a British Member of Parliament, Philip Goodhart, reported that—

> Most of the American advisers in Vietnam have gone now . . . But on the battlefields of An Loc and Quang Tri the Army of South

Vietnam has proved that the transformation scene is in full swing. The best South Vietnamese units are earning a reputation which the Koreans themselves might well envy. One objective of the current North Vietnamese offensive was the destruction of Southern morale. In fact, after four months of battle, the morale of the South Vietnamese forces has never been higher.

Mr. Goodhart points out that the Hanoi offensive was launched at least in part because of prodding from the Soviet Union. In this sense, he notes, the policy of Vietnamization has upset Russian plans in this area. He writes:

At the beginning of the offensive intelligence experts estimated that the North Vietnamese were prepared to lose 120,000 men to achieve victory. Independent observers believe that the 120,000 casualty figure may already be within sight, and there are no visible victories on any front . . . In 1968, the Tet offensive effectively broke President Johnson's administration. The 1972 offensive might well clip the wings of the Moscow hawks.

It is clear that the picture painted of events in Vietnam by antiwar critics has no relationship to reality. I wish to share with my colleagues the important report by Philip Goodhart, M.P., as it appeared in the London Daily Telegraph of Thursday, August 3, 1972. That report follows:

[From the London Daily Telegraph, Aug. 3, 1972]

WALKING TALL IN SOUTH VIETNAM

(By Philip Goodhart, M.P.)

"Do you know why this division is called the White Horse Division?" my companion asked, pointing at some Korean soldiers who were walking past the Vietnamese café at which we were sitting. I shook my head. "It's because the battle of White Horse Hill was the first damned battle in which the damned South Korean Army didn't take to their damned feet and run—but look at them now, they're superb. In the end our work paid off."

My companion was an American colonel who had fought with distinction in Korea. At the time that we were talking, September 1966, the Korean White Horse Division had recently moved into the Vietnamese province where he was a senior adviser. The Koreans would visit the local villages and smash bricks with their bare hands. The Vietnamese listened with some attention when the Koreans went on to say that anyone who caused trouble could be broken as easily as the bricks.

At that time, many of the senior and middle-rank American advisers in Vietnam had served in Korea training the Koreans, and used constantly to reiterate their hope—and sometimes their belief—that the Vietnamese forces would eventually undergo a transformation like that of the Koreans.

Most of the American advisers in Vietnam have gone now. Some have retired. Some have been killed. But on the battlegrounds of An Loc and Quang Tri the Army of South Vietnam has proven that the transformation scene is in full swing. The best South Vietnamese units are earning a reputation which the Koreans themselves might well envy. One objective of the current North Vietnamese offensive was the destruction of Southern morale. In fact, after four months of battle, the moral of the South Vietnamese forces has never been higher. In the words of Lt-Gen. Nguyen Van Minh, Commander of III Corps, whose troops held An Loc against a furious Communist assault, "my men are now three inches taller."

What matters for the future of South Vietnam is the fact that the recent battles have been won without an obtrusive American presence on the ground. The American advisers brought with them candy and kindness and guns and ammunition and transport and communications and knowledge, but they could not bring morale. Indeed, it is arguable that the pride of the South Vietnamese Army was once buried under a pile of American divisional insignia and Coca Cola bottletops. But now, four months after the launching of the North Vietnamese offensive, there are just two American combat battalions left in South Vietnam, and the South Vietnamese Army can record some success on every front.

Admittedly, this position has been achieved at substantial cost. Since the offensive began, 15,000 South Vietnamese soldiers have been killed; some of the best young officers have been knocked out; a number of attractive towns have been destroyed; 600,000 refugees have fled from their homes. Both sides have thrown vast quantities of material into the battle.

Over the battlefields the American Air presence is still a noisy and effective reality. On a clear day Communist positions west of Hue and Quang Tri have sometimes been hit by more than 2,000 tons of bombs. During the whole of the Cassino campaign, Allied bombers dropped 700 tons of bombs in support of the troops. Of course the American air intervention has had an important effect on Vietnamese morale. "That is the spirit of air bombing" my Vietnamese companion remarked, as we passed a particularly beatific-looking plaster angel in Saigon recently, "entirely symbolical, of course." The American bombing has been far from symbolical, but the bombing could not have been half so effective if the South Vietnamese soldiers had not held so well on the ground.

It is estimated that the initial planning for the current offensive was begun in February 1971, and that active preparations on the ground began in 1971—the final deployments and orders for the offensive were given in February 1972. There is substantial evidence that the Russians, at every phase, encouraged Hanoi to go ahead with their offensive.

ROCKET'S AIM

Some degree of the Soviet Union's direct involvement is shown by the deployment of the SA 7 "Strella" rocket. The SA 7 is a sophisticated infra-red heat-seeking rocket, very similar to the British "Blowpipe" or American "Redeye" missile launchers. It can be carried and fired by one man.

The SA 7 is reasonably effective against fixed-wing aircraft, but it was expected that the effect on helicopters would be devastating—and the South Vietnamese forces are heavily dependent on helicopter supply and support. The Russian decision to hand over the SA 7—which has not been made available to other Russian allies—was clearly a blow aimed at the South Vietnamese jugular vein.

Every North Vietnamese army regiment on every front now has an SA 7 section, and in view of the difficulty of training and deployment, a decision to equip the North Vietnamese with the SA 7 can hardly have been taken later than October, 1971. Engine shielding, exhaust deflection and advanced flying techniques have helped to reduce the impact of the introduction of the SA 7. The fact that the widespread use of the SA 7 has not had the devastating effect on American and South Vietnamese helicopters that many people first feared is not the fault of the Russians.

Why did the Russians decide to encourage Hanoi to launch an offensive in March 1972? There are probably three main reasons. First, it is clear from the conversation of Soviet diplomats in a number of capitals that the Soviet Government knew that Vietnamisation was working and that the power of the South Vietnamese Government within its own borders was increasing.

Secondly, the Russians and the North Vietnamese both knew that a successful offensive in the spring of 1972 would give powerful support to the "peace" movement in America at the beginning of the election campaign.

Thirdly, there is some sign that the Russians were getting fed up with the constant drain of supplies to North Vietnam. At the beginning of 1972 American commanders estimate that up to 1,000 Russian lorries a week were being destroyed on the Ho Chi Minh trail. The Soviet Union was prepared to make more sophisticated equipment available only if Hanoi was prepared to try to impose a decisive defeat on the South. The Russians, like the Americans, have been finding the physical cost of supporting their Vietnamese allies increasingly burdensome.

The result has been a catastrophe for the Soviet hawks. Some allied experts have argued in the past that a plethora of sophisticated equipment has encouraged the Americans and the South Vietnamese to adopt unsuitable tactics. In 1971 and 1972, the Soviet gift of tanks, rockets and heavy artillery provided an irresistible inducement to the North Vietnamese to adopt tactics for which they were temperamentally unsuited and inadequately trained.

At the beginning of the offensive intelligence experts estimated that the North Vietnamese were prepared to lose 120,000 men to achieve victory. Independent observers believe that the 120,000 casualty figure may already be within sight, and there are no visible victories on any front. Meanwhile, the reputations of those who advocated this offensive policy have clearly suffered in both Moscow and Hanoi. In 1968, the Tet offensive effectively broke President Johnson's administration. The 1972 offensive might well clip the wings of the Moscow hawks.

Despite these terrible losses, the North Vietnamese army—particularly near Hue—still retains some offensive capability and could inflict damaging local defeats, but now the North Vietnamese army faces an enemy that expects to win. The ordinary South Vietnamese soldier has often had a claim on our sympathy. Now he should command our respect.

SCHOOL PRAYER AMENDMENT IN REPUBLICAN PLATFORM

HON. RICHARD S. SCHWEIKER

OF PENNSYLVANIA

IN THE SENATE OF THE UNITED STATES

Wednesday, September 6, 1972

Mr. SCHWEIKER. Mr. President, I am deeply gratified that the 1972 Republican platform contains a strongly worded plank in favor of school prayer. As a member of the Republican platform committee, and a longtime supporter and cosponsor of the school prayer amendment, I gave my strong support to the school prayer plank. In addition, I advised platform committee Chairman JOHN RHODES of the strong support for school prayer by a number of organizations with which I have been in contact, including Citizens for Public Prayer, the National Back to God Movement, and Citizens for Public Reverence.

It has been 10 years since the Supreme Court ruled to ban prayer from public schools and buildings. In that time, respect for other persons, respect for individual integrity, and respect for our institutions has been weakened. I believe the Supreme Court was misguided in its decision. I know the majority of citizens share my belief.

I am encouraged by the strong stand the leadership of the Republican Party has taken on the school prayer issue, and I am hopeful that Congress will move swiftly to restore the right of prayer to our citizens.

The text of the Republican platform plank on school prayer follows:

We affirm our view that voluntary prayer should be freely permitted in public places—particularly by schoolchildren while attending public schools—provided that such prayers are not prepared or prescribed by the state or any of its political subdivisions and that no person's participation is coerced, thus preserving the traditional separation of church and state.

McGOVERN "ELITES" TO PURIFY US ALL

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. DERWINSKI. Mr. Speaker, certainly, we recognize the natural tendency of political commentary to reflect the partisan view of an individual, and I believe it behooves us to study objective reports of the political scene. Therefore, I direct the special attention of the Members to a column in the New World of August 25th by Father Andrew M. Greeley which is, in my judgment, a very scholarly commentary on the makeup of McGovern supporters.

McGOVERN "ELITES" TO PURIFY US ALL

(By Father Andrew M. Greeley)

Among other things, the 1972 campaign is an attempt by those who are the intellectual and cultural elites of the country—and by their own standards are also an elite of moral concern and ethical sensibility—to take over political power. They have already taken over the Democratic party, and their sights are now set on the White House.

Forty-five per cent of the McGovern delegates at the Democratic convention had attended graduate school as opposed to 4% of the national population. They were very much concerned, of course, about "balanced" delegations—although none of them suggested that there should be adequate representation for the 89% of the American population which did not go to college, or even for the 60% of the young people who never went to college.

As one McGovern enthusiast said to me when I expressed doubt that Gloria Steinem or Bella Abzug spoke for very many American women. "But they know what the interests of women really are and most women don't." This is elitism pure and simple; but that's what the name of the game is.

As for moral sensitivity, consider Shirley MacLaine's comment that the Daley delegation was so old she didn't know how they got out of bed in the morning. Most people would consider such a crack to be cruel, vicious and politically inept, but one must understand that the elites consider youth to be clean and pure and the rest of us to be immoral and corrupt. There is no need to abstain from offending the old or the ethnic or the workingman. They are politically finished. The legions of the young are going to deliver the country into the keeping of people like Miss MacLaine.

Obviously, Mr. McGovern himself is not so naive. Yet those of us who have never voted for a Republican in all our lives would like to be able to distinguish between Mr. McGovern and some of his supporters, but it does not seem to be a distinction that he himself is prepared to make.

Nor is it just a washed-up movie actress with lots of money who hates the old. Listen to Tom Wicker, the movement's representative on The New York Times, describe the labor leaders of the country. "They were still mumbling threats and recriminations around their frayed cigars—elephants on their way to the boneyard."

Well, maybe. But many Americans still have some reservations about whether they are ready to turn political and moral power over to the elites. Many intellectuals will agree, but the sectarian intellectuals see a way to power and they are grabbing for it.

Where these sectarian intellectuals stand is nicely outlined by Arnold Beichman (himself an intellectual) in his new book, "Nine Lies About America." Anyone wishing to know what the sectarian intellectuals really think about the rest of us should read the book.

Among the lies Beichman documents are: "America is a fascist country," "America means genocide," "the American worker is a honky," "our political system is a fraud," "American values are materialistic," "America is insane," "the American people are guilty." The people who believe these things hate the rest of us, make no mistake about it.

In fact, there was much hatred at the Democratic convention. The pro-McGovern journalists sang the praises of the delegates for drinking less than delegates at previous conventions. But many of these delegates did not need to drink; they were getting their kicks other ways. Political rhetoric is frequently abusive, yet it is harmless because no one takes it seriously, neither those who use it nor those who are attacked by it. But when Allard Lowenstein and Father Drinan attack Mr. Nixon there is pure venom in their voices. They not merely want to beat him; they want to destroy him because he is "immoral."

And not only Mr. Nixon, I think. One of the female crazies said that it was a "purifying" convention. Right! The old and the corrupt and the uneducated and the ethnic were purified right out of the party. The Chicago delegation, duly elected under the laws of the State of Illinois was purified because it was old and immoral. The labor leaders were purified because they were on their way to the boneyard. But the purification has just begun. Now the party has been purified, next the nation.

What does Mr. McGovern think of all this? His admirers say he is a decent, honorable man who is not an extremist. But if he has repudiated the purifiers, he has yet to do it in a very loud voice.

Who are these people that are going to use the young of the nation to purify the rest of us? Listen to Norman Podhoretz, who knows them all too well from having associated with them most of his life. They are unwilling "as a class to understand themselves as part of the common run of mankind, to understand their own implication in the common run of human experience . . . the intellectuals have been trained to believe that they transcend the common destiny by virtue of the power of their minds."

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,757 American prisoners of war and their families.

How long?

CASPER MATHER, WELL-KNOWN ALASKAN, DIED AT 97

HON. NICK BEGICH

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. BEGICH. Mr. Speaker, on July 19, 1972, Casper Mather, well-known Tsimpsean wood carver and one of the five remaining pioneers of New Metlakatla, died at Ketchikan General Hospital at the age of 97. I would like to pay tribute to this man who symbolized a generation that dimly remembered the days in Alaska before the white man and looked forward to conquering the difficulties of a new way of life.

Casper Mather was born in 1875, and, as a young boy accompanied Father William Duncan, a missionary sent from England, to their new home on Annette Island in Alaska. Father Duncan had a profound influence on Casper Mather's life, and Casper believed that "Christianity was the greatest gift of the white man to our people." He, himself, was a staunch Christian who preached to his people on Sundays, both in English and in his native tongue. On one occasion, accompanied by his wife, Casper went to many churches in New York, Chicago, and other cities to tell the congregations of the missionary work among the Indians. He was chosen because he "knew more about Alaska than anyone else."

Casper had traveled extensively throughout Alaska. When he was a young man during the gold rush, he went to Chilkoot Pass and packed loads for men who wanted to dig for gold. In Casper's words, "They were all crazy; it was hard work, but we made lots of money." Later, he traveled all over Alaska, learning about the land and its people. He trapped fur animals, fished for Alaska salmon, and did all of the many things Indians had learned to do to earn a living in the rugged climate.

At one time, he even had a ship captain's license. He and his brother Paul knew how to pilot boats, had grown up on the water, and knew all about the rocks and islands where they lived. Father Duncan encouraged them to read books on navigation and steam engines, which they did before going to Juneau and passing the examination. Nearly 50 years later, during World War II, the Coast Guard called him, renewed his old license, and asked him to be ready in case he was needed.

His wife and 12 children were claimed by the tragedy of tuberculosis. Alone during his later years, Casper earned his living by carving totem poles, peace pipes, war clubs, bows and arrows, and other wooden objects for the tourist trade. The art of wood carving had been passed down to him through many generations, and the long hours of careful and loving attention were evident in the hand-carved figures. Casper was a real artist in wood and each of this productions were authentic, taken from the lore of his wood carving ancestors or the legends of his people. Some of the designs were borrowed from other Canadian and Alaskan tribes, with the influence of the Tlingit and Haida tribes, among others, being seen in his work. Each figure was carved with great care and concentration with his handmade tools.

The totems he carved told ancient legends of his people, stories of battles and other happenings, or of the lineage of an Indian family. But, even more importantly, the wood carvings of Casper Mather will serve as a reminder of a man who has become such an unforgettable part of Alaskan history.

EQUAL OPPORTUNITY ACT

HON. EARL F. LANDGREBE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. LANDGREBE. Mr. Speaker, in passing the Equal Opportunity Act, I feel that the House of Representatives has made a historic decision to restore the inherent balance in our Federal system between the power of the courts and the legislature. But more than this, by our action we have reaffirmed the right and the power of Congress to enforce the equal protection laws as they are guaranteed under the 14th Amendment.

These two actions should serve as a turning point for the renewal of the Federal structure and serve notice at the same time that we will not desist from our efforts to see that every American receives the equal protection of the laws of our land.

It would be valid at this point to refer directly to the words of the 14th Amendment:

> No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny any person within its jurisdiction the equal protection of the laws.

The amendment goes on to state, however that "Congress shall have the power to enforce, by appropriate legislation the provisions of this article." This, then, is the crux of the matter before us. It must be clearly understood that Congress is specifically given the power of enforcing the guarantees of this amendment to the Constitution by specific legislation. Up to this point, Congress has failed in its appointed duty and left this task to the Federal courts. Congress has allowed the courts to assume a legislative role completely at variance with the Constitution; the passage of this bill will redress that imbalance.

The Supreme Court, in its historic ruling in Brown against the Board of Education, found de jure school segregation to be unconstitutional. Since that time subsequent court decisions have found that de facto segregation, resulting from neighborhoods being predominantly of one racial group, is also unconstitutional.

In the absence of Congressional action, the lower Federal courts have issued a wide variety of remedies to insure that all school children have equal educational opportunity. One of the many remedies drawn up by the courts was the extensive transportation of pupils from one school to another often over long distances.

The result of all this court action has been a new evil to match the older one of racially segregated schools. That evil is the disruption of communities and the transportation of school children to achieve social goals. I strongly concur with the President's statement that "schools exist to serve children, not to bear the burden of social change." It is wrong to expect that our schools can be the sole factors in achieving social change.

There were many reasons why I objected to the use of forced busing as a major means of ending discriminatory schooling.

First, I felt that Congress had to reassert its duty to enact legislation and to secure the rights guaranteed under the Constitution in the 14th Amendment. I could not stand by and see this power usurped by the Federal courts.

Second, I feel that our governmental structure must sustain the rights and responsibilities vested by the States in the local school boards.

Third, we dare not allow the legitimate concerns of parents to be muffled by Federal regulation. The enforced busing orders of the courts resulted in just such a disruption of peoples' lives.

Fourth, forced busing does not really contribute to solving the racial problems in America. On the contrary, it compounds the problem by stirring up emotions in many communities throughout the country.

Above all, the undue attention which forced busing has attracted has diverted attention from what must be our prime area of concern—that of improving the quality of education for all students.

In addition to this, we must face the hard fact that quality education can only take place in an orderly atmosphere. Discipline and learning go hand in hand and to achieve that end we must make a major effort to reduce the present chaos in the classroom.

A NEW LIGHT ON RURAL DEVELOPMENT

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. CARTER. Mr. Speaker, the rural areas of our Nation must be viewed as one of our most valuable resources. I deeply feel that the development of our rural areas should be carried out in a manner which includes local interest and participation. I wish to submit the following article pertaining to this matter from Rural Electrification magazine, entitled "A New Light on Rural Development," by James V. Smith, Administrator of the Farmers Home Administration.

[From Rural Electrification, August 1972]

A NEW LIGHT ON RURAL DEVELOPMENT

(By James V. Smith)

When I heard that one rural community had been polled on its interest in rural development and had overwhelmingly refused to take part in it, I was amazed and a little shocked. Why would a community reject improvement? In this particular case, the residents thought "rural development" meant that a factory would invade their community and they did not want it.

To me rural development is a package involving ideas, initiative and action programs that will bring new life and new opportunity to rural areas. If communities we serve think it means only bringing in a factory, we have not told our story well enough.

We must inform rural people of the many things that can be done, and of the importance of local participation and initiative. . . .

The most important contacts must be made by the states and counties. Rural Development Committees should use every possible avenue to advise each community of the opportunities to determine its destiny. The town, community, or area can select the kind of help it wants from the dozens of programs available to it.

Some will decide that they need factories and other alternative sources of employment. Some will emphasize new homes, which will improve the local economy by providing work and an expanded tax base. Others will continue their present course. If communities are to be improved, the needs must be assessed and plans worked out. Then help can be sought.

The Farmers Home Administration promotes rural development through three major thrusts: A rural housing program provides funds for single-family dwellings, rental units, and self-help housing. Farmer programs help families purchase or improve farms, provide short-term operating funds, and help restore farming operations disrupted by natural disaster. Community services loans permit thousands of families in rural areas to enjoy an adequate water supply for the first time. Industry finds ideal locations along these water lines. This means jobs and real and viable rural development spearheaded by USDA.

FEDERAL CIVILIAN EMPLOYMENT, JULY 1972

HON. GEORGE H. MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. MAHON. Mr. Speaker, I include a release highlighting the July 1972 civilian personnel report of the Joint Committee on Reduction of Federal Expenditures, together with a fiscal year 1972 summary of payroll costs and average employment:

SUMMARY OF PAYROLL COSTS AND AVERAGE FEDERAL CIVILIAN EMPLOYMENT—FISCAL YEAR 1972

The total annual payroll cost of civilian employment in the Legislative, Judicial and

Executive Branches of the Federal Government in fiscal year 1972, ended June 30, 1972, was $31,717,000,000. This was $2,170,000,000 higher than in the preceding fiscal year, and an all-time high.

Total average federal civilian employment in all three Branches for the 12 months of fiscal year 1972 was 2,879,379. This was a decrease of 15,511 as compared with total average employment in fiscal year 1971.

This summary of annual payroll costs and average employment for fiscal year 1972, following practice of many years standing, is submitted along with the Joint Committee's regular monthly report for July 1972 which carries payroll figures for June, the last month of fiscal year 1972. Figures are from reports certified by the agencies as compiled and published monthly by the Joint Committee on Reduction of Federal Expenditures.

PAYROLL COSTS—FISCAL YEAR 1972

Within the *Executive Branch* payroll costs in fiscal year 1972 totaled $31,193,000,000, an increase of $2,114,000,000 over the previous year. The following tabulation shows Executive Branch annual payrolls, broken between civilian and military agencies, for the past 10 years—fiscal years 1962–72:

[In rounded amounts]

Fiscal year	Executive branch—Civilian employee payrolls		
	Civilian agencies	Defense Department	Total [1]
1962	$7,898,000,000	$6,318,000,000	$14,216,000,000
1963	8,659,000,000	6,603,000,000	15,262,000,000
1964	9,297,000,000	6,818,000,000	16,115,000,000
1965	10,043,000,000	7,102,000,000	17,145,000,000
1966	10,875,000,000	7,732,000,000	18,607,000,000
1967	11,727,000,000	8,668,000,000	20,395,000,000
1968	12,919,000,000	9,395,000,000	22,314,000,000
1969	13,840,000,000	10,298,0001000	24,138,000,000
1970	15,621,000,000	11,213,000,000	26,834,000,000
1971	17,480,000,000	11,599,000,000	29,079,000,000
1972	18,992,000,000	12,201,000,000	31,193,000,000

[1] Excludes pay for foreign nationals not on regular rolls ($533,000,000 for fiscal year 1972); includes pay for disadvantaged persons employed under youth opportunity programs ($93,000,000 for fiscal year 1972).

Payroll for the *Legislative Branch* in fiscal year 1972 totaled $412,000,000 an increase of $42,000,000 over the previous year. Payroll for the *Judicial Branch* in fiscal year 1972 totaled $112,000,000, an increase of $14,000,000 over the previous year.

AVERAGE EMPLOYMENT—FISCAL YEAR 1972

Civilian employment in the *Executive Branch* during the 12 months of fiscal year 1972 averaged 2,839,163 as compared with 2,857,014 in fiscal year 1971. This was a decrease of 17,851 in average employment.

The average Executive Branch employment total of 2,839,163 for fiscal year 1972 includes an average of 2,530,037 full-time employees in permanent positions; the total of 2,857,014 for fiscal year 1971 includes an average of 2,526,088 full-time permanent employees. This was an increase of 3,949 in average full-time permanent employment.

The following tabulation shows average employment for the Executive Branch, broken between civilian and military agencies, for fiscal year 1962–72.

Fiscal year	Average civilian employment, Executive branch		
	Civilian agencies	Defense Department	Total [1]
1962	1,373,484	1,058,676	2,432,161
1963	1,417,937	1,063,720	2,481,657
1964	1,434,104	1,042,552	2,476,656
1965	1,443,376	1,024,482	2,467,858
1966	1,500,349	1,074,080	2,547,429
1967	1,605,919	1,234,474	2,840,393
1968	1,654,973	1,280,853	2,935,826
1969	1,655,976	1,305,664	2,961,640
1970	1,694,157	1,264,207	2,958,364
1971	1,694,897	1,162,117	2,857,014
1972	1,710,991	1,128,172	2,839,163

[1] Excludes foreign nationals not on regular rolls (averaging 99,684 for fiscal year 1972); includes employment of disadvantaged persons under youth opportunity programs (averaging 33,543 for fiscal year 1972).

Average employment for the *Legislative Branch* in fiscal 1972 was 32,072, an increase of 1,437 over the previous year. Average employment for the *Judicial Branch* in fiscal year 1972 was 8,144, an increase of 903 over fiscal year 1971.

THE MONTH OF JULY 1972

Total civilian employment in the Executive, Legislative, and Judicial Branches of the Federal Government in the month of July was 2,854,913 as compared with 2,865,303 in the preceding month of June. This was a net decrease of 10,390, primarily due to reductions in Postal Service and Defense Department employment, partially offset by increases in regular seasonal employment and summer employment of the "disadvantaged" under youth opportunity programs.

Executive Branch

Civilian employment in the Executive Branch in the month of July, as compared with the preceding month of June, follows:

	July	June	Change
Civilian agencies	1,717,474	1,715,608	+1,866
Military agencies	1,095,160	1,107,761	−12,601
Total, civilian employment	2,812,634	2,823,369	−10,735

The civilian agencies of the Executive Branch reporting the largest increases during the month of July were Agriculture with 8,928, HEW with 4,314, Interior with 3,487, Veterans Administration with 2,902 and Treasury with 1,626. The largest decrease was in Postal Service with 21,231. In the Department of Defense the largest decreases were reported by Army, Air Force and Navy.

Total Executive Branch employment inside the United States in July was 2,663,630, a decrease of 7,440 as compared with June. Employment outside the United States in July was 149,004, a decrease of 3,295 as compared with June.

The total of 2,812,634 civilian employees of the Executive Branch reported for July 1972 includes 2,468,423 full time employees in permanent positions—a decrease of 37,265 from the preceding month of June.

Legislative and judicial branches

Employment in the Legislative Branch in July totaled 33,998, an increase of 307 as compared with the preceding month of June. Employment in the Judicial Branch in July totaled 8,281, an increase of 38 as compared with June.

Disadvantaged persons

The total of 2,854,913 reported by the Committee for July includes 61,112 disadvantaged persons employed under Federal opportunity programs. This is an increase of 7,692 over June due to the hiring of temporary summer aids.

In addition, Mr. Speaker, I would like to include a tabulation, excerpted from the Joint Committee report, on personnel employed full-time in permanent positions by executive branch agencies during July 1972, showing comparisons with June 1972, June 1971 and the budget estimates for June 1973:

FULL-TIME PERMANENT EMPLOYMENT

Major agencies	June 1971	June 1972	July 1972	Estimated June 30, 1973 [1]
Agriculture	84,252	82,511	81,320	83,400
Commerce	28,435	28,412	28,172	29,700
Defense:				
Civil functions	30,063	30,585	29,856	31,300
Military functions	1,062,741	1,009,548	994,011	1,005,800
Health, Education, and Welfare	104,283	105,764	105,946	99,500
Housing and Urban Development	16,030	15,200	15,164	16,000
Interior	57,570	56,892	56,166	56,900
Justice	42,662	45,446	45,572	46,300
Labor	11,352	12,339	12,374	12,600
State	23,398	22,699	22,715	22,800
Agency for International Development	13,477	11,719	11,486	11,800
Transportation	68,482	67,232	66,099	69,200
Treasury	90,135	95,728	95,600	99,200
Atomic Energy Commission	6,920	6,836	6,781	6,900
Civil Service Commission	5,324	5,260	5,259	6,000
Environmental Protection Agency	5,959	7,835	7,887	8,500
General Services Administration	38,076	36,002	35,708	39,400
National Aeronautics and Space Administration	29,478	27,428	27,253	26,800
Panama Canal	13,967	13,777	13,651	14,000
Selective Service System	5,569	5,791	5,759	6,100
Small Business Administration	4,004	3,916	3,829	4,000
Tennessee Valley Authority	13,612	14,001	14,000	14,000
U.S. Information Agency	9,773	9,255	9,285	9,400
Veterans Administration	158,635	163,179	164,241	174,100
All other agencies	31,333	33,499	33,533	34,600
Contingencies				5,000
Subtotal	1,955,530	1,910,854	1,891,667	1,933,300
U.S. Postal Service	564,782	594,834	[3] 576,756	618,500
Total [2]	2,520,312	2,505,688	2,468,423	2,551,800

[1] Source: As projected in 1973 budget document; figures rounded to nearest hundred.

[2] Subject to revision.

[3] July figure excludes 2,901 disadvantaged persons in public service careers programs as compared with 3,250 in June.

UNSUBSIDIZED HOUSING PROGRAMS

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. HANNA. Mr. Speaker, the claims of the incumbent administration notwithstanding, the Nation's accomplishments in meeting the housing needs of our people have not been without severe problems and some pain. Not the least of these has been the exposure of the inadequacies of certain of our Federal housing programs.

An article in the August 1972, edition of the Mortgage Banker states very succinctly, yet quite adequately, the fears and concerns I have both felt and expressed from time to time. I commend to my colleagues Mr. Jackson's observations as to the efficacy of the retention within HUD of the Federal unsubsidized housing programs:

UNSUBSIDIZED HOUSING PROGRAMS SHOULD BE SPUN OFF FROM HUD

(By Philip C. Jackson, Jr.)

The Mortgage Bankers Association (MBA) is convinced that the Federal Housing Administration's unsubsidized programs cannot be sustained as part of the operations of the Department of Housing and Urban Development offices where they must compete with subsidized housing and community development programs. The unsubsidized programs can be managed more effectively—to the benefit of all parties involved, including HUD—if separated within HUD or spun off in a federally chartered, private, and mutually-owned corporation. MBA has given this matter serious study and consideration.

The prevailing concern over the future course of subsidized housing programs of FHA ignores the persistent decline of FHA's unsubsidized programs. Yet, the unsubsidized programs, specifically the mutual mortgage insurance (MMI) programs, have served this nation well for nearly four decades. These programs helped lift a seriously depressed industry off the ground in the thirties. They provided the base for the nationwide mortgage market that developed in the postwar years and contributed most significantly to the task of catching up with the massive housing shortage that faced the nation in 1945. They provided a vehicle attractive to borrowers because of the low borrowing cost, and to investors because of the protection of insurance and assurance of standard appraisals, inspections, and underwriting procedures. Throughout its entire history, the mutual mortgage insurance program was privately-oriented and supported by private lenders. Throughout its entire history, premiums and fees have more than covered operating expenses and losses under the MMI program.

Despite this unqualified success, MMI programs are falling into disuse. The evidence is clear. More and more builders of unsubsidized homes, and sellers of existing unsubsidized homes, are having difficulty in participating in the FHA system because of mounting delays and complexities in its underwriting process. This process is not an even swap between FHA and conventional mortgage markets. When builders and sellers refuse to "go FHA," they cut off many low-income families from the housing market and reduce the flow of funds into local market areas. Conventional lenders, then, have less competition and are free to charge higher interest rates.

NEW EMPHASIS IS GIVEN SUBSIDIZED HOUSING

As the Secretary of Housing and Urban Development has stated on numerous occasions, this difficulty is an outgrowth of the dual role FHA has been required to play as an insurer of credit-worthy mortgage loans ***and*** **as** the vehicle through which housing subsidies to the poor have been distributed. As a result, FHA has been unable to play either role well.

An unsubsidized system of mortgage insurance can rely on the fact that most home purchasers are sound financial risks, knowledgeable of the facts of the real estate market and able to conduct real estate transactions in a sound manner. In writing insurance for such a market, it should be possible to provide prompt service with a minimum of administrative overhead and paper work.

In contrast, the subsidized market is characterized by uninformed buyers motivated by a desperate need for shelter. Purchasers not only need assistance in the costs of housing, but also training in the techniques of personal financial management and the preservation of the real estate. Due to the lack of dependable market data, appraisals are made with difficulty under these programs. All of these factors make processing an application and servicing a loan complicated, expensive, and time consuming.

As policy has developed, HUD has been forced to place its primary emphasis on the subsidized sector of the market. As the distributor of federal housing subsidy funds, HUD has the responsibility of assuring that they are properly and effectively administered. Further, the successful administration of housing subsidy programs had direct impact on the broad responsibility of the department for community development.

The question then moves another notch forward: Can a system be devised which would retain the unsubsidized market, mortgage insurance function within HUD and still be workable? Our industry is working with HUD Commissioner Gulledge on revisions in procedures with this goal in mind. Among other features, the revisions would place increased reliance on outside fee appraisers and mortgagee analysis of credit requirements.

Yet, even if these changes prove successful in improving the quality of service to the unsubsidized buyers and sellers, they would not change the fact that market programs will continue to be the stepchild of the department—eating the leftovers after the administrative requirements of the subsidized programs have been satisfied. Furthermore, the unsubsizided programs will continue to be burdened by the legislative process which controls appropriations for personnel and authorizations for insurance activity.

MUTUAL MORTGAGE INSURANCE STILL NEEDED

Some have pointed with satisfaction to the reduced role of mortgage insurance in the private market as evidence that government participation is no longer needed in this field, and that non-government-sponsored private sources are now adequately and competently serving this function. True, the sustained period of inflating real estate values since 1935 has finally encouraged supervised lenders to enlarge maximum permissible loan-to-value ratios. The success of these programs does not mean that FHA mutual mortgage insurance has out-lived its mission of broadening—both economically and geographically—the nation's housing market.

The FHA system offers the one effective means so far devised for providing a nationwide flow of mortgage funds. The Federal Home Loan Bank System, despite its participation program and the operation of the Federal Home Loan Mortgage Corporation, cannot do it. The commercial banking system, without the backing of FHA insurance, cannot do it. Life insurance companies have found FHA insurance necessary for nationwide lending. Only substantial and unlikely changes in federal and state laws could lessen the national market's dependence on FHA.

Finally, it is essential that the FHA mortgage insurance system exist as an adjunct of the private mortgage market with ample reserves (the Mutual Mortgage Insurance Fund) and secondary financial facilities (the Federal National Mortgage Association) to withstand a period of sharp or prolonged adversity.

BOLD NEW STEP NEEDED

If it is concluded that a continuing, self-sustaining federal system of mortgage insurance is needed, the question then becomes: What changes, if any, are necessary in order to make it more effective? What is needed is not a revision within HUD, but a bold, new step forward to create an organization that has a primary goal to improve and expand the present market-oriented system, and will find more economical ways to perform present functions. One obvious way to create such a new organization would be for the Congress to charter a new federal mutual mortgage insurance corporation. This corporation may remain subject to the general supervision of the Secretary of HUD, as national banks are subject to the supervision of the Comptroller of the Currency.

The corporation may be controlled by a broadly representative board of trustees appointed by the President. The capital for the corporation initially should be derived from a transfer and continuance of the existing $1.4 billion in reserves of the FHA mutual mortgage insurance fund. This would provide a reserve sufficiently large to be an adequate base for expanded operations. Thereafter, the affairs of the corporation should be carried by the fees and premiums charged participants. The charter should provide that the reserves shall be invested in such obligations as are legal investments for Federal Reserve Banks. The corporation should be subject to all of the requirements of the civil rights legislation applicable to other private financial institutions.

HUD SPECIALISTS NUCLEUS OF PRIVATE CORPORATION

The management and staff of the new mutual corporation would operate under the direction of the trustees. The initial employee nucleus might be derived from those personnel now in HUD having special training and skill in the underwriting and appraisal processes. Adequate provision for continuing retirement, tenure, and fringe benefits similar to that available under Federal Civil Service should be available to those employees who desire to transfer. Thereafter, additional staff would be added according to the current or future needs of the corporation's activity.

The operational goal of management should be to build a highly competent team of experts in the skills of underwriting and appraisal to serve the interests of their policyholders and participants. In addition, the same team may, by contract, serve the department for appraisal, underwriting, construction analysis, and engineering functions. Further, the corporation should be able to contract to employ its special skills to liquidate foreclosed properties acquired by HUD or other agencies of the federal government which acquire private housing through the operation of various laws.

The proposed changes aim to:

1. Make housing available at lower cost to a larger number of American families.

2. Reduce the level of federal expenditures by removing one of the current functions and, as a consequence, lowering the number of federal employees.

3. Make the federal unsubsidized mortgage insurance system more responsive to current demand by eliminating imbalances attendant to the legislative process.

4. Provide HUD with a specialized team of experts in appraising, credit underwriting, and construction analysis, thus enabling the department to concentrate on its much more difficult responsibilities of human relationships and urban development.

5. Avoid confusion between welfare- and market-oriented functions, each of which requires specialized talent and training.

There is widespread support for these constructive proposals. After 40 years of changes in the fiscal and social environment, FHA should face this natural evolution. It would be a giant step forward for the nation's housing programs.

NEWS BULLETIN OF THE AMERICAN REVOLUTION BICENTENNIAL COMMISSION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. WHITEHURST. Mr. Speaker, I am inserting in the Record the August 21, 1972, edition of the news bulletin of the American Revolution Bicentennial Commission—ARBC. I take this action to help my colleagues be informed of actions and developments across the Nation preparing for the 200th anniversary of our country in 1976. The bulletin is compiled and written by the ARBC Communications Committee staff. The bulletin follows:

Bicentennial Bulletin

The National Association of Negro Musicians held its annual convention in New York City recently. Keynote speaker Dr. Walter F. Anderson, director of music programs for the National Endowment for the Arts, suggested a national archive of the works of black musicians and composers. Dr. Anderson stated that the nation's Bicentennial celebration would be an appropriate time for such recognition of the musical contributions of black Americans.

The Florida Bicentennial Commission adopted a half-million dollar budget for 1972–73. Largest expenditures are grants of $130,000 to Third Century USA and $100,000 to Interama. Lt. Gov. Tom Adams, Chairman of the Florida Commission, said $42,230 has been allocated as "seed money to be disbursed to 16 scattered communities on a matching fund basis for local Bicentennial projects. The purpose of this money is not to stage a celebration—we would oppose such use of the funds—but to stimulate the development of meaningful programs."

Kenneth Fulk, Secretary of the Iowa ARBC, reported that the State Commission has set up preliminary planning organizations in all but two of Iowa's 99 counties. Fulk said when the Commission receives federal funds, an additional staffer will be hired "to go to the schools and colleges. We really want to get students involved; after all this fall's freshmen are the class of '76."

Fort Frederick State Park in western Maryland recently held a two-day Bicentennial preview with a three-hour re-enactment of authentic Revolutionary War drills, drums, music, musketry and crafts by the First Maryland Regiment. In the afternoon other demonstrations that typified colonial life in Maryland were presented.

Hon. George F. McDonald Jr., Chairman of the Rhode Island Bicentennial Commission, announced at a press conference that the Commission's plans to restore the Old State House on North Main Street in Providence are nearly complete. The building, built in 1762, witnessed gatherings which included George Washington, Rochambeau and Lafayette, as well as the adoption of the State's Act of Independence on May 4, 1776.

The Nebraska ARBC recently elected officers, and State Senator Wayne Zeibarth was chosen chairman by the 15-member Commission. . . . Gov. George Wallace of Alabama has appointed Bobby Bowick as director of the Alabama ARBC. . . . Gov. Wendell Ford of Kentucky recently announced that Charles J. Hellmann has been appointed executive director of the state's Bicentennial Commission.

Hawaii Bicentennial Chairman, Thurston Twigg-Smith, wrote the ARBC that receipt of the State Commission's federal grant "is really a lifesaver. It's exactly the boost we need." With the money, the Commission intends to open a permanent office and create a staff to assist in planning and implementing celebration projects.

The City of Lansing (Mich.) is proposing a Michigan Bicentennial Park, a historical-cultural-educational-recreational complex occupying 130 acres of Grand River waterfront, to the State ARBC. "The entire thrust of the Michigan Bicentennial Park concept is to provide a dynamic, exciting urban park in the center of the state capital for the people of Michigan," said Clarence H. Rosa, design committee chairman for the city's ARBC Committee.

Ann Hawkes Hutton, ARBC Commission Member and author-historian of Bristol (Pa.), has been included in the 37th Edition of *Who's Who in America*. Mrs. Hutton, who is also chairman of the board of the Washington Crossing Foundation, is recognized for her definitive research on the year 1776.

After receiving a federal grant check, P. Bradley Morrah, Chairman of the South Carolina ARBC said, the Commission hopes to be "self sustaining, without any additional burden to the taxpayer" for the state's part in the Bicentennial. He further stated that the Commission plans a "grand celebration" involving all the agencies in the state, counties and even individual commissions in the larger cities.

David L. Davies, Chairman of the ARBC of Oregon, announced that the state's federal grant will assist in the establishment and operation of the State Bicentennial Commission. Davies pointed out that the Nation's 200th anniversary will be centered on individual and local activities. "Oregon with its history and outstanding local leadership record can well be in the vanguard of the states in the observance of the Bicentennial in 1976."

On July 25th, the National Association of the Physically Handicapped, Inc. resolved: "Whereas, 1976 will mark the 200th 'Birthday' of the United States of America; and whereas, plans are currently being formulated for a uniquely diversified celebration, not just in one particular U.S. city, but scattered across the country with one city in each state being selected to develop a Bicentennial Park Project: and Whereas, many of these proposed projects include great potential for the redesigning and rebuilding of city environments which are more compatible with human needs; now let it be resolved that NAPH join with other organizations of and for the handicapped in making 1976 the target year on which all of our needs and rights will have been recognized and responded to by a society which will once and for all include *every* individual in America within the concept of a Barrier-Free Design."

John Conrad, Chairman of the North Dakota ARBC, reports that the money from State's federal grant will be used for informational materials and guidebooks encouraging local involvement in the Bicentennial.

SECRETARY OF THE NAVY WARNER SPEAKS AT THE KEEL-LAYING OF THE U.S.S. "VIRGINIA"

HON. THOMAS N. DOWNING

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. DOWNING. Mr. Speaker, on the first day of our recess just concluded, the Secretary of the Navy, the Honorable John W. Warner, led a most distinguished group of visitors into the First Congressional District of Virginia with the high purpose of authenticating the keel of the U.S.S. *Virginia*, the sixth vessel of the U.S. Navy to bear the name of our State.

Those of us who shared the occasion at the Newport News Shipbuilding & Dry Dock Co. were deeply moved by the eloquence of Secretary Warner's remark which is inscribed upon the authenticated plate of the vessel:

> My mission is to pledge to bring a generation of peace to my children, to your children, and hopefully to children the world over.

The keel was authenticated most appropriately by Secretary and Mrs. Warner's 13-year-old daughter, Virginia.

We are proud to have the opportunity to build another great vessel for our peacetime Navy in Newport News.

We are proud indeed to have the opportunity to share the feelings of Secretary Warner.

I am proud to include them in the Record so that all of the Members might share the opportunity which was ours on a sunny August day:

Remarks by Honorable John W. Warner, Secretary of the Navy—Keel Laying of U.S.S. "Virginia" (DLGN–38), Newport News, Va., Saturday, August 19, 1972

Greetings and amenities:

Admiral Rickover's eloquence has set the tenor—for today's occasion—he has ordered the helmsman to set a course that will pay honor not only to our great state but to the ladies of Virginia.

I fervently hope that the thundering tide of women's lib will not wash out to sea the old traditions emanating from ancient times whereby it is the woman who imparts to a ship its spirit. Mariners facing the unknown perils of a vast and trackless sea, put their faith not only in a stout ship but in that unseen guiding spirit provided by ladies who participate from the laying of the keel to the sponsor's thrust of the bottle to slip her from land to sea.

My current service to the Navy as Under Secretary and Secretary is nearing the four-year mark and I daily pause to pay respect to those who have entrusted me with the responsibility of being "top hand" in the Navy. It has been not only an honor for me but for my family, particularly today when my daughter inscribes her initials in the keel of this great ship.

You may fairly ask of me why should a girl of but 13 be the one to impart her spirit to this ship. My message to my daughter and to her generation is simple. It is to tell her and all the children throughout the free world that this ship will protect them only if they protect it.

I would also like to share with you a story I told my daughter about one of the most memorable events of my life—my visit to the Moscow summit with the President of the United States.

There, in full view of the citizens of the Soviet Union, he laid a wreath at the cemetery which commemorates the brave people who died during the siege of Leningrad in World War II. He told the people of the Soviet Union that he saw at the cemetery a picture of a 12-year-old girl. She was a beautiful child. Her name was Tanya. The pages of her diary tell the terrible story of war. In the simple words of a child, she wrote of the deaths of the members of her family. "Geine in December, Grannie in January, Leka next, then Uncle Vasya, then Uncle Lyosha, then Mama and then the Savichevs," and then finally, these words, the last words in her diary, "all are dead. Only Tanya is left."

Unlike Tanya's generation, we in this country have been fortunate, by the grace of God, to have been free of foreign invaders for many generations.

One reason for this blessing has been the high seas which surround our island nation—oceans which have made it impossible for anyone to attack us, oceans which have given us in the past the time needed to build our strength when danger has threatened.

The defense of our country has always depended, upon control of the seas. We have listened with comfort and security to their gentle wash upon our shores. We must never allow that lullaby to send us off to sleep.

The oceans no longer provide that protection. Today a danger can come overnight and can come stealthily, hidden beneath the surface of these once friendly seas.

We must carry the message to today's children, to this generation experiencing change now, that leisure without liberty is an empty victory, that idealism without labor and energy betrays rather than serves their hopes for the betterment of mankind.

One of America's most priceless assets is the idealism which motivates its young people. Always have they strived to make this a better world. Today's youth is an exception only because they seem to be trying harder. They long to divert their labor and energy from material pursuits to thoughts, dreams and creation for the betterment of all mankind.

We don't fault this goal; in fact, in secret many of us have similar dreams. We don't wish to dampen these dreams, but our experience has shown that now you should gain an awareness of the responsibilities you must soon shoulder.

One of these responsibilities—of co-equal importance to any other—you must assume is that of participating in national defense. Some may elect to serve in uniform, others may elect to work in great shipyards such as this one, where for generations the hands of Virginians have built the finest ships to be found anywhere in the world, and others may elect to support national defense through indirect means. But all must be aware and all must shoulder the responsibility.

I view today's ceremony as a passing of the mantle of responsibility from the sponsor of the last ship to bear the name Virginia to my daughter and her generation. As this new generation takes up its responsibilities to work toward a more peaceful world, let us think of Tanya and the other children throughout the world who have not enjoyed the blessing of freedom we have known so long in this country.

As President Nixon has stated, let us do all that we can to insure that no other children will have to endure what Tanya did and that your children and ours, all the children of the world can live their full lives together in friendship and in peace.

As the great mass of the next U.S.S. Virginia rises above her keel, aided by skills and talents of our finest craftsmen, we shall begin to see another instrument of peace cloaked in spartan grey. We welcome her birth today.

LONGS WIN FREEDOM OF INFORMATION SUIT AGAINST IRS

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. MOORHEAD. Mr. Speaker, among the many cases involving the Freedom of Information Act (5 U.S.C. 552) that have come to the attention of the Foreign Operations and Government Information Subcommittee is that of Mr. and Mrs. Philip H. Long of Bellevue, Wash. and their long struggle with the Internal Revenue Service bureaucracy.

The Longs' case, the subject of discussion with IRS officials who testified in April before our subcommittee during hearings on the administration of the Freedom of Information Act, has now been decided by the Federal court in Seattle, Wash., and the information requested—the IRS "closing agreement handbook"—has been turned over to them by order of the court.

The struggle over this information consumed 8 months and vast expenditures of time and money both on the part of the plaintiffs and untold sums of U.S. taxpayers' dollars in IRS administrative and Justice Department attorneys' time in fighting the public's right to know. Yet this case is but one of many pursued by the Longs in their determined efforts to force the IRS to live up to the law of the land. I commend these outstanding Americans for their courage and perseverance. They are fighting the battle of many millions of our fellow citizens against the secrecy-minded bureaucrats of the IRS and other executive agencies.

Mr. Speaker, at this point I include an article by the distinguished tax writer, Mr. E. Edward Stephens commenting on the court decision in the Long case, appearing in the Washington Star-News for August 27, 1972:

COUNSEL FOR THE TAXPAYER—IRS LOSES A ROUND

(By E. Edward Stephens)

Dear Counsel:

In past columns, you have exposed the Internal Revenue Service's failure to comply with the 1967 Freedom of Information Act. Have any taxpayers gone to court and forced IRS to furnish documents?

Yes. On Aug. 9, Philip H. Long and his wife, Susan, chalked up a glorious victory in the U.S. District Court at Seattle, Wash.

It was a day of emancipation for all American taxpayers. IRS warriors were ordered to appear before Judge William T. Beeks, to be told what they must do to get in step with the Freedom of Information Act, now in its sixth year of operation.

This is the first time taxpayers have prevailed over the deft maneuvers of IRS and Justice Department lawyers in a freedom-of-information case. They did it without counsel too.

At a cost topping $10,000, Phil and Sue have mastered the Freedom of Information Act. Contact them at 4885 Lakehurst Lane, Bellevue, Wash. 98006, if IRS turns you down for requested information. These courageous, unselfish people will tell you what to do. No charge.

For Phil and Sue, it's been a long, hard struggle. Their original request for the desired documents was made a year and 8 months ago. IRS and Justice Department attorneys shot the works in an all-out drive to keep the information door closed.

The Longs stuck to their guns. With their backs to the wall, they filed some 300 pages of legal briefs and memoranda to establish their right to know.

The Freedom of Information Act was passed to force bureaucrats to disclose, upon request, nearly every kind of information they compile at public expense. But IRS officials virtually ignored it. They went right on brushing off taxpayers who dare to ask for a peek at manuals, statistics and similar documents that the Service stamps "for internal use only" or "for official use only."

IRS disclosure staff members, headed by Donald O. Virdin, have flaunted the act so arrogantly that they were raked over the coals last April by the House Foreign Operations and Government Information subcommittee, chaired by William S. Moorhead, D-Pa. The committee's staff director, William G. Phillips, said IRS was the "most flagrant" of all U.S. agencies in violating the act. IRS policies had almost become a "national scandal," he said.

Phil and Sue wanted to examine the IRS "closing agreement handbook." This is a bible used by service employes in negotiating agreements with taxpayers affecting their tax liabilities.

Judge Beeks found that the handbook isn't "solely" related to IRS internal personnel functions, as its attorneys contended. The service must come across, he ruled, because the book "clearly" affects members of the public—taxpayers.

The Longs also wanted to examine audit statistics that IRS had compiled at public expense. For many years, earlier reports of the same kind were prominently displayed on shelves of the Treasury Department library, open to the public. But they were whisked away last March—along with row on row of other statistical reports—when embarrassing figures were published in this column.

The library shelves still are as bare as a night club fan dancer. And that's the way IRS moguls want to keep them. So service lawyers argued that such statistics are exempt from disclosure under the Freedom of Information Act.

But Judge Beeks ordered IRS to hand them over. He said they're "entirely factual" and not "inextricably intertwined" with any IRS policy-making process, as IRS attorneys contended.

Phil and Sue have sent a load of statistics to me. In columns to come, I'll let you in on some secrets that IRS has been keeping from you.

CONGRESSIONAL REFORM

HON. MARVIN L. ESCH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. ESCH. Mr. Speaker, the wisdom of the division of powers in our Constitution between the Executive and the Congress has been continuously reemphasized in history. Unfortunately, as the Federal Government has grown more complex Congress has not equipped itself with the tools necessary to maintain itself as an independent and effective partner in our Federal system. This problem could perhaps be best summed up in a statement by James Madison in 1788. He said:

> I believe that there are more instances of abridgement of the freedom of the people by the gradual and silent encroachment by those in power than by violent and sudden usurpations.

An independent role for Congress has been proscribed because as our federal system has become more complex we have not taken the same care the Executive has to modernize its functions. The result is that Congress is unable to handle the new and complex problems which face our Nation.

Five years ago I wrote a paper entitled, "The Need for Reform." In it I said:

> If Congress is going to remain a viable force in our federal system, then it must squarely face the need for change. It must fill the void left by its failure to exercise effectively its oversight obligation. It must adopt reforms which make it physically and structurally possible to review what administrations have done with the laws it has passed. It must be willing to take a long hard look at its rules and traditions to determine which ones are inconsistent with the times and then be willing to adopt the necessary changes.

Since that time, myself and a number of my colleagues, have worked to bring about reforms to meet these challenges. Our efforts have centered on five areas: First, information sources for Congress; second, congressional structure and staffing; third, definition of the congressional role in warmaking powers; fourth, definition of the congressional role in budget and financial control, and fifth, campaign financing reform.

INFORMATION SOURCES FOR CONGRESS

In many legislative areas the only source of information for Members comes directly from the executive. Obviously, if Congress is to play a viable role in the making of policy and in the drafting of legislation it must develop independent sources of information. This is especially critical in technological areas where many Members of Congress have a distinct lack of expertise. This problem was never better demonstrated than with recent consideration of the supersonic transport. Proponents of the SST claimed that the supersonic plane would create few if any environmental problems. The opponents of the SST claimed that the proposed "dodo bird" as many of the environmentalists liked to call it, would wreak havoc on our ecosystem through massive amounts of noise and air pollution. The controversy involved complex scientific considerations, and Members of Congress were besieged by information from both sides of the issue. While much of this information was helpful, it would have assisted many Members of Congress to have an independent analysis of the technological implications of the plane. In more generalized issue areas, such as the energy crisis which faces our Nation today, Members of Congress could truly benefit from an independent technological assessment of alternatives in resolving the competing demands of energy and ecology. The solution which I have supported in the last few Congresses and which passed the House during this past session is for the creation of an Office of Technology Assessment. The OTA would operate in a similar manner to that of the Congressional Reference Service and the Government Accounting Office which provides independent sources of information for Congress in research areas, and in the case of the latter, a postaudit of Federal programs.

A second area of concern relates to the congressional role in determining our Federal budget. The record of Congress on budgets in the last 15 years has been consistently poor. Congress never once takes the time to consider the budget as a package. Members of Congress have very little information on a comparative basis of budget categories. How can Congress reasonably expect to deal with the budget and to deal with changing national priorities if it does not consider a comprehensive picture of the budget? It would be helpful to Members of Congress to have the budget computerized so that comparative analysis can be made on categories, much the same as is done within the departments in the executive.

Congressional information on oversight of Federal programs could also be improved. The Government Accounting Office which performs this function for the Congress has been recently reorganized. While the quality of reports done by GAO has been high, it has been consistently limited in staff. I believe this is unfortunate as the basis for an improved congressional information flow is there. The need to upgrade this system as we go into the 1970's and 1980's remains an important task.

CONGRESSIONAL STRUCTURE AND STAFFING

The manner in which Congress organizes itself can have a significant impact on how it is able to respond to the issues facing it.

One of the most detrimental aspects of the present structure is that which bases committee chairmanship on seniority. There are some 16 chairmen of key committees in the House and the Senate over 70 years of age. While age is not necessarily an indication of competency, many instances of roadblocks to significant national legislation can be attributed to the seniority system during this and other sessions. A more rational system would require a vote of confidence in each session by the chairman's colleagues to insure that the person who can handle the job serves as chairman—a system that Republicans have adopted for choosing their ranking members on each committee.

A second problem relating to congressional structure is the limited availability of minority staff on the committees. Most of the work of the Congress is done in the committee and much of that work, particularly in the area of analyzing complex legislation, is carried on by that staff. It seems illogical to me that the minority party is not guaranteed adequate staffing.

If Congress is to be truly responsive to the people then it must open up its deliberations to the people. The first steps at this were taken in the Legislative Reorganization Act of 1970. One section of that act initiated an easier procedure for requesting recorded teller votes on the floor of the House, a procedure which had heretofore allowed the Members to hide their votes under a layer of parliamentary subterfuge. Several years ago my own Committee on Education and Labor, became the first committee in the Congress to make all of its hearings open to the public. This included the markup sessions where legislation is actually written. I believe all the committees should undertake such a reform so that citizens are better able to find out how their Representatives voted on any given legislation.

A final question relating to congressional structure concerns the rule which allows Members of Congress to revise the substance of their remarks in the daily CONGRESSIONAL RECORD. I believe it is important that we limit this practice to grammatical and stylistic changes so that the substance of what is said on the floor or in committee will be an accurate record.

REASSERTING THE CONGRESSIONAL ROLE IN WARMAKING POWERS

It has become especially clear with the Vietnam conflict that Congress' role in war-making powers has been greatly reduced from that originally prescribed in the Constitution. During the last two sessions of Congress I, along with several other Members, have proposed legislation which would limit the ability of the President to get us into armed conflicts overseas without congressional assent. Those who have supported the President's actions have claimed that he has some mystical implied powers which give him the right to, by himself, take this country into war. In our representative system, foreign policy decisions, especially the decision to go to war, should be made on the broadest possible base. If this is not done in future conflict situations, we can expect to receive the same indication that our representative system is breaking down which was so obvious during the height of the conflict in Vietnam. During this session, the Senate was able to pass a measure which would prohibit the President from sending unauthorized troops overseas without congressional assent, unless it could be shown that they were protecting American lives and property. This legislation gives the President adequate emergency powers so that he could handle emergencies while Congress is acting. However, it limits his ability to carry on extended conflicts. Many of the opponents of this legislation say that Congress cannot act rapidly enough in crisis situations. It has been demonstrated to me time and again that this characterization is patently untrue. When Congress needs to act, it can act.

The House has also passed war powers legislation during this session but clearly the intent of the manager of the House bill was to prevent the issue from being seriously considered. I am hopeful that during the next session of Congress we will be able to pass a meaningful war-powers bill.

BUDGET AND FINANCIAL CONTROL

The divergence between congressionally established perogatives in budget and fiscal matters and the level of congressional activity in this area has been extremely great. First, this has been caused by the overall level of Federal spending. This year the budget will exceed $240 billion. The budget document runs over 1,100 pages and is divided into 14 separate appropriations measures. At no time in congressional consideration is the budget ever examined from a comprehensive point of view. There is no cost comparison being done. How can we talk of seriously restructuring our national priorities when Members of Congress cannot really sit down and consider alternatives?

The ability of individual Members of Congress to become involved in tax and appropriations measures is also limited. Most authorities on the budget agree that subcommittees in each House make the preliminary decisions which are assented to for the most part by the full Appropriations Committee and then are given minimum consideration on the floor. This means that the members of the Appropriations Committee hold a great deal of personal power on the budget. A similar position is present on tax matters with members of the House Ways and Means Committee and the Senate Finance Committee.

Congress still works through a two-step budgeting process which requires authorization before funds can be appropriated. The folly of this system is best demonstrated through the record of education appropriations and authorizations. In fiscal year 1971, the level of authorized expenditures for Federal programs in education amounted to over $11 billion. In the same time period, however, the appropriations for those programs amounted to only $4 billion.

In recent years, the President has felt it necessary to impound appropriated funds to help balance budget expenditures. This takes away congressional perogatives in the appropriations area. Impoundment of funds has been criticized from many quarters. However, Members of Congress should realize that part of the responsibility for wise budgeting falls on their shoulders. In March of this year I introduced the Fiscal Responsibility Act of 1972.

H.R. 15509 would make a start at reorganizing the congressional appropriations process and other budgetary procedures. Congress has traditionally been very late in passing appropriations bills. Last year the last appropriations bill was passed 252 days into the fiscal year. Although this budgeting procedure can be patched up through supplemental and continuing appropriations, these measures are hardly adequate to fit the needs of our system. The first title of the Fiscal Responsibility Act reestablishes the fiscal year to coincide with the calendar year. Basically, this would allow Congress 12 months to consider the budget instead of the 6 it now has. The second title of the bill requires that at the beginning of each budgetary cycle, Congress establish an expenditure limitation taking into account all the competing priorities in the budget. This would help Congress to consider the budget as a financial document rather than 14 separate appropriations bills. The third title of the Fiscal Responsibility Act regulates the President's ability to impound funds. It establishes two types of impoundments—one a pro rata or percentage impoundment allowing the President to impound funds in a department or agency on a percentage basis. If this percentage funds cut is applied to all bureaus in that agency or department equally, the President is required to notify the Congress of his impoundment. Either House of Congress then has 60 days to disagree with that impoundment. Congressional action will force him to cease the impoundment. If the President wants to target his impoundment against a specific program or agency, he must notify the Congress in advance. Either House then has 30 days to disagree with this impoundment. The final title of this bill calls for a comprehensive year-long study involving the leadership of both Houses of Congress as well as the Comptroller General of the United States in looking at the congressional budgeting process. The study should produce alternatives to the present inadequate system. One additional provision of the bill is an indemnification clause which requires that after the Federal Government has established a payment schedule, that it must keep to that schedule or face the burden of paying extra costs incurred as a result of the delay. The Fiscal Responsibility Act obviously will not solve all of our Federal problems relating to budget and fiscal problems. However, I think that it is a step in the right direction.

CAMPAIGN FINANCING

Access to the political system is an important aspect of a representative government. The 1970 election proved to me and to many other Members of Congress that the cost of political campaigns was jeopardizing the potential for participation for most Americans.

While realistic campaign guidelines have yet to be established the first step has been taken by the Campaign Reform Act of 1971. The act limits the amount that can be spent on the electronic media in political campaigns. As one who has worked many hours for the first reform in financing of political campaigns since the Fair Campaign Practices Act of 1925, I was particularly pleased by the passage of this legislation. It also requires detailed reporting of expenditures so that an elected official's campaign expenditures become a matter of public record. I have favored opening campaign finances to public view for all of my public life. Denying the public access to information on campaign financing seems somewhat analogus to the come-ons used by carnival barkers at the county fair. The public interest will be served if during this first election with new reporting requirements, they inform themselves on their candidates financing and press for enforcement of the provisions against those who are not complying with its requirements.

The Tax Reform Act of 1971 made a step toward involving more citizens in the political process. Beginning with this election, taxpayers can deduct up to $50—$100 for couples—or count up to $25—$50 for couples—as a tax credit on their income tax returns for political contributions. This tax benefit will encourage wage earners to get involved in campaigns.

All of the ideas discussed in this paper set as their goal a more responsive and responsible government. While many of these reforms will move Congress toward that goal, the key in my mind to a more responsive and responsible government is based on continued citizen involvement. Deeper citizen involvement in all our congressional districts would insure that Members of Congress could not do their job without consulting their constituency. It would insure that innovative legislative proposals do not become lost in an antiquated congressional structure. It would insure that the budget document would be a financial plan of competing priorities, and that that document was studied carefully and intensively. It would insure that Congress come to grips with the question of crisis-management. In short, a greater degree of citizen involvement would insure that Congress begins to reestablish the responsibilities they have let slip through their hands to the Executive.

In the Youngstown Sheet & Tube case, Justice Jackson admonished the Congress that the tools belonged to the man who can use them. The wisdom of Justice Jackson applies to all powers of Congress.

DRUG ADDICTION

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. HARRINGTON. Mr. Speaker, few issues facing us today are the subject of as much concern, and as much misinformation, as that of drug addiction. Everyone agrees that we ought to do something about the problem, but much of what is done is misguided because it is based on false premises about the situation. There is an organization in Massachusetts which is doing a good deal to correct this situation by circulating correct and thoughtful information about drug addiction and its attendant problems. It is called the Committee for a Sane Drug Policy and the set of questions and answers attached to these remarks are an example of the work this committee has been doing to advance public understanding of drug addiction and the role that Government ought to play in combating it:

QUESTIONS AND ANSWERS ON "THE BRITISH SYSTEM"

Question.—What is "the British system" for treating heroin addiction?

Answer.—In Britain addicts can get daily heroin from the government. Official clinics dispense a range of services—medical care, detoxification, encounter groups, family casework—but they get almost all addicts under care by starting where they're at—on the needle. Addicts are seen weekly and given a prescription for their drug—injectible heroin, injectible methadone, oral methadone, or a combination of these. The prescription can only be filled at a pharmacy on a daily basis. Doctor and patient together decide which form of treatment the patient can make use of.

Q.—What are the goals of the British system?

A.—The ultimate goal in treating the addict is to help him to become drug free.

Until that happens and in the cases where it doesn't, the goal is to help him function as normally as possible and to keep him under medical care to minimize the secondary complications of addiction such as overdose reactions and infections from unsterile needles. The goal for society is to avoid addict-induced crime and to prevent the rise of a black market in addictive drugs.

Q.—Is this system a new development?

A.—No, the British have always handled addiction as a medical, not a criminal problem. When drug control legislation was first enacted in the 1920's, doctors were given wide discretion to treat addicts as their professional practice dictated. Such treatment has consistently included the provision of addictive drugs. Since 1968, however, prescription of heroin for purposes of maintenance has been confined to special government clinics and to certain hospitals.

Q.—How large a population of addicts does Britain have?

A.—Under 3000.

Q.—Why have some people claimed that "the British system" is a failure?

A.—During the 1960's the rate of addiction in Britain began to climb alarmingly. Between 1958 and 1968 the number of persons known to be receiving any kind of addictive drug rose from 442 to 2,782. The number receiving heroin rose during these ten years from 68 to 2,240 and their average age dropped until 33% were teenagers. Investigation revealed serious over-prescription by a small handful of doctors with the resultant surplus of heroin creating a "gray market" and many new addicts. Concern about this problem led the British to restrict prescription for addicts to newly established government clinics as of April 1968 and prompted many observers abroad to conclude prematurely that the British approach had failed. In 1969, however, the rate of addiction slowed and in 1970 the number of addicts seen at the clinics actually decreased [1]—and this despite improved reporting procedures.

Q.—Are there some addicts unknown to medical authorities?

A.—Yes, but studies have shown their number to be small.

Q.—Isn't methadone a preferable drug for maintenance?

A.—Yes, methadone, a synthetic relative of heroin, is longer acting and needs to be administered only once a day instead of every 4 to 6 hours. Accordingly, British doctors try to persuade addicts to switch drugs, but if a patient is managing well on heroin, he is generally permitted to remain on it. The number of patients receiving heroin, either alone or in combination with other drugs, has been reduced from 81% in 1968 to 31% in 1970. Contrary to the practice in this country, however, three quarters of the addicts on methadone choose and are allowed to inject it like heroin.

Q.—Does heroin do physical harm?

A.—Unadulterated heroin administered by sterile procedures in a tolerance-related dose does nothing injurious to a person already addicted. A study at Lexington Hospital in 1970 of 31 chronic opiate addicts, whose years of addiction averaged 35 years, concluded, "opiate effects *per se* must be differentiated from the medical complications associated with the hectic way of life pursued by youthful heroin addicts. While there is ample evidence that the aberrant way of life followed by most heroin abusers has both acute and chronic medical consequences (i. e.—tetanus, overdose, hepatitis, endocarditis) there is insufficient scientific basis for maintaining that long-term use of opiates—in and of itself—is related to any major medical condition."

Q.—Can persons maintained on heroin function normally?

A.—Yes, other things being equal. Of course many British addicts have severe social and personal problems, including multiple drug use, which limit their functioning. 40% of British addicts are, however, employed. (And one youthful group of 218 addicts receiving intensive services at St. Clement's Treatment Center had an employment record which rose from 10% to an average of 55–56%.)

Q.—Can an addict be stabilized on a given dose of heroin, or will he always crave more?

A.—British doctors do stabilize patients on a set dose and even reduce the dosage gradually in many cases. They admit a lot of "haggling" occurs between doctor and patient over the amount of drug to be given, but patients can usually be persuaded to content themselves with a fixed dose if assured that they won't experience withdrawal.

Q.—Does Britain have a black market in heroin?

A.—There are illegal transactions of heroin in Britain. Addicts do sometimes share or sell some of their own legal supply, although the more skilled and careful prescription in the clinics has sharply reduced the illicit circulation of addictive drugs. There is also a small black market in "Chinese heroin" from Hong Kong. The large scale, organized traffic in narcotics which attracts criminal investment in this country, however, does not exist in Britain where the low price of legal heroin makes competition unprofitable. (A bottle of 100 heroin tablets, worth $1000 on the streets of New York, retails at $2.16.)

Q.—Is there any relationship between British addicts and crime?

A.—Britain remains free of the kind of street crime which has plagued American cities in recent years, in part because addicts don't have to maintain expensive habits by stealing. This does not mean that British addicts are never involved in crime. A study in 1969 of 111 addicts showed that 41% had convictions for non-drug related offenses prior to their first use of heroin. 34% of the 111 reported current involvement in non-drug related crime.[2] Thus, although the provision of heroin may not reform persons disposed to criminal activity, the amount of addict crime in this sample did decrease after the addicts became involved with a clinic.

Q.—Is it illegal for a person to possess heroin without a medical prescription?

A.—Yes. The maximum punishment for illegal possession is seven years and for trafficking fourteen years in jail. In 1970, 226 persons were convicted for unlawful possession of heroin, down 52 from the year before. (6,682 convictions were obtained in 1970 for offenses involving cannabis.)

Q.—Are British addicts ever cured of their drug habit?

A.—Yes, but the number successfully rehabilitated remains small. St. Clement's Treatment Center reported that 86 of 218 patients treated between 1968 and 1970 were taken off drugs altogether and were not using opiates 6 months later. Many of these patients were, however, abusing alcohol, hallucinogens, barbiturates, etc. Britain has not found an answer to multiple drug use by young people.

Q.—Could heroin be legally given to addicts in this country?

A.—Yes. The Federal Comprehensive Drug Abuse Prevention and Control Act of 1970 provides that any research with a drug in Schedule 1 (e.g., heroin) requires registration with the Bureau of Narcotics and Dangerous Drugs and approval from the Secretary of Health, Education, and Welfare and from the Food and Drug Administration. To gain approval, a proposal would have to satisfy various criteria, including the provision of adequate safeguards against diversion of the drug and community support for the project. Proposals would also have to receive state approval. Thus until the idea becomes a lot more acceptable than it is at present, it will remain a difficult and discouraging project for any medical program to undertake.

Q—Have there been proponents for heroin maintenance in this country?

A—Yes. A number of well-documented books advocating legal heroin for addicts have been written, the best known being Alfred R. Lindesmith's *The Addict and the Law* (Vintage Book, $1.95). Groups supporting heroin maintenance have included the New York Academy of Medicine (1955), the Joint Committee on Narcotic Drugs of the A.M.A. and the A.B.A. (1958, 1961), the Council of Judges of the National Council on Crime and Delinquency (1964, 1971), the San Francisco Committee on Crime (1971), Americans for Democratic Action (1971), Committee for a Sane Drug Policy (1971), the Special Committee on Crime Prevention and Control of the A.B.A. (1972), and the new Drug Abuse Council (Washington, New York, 1972). Currently, the Vera Institute of Justice in New York is seeking government approval for a concrete proposal offering a highly structured heroin maintenance program to 300 hard core addicts who have refused or failed in that city's methadone program.

FOOTNOTES

[1] The number of addicts known to the Home Office during 1969 peaked at 2,881. The number actually receiving drugs at the end of the year, however, was just 1466. In 1970 that end of the year figure was reduced to 1430. The 2600 figure often cited in recent reports about English addicts is apparently the approximate number of addicts known to the Home Office during 1970.

TAKING TANGLEWOOD OUT OF THE WOODS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. CONTE. Mr. Speaker, of the many outstanding events that take place in my district each year, one that consistently attracts thousands of delighted visitors is the annual Berkshire Festival of the Boston Symphony Orchestra held in the Music Shed at Tanglewood.

The recently completed 1972 summer season was the most successful ever. More than 257,000 people enjoyed the brilliant concerts given by the Boston Symphony in the unparalleled natural beauty of Tanglewood.

I would like to take this opportunity to applaud the symphony for its high standards of excellence and for the many hours of pleasure it accords its listeners. An article reviewing this past season at Tanglewood appears in today's edition of the Christian Science Monitor and I now include it along with my remarks:

TAKING TANGLEWOOD OUT OF THE WOODS

(By Louis Snyder)

(NOTE.—With bolder and more innovative programming, the Boston Symphony's 35th Berkshire Festival last month chalked up an 18 percent increase in attendance over 1971. Armed with better ecological manners (there was a marked decreased in litter) and a substantial musical curiosity, this year's audiences were obviously delighted to see some of the festival's traditional cobwebs brushed away.)

LENOX, Mass.—Over the vast green expanse of Tanglewood, the morning after the final Berkshire Festival concert doesn't seem to differ much from year to year. Gone are the warming-up sounds of a blossoming student oboist from the direction of Music Center headquarters; no longer faced with large, expectant crowds to please, the groundskeepers who are usually cutting grass and raking paths are out of sight, and bird families that nest in the rafters of the huge Music Shed finally have the place to themselves again.

Looking south through the pines, nothing obscures the serene, Giottesque landscape in which Lake Mahkeenac nestles—a view that admittedly often kept Nathaniel Hawthorne from writing when he spent more than a year within sight of it, here on the former Tappan estate in 1850–51.

On Aug. 21, 1972, the day after the Boston Symphony's 35th Berkshire Festival had ended, the Tanglewood scene, cool but drenched with sunshine, was predictably quiet. Yet only yesterday afternoon, 12,884 people had gathered here for Mahler's Eighth—the climax of a summer of almost unprecedented popularity.

Now the grounds were without as much as a discarded program or an empty picnic box to testify to even one concertgoer's presence. In fact Tanglewood's operations manager, James Kiley, is reported still amazed at the sudden ecological bent of this season's audiences: "Almost nothing to be picked up next day," he is quoted as saying.

AN "UNBELIEVING SQUARREL"

But the return of good ecological manners wasn't the only distinguishing feature of the festival summer of '72, one recalled, as a lone squirrel streaked unbelieving across the deserted lawn. For 24 scheduled BSO concerts, 8 open rehearsals, Tanglewood-on-Parade (an annual day of musicmaking), and Boston Pops at Tanglewood, more than 257,860 arrived to listen.

There were some, too, not included in this figure, who partook of recitals and concerts by Fellows of the Berkshire Music Center, others who crowded the West Barn for productions staged by the two-year-old Music Theater Project, and those who bent an ear to the five contemporary "festival-within-a-festival" concerts presented by the Berkshire Music Center and the Fromm Music Foundation, marking the latter's 20th anniversary.

The grand total attendance represented an 18.5 percent increase over 1971, and as one gazed at the empty, shadowy shed pondering why, the squirrel scampered back bearing an unidentifiable but substantial prize between his teeth.

NEW EXCITEMENT IN AIR

In retrospect, reawakened interest and burgeoning response came as no surprise. Almost from the beginning of this Tanglewood season, except for a few early rain-drenched filled the Berkshire air. A Beethoven weekend, which reunited the whole orchestra for the summer, with retiring music director William Steinberg and director-elect Seiji Ozawa in charge, racked up a count of 26,903 listeners—the Saturday-evening audience for the Ninth Symphony being the largest (14,851) since 1963.

Leonard Bernstein's appearance in a Brahms program drew 13,374 devotees, either of the composer or the conductor or both; Eugene Ormandy, on two nights before opening his own Saratoga-Philadelphian festival, attracted more than 14,000 to hear him conduct the BSO; Colin Davis renewed his love-feast with the orchestra and 26,730 hearers in three concerts; and in single engagements, Aldo Ceccato, James Levine, Stanislaw Skrowaczewski, and Karel Ancerl, with noted soloists and tempting programs, made honorable showings.

It remained for BSO associate conductor Michael Tilson Thomas to come forth with the two musical blockbusters of the summer—the premiere, in a BSO tribute to the Fromm Foundation, of Charles Wuorinen's Fromm-commissioned Concerto for Electrified Violin and Orchestra (with Paul Zukofsky as soloist), and the first repetition, in wider-open spaces than Boston's Symphony Hall, of Olivier Messiaen's "Et Exspecto Resurrectionem Mortuorum," in which winds, brass, and particularly percussion anticipate the tonal terror and grandeur of Judgment Day.

ELEMENT OF DARING

Mr. Thomas, who has never given the impression of being a fearfully treading angel where challenging scores are concerned, rose mightily to both occasions, and in doing so contributed the element of daring on a large scale that finally brought Tanglewood programming out of the traditional woods.

Stories circulated at Tanglewood about the incompatibility of composer and some BSO musicians during rehearsals of the Wuorinen piece (age-old music history repeating itself), and indeed there were a few boos from the audience at the first performance.

So was it the music? The performances? The weather? The economy?

Thomas D. Perry Jr., the orchestra's manager since 1954, wryly admitted that he couldn't be sure. "Managers always know why things go wrong," he explained, "but when they go as well as they have this summer, we're nonplussed."

As might have been expected, Mr. Perry was not without his theories, however. Despite the tremendous cost of maintaining Tanglewood—the concert season is only eight weeks long—and the necessity for maintaining the musicians as though they were on tour ("after all, in Boston, they are at home, but here they must naturally receive per diem rates"), the festival represents a special challenge. To keep Tanglewood, like any finely attuned mechanism, in working order—a 707 aircraft was cited—it must be used often and to best advantage. Thus, for audiences' sake as well as its own, the BSO must not rely exclusively on repeats of its Boston programs (a general complaint several years back), but regard Tanglewood as a place where it can serve a new repertory and a new public.

For the past several years, Ozawa, as artistic director with Gunther Schuller at Tanglewood (Bernstein is its adviser), has been conscious of this need to appeal to audiences who are now coming armed with a substantial musical curiosity—not as a group of potluck listeners. Unusual works, ancient and modern, have crept into the regular festival programs, and for Tanglewood have been reserved a number of special ones, seldom undertaken because of their large musical demands, like Berlioz "Damnation of Faust," Beethoven's Missa Solemnis, and this year's Eighth Symphony of Mahler.

The formation of a Tanglewood Festival Chorus, based in Boston, under John Oliver's direction, has also made such projects more feasible. And the obvious eagerness of listeners to hear these rarities live, under optimum conditions, is indicative of the catholicity of taste existent these days among record collectors.

INTEGRAL PART RESTORED

In forming the Music Theater Project two summers ago with Ian Strasfogel as its head, the Berkshire Music Center has restored an integral part of the festival scene to do what its name implies—present innovative staging of music drama, with the operatic cobwebs brushed away. In a small cleverly converted barn on the property, turn-away audiences have sought out short pieces by Harrison Birtwistle, Erik Satie, Ligeti, Offenbach, and this summer a tailor-made premiere—Robert Selig's "Chocorua"—along with the Brecht Weill "Jasager" and Monteverdi's "Coronation of Poppea."

And during the Fromm events, Collage, an offshoot of the BSO itself, comprising six young orchestra members and three outside recruits, made a promising official debut in extraordinary performances of works in the contemporary idiom, which is their raison d'etre. Now if enough modern pieces can be found really worthy of their talents. . . .

"I sense a sea change in these audiences," Mr. Perry remarked. It has been happening gradually, but it's very evident this summer. Many new people and more young ones are coming to the concerts—they really appreciate the sweep of Tanglewood and its very denial of the traditional concert-hall ritual. They come to absorb the beauty of the music and the place. And they obviously respect it from the way they treat it—plenty of applause when they're pleased, and almost no litter at all!"

So the shining statistics may spring from the "new audience," more favorable weather than usual, restored pride within the orchestra itself ("They're playing again with that 'we're-really-something' air," an old-timer noticed), fresh programming, the economy, or another coming of age for Tanglewood after some years of being taken for granted.

Whatever it is, Tanglewood in 1972 was full of the vitality and promise that must have prompted Miss Gertrude Robinson Smith, the festival's tireless founder and advocate, to say in 1936: "There are all kinds of things that can be done musically. Let your imagination go as far as you like and you will not go too far."

The message, like Hawthorne's view, happily is still with us.

REMOVAL OF FEDERAL EXCISE TAX APPLIED TO SPARE PARTS FOR PRIVATELY OWNED URBAN TRANSIT BUSES

HON. RICHARD H. FULTON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. FULTON. Mr. Speaker, I am today introducing legislation which would seek to remove the 8-percent Federal excise tax currently being levied against privately owned bus companies when they purchase spare parts for their vehicles.

This action, I believe is not only the natural second step following 1971 legislation lifting the 10-percent tax from original private-line bus purchases; it is a necessary step to help keep many of these private mass transit firms operating.

Currently, 938 of our Nation's 1,079 urban transit systems are privately owned. Many, such as several of the lines serving Washington, D.C., and the Nashville Transit Co. serving my own constituency, face growing deficits—deficits which can only grow larger by keeping this tax is effect. Within the past 17 years, 258 cities have lost their transit systems and many more have either required local subsidies or outright municipal purchase to continue operations. This trend must be reversed.

The Congress in 1970 recognized that aid for urban mass transit was required when it approved a multimillion-dollar capital grant program. Yet balanced against this is the $800,000 to $1.9 million in Federal excise taxes estimated to be demanded yearly of private buslines purchasing spare parts. A discrepancy clearly exists when we offer financial assistance yet continue to demand a counterproductive tax.

Private bus company spare part levies flow into the $85 million highway trust fund, constituting perhaps 2 percent of the fund's total revenues. This is not a great percentage from the Government's point of view; however, it is quite a bit to those buslines affected. A look at the current estimated excise tax expenditures of a few private buslines amplifies the point:

1. Nashville Transit Company (Nashville, Tennessee):

Federal excise tax	$9,700
Number of buses	117
F.E.T./bus	$82.90

2. Louisville Transit Company (Louisville, Kentucky):

Federal excise tax	$12,000
Number of buses	197
F.E.T./bus	$60.91

3. Niagara Frontier Transit System (Buffalo, New York):

Federal excise tax	$21,000
Number of buses	483
F.E.T./bus	$43.50

4. Milwaukee & Suburban Transit Corporation (Milwaukee, Wisconsin):

Federal excise tax	$24,000
Number of buses	538
F.E.T./bus	$44.60

5. New Orleans Public Service, Inc. (New Orleans, Louisiana):

Federal excise tax	$49,000
Number of buses	494
F.E.T./bus	$99.20

As my colleagues can see, these excise taxes add up to a considerable amount, particularly considering the financial pressures many of these lines currently face.

Mr. Speaker, my legislation would ease the burden, and provide even a small measure of retroactivity by exempting from the tax those vehicle parts already sold by manufacturers to dealers, but not yet in use at the time of the bill's enactment. It is a measure I believe sorely needed by our Nation's private mass transit industry—and a measure designed, and I hope destined to build rather than "overtax" those systems upon which America in the future must increasingly depend.

RAMSEY CLARK OVERSTEPS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. DERWINSKI. Mr. Speaker, a very thoughtful and objective editorial commentary on Ramsey Clark's recent visit to North Vietnam was carried by the Chicago Daily News of Wednesday, August 16. The points made are still pertinent as the performance of Mr. Clark since he returned from Hanoi shows that the analysis in this editorial was eminently correct.

The editorial follows:

RAMSEY CLARK OVERSTEPS

It is hard to think of a precedent for Ramsey Clark's treating with an acknowledged enemy of the United States and his return with conditional "agreements" signed, on Clark's own word, by Hanoi's deputy premier and minister of foreign affairs.

The mildest question the action raises is: By what authority does Citizen Clark undertake negotiations with the Hanoi government in obvious contravention of negotiations already being carried on by the duly installed government of the United States?

Clark may disagree with the administration as violently as he pleases and criticize as loudly and publicly as he pleases. That is any citizen's privilege.

But it is not his privilege to intercede or interfere in disputes between the United States and a foreign power. As a lawyer and former attorney general of the United States, he must have some knowledge of the Logan Act. And if his excuse rests on the premise that this is an undeclared war, it is a shaky premise, indeed. Fifty thousand American dead bear witness to the fact that it is indeed a war, far too grim and important to brook interference by any private zealot or political crusader. No one has given Ramsey Clark authority to act as agent for the American people; he knows well enough what course the law prescribes for one seeking that right.

As a matter of fact, Clark's astonishing indiscretion caps the climax of the whole parade of politically motivated visitors who have trouped to Hanoi, listened to the gospel as propounded by the Communist government, taken a guided tour of prison camps and dikes and bombed areas, lent themselves to the artful propaganda devices of Radio Hanoi, and returned to challenge anew the morality of the Nixon administration.

It isn't necessary to hold any brief for the President to perceive how this strengthens the Communist hand at the Paris negotiations and encourages them to raise their price for peace.

At the same time it strikes us as miserably poor politics. The Democrats' thesis that Vietnam betokens moral laxity on the Republicans' part rings hypocritical against the low moral tone of this ploy, and we believe it will so strike the American public.

Sen. McGovern cannot, of course, be held responsible for the words or actions of Clark or Jane Fonda or any other private citizen working in his behalf. But McGovern has it in his power to repudiate this particularly dangerous kind of trifling with the national interest and he should do it promptly. The Vietnam War is a valid issue, but it can be handled on a responsible level without a covey of bumbling amateurs trying to take over the execution of U.S. foreign policy.

NEWS BULLETIN OF THE AMERICAN REVOLUTION BICENTENNIAL COMMISSION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. WHITEHURST. Mr. Speaker, I am inserting the August 28, 1972 edition of the news bulletin of the American Revolution Bicentennial Commission—ARBC. I take this action to help my colleagues be informed of the plans and activities underway across the country in preparation for the observance of this Nation's 200th anniversary in 1976. The bulletin is compiled and written by the staff of the ARBC Communications Committee of which I am vice chairman. The bulletin follows:

BICENTENNIAL NEWS,
Washington, D.C., August 28, 1972.

The third quarter Commission meeting of the ARBC will be held in Washington, D.C. instead of Atlanta, Ga. on September 7 and 8. The Atlanta meeting is being rescheduled for December.

At the first meeting of the Mississippi American Revolution Bicentennial Commission in Jackson, Gov. William Waller told the gathering of state and local dignitaries the Commission was created, "to see that Mississippi has her proper place in the celebration of the nation's 200th year of successfu government." Hon. James P. Coleman is Chairman of the Commission and Perry Anderson Snyder is the recently appointed Director.

A seminar about the American Revolution Bicentennial celebration was held at North Dakota State University in Largo on August 8. In the morning, "A Call to Action," the official ARBC film was shown and information about the Bicentennial was provided. During the afternoon session, discussion centered on how communities in North Dakota can plan for their participation in the 1976 celebration. Joseph Satrom, Exec. Director of the Commission, and other members of the State Commission attended the meeting.

Alexander A. Bleimann, Grand Master of the Richmond District Grand Lodge, Free and Accepted Masons, and General Chairman of the Richmond Masonic Bicentennial Committee, reports that his group is actively working on plans for 1976. He also noted "There is no other group in the country which is so well connected with the Bicentennial than the Masonic Fraternity. General George Washington, a Master of the Virginia Lodge, entrusted important affairs of the new Republic and the war itself to his generals who were all Masons."

The ARBC Speakers Bureau annual report includes the following statistics: ARBC Staff and Commission members addressed 83 groups in 29 states. Audiences covered were service and professional organizations, historical societies, media associations, travel groups, universities and elementary and secondary schools.

Beginning in September the United States Travel Service will initiate a series of nationwide grassroots "Selling of America" working seminars which will take place between the 50 state travel directors and the highest level foreign and domestic staffs of USTS. James T. Hamilton III, Acting Assistant Secretary of Commerce for Tourism said, "The accelerated Bicentennial-invitation program is designed to meet the challenge of President Nixon's July Fourth radio address, in which he called on all levels of government, the travel industry and the American business community to seek means of attracting more foreign visitors to the United States during the celebration."

Allston Jenkins, President of the Philadelphia Conservationists, Inc., suggested in a letter to the Commission that "the commemoration of our nation's bicentennial be directed toward local and regional re-enactment of historic events of our past." He submitted a sample proposal: A covered wagon train to follow the Oregon Trail from St. Louis to Oregon making camp at night, where the vacationing public could join in a chuckwagon supper, camp-fire, and song fest. Several trains could take part at intervals of 100 miles or so.

Students in grades K–12 in the Jefferson County Schools, Steubenville, Ohio have submitted creative writings for an American Heritage Publication. A volume will be developed for each year of the Bicentennial Era, and Dr. A. Eileen Cozart, Research, Curriculum and Evaluation, Department of Education, welcomes guest writings from schools across the country. A few suggested titles are: "My Community and Its Place in History"; "Memories of Growing Up in Rural America . . . or In a City in America"; "My School 50 Years Ago," "Symbols of America." Credit lines will be given to pupil, teacher, grade and school. Dr. Cozart emphasized that the project is not a contest but an involvement of children and young people toward a publication dedicated to the celebration of the nation's 200th anniversary. Send manuscripts to Dr. Cozart at the Court House, Steubenville, Ohio 43952.

Items from the August *Virginia Independence Bicentennial News:* The 225 young men entering Hampden-Sydney College will have the honor of graduating in the 200th year of the college's founding. Two of the original trustees of the college were James Madison and Patrick Henry. . . . At the University of Virginia, restoration of the Rotunda in accordance with Jefferson's original plan for it, is now underway as a result of the University's Bicentennial Planning Committee effort. . . . On July 4, Alexandrians began an 8-month "Think-On Bicentennial," designed to solicit ideas for the city's observance of the anniversary. Final date for the submission of ideas is February 22, 1973.

At a meeting of the Board of Education, City School District, Syracuse, (N.Y.) members resolved: "That the Board of Education and the staff of the City School District support in principle and in every way possible the efforts of the City, County, State, and Nation in creating a worthwhile and meaningful experience for the Bicentennial Celebration planned for 1976."

The Oklahoma Bicentennial Commission recently sponsored a workshop in Oklahoma City. Governor David Hall and other dignitaries heard *Reader's Digest* senior editor, Robert O'Brien and Commission Member, Clarke T. Reed praise Oklahoma's early efforts to organize. Mrs. Gladys Warren, Chairman of the Commission, reported "Ideas are pouring in and many of them are excellent."

Prof. Richard P. McCormick, Commission Member, presented a check of $13,500 (first installment of the $45,000 Federal grant) to Governor William T. Cahill on August 9th in Trenton, New Jersey.

The ARBC of Connecticut has begun an ambitious publications program consisting of 30 to 40 booklets of some 60 pages each. The first five booklets, due to be published next year, will be on the following topics: Connecticut, The Provision State; Connecticut in the Continental Congress; Connecticut Military Leaders in the Revolution; Stamp Act Crisis in Connecticut; and Negroes in Connecticut during the Revolutionary Period. The Commission is currently negotiating a publishing contract with Pequot Press of Chester, Connecticut. Eric Hatch Commission Chairman, has expressed the hope that one of the purposes to be served by the program will be to stimulate public school teaching of the Revolutionary War history in the State.

UGANDA PERPETRATES INJUSTICE ON DESCENDANTS FROM ASIA

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. McCLORY. Mr. Speaker, in connection with the apparent efforts on an international scale to reduce racial and ethnic prejudice—particularly the large-scale national efforts in this country to judge citizens on an equal basis, it is quite astounding to read of the action taken recently by the government of Uganda against some 50,000 permanent residents of that country of Asian citizenship or descent.

According to unconfirmed information emanating from Uganda both citizens and noncitizens of Uganda who trace their backgrounds to India and Pakistan are being summarily deported with a 90-day deadline and without any compensation for their homes and other properties.

Mr. Speaker, this action by a black African country, evidencing the most heartless prejudice and injustice, appears to have evoked little criticism among the great civil rights leaders of this and other nations.

Mr. Speaker, I hope that prejudice and injustice of this type will not be overlooked or condoned because the perpetrators in this instance are black. Indeed, if we are to establish a world free of prejudice and injustice, we must treat all citizens alike regardless of their race, color, or other identifying characteristics.

Mr. Speaker, I am attaching herewith a recent article an editorial which appeared in the August 15 issue of the Christian Science Monitor, which is illuminating on this subject:

ASIAN-EXPULSION ORDER STANDS—UGANDA FRUSTRATES BRITISH ENVOY

(By Frederic Hunter)

NAIROBI, KENYA.—At it faces the threat of 50,000 British-Asians deported to its shores in less than 90 days, Britain finds its relations with Uganda becoming ever more like a nightmare.

Britain faces two dilemmas. First it is trying to negotiate a matter of extreme delicacy from a position of extreme weakness. Second it is seeking to negotiate with a regime which refuses to play the game of international relations by the rules practiced in international diplomacy.

The nightmare is that Britain has yet to talk directly with the government of Gen. Idi Amin on this matter of obvious mutual importance.

AMIN WON'T CONFER

On his arrival here in Nairobi from Uganda late Sunday afternoon, Geoffrey Rippon, a senior British minister sent to negotiate with General Amin, acknowledged that he had failed in his bid to meet the eratic Ugandan leader. He had been in Kampala almost two full days. Mr. Rippon said his schedule had been agreed in principle with General Amin before he left London Friday night.

Mr. Rippon appeared not only frustrated and embarrassed, but also puzzled. "I can't make General Amin meet me," he said. "I won't bite him."

The British minister's problem is that he is approaching the Amin expulsion order as a policy matter to be negotiated. General Amin refuses to negotiate.

Mr. Rippon stated that he had written the Ugandan leader a personal letter outlining the practical problems involved in the mass movement of thousands of people. He also expressed hopes that negotiations at some level could begin soon.

FOREIGN-EXCHANGE EDICT

In an attempt to solve the problem created by Uganda's shortage of foreign exchange, General Amin has signed a decree prohibiting the export of foreign exchange from Uganda. Thus it appears the Uganda Government intends to deport the Asians without letting them take any assets with them. This decree, if enforced, will magnify Britain's difficulties in caring for the refugees once they start to arrive.

It is presumed that Mr. Rippon is having discussions with ministers of the Kenya and Tanzania governments during brief visits there.

Originally the British Government is thought to have hoped these governments, especially that of Kenya, could bring pressure to bear on General Amin. But this hope has all but dissolved.

EVERYONE LOSES

At this point, the whole affair appears to be one in which no party stands to gain.

The affected Asians suffer the uncertainties of knowing that Uganda intends to deport them, that Britain is prepared to take them only as a last resort, and that an ill-disciplined Ugandan Army and police force await them if they exceed the early November deadline.

Other Asians, thinking themselves Uganda citizens, are seeing their citizenship documents rejected—and in some cases destroyed—by examiners of the Amin government. Does this mean that they become stateless? If so, where do they go before the time limit runs out?

CRASH PROGRAM

The British must mount an expensive crash program to house, feed, and assimilate tens of thousands of possibly penniless refugees at a time when its own race relations are delicate. In addition, Britain's unemployment hovers near the 1 million mark and its labor relations are tense.

For its part, Uganda stands to suffer a period of extreme economic dislocation and readjustment.

General Amin's seizure of power has already caused a chaotic upheaval in the economy, with five of Uganda's seven principal exports declining last year and its foreign assets falling by more than one half at a time when military expenditure doubled.

The deportation order is likely to deprive Uganda of its most economically knowledgeable and entrepreneurial class. While the deportations will undoubtedly Africanize the economy, it will be an economy which operates at a much lower level.

THE PLIGHT OF UGANDA'S ASIANS

Whatever one might think of Ugandan President Amin's impulsive action in expelling 50,000 Asians holding British passports, there is no denying Britain's moral duty to accept responsibility for the Asians. And this the British Government has said it will do.

At the same time the sudden influx of thousands of East African Asians would put a tremendous burden on Britain's capacity to absorb nonwhite immigrants and risk igniting racial tensions.

Britain therefore is justified in asking for the cooperation of other members of the Commonwealth, and particularly of India and Pakistan, in seeking a solution of this acute human problem.

The number of nonwhite immigrants entering Britain after World War II and decolonization attained such proportions in the '60's that the Labour government of Harold Wilson had to introduce legislation to reduce the flow.

Under pressure from his right wing, Conservative Prime Minister Edward Heath added still more controls. The existing legislation permits 3,500 East African Asians with British passports to enter Britain each year with their families provided they have special work vouchers. This annual quota, which covers Kenya and Tanzania as well as Uganda, will now have to go by the board, even if other Commonwealth countries come to the rescue by accepting some of the expelled Asians.

There seems little hope of persuading General Amin to revoke his decision. His move was designed to enhance his own position and popularity by playing on his people's distrust of the Asians, who have long represented a prosperous middle class dominating Uganda's commercial and professional life. The most that can be hoped for is an extension of the General's 90-day deadline for the Asians' departure.

The problem of nonwhite immigrants has been a continuing embarrassment for both Labour and Conservative governments in Britain. The European Commission on Human Rights is currently investigating cases of Asians with British passports who have been refused entry to Britain and have been shuttlecocked from country to country with no place to go.

In accepting responsibility for the Ugandan Asians the Heath government has taken the only honorable course open to it.

A MESSAGE FROM THE AMBASSADOR OF ITALY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. RODINO. Mr. Speaker, recently a group of New Jersey residents traveling through Europe with the Ace Alagna Civic Association met with the American Ambassador in Rome. As a matter of protocol, never before had the Ambassador met with so large a group in the Embassy. It was indeed a historic occasion.

I am most pleased to learn of so warm and special a gathering. Ambassador Graham Martin exchanged views with Mr. Alagna and with a great many members of the group. All agreed it has been a highly informative get together. Following the August 4 visit, the Ambassador wrote the following letter which appeared in the Italian Tribune News of September 1. I would like to share his words with you at this time:

ROME,
August 8, 1972.

Mr. ACE ALAGNA,
Publisher, Italian Tribune News,
Newark, N.J.

DEAR MR. ALAGNA: It was a pleasure to meet the group which called on me on August 4. We speak of the "special relationship" which unites Italy and the United States. There are many historical reasons for this, not the least being factors related to the unification of Italy. The strongest bond, however, is one of blood.

When our nation soon celebrates its bicentennial of our independence, one-tenth of our population will be composed of Americans of Italian origin. Such citizens take great and highly justified pride in their "mother country," with its vast repository of culture spanning millenia.

Since there is this special identification, such Americans also should have particular interest in the Italy of the present and future, not only of the past.

Aside from its highly important role within Europe itself, Italy is a key member of the Atlantic Alliance. As such it is one of our most important Allies. The continuation of Italy as a strong and viable member of the Alliance is a matter of concern to all Americans and particularly to those of Italian descent. I therefore hope that the members of the group whose visit I so much enjoyed will have as a remembrance of their trip not only a renewal of their great Italian heritage, but also an interest in Italy as a friend and Ally of the United States.

Sincerely,

GRAHAM MARTIN.

NIXONIAN AMERICA: A STEADY COURSE

HON. GERALD R. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. GERALD R. FORD. Mr. Speaker, it is refreshing to read the comments of a newspaper columnist who has no ax to grind but is interested only in shoveling aside verbal garbage and getting at the facts. That is the kind of material that comes from the typewriter of Nick Thimmesch. His column which appears in the Sunday, August 27, edition of the Chicago Tribune is the best proof of that. Thimmesch writes the truth, and I would like to give that truth the widest possible circulation. In that spirit, I place Nick Thimmesch's August 27 column in the RECORD at this point.

NIXONIAN AMERICA: A STEADY COURSE

(By Nick Thimmesch)

MIAMI BEACH.—As President Nixon arrived here for his coronation, it's fair to ask, what kind of government has he given the United States since he was inaugurated? And how effective was he in keeping that balance, vital to our kind of society, between freedom and order? What's gone on since 1969?

The Vietnamese war goes on, but differently. Nixon brought more than 500,000 troops home, drastically reduced U. S. casualties, but the American war is now in the air and on the water in enormous scale. North Viet Nam is no longer a fearful colossus backed to the hilt by China and the Soviets. And the world is as tired of Hanoi's intransigence as it is of our marathon show of military might.

The American people are disgusted with the war, but not making a major decision on it as they were four years ago. The showboating by McGovern on how to end it all, including Pierre Salinger's illicit diplomacy, amounts to pesky politics. It's Nixon, Dr. Henry Kissinger, President Thieu, and the Communists in North Viet Nam and elsewhere who will settle this ordeal.

BOND IS UNRAVELING

The bipartisan foreign policy bond began to unravel before Nixon took office, and now it's a jumble of yarn. The President has most of the Senate behind him on the Strategic Arms Limitation Talks agreements and the new relations with China and the Soviet Union, but there's growing dissent on his right to make war and his wisdom in keeping high levels of troops in Europe. Since military strength has been an instrument of U.S. foreign policy for a generation, the demand to reduce it, for better or worse, comes out as a new form of isolationism. This situation clearly developed in the Nixon years.

The President's Peking and Moscow trips are celebrated as surprising turnabouts for him. But I think his handling of the economy is an even greater surprise. Nixon putting in price-and-wage controls and presiding over record budgets? But inflation seems curbed, and the April-thru-June economic growth rate of 9.4 per cent is lively and encouraging. Unemployment is expected to drop to 5 per cent and employment is at a record 83 million.

Democratic noise to the contrary, there's been no backdown of government involvement in housing, Social Security, education, health, and welfare. And the Environmental Protection Agency, created by Nixon, is as much cursed by industry as it is by anyone else. The administration has not pushed hard enough to make welfare reform and revenue sharing realities instead of bright new concepts, but the Democrats are equally to blame for that.

There is much bellowing in civil libertarian circles about repression and suppression by the Nixon administration. But Jerry Rubin and the Chicago 7 are free and so is Angela Davis. Daniel Ellsberg benefited from a decision by Nixon's Supreme Court. Law enforcement authorities feel the pendulum on law-and-order has some distance to go before it's swung back to their side.

Some Americans need to be loved a little more by their President than others. Blacks don't feel such love from Nixon, but there have been no major urban riots since he took office. Blacks increasingly fall into the middle class and its afflictions. Tell blacks that under Nixon the civil rights budget tripled, that he made a record number of appointments of blacks to top positions, and that record school integration was achieved in his years, well, most blacks won't believe it.

THE SOCIAL ORDER

The McGovernite college youth don't believe it, either, but there are 18 million nonstudent youths who don't feel that antagonistic.

More action against hard drugs, and less against soft. More long hair, and less opposition to it. A freer movie screen, stage, and printed expression, and less worry about it. More government and more distrust in it. More talk about the urban and mass-transit crises, and only nominal effort to relieve them.

So this is Nixonian America. Steady as she goes, straight ahead, but not fast enough for some. Scarcely any glamor. Overall, the President has a steadier hand on his rudder, which is the U.S. government, than McGovern has on his, which is his campaign.

MISS TEENAGE AMERICA

HON. ROGER H. ZION

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. ZION. Mr. Speaker, I am extremely proud to bring to the attention of my colleagues the fact that Miss Teenage America hails from my own congressional district.

Lovely, 17-year-old Carla Tevault of Petersburg, Ind., has just won this high honor in the 13th annual Miss American Teenager Pageant at New York City.

Carla, who is now beginning her freshman year at Indiana University has brought much pride to Petersburg and southern Indiana. She has brown hair and green eyes, is 5 feet, 8 inches tall, and weighs 123 pounds. A pageant spokesman said that Carla was chosen for her poise, appearance, and personality.

In a locality famous for pretty, intelligent, and all-around wholesome young ladies, we are all delighted with this young lady and the honors she has so recently brought to her home community and her State.

VERY REVEREND WARREN F. DICHARRY DEDICATES NEW ST. THOMAS CHURCH

HON. HALE BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. BOGGS. Mr. Speaker, during the recess, I attended dedication services for the new St. Thomas Church in Long Beach, Miss. This is not a new congregation; its roots go deep into the history of the area. The services were held to dedicate a new church to replace a structure lost in the terrible fury of hurricane Camille on Sunday, August 17, 1969. The sermon was delivered by the Very Reverend Warren F. Dicharry, rector of St. Mary's Seminary, Houston Tex. In his sermon, Father Dicharry gave a moving account of the strength and determination of people who, having lost everything, retained their faith and will to rebuild their homes and their communities. I am inserting Father Dicharry's sermon in the RECORD and calling it to the attention of my colleagues.

SERMON FOR THE DEDICATION OF ST. THOMAS CHURCH

Your Excellency, Bishop Joseph Brunini, Very Reverend Cecil Parres, Provincial of the Vincentian Fathers, the Honorable Hale Boggs, the Honorable William Skellie, the Right Reverend Monsignor Michael Campbell, Members of the Long Beach Ministerial Alliance, Father William Pittman, Very Reverend and Reverend Fathers, Beloved Sisters, Parishoners, and Friends of St. Thomas Parish . . . It is always a source of joy to participate in the dedication of a new church. But it is a source of very special joy indeed to assist in the dedication of the new Saint Thomas Church here at Long Beach, Mississippi. For this is not just a new church; it is a resurrected church, a church risen from the ruins and, as such, a shining symbol of the extraordinary faith and courage of the priests, sisters, and people of this parish.

Three years ago, on Sunday, August 17, 1969, Long Beach was ravaged by the fiercest hurricane ever to strike the United States. I need not describe it, for those of you who were here that night can never forget the screaming wind, the pounding water, the deadly darkness, the tragic loss of life. I was in Rome when it all happened, but about two weeks later I came here with my brother, Father Harold Dicharry, to see if we could recover any of his belongings from the ruined rectory. I was absolutely appalled at the desolation all around: the demolished homes, the uprooted trees, the washed out streets, the town literally swept away from the shore. But perhaps the most vivid picture in my memory as in yours is the one which was also carried in newspapers around the country—the picture of St. Thomas Church shattered beyond repair. And even more moving was the picture of the parishioners of St. Thomas gathered next to the devastated church and participating in the Holy Sacrifice of the Mass offered by your pastor, Father Frank O'Malley, on the very first Sunday after the disaster.

Your unselfish and unshakeable faith on that occasion and ever since has been an inspiring example to us all. Your own homes were damaged or destroyed, but your immediate thought was that of rebuilding the House of God. Your own businesses were in many instances literally wiped out, but you were determined to "be about your Father's business" and to restore His worship in a worthy edifice.

The new St. Thomas Church stands today as the fruit of your courageous faith. In a kind of present-day paraphrase of Our Lord's own words regarding His resurrection, you have said in effect: "Destroy this temple and in three years we will raise it up again!" And you have been true to your word.

Yes, St. Thomas Church has risen from the ruins, and what a worthy tribute it is to your devotion! Shining white in the bright Mississippi sun, this beautiful church, even more than its predecessor, is truly (in the words of the dedication plaque) "a beacon for fishermen and a symbol of Catholic faith." Standing boldly on the very edge of the Gulf, it demonstrates your complete and childlike confidence in your Heavenly Father. In its perfect proportions, its balance between the vertical and the horizontal, it proclaims to everyone who sees it your own dual dedication to the love of God and the love of your neighbor. In its memorial chapel are preserved the crucifix and statue of Our Lady from the old church, thus keeping a sense of continuity with the past glorious traditions. And in its simple but beautiful interior, it bespeaks your ardent desire to worship God in awareness of His Presence and in appreciation of His Liturgy. These surroundings form a pressing invitation to "worship God in spirit and in truth." Here, it is easy to take to heart St. Paul's reminder to the Romans: "Offer yourselves as a living sacrifice holy and acceptable to God, your spiritual worship" and to the Ephesians: "Follow the way of love, even as Christ loved you. He gave Himself for us as an offering to God, a gift of pleasing fragrance."

Yes, it is indeed a source of great and special joy to be here for the dedication of the new, the resurrected, St. Thomas Church. But we are here for more than the dedication of a physical structure. We are here to dedicate and consecrate anew the Church, that is, the People of God dwelling and worshipping in this area. It is in this sense that St. Paul addresses his epistles to the Church of God which is at Corinth, to the Churches in Galatia, and so on. It is in this spirit that he challenges the Corinthians as follows: "Are you not aware that you are the temple of God, and that the Spirit of God dwells in you. If anyone destroys God's temple (and he is referring to disunity and factionalism), God will destroy him. For the temple of God is holy, and you are that temple." And perhaps even more explicitly he declares to the Ephesians: "You form a building which rises on the foundation of the apostles and prophets, with Christ Jesus Himself as the capstone. Through Him the whole structure is fitted together and takes shape as a holy temple in the Lord; in Him you are being built into this temple, to become a dwelling place for God in the Spirit."

Today, therefore, we are here to perform the dedication not only of this beautiful church but also and especially of you, the priests, the sisters, and the people of this parish, invoking upon you God's choicest blessings and graces in order that you may commit and consecrate yourselves anew to His love, His worship, and His service. The word church, which comes to us from the Greek by way of the Teutonic, means "the Lord's House." May Jesus Christ, whom St. Thomas the Apostle acknowledged as "my Lord and my God," take possession as Lord, not only of this structure, but of each and everyone in this parish. May He be truly and completely the Lord, that is, the Master, the Ruler, the very Heart and Center of your lives. May He, with each celebration of the Eucharistic sacrifice in this church, grant you the grace to offer yourselves completely to Him, with Him, in Him, and through Him to the Father, so that, as the bread and wine are transformed into His Body and Blood, you too may be transformed spiritually into Him. And may He be able to say of you as He said at the conclusion of His Sermon on the Mount: "Anyone who hears My words and puts them into practice is like the wise man who built his house on rock. When the rainy season set in, the torrents came and the winds blew and buffeted his house. But it did not collapse, for it had been solidly set on rock."

"May the Lord bless you and keep you. May He let His Face shine upon you and be merciful to you. May He look upon you kindly and give you peace." In the name of the Father and of the Son and of the Holy Spirit. Amen.

TEAMSTERS CHARGE LETTUCE BOYCOTT "RAIDS" THEIR UNION

HON. VICTOR V. VEYSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. VEYSEY. Mr. Speaker, the August 28 issue of U.S. News & World Report contains a factual refutation of the oft-repeated story that the lettuce dispute in California is an attempt to unionize impoverished laborers. The facts once again are shown to be that at least 70 percent of the lettuce grown in California is already harvested by members of the Teamsters Union, and 15 percent by the United Farm Workers Union headed by Cesar Chavez. Little if any nonunion lettuce is shipped out of the State.

The article clearly shows the lettuce boycott is not a crusade to organize unprotected workers, but simply a public relations power play by one union against another. The Teamsters aptly call it a raid on their membership. I hope my colleagues will not be taken in by the deceptive call to boycott nonunion lettuce.

The article follows:

[From the U.S. News & World Report, Aug. 28, 1972]

WE'VE BEEN ASKED ABOUT . . . CAMPAIGN TO BOYCOTT LETTUCE

A drive is intensifying for a nationwide consumer boycott of one of the country's important farm products—the iceberg lettuce grown in the rich valleys of California and Arizona. The stakes in this campaign are high.

On one side is the militant United Farm Workers Organizing Committee headed by Cesar Chavez. It is seeking to organize the 15,000 farmhands who harvest and field pack about two thirds of the lettuce consumed in the U.S.

On the other side are growers, many of them large corporations, whose yearly crops bring them about 175 million dollars. They oppose the Chavez effort on the ground that they already have contracts with a rival union.

If a major part of the consuming public, through the boycott, can be persuaded to stop buying head lettuce in stores or eating it in restaurants, the UFWOC hopes to pressure growers into recognizing their union as the sole bargaining agent for field workers.

AFTER GRAPE BOYCOTT

The lettuce fight, so far, is running the same course as the grape boycott organized by the union about five years ago. That drive was so successful that most California growers of table grapes were finally forced to sign up with the union headed by Mr. Chavez.

There is this difference, however: The UFWOC, which is affiliated with the AFL–CIO, this time may be on a collision course with the powerful Teamsters Union.

The Teamsters already have contracts to represent the workers of about 170 California and Arizona growers. These cover approximately 70 per cent of all lettuce produced in the two States. The UFWOC, on the other hand, has four growers under contract, covering about 15 per cent of lettuce output. The remaining 15 percent is harvested by nonunion labor.

The Chavez union does not recognize the Teamster contracts. At the Keene, Calif., headquarters of UFWOC, union official Hub Segur says:

"There is no such thing as a Teamster contract. It's a piece of paper used by the growers for public-relations purposes. Dues aren't collected, and there is no administration of benefits. The industry is just using those so-called contracts as a disguise for the fact that workers aren't organized."

"THIS IS A RAID . . ."

The Teamsters do not agree. Einar Mohn, director of the Western Conference of Teamsters, put it this way:

"We consider our contracts still valid. This is not a jurisdictional dispute, since we have contracts. This is a raid on our membership by UFWOC."

The lettuce boycott began officially on May 3. But it did not come to widespread attention until the Democratic National Convention, when it was endorsed—with a television audience listening in—by about 20 State delegations. Senator Edward Kennedy (Dem.), of Massachusetts, in his Convention appearance, supported both the Democratic tickets and the campaign against nonunion lettuce.

The UFWOC claims that any lettuce sold without its symbol—a black eagle—is nonunion, even though it might bear a Teamsters' label. So far there has been only sporadic picketing of stores, but more of this action is likely.

The Farm Workers' boycott is being endorsed by the United Auto Workers, other unions, mayors of big cities and some Governors.

Marshall Ganz, UFWOC boycott coordinator, says: "After just three months of organizing, we're at the same level it took us two years to reach in our boycott of table grapes."

Full-time workers are setting up local boycotts in 40 cities, Mr. Ganz claims.

MEANING TO GROWERS

The union says that each person who abstains from buying lettuce for a year will cost the growers $15. But growers assert that the boycott has shown no effect, so far, on the demand for lettuce and that, in fact, the latest quotations by the State market news service indicates that "demands exceeds supply."

A carton of 24 heads of lettuce has been bringing around $3, compared with about $2 in late July. Tom Merrill, whose family operates a 3,000-acre farm in Salinas, Calif., commented:

"Seems as though every time they try to crank up the boycott, the price of lettuce goes up a bit."

California's position on the dispute, as stated by William F. Cowan, chief deputy director of the State's department of agriculture, is this:

"The claim that California iceberg lettuce is 'nonunion' is ridiculous. The truth is that more than 85 percent of all head lettuce harvested in California and Arizona is harvested under union contracts.

"Some of the Teamster Union contracts in the Salinas Valley go back 30 years. California's State government has taken no steps to support this boycott which is a jurisdictional dispute between two unions."

How do farm laborers fare in the lettuce fields? The Chavez union declares they are underpaid. State officials say that, in 1972, California lettuce workers have hourly earnings ranging from $5.70 to $7.41, on a piecework basis. Their working conditions, the State says, are "far better" than those found in any other State.

As the drive for a lettuce boycott gains momentum, some officials foresee the battle lines being formed more clearly between the Chavez union and the Teamsters. In that event, they feel, those caught in the cross fire will be the growers and, increasingly, the American public.

FORMER CHIEF JUSTICE EARL WARREN SPOKE TO A GATHERING OF CONGRESSIONAL INTERNS

Hon. PETER H. B. FRELINGHUYSEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. FRELINGHUYSEN. Mr. Speaker, on August 1, former Chief Justice Earl Warren, who is Chairman of the United Nations Association of the United States, spoke to a gathering of congressional interns at the Library of Congress, Coolidge Auditorium. I include his interesting and informative remarks for the RECORD:

REMARKS OF CHIEF JUSTICE EARL WARREN

On behalf of the United Nations Association of the United States, it is a pleasure to welcome you to this conference on the UN.

Also, at the very outset, I want to express my deep appreciation to Representative Fraser and his colleagues on the House Foreign Affairs Committee, including its outstanding staff; to Senator McGee; to Undersecretary-General F. Bradford Morse, and to your colleagues on the Bipartisan Committee of the Congress for helping us make this day possible. And may I also express my thanks to all of you for the interest that has brought you here.

Let me also bring you a word of reassurance. Despite the indications on the program, I am *not* going to talk for half an hour.

I guess the program planners assumed some of you might find it difficult to get here by 9:45 on a summer day and used this device to make certain Mr. Mooney would be able to start promptly at 10:15. From what I have heard of his presentation, I am happy to yield time to him.

Time, however, is not the measure of my delight in being with you. For me, it is a welcome opportunity. There must never be a generation gap in relation to the concern which brings us together—the urgent need to stop the killing of our fellow man; to protect and enrich the future of the human race, and of this small planet that is our home.

Science and technology are changing the physical environment and our social relations so substantially and at such an accelerating rate that the methods and institutions on which society depends are lagging far behind. Too often these methods and institutions have become inadequately responsive to the needs of today—and grossly inadequate to the needs of tomorrow.

Discontent and demands for change are not only understandable, they are essential.

These comments with special force to the methods and institutions by which we handle relations between nation-states and problems that are of common concern to the family of man.

For centuries, war and the threat of war, however barbaric, have been used for the pursuit of national interests; but on a scale that mankind could tolerate. Now, virtually within your lifetimes, and certainly within mine, we have brought about a fundamental change in the nature of war. Warfare now has become so destructive of man, of his works, of his essential environment, it is no longer either rational or tolerable.

Warfare as a method for settling disputes must be eliminated—and eliminated rapidly. Institutions strong enough and fair enough to resolve the conflicting interests of nation-states must be bulit—and built rapidly.

The United Nations is our starting point.

I know that, for many of you, the United Nations is a piece of the "Establishment", to be looked on with suspicion and doubt. I suspect that, for most of you, it is a disappointment. That is a feeling I understand and share.

I was Governor of California when the Charter of the United Nations was signed in San Francisco. My hopes that mankind was at last turning the corner, away from the barbarism that had culminated in the Second World War, were as high as the hopes of men could be.

But it is absolutely vital that we realize the root of our disappointment is not in the Charter of the United Nations. Instead, it is in ourselves—in our unwillingness to insist that nation-states use and develop the United Nations as a new and different way for handling their relations and their mutual problems.

All of us, in every nation—without regard for ideology, race, or religion; and without regard for fundamentally changed conditions—are permitting relations between states to be conducted in essentially the same way that has prevailed for the past two thousand years. The continuation of these attitudes and habits pose the gravest peril for the whole human race.

I ask you to read the Charter of the United Nations. Then ask yourselves if it does not provide—as our Constitution has provided—the base for building new and dynamic relations between men and their institutions.

We Americans have been given time to develop the resources of the Constitution. We members of the human race do not have so much time to develop the resources of the Charter of the United Nations.

All that I have said is merely background to the expression of my profound agreement with the statement of purpose in the Program of this conference which asserts that "if we are going to build effective institutions to help shape our nation's priorities, the task cannot be done without the younger generation's values, ideals, and vitality." I would only add that the situation requires another important attribute of youth, and that is impatience.

Currently, we are witnessing a *negative* form of impatience in the reluctance of the Congress to appropriate funds for the United Nations itself, as well as for many related programs.

What we need to witness is a *positive* form of impatience that demands to know why we continue to tolerate the Connally amendment which condemns the World Court, and its capacity to build a body of world law, to idleness; why there are not more initiatives to develop the peacekeeping as well as the peace-building functions of the United Nations; why the United States fails to ratify conventions relating to human rights, and why such a massive portion of our resources, both human and material, are devoted to the instruments of war and destruction rather than to the institutions of peace and human development.

The United Nations can only be what the member states make it. Admittedly, the United States cannot, by itself, build a more effective United Nations. But, most assuredly, a more effective United Nations will not be built without strong, persistent leadership from the United States.

I believe the Charter of the United Nations is an inspiring expression of our deepest instincts as a people and our highest interests as a nation-state. I believe it to be sorely neglected. I believe your generation has no more noble or exciting opportunity than to give it vitality.

You have on your side the fact that science and technology are imposing disciplines that clearly go beyond the capacities of nation-states. Problems such as abuse of the environment, management of seabed resources, modification and control of climate, the uses of outer space, satellite communications, and so on, all require some multinational framework for solution. Inescapably, they are bringing us face to face with the imperative of bringing a worldview to the affairs of man.

Also on your side is the fact that the same science which threatens to destroy us all, has also made it possible, for the first time, for man to live bountifully upon this planet.

But only man himself will civilize our global village and make it habitable.

The United Nations provides the means for achieving greatly—*if* we are willing to use it. The will to do that must now—and in the future—bridge all generation gaps. Let us waste no more time. Let us do all we can, beginning now, to build a world in which we can, in the words of the UN Charter, live together in peace with one another, as good neighbors.

Thank you again for being here, and for giving me the opportunity to be with you.

PEOPLE DO CARE

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. EILBERG. Mr. Speaker, one of the many complaints we hear about our society today is that people do not care about anyone but themselves.

We have all heard reports about persons being beaten or robbed or killed while a crowd watched and did nothing. So I am happy to report to you today about a group of men, the Philadelphia Fire Officers Union, who went out of their way to help someone else.

Recently, the Sisters of Mercy, in my city, Philadelphia, acquired a new and more modern home for their vocational school and convent. Unfortunately, they did not have the money to pay for the transportation of the equipment and furnishings for the school and their residence.

When George A. Yeager, president of the officers union, heard about the sisters' problem he asked the members, all officers of the Philadelphia Fire Department, if they would help the nuns make the move.

Yeager also asked the Crown Cork & Seal Co. for some help. The company responded by giving the fire officers the use of six tractor trailers. The company also offered to supply the drivers, but they were not needed.

On August 12 of this year 75 officers, from every civil service grade in the department, three of their sons, one retired fireman, and one off-duty fireman arrived at the old school at 8 a.m. Five hours and 10 trailer loads later, four floors of furniture and equipment had been moved.

The move saved the sisters some $7,000 and restored the faith of a great many people in their fellow man.

OUR BOMBS FALL ON PEOPLE

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. McCLOSKEY. Mr. Speaker, most of the Nation shares a sense of dismay today over the senseless slaughter of Israeli athletes in a political terrorist action. As in the case of the assassinations and assassination attempts by which we have lost four national leaders in our own country in less than 10 years, we wonder whether or not the world is seeing a growing acceptance of violence as a means of political protest. We wonder whether or not our national taste for violence in television, movies, and current literature may not play a part in the motivation of individuals to commit acts of seemingly senseless tragedy.

It seems to me, Mr. Speaker, that as the world's largest and most powerful nation, enjoying a standard of living unparalleled in history, we should specifically question what part is played in the encouragement of terrorists around the world by the fact that the United States is daily killing and maiming hundreds of innocent civilians in North Vietnam. At the same time, as we deplore Palestinian terrorism or Irish terrorism, might we not also consider a cessation of the indiscriminate killing which necessarily accompanies our devastating air war in Southeast Asia.

What American child can be taught respect for human life when our national policy is to indiscriminately destroy the lives of Vietnamese civilians our pilots never see?

If our national policy is to use antipersonnel bombs and napalm against the villages and countryside of Vietnam, what do we tell our children about the value of human life? Are we not guilty of hypocrisy in wringing our hands over 11 Israeli lives when we daily acquiesce in the expenditure of millions of dollars to kill many times that number of Vietnamese? What kind of nation have we become?

We are reported to have over 200 B-52's and more than 400 fighter bombers operating in Southeast Asia. The heaviest raid of the war on North Vietnam was reported only a few days ago, involving over 200 planes. What only 12 planes could do in killing and maiming innocent Vietnamese children was well described by Howard Professor George S. Wald's eyewitness account of the bombing of the Thanh Hao hospital in North Vietnam last December 26. The following part of Professor Wald's account should give us pause today as we express our unanimous shock over yesterday's events in Munich:

[From the Washington Monthly, May 1972]

OUR BOMBS FALL ON PEOPLE

(Excerpts from Professor George Wald's account of the bombing of Thanh Hao)

I visited a dispersed portion of the Thanh Hoa provincial hospital which opened in September, 1970. It is three and a half kilometers from town, and, I was told, about three kilometers from the nearest strategic objective. There is a complex of low buildings of bamboo and thatch and two rather handsome brick buildings are under construction. Across the road there is a technical school, training students to be assistant doctors and pharmacists.

At 9:35 a.m. that Sunday, a group of four planes dropped 10 explosive bombs, one ton each, near the hospital. This was followed at 10-minute intervals by two further groups, each of four planes, dropping cluster bombs. I was told that each cluster bomb contains 300 pellet bombs, spherical, about two and five-eighths inches in diameter, with plastic jackets. The cluster bomb explodes in the air, releasing the pellet bombs, which are intended to explode just above the ground, where they will do the most damage. The pellet bombs in this instance did not contain pellets, but the casing itself fragmented into small rectangular pieces of metal each about four by 10 millimeters. Each pellet bomb breaks into about 300 such fragments. The one I was shown had a casing marked L22, was khaki in color, and had been manufactured in August, 1971.

The bombing of the hospital completely destroyed two of the buildings and heavily damaged another. One of the buildings destroyed had been for traditional medicine (Chinese and Vietnamese hospitals ordinarily offer patients a choice between traditional and western forms of treatment). The second building destroyed was the dental clinic. In all, nine persons were killed and 11 wounded. Of the nine killed, four were patients, the others were medical workers and their children. Of the 11 wounded, one was an assistant doctor, one a nurse, and seven were children. Of the seven persons in the nurse's family, four were killed, including her husband and three children. The wounded assistant doctor lost a boy in the raid, and two of his other children were wounded. The first bomb to hit a building threw bodies of patients as far as 20 meters; the head of one patient was found three days later 100 meters away.

I saw and photographed the dental clinic, flattened by the blast from a bomb that had fallen nearby. I also examined the bomb, which had been dug out, and another, a dud.

I then went through the wards of the hospital, going from bed to bed and examining the patients' records. They included the following:

Girl, Xuong, aged eight. Lower spinal cord cut by a pellet from a fragmentation bomb. Lower body permanently paralyzed.

Baby girl, Thao, three months old. She was being held by her grandfather. Her father had been killed in the bombing; her mother, wounded in the backbone, is in the hospital in town. The baby still has a pellet under her jawbone which will be removed later.

Boy, Chien, three years old. A bomb fragment tore his left arm so badly that the arm had to be amputated just below the shoulder.

Young male, Manh, 20 years old. He was being treated by traditional medicine and was about to be discharged when the bomb struck. Open skull wound with some brain damage, bone broken in forearm, pellet in chest, all results of a fragmentation bomb.

Male, An, 34 years old. Another patient in traditional medicine. Both lower legs shattered and in a cast. Also, so much skin was lost from scraping against the ground that skin grafting will be needed later.

Boy, Thinh, nine years old. Right foot torn off. Crutches.

Boy, Jaing, 13 years old. Son of the vice director of the medical school. Fragments in chest that entered through back.

Boy, Hung, 10 years old, son of an assistant doctor. His big brother was killed instantly in the raid, the head blown off and the body disemboweled. Blast wounds on arm. His sister had one buttock blown off.

Girl, Mai, 13 years old, and her sister, Huong, eight. Their mother was a student in the school, being trained as an assistant doctor. The mother and brother were killed instantly. The girls' father had recently been killed in the war. These children had only superficial injuries to feet and other parts. They now, however, have no family.

Boy, Phuc, 12, son of a pharmacy student in the school. A penetrating skull wound, exposing the brain, with some brain damage. He was operated on four hours later.

It was just a cloudy Sunday morning, the morning after Christmas. The visibility was poor, but good enough to bring three groups of planes over this area. As the Associated Press reported on January 3, 1972:

Bad weather over North Vietnam forced U.S. pilots to pass up a number of important military targets during last week's heavy air raids, the Pentagon acknowledged yesterday for the first time . . . the results of the bombing were not as successful as hoped.

METRICATION

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. GIBBONS. Mr. Speaker, for some time now I have advocated our conversion to the metric system of weights and measurement which is now used by or is coming into use in virtually all of the other countries of the world.

At a time when we are experiencing some of the worst balance of trade and balance of payments difficulties in our history, it is becoming increasingly important that we adopt the measurement system used by all of our trading partners if we are not to be badly hampered in our efforts to increase our exports and improve our trade and payments positions.

The metric system is not really a new departure for us. Congress authorized its general use way back in 1866, but has never acted to implement the metric system on a national basis. Nonetheless, we were one of the first countries of the world to adopt a decimalized currency, and the metric system is already used by our scientists and pharmacists and in more than 10 percent of our manufacturing—especially in manufacturing for export markets.

The Secretary of Commerce has reported to Congress that we should indeed convert to general, although not exclusive, use of the metric system over a 10-year period, which would allow the conversion to become effective gradually and with minimal cost and confusion. Also, a whopping 90 percent of American industries surveyed by the Commerce Department have expressed their support for the metric system.

I have joined with a number of my colleagues in the House in sponsoring legislation which would make it our national policy to encourage the substitution of metric measurements in this country and to help educate the American people in the use of the metric system—which is, after all, not so difficult to learn.

It is unfortunate that Congress has not exercised leadership in the area of metrication by considering this legislation, and I sincerely hope that we will remedy this failing in the near future.

S. Dillon Ripley, Secretary of the Smithsonian Institution, has suggested in a recent article on the importance of our early conversion to the metric system, that we begin now to increase our working knowledge of the system by simple means such as the use of "yardsticks" which measure length in both inches and centimeters. I think this is a good idea, and I would like to insert Mr. Ripley's article at this point in the RECORD:

[From Smithsonian magazine, September 1972]

THE VIEW FROM THE CASTLE

The problem of standard weights and measures keeps popping up in the United States with increasing frequency, and the solution is becoming increasingly clear: If we are ever going to adopt the metric system, let us get on with it.

Standardizing is especially urgent these days, partly because the United States is currently suffering from an unfavorable balance of trade abroad. It has been reported that any drop in our export of "measurement-sensitive products" such as vacuum pumps, typewriters and computers could darken the picture.

In 1969, the export of these instruments amounted to some $14 billion. Since we are in a deficit position, the loss of revenue from them would be far more crucial. Consider that the majority of nations use the metric system, and we naturally must provide them with metric instruments.

In 1866, the metric system was given legal status by Congress, but did not take the place of the old English system from which our system was originally derived. Actually, the imperial yard goes back to the Middle Ages. In 1893, the United States went off the British standard and began computing its yard and pound from metric standards. This was just as well, since the imperial yard, made of bronze, showed itself to be badly out of whack around the turn of the century—the microscopic inconsistencies are caused by shrinkage.

The standard meter is now firmly based on a specific wavelength of light which shows virtually no variation. The days of the imperial yard are numbered.

Britain is committed to go on the metric system in 1975. That leaves the United States standing almost alone—we and our Canadian neighbors—still resisting full commitment to the meter.

It would seem most sensible, therefore, to declare for the metric system once and for all. In 1968, Congress passed a law directing the Secretary of Commerce to study the problem of measurements. The study recommended that the United States adopt the metric system. Currently bills have been introduced and efforts proposed to make the switch, more or less gradually from a yardstick to a meter stick. (One meter equals a yard plus 3.37 inches.)

The easiest way to start converting would be to have hardware stores order yardsticks a meter long with the figures printed on both edges. That would explain things in the home. In time people would begin talking about centimeters instead of inches; a "foot" would come to mean only something on which you walk, rather than that untidy unit of measure which got going in the dim past. All planners, economists and research workers in this country would applaud such a sensible change, not least our Smithsonian scientists who, like the rest of the scientific community have been educated to use the metric system.

The framers of the Constitution recognized the importance of a uniform system of measurement and expressly gave Congress the power to "fix the standard of weights and measures." Now is the time to begin the arduous but necessary task of converting our archaic and chaotic system of measures to the metric system which is in almost universal use. For once, quaint historic charm should give way to common sense.

WHY A DIFFERENT MINIMUM WAGE FOR YOUNG PEOPLE?

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. ERLENBORN. Mr. Speaker, when the House in May passed H.R. 7130, to amend the minimum wage law, it insisted on a different minimum wage for young people than that paid to adults. The other body, however—and, of course, a few House Members—found it difficult to understand the value of a youth differential wage to young people, to their employers, and to education.

In a recent letter to me and to several other members of the Education and Labor Committee, David F. Howlan, personnel officer at Amherst College, Amherst, Mass., gives us specifics on the significant and adverse impact of a law that excludes the youth employment provision of the House-passed bill. I commend his letter to my colleagues with the reminder that Amherst is but one of some 8,000 institutions providing secondary education.

The letter follows:

AMHERST COLLEGE,
Amherst, Mass.

Recently the Congressional Quarterly reported that HR 7130, the Minimum Wage bill, may go to conference providing certain differences can be resolved. This step is necessary, I assume, because of the Senate's passage of S 1861 which differs in many respects with HR 7130. As Personnel Officer of Amherst College, I wish to call to your attention one provision of the House bill that is particularly pertinent to college and university administration and which, I feel, should be retained in HR 7130 or any subsequent compromise bill. That provision is Youth Employment.

As you recall, under HR 7130 as reported, employers were permitted to hire full time students at wages equal to 85% of the applicable minimum wage or $1.60 per hour ($1.30 for agricultural labor), whichever was higher. Certification by the Labor Secretary stating that the student worker would not displace an adult worker was required. The Erlenborn substitute, later adopted, permitted the employment of youths in any field under the age of 18 and students under age 21 at 80% of the applicable minimum wage or $1.60 an hour ($1.30 for agricultural labor), whichever was greater. On July 20, 1972, the Senate passed its version of the Minimum Wage Bill, but the amendment that would have authorized the employment of youths under 18 and students under age 21 at wages below the applicable adult minimum was defeated.

The impact of a law upon Amherst College that excludes the youth employment provision of the Erlenborn substitute would be significant and adverse. The following is a summary of the reasons why:

1. FINANCIAL AID

The Financial Aid Program of Amherst College includes employment of students in part time capacities to assist them in financing their college education. Such part time work is an integral part of a "self-help" concept at Amherst. Earnings are paid to the students by the College for services rendered; the costs are, therefore, tantamount to scholarship money for the students on financial aid. Many of these positions do not require the constant attention and effort by the student, and, in fact, permit studying while on duty. Other positions are flexible enough so that students may complement working hours with classroom hours. Generally the work they perform is limited in scope, i.e., duties are only portions of normal full time positions.

During this past fiscal year 875 of 1250 students were on the Student Payroll at some time or another. Funds expended for this purpose totaled $239,536 of which $19,233 were federal monies for the College Work Study projects. The hourly rate for student positions ranges from $1.60 to $3.50 per hour. Amherst College has a job classification system whereby the rates for different positions have different values. A raise in minimum rates, therefore, means that all rates would have to be adjusted upward. To raise the minimum wage from $1.60 per hour to the provisions of HR 7130 applicable to colleges and universities, i.e., to $1.80 per hour after passage and $2.00 per hour the following year means a 12.5% increase in cost to the College for each year. This amounts to about $30,000 each year. S 1861 would incur the same obligation except an additional year's increment to $2.20 per hour was added to that bill which would result in another round of increases.

The Financial Aid Program is supported primarily by College funds. To increase the minimum wage without concomitant increases in income from tuition charges and endowment literally means reducing the number of hours that can be spent for student payroll purposes. This in turn curtails the number of employed students and, therefore, the educational opportunity for many students. It is inflationary in terms of economics and deflationary in terms of educational opportunity.

2. ADMINISTRATION

The Erlenborn substitute removes the certification procedure of the Labor Secretary's office requiring a statement that student workers are not displacing adult employees. The current provision of the law is phrased in such a way that it requires renewals for such certification and, to say the least, it appears cumbersome and unrealistic to administer. The House bill, as was passed, is simple and applicable to the employment of youths and students all over the country. Moreover, it would encourage the employment of young people at a time in their lives when they need hope and opportunity. The responsibility is on the employer to meet the requirements of the law, much the same as other provisions of the Fair Labor Standards Act. It appears to me, therefore, to be impractical to go through the exercise of certification for such a sizable block of the work force. We do not need more administrative detail.

3. GENERAL FINANCES OF THE COLLEGE

Student labor does help the College in achieving its goals as an educational institution as well as providing an opportunity for students to pay their way through school. Amherst has employed students for as long as anyone can remember. As a private college it has limited resources so that a significant increase in costs immediately creates additional hardships on budgets that are already stretched beyond income. To meet rising costs productivity has been improved, but some of the improvements in productivity have also resulted in fewer jobs. The Minimum Wage bill is but one piece of employment related legislation that has affected colleges and universities in recent years. Social Security, Unemployment Insurance, the Occupational Safety and Health Act, to name a few, have contributed to increased costs and administration. Amherst is only one of over 1700 institutions of higher education in this country; the impact of this bill on student labor is obvious.

Thank you for any attention you may give this letter and good luck in your deliberations.

Sincerely,

DAVID F. HOWLAND,
Personnel Officer.

FLETCHER THOMPSON REPORTS FROM CONGRESS

HON. FLETCHER THOMPSON

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. THOMPSON of Georgia. Mr. Speaker, I include the contents of my newsletter, which is being mailed tomorrow, in the CONGRESSIONAL RECORD in order that it may be made available to all the Members who receive the CONGRESSIONAL RECORD and are not on my mailing list:

FLETCHER THOMPSON REPORTS TO YOU

AID AND COMFORT TO THE ENEMY

From July 8 through July 30, Jane Fonda broadcast psychological warfare propaganda messages from Radio Hanoi directed against American Servicemen. *Former Attorney General Ramsey Clark in August visited Hanoi and North Vietnam and while never condemning the North Vietnamese for their tens of thousands of murders and atrocities he spoke for North Vietnam against the United States.* Both Clark and Fonda allowed themselves to be used by the Communists. Why?

"HANOI JANE" BROADCASTS

Jane's broadcasts were typical Tokyo Rose and Axis Sally type material from Radio Hanoi. In trying to discourage American Servicemen and get them to disobey orders, she broadcast comments such as the following. *"The men who are giving you orders are war criminals . . . Why do you follow orders? . . . How does it feel to be used as pawns . . . You may be shot down . . . even be killed . . . but for what? . . . Tonight, when you are alone, ask yourselves . . . can you justify what you are doing? . . . Why do you follow orders telling you to destroy a hospital or bomb schools?"* In short, Jane Fonda for about a two week period, never condemned the enemy for their atrocities, never asked them why they would not comply with the Geneva Convention on the treatment of American POWs, but instead tried to demoralize American Servicemen through psychological warfare broadcasts over Radio Hanoi. Miss Fonda knows her charges are not true. Even though she is a famous actress she must answer for her actions.

NO ONE IS ABOVE THE LAW

Printed below are the remarks I made to the U.S. Congress when I called for an investigation of Jane Fonda. I have also requested an investigation into Ramsey Clark's activities.

[From the CONGRESSIONAL RECORD, July 20, 1972]

Mr. THOMPSON of Georgia. Mr. Speaker, I never cease to be amazed how people who grow up in a land of freedom and opportunity, such as the United States, can turn upon this their own country blindly taking the side of a totalitarian enemy. Actress Jane Fonda has made a trip to North Vietnam and has broadcast one or more times over Radio Hanoi directing her remarks to American servicemen. Obviously she is trying to demoralize them and attempting to get them to disobey orders. On July 17, 1972, she spoke over Hanoi radio and said in part:

"This is Jane Fonda speaking from Hanoi, and I'm speaking particularly to the U.S. servicemen who are stationed on the aircraft carriers in the Gulf of Tonkin, in the 7th Fleet, in the Anglico Corps in the south of Vietnam.

I visited a hospital today, the Bach Mai hospital. I saw a huge bomb crater in the center of the hospital. It was obviously dropped there on purpose. With the kind of bombs, the kind of techniques that have been developed now, you know, particularly you pilots know, that accidents like that don't happen. This was no accident. It destroyed wards filled with patients. It destroyed hospital equipment. It killed some doctors. It is a terrible thing to see what has been done.

"Why? Why do you do this? Why do you follow orders telling you to destroy a hospital or bomb the schools?"

Miss Fonda knows that there are no orders to bomb hospitals but to the contrary every effort is made to avoid them.

The thrust of her statements truly appear to be designed to cause the American troops to disobey the orders of their country. Frankly, I am astounded that an American, even Miss Fonda, would so overtly side with an enemy who has an officially announced policy of causing terrorism in South Vietnam. An enemy who have assassinated more than 30,000 schoolteachers, policemen, and civic officials through brutal ambush in South Vietnam. An enemy who have bombed school buses, cafes, indiscriminately, and who at every opportunity will lob a rocket into a city, caring not where it hits, only that it creates destruction and terror.

Clearly Miss Fonda is giving aid and comfort to the enemy and clearly she is closing her eyes deliberately and intentionally against the terror of the enemy. She is closing her eyes to the brutal mass executions by the North Vietnamese during the Tet offensive when 4,000 South Vietnamese were executed at Hue and then buried in a common grave by bulldozers.

Clearly Miss Fonda has chosen the enemy's side, the side of an enemy so brutal that when they have taken towns in South Vietnam they have systematically gone about murdering and executing civic officials who believe in democracy and the right of the South Vietnamese to determine their own destiny.

Some say Miss Fonda is making her statements to further her career as an actress that publicity, good or bad, helps an actress' career. If this is her reason, her actions are all the more despicable. If her reason is to cry out against human suffering, why does she not decry the brutal terrorist tactics of the North Vietnamese. The fact that she only condemns her own country and not the enemy puts the lie to any statement she may make that she is concerned about human suffering. Jane Fonda by her failure to cry out against the terrorist tactics of the North Vietnamese is putting a lie to any statement she may make that her concern is for humanity.

It is obvious by her actions that Miss Fonda's concern lies in one of two realms. One, she desires to see a Communist dictator seize control over the people of South Vietnam by whatever means they desire to employ, or two, she is so cold and callous to human suffering that she would use the emotion of the Vietnam war as a vehicle by which she obtains publicity hoping that this will further her movie career and put green Yankee dollars in her bank account.

It is interesting that there has not been even one report in the press of any statement attributed to Miss Fonda where she has condemned the North Vietnamese for their massive land invasion against South Vietnam last spring. I wonder if she at any time mentioned to the North Vietnamese the slaughter of the thousands of South Vietnamese civilians, including children, women, and old men as they fled the ruthless North Vietnamese invader. I wonder if Jane Fonda ever asked the North Vietnamese why they had a deliberate policy of trying to cause terrorism through extremist actions in South Vietnam. I wonder if Jane Fonda ever brought up the question of American POW's and why the North Vietnamese will not adher to the Geneva Convention regarding the treaty of POW's.

In my opinion Jane Fonda is a despicable individual not deserving of any of the fruits of this country. The actions of Jane Fonda, as reported over Radio Hanoi, I sincerely believe constitute treason against this country and I have requested the Attorney General to fully investigate the matter with the aim of bringing treason charges against Miss Fonda. For me to do any less would be to neglect the duty I owe to all loyal Americans.

NO CONCERN FOR VICTIMS IN SOUTH VIETNAM

I sent to Jane Fonda dozens of pictures of North Vietnamese atrocities: *The burning of babies and old women with flame throwers, people who have had their heads cut off,* hospitals, schools, orphanages and churches destroyed by the North Vietnamese and asked her to denounce these documented acts of murder and atrocities against the South Vietnamese. But Jane will not criticize the North Vietnamese!

Because the pictures are so horrible I am not going to reprint them here but printed below are pictures *showing war supplies stored along dikes and North Vietnamese anti-aircraft guns on top of a dike* firing at American airplanes as they pass. This is the reason some dikes have been hit. [Pictures are not printed in Record.]

MIDDLE EAST WAR PREVENTED

Few people know how President Nixon helped prevent a major war in the Middle East when Syria started to invade Jordan in 1970. Because Jordan was preventing Al Fatah guerrillas from raiding Israel from Jordanian bases, Syria planned an invasion of Jordan. President Nixon contacted Ambassador Rabin and asked how long Israel would be able to ignore the invasion, and how long it would take for Israel to wipe out the Syrian column if they moved. *The President is reported to have told the Soviet Union that they had better use their influence to get the Syrian column to turn around, otherwise Israel would be forced into massive action.* Consequently, the Russian advisors left the Syrian tank columns when they reached the Jordanian border and the Syrians abandoned their invasion of Jordan. Thus, a new war was stopped before it started!

THE NEW JERSEY SPORTS COMPLEX: POLLUTION, PROBLEMS, AND THE PUBLIC

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. HELSTOSKI. Mr. Speaker, recently, Mr. William Walsh of Rutherford, N.J., wrote a very timely and interesting article concerning the building of the New Jersey Sports Complex and the myriad problems related to it.

Mr. Walsh is a respected journalist for the Herald-News of Passaic and most knowledgeable on the issues surrounding the proposed New Jersey Sports Complex and its impact on the environment and the public.

I call this article to the attention of my colleagues because many communities throughout the United States are faced with problems similar to what we are facing in northern New Jersey.

Mr. Walsh places into proper perspective the desire to build large complexes without due consideration being given to pollution, sewage, waterways, and other environmental factors, along with dangers faced by the public. In essence, the challenge is how to obtain truly balanced planning and usage of great stretches of estaurine areas.

Mr. Speaker, the very informative article by Mr. Walsh follows:

[From the Passaic (N.J.) Herald-News, Aug. 20, 1972]

THE NEW JERSEY SPORTS COMPLEX: POLLUTION, PROBLEMS AND THE PUBLIC

(By William Walsh)

The autumn winds rustle the cattails as they bend gently toward the New York skyline as if to point out the Empire State Building standing majestically in the distance.

But here among the cattails and wandering waters of the New Jersey Hackensack Meadowlands there is only desolute quiet, broken only by the distant hum of vehicles, moving on Routes 3 and 17. For here lies 18,000 acres of undeveloped land, considered by land appraisers as the most valuable real estate in the nation."

Less than 20 years ago an acre in the meadowlands could be purchased for $500. Today, an acre is worth $110,000.

On this property now owned by the state, the N.J. Sports Authority, created by an act of the State Legislature in 1971, is set to build a race track, football stadium for the N.Y. Giants, a motel, and an amusement area, to be opened by 1975.

Following the N.J. State Supreme Court's decision, upholding the constitutionality of the Sports Complex Act, the Court ordered that hearings be held on the environmental impact of such a complex on 750 acres and its affect on the surrounding municipalities adjacent to the meadowlands.

For five weeks testimony was presented by various experts on ecology, engineers, and scientists, before the Hearing Committee, composed of members of Hackensack Meadow lands Development Commission and the State Department of Environmental Protection.

Leading the fight against the present plans of the sports complex is Alfred A. Porro, Jr., Lyndhurst attorney, who represents the National Audubon Society and local towns adjacent to the sports complex site.

Porro, who has specialized in marshlands and meadowlands development, and is adviser to the U.S. Commission on Marine Science, Engineering & Resources, said the other day, "Pollution sweeps through rivers and coastal zones in a bolero of death."

The attorney claims that New Jersey, along with the entire nation, faces a challenge—how to obtain truly balanced planning and usage of great stretches of estuarine areas.

He contends that the N.J. Sports Authority has not planned for the protection of the environment in their sports complex, but actually will create conditions that will be dangerous to human life and further pollute the whole meadowlands area.

A casual look at the Hackensack River reveals bottles, cans, old tires, oil drums, and other wastes flowing merrily toward Newark Bay and the open sea.

Ironically, dead birds and fish were found recently in back of the office building in the meadowlands, occupied by the state's Hackensack Meadowlands Development Commission.

In testimony given at the hearings, Dr. Robert N. Rickles, former air resources deputy administrator for New York City, stated, "Unless the sports complex is planned with adequate mass transportation and unless automobile traffic to the site is limited sharply, the existence of the complex will create serious air pollution problems and create circumstances which could be harmful to the public health."

Rickles, who holds a PhD. degree in chemical engineering, said that even short exposures to carbon monoxide from automobile exhausts could endanger the health of persons over 40 with susceptibility to heart failure.

The argument that Porro, Rickles and other experts have presented at the hearings is that the sports authority has failed to plan properly and that the major problems are: air pollution; sewerage; construction procedures; and the Hackensack Meadowlands Master Plan.

Air Pollution—90 per cent of air pollution will be caused by emissions from idling automobiles and buses in the parking lots. In a report prepared for the N.J. Sports Authority by Dr. Jack McCormick & Associates, environmental firm, the report states in part: "Approximately 18,000 cars and 400 buses will attempt to leave the site in one hour, and these volumes, even though distributed by direction, will overload available capacities. For example, the projected peak hour departure volume is 5,900 cars."

The above estimate, incorporated in McCormick's report, was prepared by Wilbur Smith and Associates, nationally known traffic study experts. Smith's estimates are considered conservative by some since it is now expected that traffic volume will be closer to 25,999 cars and 800 buses to handle the expected 80,000 football fans alone.

As far as traffic generated by baseball games, the Smith report stated, "This traffic could total 21,000 cars and 400 buses on weekdays. These conditions are substantially worse than the 18,000 cars projected for football games, and it is unlikely that any improvement, other than substantial rail access. could be achieved."

Add to these traffic volumes anticipated, the heavy weekend normal traffic flowing eastbound on Route 3 on Sundays and southbound on Route 17—all heading toward New York City and other points adjacent. Added to the Route 3 traffic will be additional heavy Sunday traffic funneling onto Route 3 from the N.J. Turnpike at Secaucus. Additionally, many vehicles leaving the Giants stadium parking lots will be headed north on Route 17 to Route 80 eastbound, joining other heavy traffic headed for the George Washington Bridge.

No comprehensive plan has yet been presented by the sports authority to explain how such massive traffic disgorging from the sports complex site will be handled.

The Bergen County Police, a force of 115 men, would not be able to supply enough manpower to direct the flow. The department is responsible for patroling and directing traffic on county roads only, of which there are 540 miles in the County. Not more than 30 men are on road duty during any given eight hour shift.

Local police municipalities in the surrounding towns of Carlstadt, East Rutherford, Hasbrouck Heights, and Rutherford, will have no responsibility to direct such traffic and could not supply manpower even if requested in an emergency.

Private security guards hired by the sports authority would be limited to handling traffic only on the complex site and would be legally barred from directing traffic on state highways.

Sewerage—All reports show that the Bergen County sewerage plant, located in Little

Ferry, is overloaded. Porro told the hearing officers that sewerage generated from the sports complex could not flow into the county processing plant with present facilities.

Dr. C. J. Touhill of Enviro-Engineers, leading experts on problems of solid waste disposal, raised the serious question, still unanswered by the sports authority, of waste pollution disposal. He pointed out that the Little Ferry Sewerage Treatment Plant is already over-loaded. Dr. Touhill believes the only practical solution would require the authority to have their own sewerage control plant at a cost of $3 to $5 million.

Construction procedures—It is estimated by engineers that it will require 3 million cubic yards of landfill to prepare the sports complex site for construction.

How will such an enormous amount be transported to the 750 acres? The Sports Authority plans are to bring the fill up the Hackensack River on barges and then pipe it under high pressure water lines onto the site. Again, engineers estimate it will require 30 billion gallons of water to dredge the fill onto the site.

To complete the process in reverse, the water will then be piped back into the river, carrying with it waste pollution materials.

Richard Plunkett of the National Audubon Society, said recently, "The construction schedule to complete the sports complex by 1975 will devastate the environment in the meadowlands." He pointed out that construction firms, working under specific completion date assignments in their contracts, will have little interest in protecting the environment from the massive effects of heavy construction and the resultant pollution caused.

Hackensack Meadowlands master plan—The Master plan has projected 200,000 new residents in the Carlstadt meadowlands and another 200,000 coming to work in the industrial parks, a total of 400,000 persons using transportation adjacent to the sports complex.

The Meadowlands Commission went into effect in 1969, and issued their Master Plan in 1970. They did not, originally, contemplate a race track in the sports complex.

On Sept. 9, 1970, the N.J. Racing Commission noted: "It is clear to us and it will soon be equally clear to the public that the racetrack in the proposed location is incompatible with the Meadowland Commission's plans for the best use of the meadowlands."

Pollution and politics go together. Take for example, the "Wetlands Act", passed by the State Legislature in 1970. The Act states that no property owner can dredge or fill in property under water in order to protect and preserve the marshlands.

However, the "Wetlands Act" excluded the Hackensack Meadowlands from the law. Porro concludes that the meadowlands was left out of the Act in order to allow the continuing dumping of refuse and garbage there.

More than 35,000 tons of garbage from Bergen, Hudson, and Essex Counties are dumped in the meadowlands each week.

The most critical question raised by Dr. Touhill is "The New Jersey Sports Authority has agreed to remove all of the garbage that has been deposited in 750 acres (the sports complex site) over a half century." However, their report doesn't say where they would move a possible 260 million to 400 million cubic feet of solid waste.

No estimate has been made of the possible millions of dollars it would cost even if there was a place to dispose of it.

Dr. Rickles, in concluding his testimony before the hearing commission, observed, "Clearly, the problem without adequate mass transit, to empty traffic on weekends from the sports complex, will be chaotic . . . the same cannot be said for air pollution—it will not be chaotic—simply deadly.

Giant sports fans may well have to come equipped with gas masks to watch the football games, and may spend tortuous hours fighting their way home unless solutions to these major problems are found before 1975. So far, the sports authority does not seem to have any of the answers.

In a recent article in the National Geographic magazine, entitled "Can We Save Our Salt Marshes", Porro stated in an interview with the author, Professor Stephen Hitchcock, "Man is outwitting himself. Technology has taught us to conquer, and many marshes have lain undisturbed only because man at first couldn't modify them. Scientists say, for nature's sake—and for man's sake—don't blacktop it all. The scales must tip in favor of conservation and restoration. Land for development must be found elsewhere."

ALTERNATIVES TO THE PRESENT SYSTEM OF SOLID WASTE DISPOSAL

HON. GILBERT GUDE

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. GUDE. Mr. Speaker, each summer I sponsor an intern program for a number of high school juniors from my congressional district. During the 3 weeks they are here they listen to prominent speakers, take a number of tours, and participate in individual research for my office.

Out of this research have come many valuable and timely reports. In particular, Miss Amy Kyle's analysis of solid waste disposal alternatives has been chosen by my Intern Selection Committee as the best report. I believe that an examinaiton of this report would be helpful to our understanding of the problem and the possible solutions.

Five other students deserve special recognition for their reports. They are Miss Lisa Smith, Mr. Jeff Francis, Mr. David Carbone, Miss Linda A. Mallin, and Miss Martha King.

Miss Kyle's paper and a list of the other participants in my program follow:

ALTERNATIVES TO THE PRESENT SYSTEM OF SOLID WASTE DISPOSAL

(By Amy Kyle)

"And man created the plastic bag and the tin and aluminum can and the cellophane wrapper and the paper plate and the disposable bottle and this was good because Man could then take his automobile and buy all his food in one place and he could save that which was good to eat in the refrigerator, and throw away that which had no further use. And pretty soon the earth was covered with plastic bags and aluminum cans and paper plates and disposable bottles and there was nowhere left to sit down or to walk and Man shook his head and cried, 'Look at all this God-awful litter." [2]—ART BUCHWALD, 1970.

American industry produces an astounding amount of disposable packaging. Fifty billion cans and fifty billion bottles are discarded annually.[3] In 1966, 1,804,000,000 pounds of plastics (20% of the total plastics produced) were used in packaging. By 1976, this figure is expected to double.[4] Half of the paper produced is used for packaging (25.2 of 46.6 million tons in 1966).[5] 800 million pounds of waste are produced daily in the U.S.[6] In addition to ordinary household wastes are all mining, construction and hospital wastes, and junked automobiles. All these "wastes" have to be dealt with, preferably in a way that retains some of their value and is also ecologically sound.

At this time, 90% of the refuse collected is either burned or deposited in a landfill. Neither is particularly satisfactory. Landfill operations derive a small value from the refuse; landfill is worth about $1 a ton [7] where it is needed. Understandably, many localities have no swamps to fill in or ski slopes to construct and for these, the land used is lost. New York City, for example, consumes 200 acres a year with its landfill operations. 94% of U.S. landfills [8] have been labeled unsanitary by the Public Health Service.[9] In ideal circumstances, landfill is objectionable for only two reasons: 1) It requires extensive tracts of land; 2) It does not permit any of the valuable elements of the trash to be retained.

Incineration is the other major method of solid waste disposal. About 75% of the incinerators currently in use contribute to air pollution [10] and after burning, a residue of twenty percent or more remains. While relatively pollution-free incinerators can and have been constructed, three major hurdles face them: 1) They have to conform to rigid standards; 2) Plastics corrode flues; 3) The combination of the rigid standards and the damage caused by the corrosive plastics makes them expensive to operate, usually about $7 a ton.[11]

These two methods do not provide for the recovery of any useful material from trash. Because trash is the only "resource" that is increasing, it seems advisable to develop methods and then employ the methods to take advantage of the materials in it.

Economics is important in the development of alternate ways for dealing with this problem. No venture can be inordinately expensive and still succeed. The return has to help pay for the process; therefore, trash should be examined to see what materials of value it contains.

Paper constitutes the major portion of trash. (see table 1) For the values, assume that it is recycled to the original industry. Food yard and garbage compose the second largest portion. They are valuable as compost. The remainder is made up of very little of any one material and, in that form, has only fuel value.

POTENTIAL VALUES IN TRASH

	Percent by weight	Potential value of component	
		Dollars per ton of component	Dollars per ton of trash
Paper, paperboard	50	100	50
Ferrous metal	9	20	2
Aluminum	1	200	2
Glass, ceramics	10	10	1
Garbage, yard waste	20	[1] 5	1
Miscellaneous, plastics, textiles, etc	10	[2] 5	.50

[1] Value as compost.
[2] Value as fuel.

The value of paper in trash dwarfs the other values. However, several hurdles stand between trash and this value. 1) This is the upper limit; 2) Several obstacles exist between the dump and the industiral stockpile. These figures should be used only as a yardstick to compare various methods. Other factors that need to be considered: 1) The cost of separating the material from trash and converting it to a usable form, including the processing losses and degradation of materials; 2) The existence of a market to absorb recycled materials that is close enough to the production site to allow shipping at reasonable cost; 3) The degree of

---

Footnotes at end of article.

difficulty involved in disposal of final residue after other materials are removed.

Using these criteria, we can compare varilous methods:

A. INCINERATION

Two possible things of value may be obtained from incinerators. They are heat recovery and material recovery from the residue. In Europe, the heat produced in the inceneraters is successfully used to run steam generators. The major drawback is in the fact that the paper is used as a fuel which is of low value compared to its recycling value as shown in Table 1. The residue contains many valuable components. (See Table 2.) The US Bureau of Mines has developed a process that can separate the elements of this residue by a relatively simple screening process at a reasonable cost of $4 a ton. It seems possible that an incinerator using the heat and the residue might be able to operate near the breakeven point. However, with the increased strictness of air pollution standards, it appears doubtful that this is the most feasible alternative in many cases.

TABLE 2.—*Composition of typical municipal incinerator residue*

[Percent by weight]

Tin cans	17
Other iron and steel	11
Other metals	2
Glass	44
Ceramics, stone, bricks	2
Partially burned or unburned organic matter	9
Ash	15

From the U.S. Bureau of Mines, Report 7204, 1968.

B. PYROLYSIS

Like incineration, pyrolysis involves a "burning" process, but in this case air is excluded and the heat is applied externally. It produces charcoal and some ash similar to the ash remnant of incineration. Other products include methyl alcohol, acetic acid and some heavier oils; however, these are not likely to be readily marketable. At this time, a plant in Delaware is being constructed to operate under this system which would handle 500 tons of garbage a day. The process will include a composting step to handle the bulk, the removal of metal and glass, and the pyrolysis of the residue.

A related process is being developed by the Firestone Rubber Company. It is designed to deal with the problem caused by old, worn tires. Tires can be pyrolyxed to yield about 45% solid carbonized residue with the remaining 55% a mixture of gases and liquids similar to petroleum compounds.

The importance of this process lies in its ability to convert organic matter into charcoal, which then can be sold for fuel. This process shows a potential for simplifying the problems of extracting heat values from the refuse and also meeting pollution standards.

C. COMPOSTING

This process involves the biological oxidation of organic parts of trash to a stable and ecologically acceptable form. Usually the organic material is shredded and left to cure in windrows which are turned over after a three to five week period, or in large rotating cylinders for three days. Sewage sludge is used to moisten the compost. The process costs $5–10 per ton. About ½ to ⅔ ton is made from one ton of garbage, which is screened to remove plastic, metal, and large glass pieces. It is low in nutritive value and is best used in reclamation of barren or dry land or strip mined slopes. It can also be used to stabilize steep slopes and road embankments. It can also be used in certain specialized crops.

At this point, compost has low value. The trend is toward creating it, not to sell, but as a way of changing unwanted organic wastes into a substance suitable for the environment. This process has a number of disadvantages; (1) Incineration and pyrolysis will accomplish the same end and will produce usable heat and less residue; (2) It is produced in cities but can be used only in rural areas; (3) The disposal of the substance may become a problem. Composting is not likely to become a solution in itself. Used in combination with other procedures, it could prove useful.

D. CELLULOSE FIBER RECOVERY

Twenty percent of the 55 million tons of paper produced yearly in the US is made from waste paper, most of which comes from commercial courses. 70% of it comes from corrugated board or newsprint which is sorted, baled, and shipped by commercial dealers or volunteers to paper mills. There is a good market for these fibers. The problem arises in their separation from the remainder of the refuse. Several approaches are being tried: 1) Removing paper from raw trash and selling it; 2) A procedure developed by Black Clawson, Co. which involves pulping raw garbage directly in a machine similar to a large-scale kitchen blender. Mechanical separation of cans, shoes, bones, glass and other non-disintegratables occurs, then a fine screen catches the cellulose fibers. Most of the fiber can be recovered and the glass and metal can also be sold.

The US Forest Products Lab in Madison Wisconsin combines "dry sort" methods with the wet pulp method. The FPL wants to develop a method for the upgrading of crude pulp to high quality, material, which is necessary before it can replace virgin timber in "any" ways. A problem encountered in this research stems not from the "casual" contaminants, like dirt, in the paper, but in the waxes, pigments, and plastics added to the paper by the manufacturers.

A second problem encountered in this, as is all, attempts at recycling, is its effect on the market. 78% of the paper produced is discarded. Successful reclaiming of these fibers could allow the introduction into the market of high quality fibers of a quality comparable to that of virgin timber. These processes seem to show great promise of eventually being successful in their aim.[12]

E. PRODUCTION OF METHANE GAS FROM ORGANIC WASTES

Organic wastes can be converted to methane (natural) gas. This process would be most effective in coping with the tremendous amount of animal waste produced at feedlots each year (estimated to be 13 billion tons, seven times that of urban areas).[13] Centralizing of food processing and animal feeding makes it difficult to return wastes to the soil which practice ignores the chemical emergy in carbon compounds. Composting causes C—C bonds and C—O bonds to be broken and CO_2 and H_2O to be formed. The solar energy of photosynthesis is dissipated. When methane is produced, this energy is retained for later use.

Organic wastes, even dilute sewage, spontaneously yield methane. Unlike the pyrolysis process, this procedure needs water. In the absence of oxygen, micro-organisms transform wastes in an action called anaerobic digestion, yielding a gaseous mixture of about 72% methane and the remainder a a combination of CO_2, ammonia, hydrogen, and small amounts of mercaptans and amines. 50–80% is transformed into volatile products. The remainder can be used as landfill, incincerated, or pyrolyzed.

This is an important development because methane is becoming more and more widely used, being relatively pollution free: 1) It is easily cleaned of potential pollutants; 2) It leaves no ash; 3) Combustion is more complete than with oil or petroleum. Although methane is the most desirable fossil fuel it is in the shortest supply. This process provides a renewable energy source. Methane would be produced near the population. Gas distribution systems are already in operation; there would be few transportation problems. It would cause no change in the lifestyle of the American people.

The potential appears to be enormous. Agricultural and urban solid wastes total 1.5 billion tons a year. Each pound of organic waste will produce ten cubic feet of methane for a possible total of 30 trillion cubic feet per year, which is 1½ the total consumption of natural gas today, $6–9 billion worth.

There would be a considerable cost to developing facilities from the fermentation of the organic wastes with sewage water for seven days. Underground tanks would have to be installed, but the costs have to be weighed against the cost of developing new gas resources and transporting gas from distant regions.[14]

In solving the trash problem, a new technology needs to be developed for making products from nonvirgin sources. The attitude that everything is made to be used and then discarded is slowly changing. The technology is needed. There is no reason that trees should be cut down at the rate that they are when the average load of garbage contains the same percentage (50%) of fibers used in making paper that a tree does. Reusing our waste is not impossible, but it will take some effort.

Funds have to be appropriated to allow the Bureau of Solid Wastes Management to conduct the necessary research. Also, a program of Federal subsidy of recycling projects should be begun to help commercial recyclers begin to catch up to the industrialists who have a great head start. Miners of the nation's waste should be given all the tax privileges and advantages long enjoyed by users of the nation's natural resources. In any case, an attempt should be made to stop unnecessary exploitation of our resources by use of already used materials available.

LIST OF 1972 INTERNS

Debra Ann Bichner, Sherwood High School.
Mary V. Bobinger, Academy of the Holy Cross.
Mary Brady, Ursuline Academy.
David Carbone, Atholon High School.
Hugh Carroll, Good Counsel High School.
Thomas P. Carter, Wheaton High School.
Anne Bruton, Regina High School.
Elliot Chabot, Peary High School.
Pamela Cooper, Academy of the Holy Names.
Bill Cochran, Alholton High School.
Steve Cooper, J. F. Kennedy High School.
Michael Curley, Rockville High School.
Deborah S. Dorman, Woodward High School.
Melanie G. Dorsey, Holton Arms School.
Brenda Joyce Eden, Arundel High School.
Julie Femiano, Glenelg High School.
Josephine Ferraioli, Damascus High School.
Ward W. Fetrow (Chip), Damascus High School.
Kris N. Foster, Gaithersburg High School.
Jeff Francis, Paint Branch High School.
Gordon Gottlieb, Einstein High School.
Stephen B. Heiman, Sidwell Friends School.
Debbie Jones, Immaculata Preparatory School.
Laurie Kahn, Sidwell Friends School.
Kristie A. Kenney, Magruder High School.
Martha E. King, Howard High School.
Sharon Kothe, Notre Dame Academy.
Elizabeth Gail Korn, Walter Johnson High School.
Michael Kowler, Springbrook High School.
Amy Kyle, Montgomery Blair High School.
Deborah Linn, Einstein High School.
Elizabeth Litrel, J. F. Kennedy High School.
Ann MacNaughton, Winston Churchill High School.
Linda Ann Mallin, Howard High School.
Paul D. Mannina, Peary High School.
Ellin Marans, Springbrook High School.
Michael R. McKinley, Wilde Lake High School.
Robert Miller, Sidwell Friends School.
Margaret Ann Murch, Sherwood High School.
Mary O'Donnell, Ursuline Academy.
Karen Orlansky, Bethesda Chevy Chase High School.
Howard Present, Bethesda Chevy-Chase High School.
Sharon L. Ramsburg, Glenelg High School.
Anne Reinburg, The Academy of the Holy Cross.
Quinn Scamahorn, Montgomery Blair High School.
William Short, Wootton High School.
Lisa Smith, Academy of the Holy Names.
Joshua E. Teichman, Wheaton High School.
Gerald Vetter, Gaithersburg High School.
Neal S. West, Woodward High School.
Gordon A. Whitt, Paint Branch High School.
Elizabeth Williams, Walter Johnson High School.
Nancy Winkler, Wilde Lake High School.
Nicki Markman, Winston Churchill High School.
Garth Weldon, Duke University (formerly from Damascus)
John Daly, University of Maryland (formerly from Good Counsel High School).

MONTHLY CALENDAR OF THE SMITHSONIAN INSTITUTION

HON. HENRY P. SMITH III

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. SMITH of New York. Mr. Speaker, it is my privilege each month to insert in the RECORD the monthly calendar of the Smithsonian Institution. The September calendar of events follows:

SEPTEMBER AT THE SMITHSONIAN

Sunday 3—Concert: *Songs by Stephen Foster,* featuring Jan DeGaetani, mezza-soprano; Leslie Guinn, baritone; Gilbert Kalish, piano and melodeon; Robert Sheldon, flute and keyed bugle. The musical instruments are from the collection of the Division of Musical Instruments, and were used in the recent recording by these artists, 3 p.m. The Renwick Gallery, 17th and Pennsylvania Avenue, N.W. Limited seats available. For FREE tickets call 381–5010.

Wednesday 6—Exhibition: *Red Groom's Astronaut.* A wood, cloth, acrylic and plastic sculpture of astronaut David Scott on the moon by an artist considered to be "one of the freshest and most original young American artists . . ." The 11-foot-high sculpture was created in December 1971–January 1972 as part of a larger construction and was first displayed at the Guggenheim Museum. National Portrait Gallery, through November 19.

Design film: *Music Rack.* Wendell Castle, woodcraftsman and artist, is shown making a complex music rack. Continuous half-hour showings beginning at 10:30 a.m.; last showing at 2:30 p.m. The Renwick Gallery.

Thursday 7—Exhibition: *A Century of Weather & Crop Service.* Marking 100 years of cooperation between the Department of Agriculture and Commerce in providing weather reports and forecasts to farmers, and going back to 1849 when Joseph Henry, as the first Smithsonian Secretary, pioneered the nation's weather mapping network. Weather maps and measuring devices from then to now are included as well as a teleprinter providing the latest weather information from headquarters in Suitland, Md. First floor, National Museum of History and Technology. Through December 31.

Thursday 13—Design films: *Glas-leerdam.* Dutch film on the design and manufacture of glass. Continuous half-hour showings from 10:30 a.m.; last showing 2:30 p.m. The Renwick Gallery.

Friday 15—Film: *C & O Canal documentary*—a filmed account of citizen action that succeeded in preserving the historic canal along the Potomac. British-made, the film offers an opportunity to see how others view the workings of the U.S. citizens in achieving a public purpose. Opening program of the fall lecture series sponsored by the National Parks and Conservation Association. 8 p.m. Natural History Building auditorium.

Exhibition: *The Way of Good and Evil: Popular Religious Lithographs of 19th Century America.* Fifty-six prints including Biblical, moralizing and temperance movement themes, selected from the Harry T. Peters "America on Stone" Collection. National Collection of Fine Arts, through November 12.

Fifth anniversary celebration—Anacostia Neighborhood Museum. Activities will include a parade of drum and bugle corps, speeches by Smithsonian and city dignitaries, and the preview opening of an exhibit entitled *Evolution of a Community, Part II* (see Sept. 16). Food will be available at modest prices. 6:30–9 p.m., 2405 Martin Luther King Jr. Avenue, S.E. The public is invited.

Saturday 16—Exhibition: *Evolution of a Community, Part II.* The history of Anacostia is brought up-to-date from the post World War II years with the last of a two-part exhibition. A survey made in the community disclosed five main areas of concern and frustrations shared by Anacostians: housing, unemployment, education, drugs and crime. These concerns are the subjects of the five sections of the exhibit. Photographs, text, drawings, video tape programs and a slide/tape show trace the development of the problems and tell where the community is today. Anacostia Neighborhood Museum. Through 1973.

Sunday 17—The Gospel Truth '72—a jazz/gospel music festival. Twelve well-known, local groups will perform from 1–6 p.m. at Cedar Hill, home of Frederick Douglass, 14th and W Streets, S.E. The program is being presented by the Anacostia Neighborhood Museum in cooperation with the National Capital Parks as part of the Museum's 5th Anniversary Celebration. Food and soft drinks will be sold. The public is invited.

Wednesday 20—Lecture: Man and Cosmos: *History of the Solar System.* Lecturer: Owen Gingerich, Smithsonian Astrophysical Observatory. First in a series of nine lectures sponsored by the National Air and Space Museum and the SAO, and designed for the Washington academic and professional community. The series will provide a comprehensive and current survey of man's past, present, and future concepts of the solar system, with particular emphasis on the results of space science research during the past decade. One-hour lecture followed by question and answer period. 7:30 p.m., History and Technology Building auditorium. Free admission, limited seating. The public is invited.

Design film: *Design and Man.* A filmed look at industrial and commercial design and the design process. Continuous half-hour showings beginning 10:30 a.m.; last showing, 2:30 p.m. The Renwick Gallery.

Tuesday 26—Exhibition: *The Right To Vote.* Ballot boxes, taxpayer lists, Suffragette manifestos, as well as cartoons, posters, and clothing, tracing the history of voting rights as they have been extended to the landless, soldiers, blacks, women, Indians, and 18-year-olds. Museum of History and Technology, through January 31, 1973.

Wednesday 27.—Lecture: Man and Cosmos: *The Sun.* Lecturer: A. G. W. Cameron, Yeshiva University. Sponsored by the National Air and Space Museum and the Smithsonian Astrophysical Observatory (see September 20 for series details. 7:30 p.m. History and Technology Building auditorium. Free admission, limited seating. The public is invited.

Design films: *With These Hands.* A narrated film showing eight artist-craftsmen working in their studios. Continuous half-hour showings beginning 10:30 a.m.; last showing 2:30 p.m. The Renwick Gallery.

Lunchbox forum. Subject to be announced. 12 noon. Room 449 Smithsonian Institute "Castle" Building. Sponsored by the National Air and Space museum.

Thursday, 28.—National Capital Shell Club: *Informal discussion,* conducted by staff members of the Smithsonian's Division of Mollusks, 7:30 p.m. *Monthly meeting,* 8:25 p.m. Room 43, National History Building. Public is invited.

Friday 29.—Exhibition: *The Hand and the Spirit: The Religious Impulse in American Art, 1700–1900.* Over 120 paintings and sculptures in the first major exhibition ever held documenting specifically religious intent in American art that developed both in the "high" art of Sargent, Copley, Eakins, West and other trained professionals and the "native," or folk, art of Fine Arts. Special Exhibition Gallery, NCFA, through November 5.

CREATIVE SCREEN FILM SERIES

September 7, 9—*Bouquet, The Art of the Conservator.*

September 21—*November, Zagret, Bits; Multiple man.*

Program begin 11:15 a.m., 12:15 & 2:15 p.m. National Collection of Fine Arts.

FIFTH ANNIVERSARY OF ANACOSTIA NEIGHBORHOOD MUSEUM, SEPTEMBER 15, 1967–72

The Anacostia Neighborhood Museum opened five years ago as an experimental extension of the Smithsonian Institution—an idea that grew out of a conference on museums and education, co-sponsored by the Smithsonian in August 1966. The building, that houses the museum is a former neighborhood movie theater that had also been used as a skating rink, dance hall and a church. The area citizens played a major role in establishing and operating the museum and local youth groups did much of the work of renovating and decorating both the exterior and interior of the building. John R. Kinard whose background included a wide range of self-help programs in both the United States and Africa, was appointed the museum director. Mr. Kinard and his staff have emphasized exhibits that have been suggested by the neighborhood residents and have presented such varied activities as free jazz concerts, exhibits on the history and development of the Anacostia area, and the role of black people in science and art.

The anniversary will be celebrated with a parade, speeches, the opening of a new exhibit and a jazz/gospel music festival (see September 15, 16 and 17 in the Calendar listings below).

DEMONSTRATIONS

Museum of History and Technology

Music Machines—American Style. Mechanical and electronic music machines. Monday through Friday, 1:30 p.m., 2nd floor.

Spinning and Weaving—Wednesday and Thursday, 1–2 p.m.

Machines Tools. Wednesday, Thursday, Friday, 1–2 p.m.

Musical Instruments. Temporarily discontinued.

Hand-Set Printing Presses. Monday, Tuesday, Thursday, Friday, 2–4 p.m., 3rd floor.

DRUGS: A SPECIAL EXHIBITION

Schedule of Special Activities

Arts and Industries Building

September:

1—Films: *Brian at 17 and Epitaph.* Continuous showings 10:30 a.m.-12:30, 1:30–5:30, 6:30–8:30 p.m.

2–3—*New York Free Theater.* Performances at 1:30 and 4:30 p.m.

4—*Inner Voice of Lorton.* Performances at 1:30 and 4:30 P.M.

5—Films: *Slow Death* and *A Day in the Death of Donnie B.* 10:30 a.m.-12:30, 1:30–5:30, 6:30–8:30 p.m.

6—*Inner Voice of Lorton.* Performances at 1:30 and 4:30 p.m.

7—Films: *The People Next Door and Curious Alice.* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

8—Films: *Changing* and *Darkness.* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

9–10—Film: *THX1138.* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

11—Panel discussion: *Medical and Non-Medical Implication of Drug Treatment Modalities:* Two-hour programs at 10:30 a.m. and 2 p.m. Original papers will be presented, followed by a full panel discussion with time devoted to questions from the audience.

12—Films: *The Opium Trail* and *U.S.* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

13—Films: *Drugs of Abuse* and *11:59, Last Minute To Choose,* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

14—Films: *Ebena* and *To Find Our Life,* 10:30 a.m.–12:30, 1:30–5:30, 6:30–8:30 p.m.

15—Films: *Skezag* and *David.* 10:30 a.m.-12:30, 1:30–5:30, 6:30–8:30 p.m.

(For further scheduling or last-minute changes, call 737–8811.)

RADIO SMITHSONIAN

Radio Smithsonian, a program of music and conversation growing out of the Institution's many activities, is broadcast every Sunday on WGMS–AM (570) and FM(103.5) from 9–9:30 p.m. The program schedule for September:

3rd—*The Importance of Continental Drift.* Nicholas Hotton and Erle Kauffman, paleontologists at the National Museum of Natural History, discuss the effects continental drift may have had on living things.

10th—*Exploring Queen of Sheba Land.* Archeologist Wendell Phillips tells of his adventurous explorations to the sand-covered Old Testament cities of Southern Arabia; *Too Busy Having Fun,* Mrs. Alice Roosevelt Longworth, daughter of President Theodore Roosevelt, reminisces about her days in the White House.

17th—*The 1972 Festival of American Folklife.* Part I. A sampling of the people and music that make the Folklife Festival one of the Smithsonian's most popular events.

24th—*The 1972 Festival of American Folklife.* Part II.

UPCOMING EVENTS

Classes and workshops

International Filmmakers. 14-week class beginning September 13. Beginning in October, workshops and classes for both adults and young Associates, in many subject areas. A detailed schedule is available from the Associates office, Smithsonian Institution, Washington, D.C. 20560.

Performing art series

10-week series of five performances and five informal discussions on alternate Wednesdays beginning October 18. Performances will be at the John F. Kennedy Center for the Performing Arts and the discussions will be held in the Freer Gallery of Art with distinguished persons associated with the performing companies or a well-known critic or expert in the field. The series must be purchased as a whole. $66.50 Associate members; $75, non-members. Registration deadline: September 25.

Women at work

Luncheon/Lecture Series. October 5, 26 and November 15. $25 Associate members; $30 non-members.

Domestic study tours

(Call Mrs. Kilkenny, 381–5910).

Olympic National Park: September 16–22.

Instruction in Photography (Maine): Sept. 24–29.

Arizona Astronomy Weekend: Oct. 6–9.

Blockade-Runners' View of the Carolinas: Oct. 12–27.

Sanibel Island, Florida: Nov. 5–10.

Nature's Past (Florida's West Coast): Nov. 12–19.

Day tours

(Call Moya King, 381–5157).

Along the Brandywine River: Oct. 4 or 11. 7:45.

Winterthur: Tour of the rooms and private park of the Henry Francis du Pont Museum. 7:45 a.m.–6:15 p.m. Sept. 30 or Oct. 14. $25 Resident Associates, $30 non-members.

Winterhur: In-depth study of American Queen Anne furniture and American silver Nov. 4, 7:30 a.m.–6:15 p.m. Nov. 4. $30 Resident Associates, $35 non-members.

Alexandria's Heritage. Walking tour. Sept. 14 or 21. $18.50 Resident Associates; $21.50 non-members.

CONTINUING EXHIBITIONS

Arts and industries building

Air Force Art. A selection of paintings marking the 25th anniversary of the U.S. Air Force and depicting the milestones in the history of its operations. On display indefinitely.

Freer Gallery of Art

Recent Accessions in Japanese Art. Approximately twenty works of art including paintings, metalwork and ceramics purchased by the Freer Gallery during the past ten years.

Museum of Natural History

The Shadow of a Stone Age Hunter. The unique remains of a 30,000-year-old Stone Age human, excavated from a cave in Spain and preserved in plastic by Smithsonian technicians. The photograph above shows the mound of earth removed from its original location in the Santander cave and readied for shipping to the U.S. The exhibit, with diagrams and text, will be on display through October, when it will be returned to Spain.

Museum of History and Technology

Olympic Stamps. Paper college designs by Lance Wyman, die-proofs and full uncut sheets of four new postage stamps issued for the XX Olympiad at Munich, Germany. Through September.

Music Machines—American Style. Barrel organs and player pianos to the most up-to-date high fidelity equipment. Tapes of the machine sounds are played and excerpts from filmed musical productions shown throughout the day, as follows:

September 1–21 Highlights from MGM Musicals.

September 22–28 Songs of Disney.

Atlantic Cable. Paintings, photographs and artifacts documenting the technological triumph of 1858 when the first undersea cable was completed linking North America with Europe.

National Collection of Fine Arts

Sculpture of Hiram Powers. Selections from the contents of the 19th century artist's Florence studio, including a model of the famous "Greek Slave" and other full-length marble and plaster sculptures and portrait busts of famous Americans. On view indefinitely.

National Portrait Gallery

Notable Women from the Gallery's Collection in Honor of Women's Week. Fifteen portraits from the permanent collection in a special exhibition to commemorate the anniversary of the 19th Amendment. Portraits include those of Edna St. Vincent Millay and Harriet Beecher Stowe.

Ira Aldridge. Rare oil portrait of this black American actor (1807–1867), recently acquired by the Portrait Gallery. The portrait painting by Henry Perronet Briggs, depicts the famous tragedian dressed as Othello, considered to be his greatest role.

HOURS

Smithsonian museums are open seven days a week from 10 a.m.–5:30 p.m. Cafeteria, MHT, 11 a.m.–5 p.m.

Summer hours—10 a.m.–9 p.m.—will continue through Labor Day for the History and Technology Building, the Natural History Building, and the Arts and Industries Building.

National Zoo buildings are open from 9 a.m.-6 p.m. seven days a week.

Anacostia Neighborhood Museum is open 10 a.m.–6 p.m. weekdays, 1–6 p.m. weekends.

FOREIGN STUDY TOURS

For members of the National and Resident Associates. For further details on tours, listed below, write Miss Schumann, Smithsonian Institution, Washington, D.C. 20560.

1972

Pakistan and Afghanistan: Oct. 9–Nov. 8 (Waiting list only).

Antique Tour in London: **Nov. 2–10, $475.**

1973

Peru: **Archaeological sites. Feb. 8–March 5.**

Morocco: **March 6–27.**

Cave Paintings: **April 2–26.**

Middle East: **April 21–May 16.**

Baroque Tour of Germany and Austria: May 13–June 4.

African Safari: July 17, three weeks.

International Aerospace Tour: Sept. 10, 2 weeks.

Sites of Civilization: Oct. 6-28. Waiting list only.

PUPPET THEATRE

The Hullabaloo Election of Osbert or Jess. A new, original production beginning September 13 by Allan Stevens and Co. Hullabaloo is the story of Osbert Peabody Wright and Jessica Sweetwater as they campaign for the top prize in puppetland—President of the Puppet Theatre. All the trappings of a real-world campaign abound—parades, rallies, rumors and image-making—and the children in the audience vote to elect the candidate of their choice. Performances will be in the auditorium of the History and Technology Building, through November 12. The schedule is 10:30 and 11:30 a.m., Wednesday through Friday, and 10:30 a.m., 12:30 and 2:30 p.m. Saturday, Sunday and holidays. Children's admission is $1; adults, $1.25; groups of 20 or more, 75 cents (S.I. Employees and Resident Associates admission, 75 cents). Reservations are recommended. Call 381-5395. The Puppet Theatre is presented by the Smithsonian's Division of Performing Arts.

The Marvelous Land of Oz will be performed September 1-4 at 11 a.m., 12 and 1 p.m.

MUSEUM TOURS

Group tours are available by appointment at the following museums:

National Portrait Gallery—381-6285.
National Collection of Fine Arts—381-6541.
The Renwick Gallery—381-5811.
Freer Gallery of Art—381-5344.

MUNICH MASSACRE

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. WYATT. Mr. Speaker, the Munich massacre yesterday makes imperative immediate appropriate international action to prevent such tragedies in the future. I wish to share with my colleagues my telegram to Secretary of State William P. Rogers in which I call for the United States to initiate such action:

SEPTEMBER 6, 1972.

Hon. WILLIAM P. ROGERS,
Secretary of State, Department of State,
Washington, D.C.

DEAR MR. SECRETARY: All decent citizens of the world are as frustrated as they are sorrowful and outraged at yesterday's Munich massacre. Some aggressive action simply must be taken to prevent the repetition of the senseless killing of innocent people.

I respectfully urge that you immediately convene an international convention on terrorist, murder and kidnapping. The purpose of this convention would be to obtain agreement among the nations of the world that each signator country would refuse sanctuary to all persons involved in acts of "international terrorism and kidnapping" or attempts at such crimes. I would urge that such proposed agreement would specifically include skyjacking. All nations signing should agree to apply economic and other sanctions to any country failing to join in the agreement. Under the agreement each country would surrender quickly to any other country in which the criminal act occurred any persons so accused.

The time is past to sit idly by and ring our hands as we see innocent people murdered, kidnapped and even tortured. We must take swift and effective action to make certain that the entire world knows that such acts can be undertaken with no possibility of escape.

WENDELL WYATT,
Member of Congress.

TEAMSTERS PENSION FUND AND ORGANIZED CRIME

HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. STEIGER of Arizona. Mr. Speaker, before the recent recess I inserted in the CONGRESSIONAL RECORD the first part of an article that appeared in the August issue of the magazine Overdrive. I would now like to call your attention to the second part of the article, "How the Central States Pension Fund Finances the Nevada Schemes of Organized Crime."

The article follows:

HOW THE CENTRAL STATES PENSION FUND FINANCES THE NEVADA SCHEMES OF ORGANIZED CRIME—PART 2

KANSAS CITY MAFIA AND THE LANDMARK

Las Vegas' Landmark Hotel is another example of the link between organized crime and the Fund, although this hotel/casino was apparently built without the assistance of the Moe Dalitz group.

The developer was Frank Caroll (also known as Frank Badami and Frank Caracciolo), whose only convictions are two gambling fines paid in the 40's. In 1968, an assault and battery charge was filed against him (and later dropped) after he allegedly dragged an interior decorator through a casino by his hair.

Construction on the building that was later to become the Landmark began in 1961. The next year, financing difficulties arose. On November 3, 1962, Caroll met with the following persons in Kansas City in an attempt to secure money:

ROY LEE WILLIAMS GETS IN THE ACT

Roy Lee Williams, head of Local 41 in Kansas City and Joint Council 56, is currently being prosecuted by the Justice Department's Strike Force for embezzling $20,000 from the Local. His trial for embezzlement some years ago ended with his being acquitted, although four others charged in the same incident were convicted!

Nick Civella, "executive vice president" of the Kansas City Mafia, whose record contains dozens of arrests. Nick and his brother Carl are among the 9 individuals active in organized crime who are officially banned from setting foot in Nevada casinos.

Morris (Snag) Klein, Civella's "financial adviser," and who served time in prison for his part in the Kansas City vote fraud scandals of the 1940's. Since then, he has been convicted of income tax evasion.

Motel Grezebrenacy, better known as Max Jaben, an admitted gambler who is also banned from Nevada casinos. Jaben served time in prison later for income tax evasion.

The results of the meeting were that Williams would attempt to arrange a Pension Fund loan, with those present receiving a "fee" for their part. It took four years, but finally Caroll was granted a Fund loan of $5,500,000 in August, 1966. The loan was made to Frank Caracciolo and Plaza Tower, Inc., a company controlled by Caroll. In September, it was reported that Caroll was complaining because it cost him $500,000 to get the loan, with percentages of this amount going to individuals in four cities. Caroll also received three other loans in August: one from Buffalo Enterprises for $357,500, one from Pacific Finance Loans in Los Angeles for $257,500; and the third one—$700,000—came from a Kansas City attorney.

ADDITIONAL FUND MONEY

These amounts apparently weren't enough to complete construction of the Landmark, because in August, 1967, an additional Fund loan of $2,600,000 was made to Caroll.

A curious situation then arose in March, 1968, which is yet another example of the fast and loose methods of the Fund trustees. Although the Fund had loaned $8,100,000 to Caroll, he hadn't applied for a gambling license from the Nevada Gaming Control Board. If a person is denied such a license, he of course cannot operate a gambling establishment in Nevada. But this is exactly what happened. Caroll withdrew his application before the Board after it began probing into how he had obtained his financing. Two months later, the Pension Fund began foreclosing on the loans.

The Landmark hadn't opened yet when Caroll began searching for a buyer. The Howard Hughes organization agreed to purchase it, but the deal was not completed until June 30, 1969, the day before the Landmark officially opened for business. According to Tom Bell, a lawyer for Hughes Tool Company, the Landmark was purchased for $17.3 million in cash, with $8.1 million of that going to pay off the Pension Fund loan.

HOWARD HUGHES IN DEBT TO FUND

That should be the end of that particular escapade, but Overdrive has unearthed information which throws a question mark over the affair. According to the records of the Pension Fund, Caroll's $8.1 million loan was not paid off by Hughes Tool Company. A Pension Fund document states that the Caroll loan was "taken over" by Hughes Tool Company. This means that part of the purchase arrangement was that Hughes take over the unpaid Caroll loan and pay it off. Verifying this is another document turned up by Overdrive, an agreement between the Fund and Hughes Tool Company and Hotel Properties, Inc. (the Hughes company which operates some of his businesses in Nevada). The terms of this agreement, dated June 30, 1969 (the same day Hughes bought the hotel), state that Hughes will repay the $8.1 million in quarterly payments of $202,500 beginning October 1, 1969. In looking at Fund records this year, entries show that the loan has been paid so far as originally scheduled.

Sources familiar with the Hughes operation report that it is his practice to pay cash in any transaction. The Landmark deal is a radical deviation from that pattern. One might wonder why Hughes would change his practices; particularly since he now is dealing with the Pension Fund. Numerous attempts were made to have this question answered by Hughes officials, but they refused to discuss the matter.

OVER $20 MILLION IN CIRCUS CIRCUS

Jay Sarno and Stanley Mallin seem to have a unique influence with the Pension Fund that few others do. As far back as 1957, the pair had been wheeling and dealing multimillion dollar schemes through the Fund. Their current operations in Las Vegas, though, prove to be the most interesting.

These two men have arranged Pension Fund loans of more than $43 million for just two Las Vegas casinos.

Circus Circus, a recently-built casino on the Strip (the hotel section is still under construction), has received a total of $18,100,000 thus far, with an OK given for them to pick up $4,583,000 more whenever they want it. This amount of money has only been loaned since February, 1971, which indicates that the Fund must have had plenty of faith in a nonexistent venture to pour in that much money. And perhaps their faith was slightly misplaced. On June 27, the Internal Revenue Service slapped a $1,191,463 lien on Circus Circus, charging that taxes had been unpaid from December 31, 1970 through March 31, 1972. Within 24 hours, however, who should come streaking in with a bag full of cash to bail out Circus Circus but Allen Dorfman, one of the chief kickback artists connected with the Fund and who is a smooth operator when it comes to funneling money out of the United States.

AND $20 MILLION IN CAESAR'S PALACE

The other casino Sarno and Mallin have been involved in is Caesar's Palace. Since 1965, the Fund has dumped $20,413,000 into it. Yet today, almost $18 million is still due the Fund. Operating Caesar's Palace is a company called Desert Palace, Inc., a subsidiary of the actual owners, Lum's, Inc.

One clue to the type of ownership which has been at Caesar's Palace can be seen as far back as 1965. Overdrive has learned that after the first Fund loan of almost $10 million was made, a meeting was held in Palm Springs, California, in October, 1965. The purpose of the meeting was to discuss the division of ownership of Caesar's Palace. Attending that meeting were Mafia members Vincent Alo and Anthony Salerno, New England Mafia associate Elliott Paul Price, and convicted professional sports fixer Jerome Zarowitz (Mr. Zarowitz is no small time operator; he attempted to fix an NFL championship game).

Until recently, Zarowitz and Price were part of the management group running Caesar's Palace. In December, 1970, federal officials discovered a lock box of Zarowitz' on the casino premises. Inside was over $1 million in $100 bills. Another official of Caesar's Palace during this time was Nathan Jacobson, whose current involvement is King's Castle casino near Lake Tahoe.

KINGS CASTLE AND BANKRUPTCY

Caesar's Palace isn't the only venture involving Fund money that Jacobson has been connected with. In May, 1969, he began receiving the first of what were to be a series of four loans totaling 9.7 million. The money was used for the construction of Kings Castle, a hotel casino near Reno.

Almost as soon as Kings Castle was open, however, there were financial problems. This past January, Jacobson said he was going to "reorganize" his operation. But a few weeks later, Kings Castle was closed and in bankruptcy court. The Pension Fund at this time claimed that Jacobson was in default on $7 million in loans, and that he hadn't made any payments for four months. Overdrive has learned that this was a slight misstatement. The actual situation was that Jacobson hadn't made a payment on any of the loans for five months, his past due payments alone were $700,000, and the total still due on the loans was $10,425,000—$700,000 more than he borrowed in the first place. But that isn't the final cost. A source close to the Fund reports that the Union is paying $50,000 per month for guards and maintenance of the vacant buildings. At this rate, by August, $300,000 more will have to be tacked onto the total which has been poured into the project.

As far as information which has been publicized, Jacobson seems to be the only person involved as a principal on Kings Castle. Overdrive has discovered, though, that the amounts cited so far, and the persons connected with this project, are far from complete.

HIDDEN INTERESTS

Other documents show that a company called Sierra Tahoe Investment Corporation received Pension Fund loans of $2,600,000 in February, 1965, and $700,000 in December, 1965. Further information shows that most of this money is still unpaid, and, in fact, it has been thrown in the Kings Castle bankruptcy proceedings as money due the Fund. Yet this money was for an ill-fated venture on the same site presently occupied by Kings Castle. It was called Lake Tahoe Hotel.

Although financial records show that this money is owed by the corporation, OVERDRIVE has obtained documents showing that the loans were made to individuals: $700,000 lent to Cal Kovens, and $2,600,000 borrowed by Harold Riel and Roy Gene Lewis. The background of two of these men is worth noting.

FRAUD CONVICTIONS OF BORROWERS

Cal Kovens has been involved with a number of multi-million Pension Fund loans dating back almost to its formation. So involved was Kovens, in fact, that he has been convicted four times of mail fraud, once of wire fraud, and once of conspiracy to commit fraud, in connection with these loans. As recently as 1967, he was connected with some of the events leading to the Beverly Ridge Estates Fund loan, its bankruptcy and the recent federal indictments arising out of it.

Roy Gene Lewis is currently under indictment for fraud and perjury in connection with his involvement in Beverly Ridge Estates. During that period of time, Lewis was an official of the Los Angeles Building and Safety Commission, a body which made several favorable decisions for Beverly Ridge. While he was doing this, he was also identified as having a financial interest in the project. When this conflict of interest was discovered, pressure was exerted to have him resign. One of those who used his influence to keep Lewis in his city post was Frank Matula, a convicted liar, officer of Los Angeles Local 396 and a trustee of the International. Subsequently, though, Lewis was forced to resign.

"THE WEIRDEST DEAL I'VE SEEN"

In July, the bankruptcy court announced that a buyer for Kings Castle had been found, but his identity wouldn't be revealed until after the details had been worked out toward the end of July. The proposed purchaser, OVERDRIVE has learned, is a Reno psychiatrist, Richard C. Gilmore. The sale has not been finalized, Dr. Gilmore said, and if it doesn't go through, he will lose the $30,000 he had already put up. When asked why he would risk losing $30,000, he replied that it was better to be out that amount instead of millions if those details weren't taken care of.

And the sale may very well fall through. One person has said that the Teamsters don't want Gilmore in because he's "not their kind of people." A look at Jacobson's recent activities seem to confirm this: Jacobson is currently under indictment for kidnapping and extortion. Trial is tentatively set for September.

And as one lawyer familiar with the Kings Castle bankruptcy proceedings remarked in bewilderment: "This is the weirdest deal I've ever seen."

RIVERSIDE BANKRUPTCY AND A BAIL-JUMPER

In nearby Reno, the Riverside Hotel sports a lengthy history of involvement with the Fund. The first loan to the hotel was $2,750,000, and was made in October, 1962. Two months later, the Riverside promptly went bankrupt. The person who arranged the loan for a kickback ranging between $60,000 and $100,000 (there is a discrepancy because of bounced checks involving the payoff, and it is not known whether all the graft due was finally paid) was Benjamin Dranow.

Dranow's involvement with the Fund goes way back to 1958 when he borrowed $1 million from the Fund to operate the J. W. Thomas Department Store in Minneapolis. Under Dranow's guidance, the store went bankrupt, with Dranow grabbing $116,431 and running. His close association with Hoffa led to his entanglement with several other multi-million dollar Fund loans. When the legal dust settled a couple of years after the Riverside kickback, Dranow had a record showing bail jumping and convictions for mail fraud, wire fraud, bankruptcy fraud and income tax evasion.

The Riverside Hotel subsequently was taken over by new owners who immediately received a Fund loan of $2 million. That was in 1969. Now, the balance due on that loan is $2,200,000.

Only four Nevada loans have been discovered which are not connected with gambling and apparently are not controlled by organized crime. Two of them, however, have run into financial difficulties.

A $475,000 loan was obtained by Hank Greenspun, publisher of the Las Vegas Sun, but it has since been repaid.

TEAMSTER OFFICIAL AND NON-UNION TAXIS

Homer (Dutch) Woxberg, former secretary of Local 224 in Los Angeles, received a $225,000 loan in 1962 to operate Checker Cab in Las Vegas. An attempt was made to hide the fact of Woxberg's ownership by having an outfit called Ardmore Leasing obtain the loan, but it was discovered anyway. Perhaps such effort was devoted to concealing ownership because Woxberg was still a Union official, and the drivers for Checker were non-Union. This loan was finally paid off just this year.

In 1965, Chris Jo, Inc., borrowed $1,500,000 from the Pension Fund to operate Decatur Shopping Center in Las Vegas. It wasn't successful, and a Trustee's Deed Upon Sale filed in August, 1969, shows that the Pension Fund took it over because of Chris Jo's default on the loan. The next month, a new buyer was found who picked up the loan (which still showed a balance due of $1,483,000). The terms for the new loan are unavailable, but one document shows the same balance due in March of this year.

SKATING TO BANKRUPTCY

Another Las Vegas enterprise that received a Fund loan and then ran into money troubles was the Las Vegas Ice Palace, a public skating rink. A Fund loan was made in December, 1967, for $580,000, but less than two years later, it went bankrupt, still owing the Fund $612,857. In November, 1971, it reopened as Ronnie Robertson's International Ice Palace, and received a $700,000 Fund loan.

A company called Marlee, Inc., picked up a $1,955,000 loan from the Valley Bank of Nevada in September, 1968, for construction of a gambling casino in downtown Las Vegas. Upon completion of the casino—called the Carousel—the Pension Fund bought the loan from the bank. Almost all of that money is yet to be repaid. At one point last year, Marlee was in default on ground rent, tax and insurance escrow for the period June, 1970 through January, 1971 to the tune of slightly under $100,000. Yet Al Garbian, the owner of the Carousel, was able to borrow another $40,000 from the Fund in September, 1971.

THE ALADDIN HOTEL

The most recent Pension Fund loan to a gambling casino that has been uncovered is one made on March 27 to the Aladdin Hotel for $3 million. One of those signing for the loan was a convicted bookmaker, Sam Diamond. Diamond also is president of the Aladdin. His involvement with Nevada gambling goes way back. It was reported that in 1947 he was one of several gangsters who got together less than 24 hours after mobster Bugsy Siegel was shot to death. They met in order to determine how to gain control of the Flamingo Hotel, which Siegel had been running. It has also been learned that Morris Shenker received a $500,000 fee this year for his part in the sale of the Aladdin by Recrion Corporation.

COMMUNIST REVOLUTIONARY RECEIVING FEDERAL FUNDS UNDER THE PROVISIONS OF THE EMERGENCY EMPLOYMENT ACT OF 1971

HON. RICHARD H. ICHORD

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. ICHORD. Mr. Speaker, Congress recently passed the appropriations bill for the Department of Labor for the fiscal year ending June 30, 1973, providing for an allotment of $1,250 million for expenses necessary to carry into effect the Emergency Employment Act of 1971. The act was later vetoed by the President. At the outset, I want to make it clear that I do not question the great benefits which this act has brought about in reducing unemployment. It has provided many vital public services which prior to the passage of the act had been drastically curtailed because of a lack of local and State revenues. No problem facing this Nation has been more thoroughly documented than the plight of our State and local governments as they grapple with unemployment problems and declining resources.

However, I am concerned over the fact that Federal funds allotted under this act are being funneled to pay the salary of an individual who is a self-admitted active member of the Venceremos, an avowedly revolutionary organization seeking the overthrow of the U.S. Government by force and violence. Since January 31, 1972, David Ransom, an active member of the Venceremos organization, has been holding the responsible position of community development specialist with the housing concern committee of Redwood City, Calif. He is drawing a salary in excess of $10,000 from Federal funds being channeled into Redwood City from San Mateo County, under the provisions of the Emergency Employment Act.

Last October, the Committee on Internal Security, which I chair, held hearings with regard to two Maoist groups, the Revolutionary Union and its more violence-prone splinter group, Venceremos. It was clearly established that both organizations are Marxist-Leninist groups unalterably devoted to the idea that violent revolution in the United States is inevitable and desirable. It was the finding of the committee that the Revolutionary Union and the Venceremos constitute a potential threat to the internal security of the United States. For those desiring further information concerning the insidious nature of these two organizations, copies of the committee's report are available from the committee and the Government Printing Office.

Shortly after David Ransom received his appointment as a Community Development Specialist, he was interviewed by a reporter for the Redwood City Tribune, and the results of the interview were reported in the February 8, 1972, issue of that newspaper. During the interview Ransom admitted that he was an active member of the Venceremos organization. He stated he assumed city officials were aware of his activist background when he was hired to fill the new housing aide post. He also admitted having been the editor of a west coast underground newspaper which was published during the period 1967 to 1969. Since receiving his appointment as a Redwood City housing aide, Ransom has continued his active participation in the affairs of the Venceremos.

I wrote to the Secretary of Labor on February 23, 1972, enclosing a copy of the Redwood City Tribune news article. I pointed out that the payment of Federal funds to Ransom, who is actively working with an organization devoted to the overthrow of the Government by force and violence, is a serious misuse of the taxpayer's money. I requested the facts concerning Ransom's appointment. It was not until June 16, 1972, some 4 months later, that I finally received a reply to my letter. On that occasion, Malcolm R. Lovell, Jr., Assistant Secretary for Manpower, far from being disturbed by this obvious misuse of taxpayer's money, stated that the program guidelines under the provisions of the Emergency Employment Act do not allow for the hiring or discharge of participants on the basis of political affiliation, and since there was no evidence of specific illegal activity on the part of Ransom, the Department of Labor was not in a position to take any action to remove him from his position.

Certainly, legitimate political affiliations cannot and should not be the basis for adverse action against an employee receiving Emergency Employment Act funds, but is it not a distortion of our language to put violent revolution in the category of political activity? It is totally unrealistic for the Labor Department to impose on itself guidelines so restrictive that it cannot take into account an individual's active participation in an organization devoted to the overthrow of the Government. If this is the Department's idea of being consistent with public service guidelines under the act, then it is high time to draw up new guidelines, particularly for those individuals who are occupying positions of responsibility.

If there is one thing that is of vital concern to all of us—it is what is done with the people's money—the money they appropriate through us for various Federal undertakings. The taxpayers of the United States, whose incomes are depleted each year by a multibillion dollar defense budget to insure the security of the Nation, are being further tapped to insure the comfortable Federal financial security of an individual whose conduct demonstrates deep and abiding hostility to the United States. This certainly constitutes a maladministration of the act and a perversion of our responsibility to the taxpayers.

Mr. Speaker, the Venceremos is not just an insignificant extremist group. It has regularly conducted classes in revolutionary tactics, guerrilla warfare, and sabotage, as well as holding periodic training sessions in the use of rifles, handguns, and automatic weapons. It is an organization ready to take up arms against the Government. Although some judicial decisions insist on very broad permissiveness under the protection of the first amendment, we are not bound to subsidize the participants in revolutionary planning. Eminent jurists have declared that the Constitution is not a suicide pact.

Since the Department of Labor has indicated that Ransom's employment is consistent with the public service guidelines under the act, I must question how many more David Ransoms are receiving Federal doles.

Mr. Speaker, I am sure many of our colleagues will agree that it is clearly not in the public interest to allocate Federal funds to an individual who favors the violent overthrow of our democratic society. But it is not enough to abhor this situation. It calls for action on the part of the Secretary of Labor, who has the responsibility for the administration of the Emergency Employment Act. Surely, it is not asking too much for the Secretary to counsel the State and local governments that persons who are active in the affairs of revolutionary organizations should not be eligible for responsible positions under the provisions of the act. It seems to me that the public service employment guidelines must be thoroughly reviewed by the Labor Department to determine what corrective measures are necessary in coping with this type of situation. If the dilemma cannot be resolved by administrative regulations, then it is the obligation of the Secretary to make recommendations for remedial legislation.

I am hopeful that the Secretary of Labor will take appropriate steps to rectify this situation, without making it necessary for the Congress to consider some form of amendment to the act, establishing conditions of employment which are more clearly in the national interest.

I insert at this point in my remarks articles from the Redwood City Tribune and Birmingham News along with copies of my correspondence with the Department of Labor in regard to this matter:

[From the Redwood City (Calif.) Tribune, Feb. 8, 1972]

RANSOM HIRED FOR RC STAFF

(By Ken Rowe)

David Ransom, a 31-year-old former college instructor, underground press editor, anti-war and civil rights activist, ghost writer and congressional candidate, has been hired as a staff aide to work with the Redwood City Housing Concerns Committee.

Ransom has been assigned to work in the city's Planning Department office. He will be paid $889 per month, under the federal Emergency Employment Act, to aid the committee. A primary concern of the committee is to foster development of low-income housing in the city.

A native of New York and a graduate of Harvard University, Ransom, who earned a master's degree in English from Stanford, quit Stanford's doctoral program "to work in the community." He had worked at Stanford as a teaching assistant and English instructor.

Ransom was an editor of the Peninsula Observer, an "underground" bi-weekly tabloid which ended publication on the Peninsula in September of 1969.

An anti-war activist since 1965, Ransom was the 1968 Peace and Freedom Party candidate in the 11th Congressional District, running against incumbent Rep. Paul N. (Pete) McCloskey Jr., and San Bruno Democrat Urban Whitaker. Ransom culled only a couple of thousand votes, but presented an anti-war platform which political observers termed "articulate."

Ransom was a leader in hte successful, residentalist fight which blocked the Willow Expressway project in Menlo Park last year, an effort which he said "saved 400 units of low-and-moderate-income housing."

Viewed by some observers as a "radical," Ransom is a member of the revolutionary Venceremos organization. He said he assumes city officials were aware of his activist background when he was hired to fill the new housing aide post, but added in an interview that the format of application forms precluded listing of his political affiliations.

Ransom, a bachelor and a resident of 410 Park St., Redwood City, recently has been unemployed. He has been associated with the Pacific Studies Center, a humanities research organization, since 1969.

Ransom also was the ghost-writer for "P.O.W., Two Years With the Viet Cong," a book by George E. Smith, a former U.S. Army Green Beret soldier captured by the Viet Cong and later released. Smith's story is, in part, sympathetic to the Viet Cong.

[From the Birmingham News, July 27, 1972]

TAX MONEY PAYS GOOD SALARY TO COMMUNIST REVOLUTIONARY

(By Robert S. Allen)

WASHINGTON.—Money voted by Congress to create employment is being used to pay good slaries to avowed Communist revolutionaries and other extremists.

How many is not known. But in one definitely established case, the Labor Department is refusing to do anything on the ground that it's up to the local authorities who hired the Communist revolutionary.

That was the startling brush-off experienced by Rep. Richard Ichord, D-Mo., chairman of the House Internal Security Committee, when he asked Labor Secretary James Hodgson to crack down. After months of stalling, Ichord finally got a letter from Assistant Secretary Malcolm Lovell passing the buck to the local officials.

Indignantly, Ichord told Lovell:

"In view of the findings of the Internal Security Committee that the Revolutionary Union and Venceremos organizations constitute a potential threat to the internal security of the United States, it is difficult for for me to justify the expenditure of Federal funds for the salary of a publicly admitted active member of the Venceremos."

The Communist extremist is being paid $868 a month by the Redwood City, Calif. Housing Concerns Committee—with funds provided by the Emergency Employment Act.

This measure, passed by Congress in 1971 with a $750 million appropriation, authorizes the Secretary of Labor to enter into contracts with units of Federal, state and local governments, public agencies and institutions to undertake public service projects designed to create jobs—with the U.S. Treasury paying the bill.

Last February, Ichord got wind that the Redwood City agency had hired an admitted member of the Venceremos and wrote the Labor Secretary citing the extremist nature of the Venceremos—a "violence-prone splinter of the Maoist Revolutionary Union."

Ichord pointed out that sworn testimony, in the hands of his committee "clearly established that both organizations are Marxist-Leninist groups unalterably devoted to the idea that violent revolution in the United States is inevitable and desirable, and that members of these groups expect to take an active, armed part in the anticipated revolution.

"I know you will agree that the payment of Federal funds to one who is actively working with an organization devoted to the overthrow of the government by force and violence is a serious misuse of the taxpayers' money."

Chairman Ichord was sorely mistaken!

Not only was the Labor Department apparently unconcerned, but it took its leisurely time to tell him so, and then only after Ichord wrote a second letter asking what was going on. Again, several months elapsed before he finally heard from Assistant Secretary Lovell, who loftily disclaimed Labor Department responsibility on three typically bureaucratic grounds:

The city hired the Venceremos Communist revolutionary and is paying him $868 a month to develop "new approaches to solving low-income housing problems."

The city is satisfied with the job he is doing and "as long as his performance remains satisfactory, they have no problem with his continuing in the position."

The Redwood City personnel officer maintains there is no "violation of the Public Employment Program guidelines."

In this alleged technicality, Assistant Secretary Lovell fully concurred. He informed Ichord:

"As our program guidelines do not allow for the hiring or discharging of participants on the basis of political affiliation, and we have delegated authority to hire within our guidelines to agent jurisdictions . . . the Department is not in a position to take any action to remove him from his position."

Understandably, Rep. Ichord was shocked and outraged. In reply, he sharply reprimanded the Labor Department:

"It appears to me that the difficulty lies in inadequate Public Employment Program guidelines. Certainly, legitimate political affiliations cannot be the basis for adverse action against an employee under the program, but I believe it is totally unrealistic to impose guidelines so restricted that you cannot take into account an employee's active participation in an organization devoted to the overthrow of our government."

In a 200-page report published last month, titled "America's Maoists: The Revolutionary Union, The Venceremos Organization," the Internal Security Committee, brands them as the "two principal Maoist organizations in the U.S." Also that they are "a part of the larger revolutionary scene and adds significantly to the sound and fury of the politically disaffected."

"By constant emphasis on firearms in the context of their use against police and public authorities," continues the report, "they create a climate encouraging to those inclined to resolve grievances against the government by violent action . . . They have gathered firearms and explosives and have trained members in their use under anticipated guerrilla warfare conditions.

"The Revolutionary Union already had one delegation in Red China. Members of RU were ordered to seek employment in plants having military contracts and in telephone companies."

According to the report the Revolutionary Union was formed in 1968 in Palo Alto, Calif., with the prime tenet of "an armed overthrow of the government." Principal organizers included "II. Bruce Franklin, a dedicated Communist revolutionary who was a professor at Stanford University, his wife Jane Franklin, Robert Avakian, a leftist political activist in the San Francisco-Berkeley area, and Leibel Bergman, a dedicated longtime Communist."

In January 1971, there was a split in the RU organization over basic ideological differences. Dissidents, under the leadership of Bruce Franklin, formed their own organization with the name Venceremos.

This group has no known connection with the Venceremos Brigade, made up of U.S. youths who have gone to Cuba for the ostensible purpose of cutting cane. Most of them are members of the leftist Students for a Democratic Society, which several years ago produced a violence-prone, extremist splinter group called Weathermen.

Early this year, the Revolutionary Union published a pamphlet in which it described itself as a "national Communist organization made up mainly of workers, students, blacks, browns, Asians, native Americans and whites." It also declares, "We must join together into a single Communist party, with the discipline, division of labor, and strategy and tactics capable of leading the immediate struggle of the people and, when the time is right, organizing the people to deal the death blow to the imperialist-capitalist system."

FEBRUARY 23, 1972.

Hon. JAMES D. HODGSON,
Secretary of Labor,
Washington, D.C.

DEAR MR. SECRETARY: I am enclosing a copy of a newspaper article which alleges that one David Ransom, an admitted member of the revolutionary organization "Venceremos" was appointed to an $868.00 per month job with the Redwood City, California Housing Concerns Committee and that his salary will be paid from Emergency Employment Act funds. I understand that this Act is administered by the Department of Labor.

The Committee on Internal Security heard testimony in October, 1971 concerning the Revolutionary Union and its more violence-prone splinter group, Venceremos, which clearly established that both organzations are Marxist-Leninist groups unalterably devoted to the idea that violent revolution in the United States is inevitable, and desirable, and that the members of those groups expect to take an active, armed part in the anticipated revolution.

I know you will agree that the payment of Federal funds to one who is actively working with an organization devoted to the overthrow of the Government by force and violence is a serious misuse of the taxpayers' money.

I will be most appreciative if you will furnish me with facts concerning the allegations in the enclosed article.

Very truly yours,
RICHARD H. ICHORD,
Chairman.

APRIL 11, 1972.

Hon. JAMES D. HODGSON,
Secretary of Labor, U. S. Department of Labor, Washington, D.C.

DEAR MR. SECRETARY: Under date of February 23, 1972 I wrote to the Department calling attention to a newspaper article which alleged that one David Ransom, a member of the revolutionary organization "Venceremos," has been appointed to a job with the Redwood City Housing Concerns Committee and that his salary would be paid from funds administered by the Department of Labor. I expressed my view that payment of Federal funds to a member of an organization seeking the overthrow of the government was a misuse of taxpayers' money and I requested facts concerning these allegations.

As of this date I have not received a reply to my letter. I would be most appreciative for an early response to my inquiry about this matter.

Sincerely yours,
RICHARD H. ICHORD,
Chairman.

MAY 15, 1972.

Hon. JAMES D. HODGSON,
Secretary of Labor, U.S. Department of Labor, Washington, D.C.

DEAR MR. SECRETARY: I have not as yet received a response to my request of February 23, 1972 for information pertaining to an allegation that the salary of David Ransom, a member of a revolutionary organization, would be paid from funds administered by your Department.

The prompt attention of your Department to this inquiry of nearly three months ago and my letter of reminder of April 11 would be greatly appreciated.

Sincerely yours,
RICHARD H. ICHORD,
Chairman.

U.S. DEPARTMENT OF LABOR,
Washington, D.C., June 16, 1972.

Hon. RICHARD H. ICHORD,
Chairman, Committee on Internal Security, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am very sorry for the delay in responding to your letters. We have made inquiries through our regional office concerning Mr. David Ransom and have now received a reply.

Mr. Ransom was hired by Redwood City on January 31, 1972 as a Community Development Specialist. His job has to do with developing new approaches to solving low income housing problems.

The City is aware of the article from the Redwood City Tribune dated February 8, 1972, which you enclosed with your letter. The City states that they are satisfied with Mr. Ransom's performance during the time he has been on the job and that as long as his performance remains satisfactory, they have no problems with his continuing in his present position.

The City personnel office takes the position that there has been no violation of the Public Employment Program guidelines. The project officer concurs with this position.

As our program guidelines do not allow for the hiring or discharging of participants on the basis of political affiliation, and we have delegated authority to hire within our guidelines to agent jurisdictions on one hand, and as we have only the allegations of a newspaper article and no evidence of specific illegal activity on the part of Mr. Ransom on the other hand, the Department is not in a position at this time to take any action to remove him from his position.

We have also reviewed the City's position and the PEP guidelines with our Solicitor's Office. It is their opinion that if there is no evidence of illegal activity or poor program performance, we should not interfere with the City's hiring and selection process.

If I can be of further assistance, please let me know.

Sincerely,
MALCOLM R. LOVELL, Jr.,
Assistant Secretary for Manpower.

JUNE 26, 1972.

MALCOLM H. LOVELL, Jr.,
Assistant Secretary for Manpower, U.S. Department of Labor, Office of the Assistant Secretary for Manpower, Washington, D.C.

DEAR MR. LOVELL: Coincidental to the receipt of your letter concerning the employment of admitted Venceramos member David Ransom by Redwood City, California under the Emergency Employment Act, I have just submitted a report to the House furnishing details concerning the revolutionary objectives of the Revolutionary Union and Venceremos. I am enclosing a copy of the report for your information and guidance. Information concerning Ransom appears on pages 124–6 and 131.

In view of the findings of the Committee on Internal Security that the Revolutionary Union and Venceremos organizations constitute a potential threat to the internal security of the United States it is difficult for me to justify the expenditure of Federal funds for the salary of a publicly admitted active member of Venceremos.

It appears to me that the difficulty lies in inadequate Public Employment Program guidelines. Certainly, legitimate political affiliations cannot be the basis for adverse action against an employee under the above program but I believe it is totally unrealistic to impose on yourselves guidelines so restrictive that you cannot take into account an employee's active participation in an organization devoted to the overthrow of the Government.

Very truly yours,
RICHARD H. ICHORD,
Chairman.

U.S. DEPARTMENT OF LABOR,
Washington, D.C., August 25, 1972.

Hon. RICHARD H. ICHORD,
Chairman, Committee on Internal Security, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of June 26, 1972, in which you enclose a copy of your Committee's report to the House on the objectives of the Revolutionary Union and the Venceremos Organization. This report contains information about Mr. David Ransom, a Public Employment Program participant in Redwood City, California, about whom we have had previous correspondence.

We certainly share your concern about the appropriateness of Mr. Ransom's employment. However, the Public Employment Program gives to local elected officials maximum flexibility in the design of the program and the selection and rejection of individual applicants for employment. Therefore, as long as a local jurisdiction is operating its Public Employment Program in keeping with the constraints of the Act and the Regulations and Guidelines issued pursuant thereto, we do not feel it appropriate for the Federal Government to intervene in what is essentially a local personnel transaction.

We have, however, made known to local officials information about Mr. Ransom's background.

As indicated in our letter of June 16, 1972, our review of the Redwood City Public Employment Program showed the City to be operating its program in accordance with the Act. Please be assured that we will continue to monitor closely the Redwood City Public Employment Program to insure its continued adherence to program standards.

We appreciate your interest in this matter.

Sincerely,
MALCOLM R. LOVELL, Jr.,
Assistant Secretary for Manpower.

CONDEMNING THE ACT OF TERROR AND MURDER AGAINST ISRAELI CITIZENS

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. DELANEY. Mr. Speaker, the wanton murder of Israeli citizens by Palestinian guerillas at Munich, Germany is an unprecedented act of international terrorism and an outrage against humanity.

It is impossible to believe that in such a serene setting of peace and international cooperation an insane act of this nature could happen. It leaves an indelible stain on civilized society.

I join with men and women of decency throughout the world in condemning this unspeakable atrocity, and I extend my deepest sympathy to the families of these tragic victims.

QUESTIONNAIRE RESULTS FROM THE FOURTH DISTRICT OF PENNSYLVANIA

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 5, 1972

Mr. EILBERG. Mr. Speaker, each year I conduct a poll, by mail, of my constituents. I continue to find this technique a valuable and useful tool in helping me to better represent the people of my district.

Last May I mailed my annual questionnaire to every household in my district in Philadelphia. The results have been tabulated and I am now mailing them to the more than 152,000 households in my district.

At this time I enter this most recent report to my district in the RECORD:

JOSHUA EILBERG REPORTS TO THE PEOPLE,
AUGUST 1972

Dear Friend: The results of the questionnaire I mailed to you during the spring have been tabulated and, as I promised, I am sending the results to every home in the Fourth Congressional District. This year it is clearer than ever that you want the Federal government to concentrate on solving domestic problems such as crime and drugs and the nation's economic problems.

Many of you made additional comments about the quality of life in our cities. Most of the complaints centered on the fear of increasing crime and drug abuse and the fact that the average working man's take-home-pay buys less and less every week. In addition there were a great many complaints about the pollution of our environment and the quality of our public transportation and school systems.

As your representative in Congress I have tried to find solutions to these problems by introducing and supporting legislation designed to meet our needs as individuals and those of society as a whole.

Crime must be fought on two levels, law enforcement and prevention. Right now four out of every five felonies are committed by "graduates" of our prison system. In addition to punishing criminals for their crimes we must rehabilitate them so that they do not commit more crimes when they are released. For this reason I have introduced a bill to improve our prison system. I am also supporting proposals to improve and strengthen our police forces, such as the Emergency Crime Control Act.

Drug abuse is still increasing. This year I supported measures designed to cut off all aid to, and place economic sanctions on, countries which do not help us in the fight against the drug traffic. In addition, I am a sponsor of the Narcotics Addict Treatment and Rehabilitation Act of 1972, Military Addicts Bill and the Drug Abuse Control Corps Bill.

Tax relief and reform must be accomplished quickly. Our present tax laws place too great a burden on those in the middle income group. For this reason I have sponsored legislation to close tax loopholes for the wealthy and big business, which would give the government more than $4 billion almost immediately, along with proposals to help the single tax payer and working couples.

Our environment is still under a continuous attack from all sides. Part of the problem is the fact that enforcement of the new tougher anti-pollution laws causes economic hardships for both labor and business. In order to break down this barrier I am sponsoring the Small Business Pollution Abatement Loan Assistance and Worker's Readjustment Assistance Act, which provides funds to business to help it comply with the new laws. It also gives workers reimbursement for lost wages, job training, employment services and moving expenses when they lose their jobs due to permanent or temporary shutdowns caused by the new environmental regulations.

Your voice is heard. On the reverse side you will find the results of the questionnaire reported by percentage. I want to thank all of you who took the time to respond and all of those who added their own thoughtful comments.

With best wishes.

Sincerely,

JOSHUA EILBERG.

CONGRESSMAN JOSHUA EILBERG REPORTS YOUR VIEWS

[Rounded off to nearest percentage "No response" not tabulated]

		Yes	No	Undecided
1. Do you believe the President's program of wage and price controls is working?		16	67	14
2. Do you favor the President's method of giving big business tax breaks so extra money can "trickle down" to the average taxpayer or do you favor direct tax relief for the individual taxpayer as one means of stimulating the economy?				
Trickle down	10			
Direct aid	90			
3. Nonessential Government spending must be cut. If you were writing the Federal budget which program would you cut first? (check one)				
(a) Crime	0.01			
(b) Defense	15			
(c) Education	.02			
(d) Foreign aid	48			
(e) Health	0			
(f) Highways	.02			
(g) Housing	.01			
(h) Pollution control	.01			
(i) Space	15			
(j) Welfare	16			
4. Do you have more money to spend for luxuries now than you did in past years?		18	75	6
5. Federal revenue sharing is about to become a reality. Which of the following problems facing Philadelphia do you think the funds should be used to help solve?				
(1) Police and fire protection	40			
(2) Environmental protection	29			
(3) Public transportation	24			
(4) Capital improvements	7			
6. (a) Should the Federal Government administer a comprehensive national health care insurance plan?		69	21	10
(b) If yes, which plan do you favor? (check one):				
(1) Federal health insurance for the poor; Government payments to help all other families meet costs of catastrophic illnesses	14			
(2) Comprehensive national health insurance for all Americans, financed partially from increased social security taxes and partially from Federal general revenues	43			
(3) Health care plan similar to medicare for entire population; option for individuals to purchase approved private insurance plans instead of national plan	29			
(4) Voluntary income tax credit for purchase of private health insurance; free health benefits for the poor	7			
(5) Establishment of Federal standards for health benefits provided by private insurers; benefits for poor subsidized by Federal and State funds	7			
7. (a) Law enforcement officials agree that 40 to 60 percent of all crime is caused by drug addicts who need money to support their habits. Do you think a system of Government operated clinics—similar to the present system in England—which supply drugs to addicts free or for a small charge would help to solve this problem?		46	40	14
(b) Congress has given the President the power to cut off aid and use other economic weapons against countries which do not act effectively to break the drug pipeline which operates within their borders and ends in this country. Do you think we should cut off aid to such countries as Thailand, Laos, Cambodia, and Vietnam if they do not cooperate in this area?		90	5	5
(c) Would you favor economic sanctions against France, Turkey, and Middle Eastern and South American countries if they do not cooperate fully in solving this problem?		88	7	5
8. (a) Elimination of penalties for the possession of marihuana if it is only for personal use was recently recommended by a Federal commission headed by former Governor Raymond P. Shafer. Do you approve of this idea?		37	55	8
(b) Do you favor the legalization of marihuana?		22	67	10
9. Do you approve of busing as a means of integrating children?		8	88	4
10. (a) Would you support additional controls over air and water pollution and increased use of Federal funds for such programs?		87	9	4
(b) Are you satisfied with the program being made to clean up the environment?		13	72	14
(c) Are you prepared to bear some of the cost of cleaning up the environment either in the form of increased taxes or higher prices from some goods and services?		60	32	8
11. (a) Were you upset by the charges that the Justice Department approved the takeover of the Hartford Fire Insurance Co. by ITT after ITT promised to give a political party $400,000?		70	21	9
(b) Do you think this indicates that big business has too close a relationship with government?		79	13	8
(c) Do you feel Richard G. Kleindienst should be confirmed as Attorney General?		25	42	32
12. (a) Do you believe you are being told the truth by the Administration about the war in Indo-China?		19	70	10
(b) Do you feel the media are reporting the war accurately?		24	60	16
(c) Do you support the President's policy in Vietnam and the rest of Indo-China?		41	48	11
(d) Would you support an immediate pull out from Vietnam if the North Vietnamese release the Americans they are holding prisoner?		76	16	7
13. Do you feel Russia and the United States should try to impose a settlement on Israel and the Arab countries?		33	55	11
14. What do you think are the three most pressing problems facing America today? Pleaselist in order of urgency. (Using a weighted point system, the following results were tabulated.)[1]				
1. Crime and drug abuse	37.9			
2. Vietnam	17.9			
3. Economy	17.3			
4. Environment	8.3			
15. What is the one local problem which troubles you the most?[2]				
1. Crime and drug abuse	43.2			
2. Mass transportation	8.3			
3. Funds for education	6.8			
4. Taxes	6.8			

[1] The remaining 18.6 percent included welfare, education, taxes, racial problems, Government operations, and foreign policy.

[2] The remaining 34.9 percent went to a wide range of problems.

MAJ. GEN. LEO HENRY SCHWEITER

HON. GARNER E. SHRIVER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. SHRIVER. Mr. Speaker, it was with deep personal sorrow that I learned of the passing on August 23 of a distinguished American and patriot, Maj. Gen. Leo Henry Schweiter. General Schweiter was a native of Wichita, Kans., which is in my congressional district, and he was part of a pioneer family which contributed significantly to the progress of Wichita.

He was a dedicated soldier. His outstanding service to our country extended over a 31-year period beginning in 1941. At the time of his retirement because of cancer, General Schweiter was Chief of Staff of the Army in Vietnam.

His many decorations included the Distinguished Service Medal, the Silver Star, the Distinguished Flying Cross, two Purple Hearts, and the Bronze Star.

It is my privilege to be well acquainted with members of the Schweiter family, and I know the great personal loss which they and our Nation have suffered. I take this opportunity to salute and pay tribute to the memory of a brilliant general, Leo Henry Schweiter.

Mrs. Shriver and I join in extending our heartfelt sympathy to his wife, Virginia, his four children, and to his mother, Mrs. Otto Schweiter of Wichita.

As a part of my remarks, I include an article from the Wichita, Kans., Eagle which reported the death of General Schweiter.

RITES FOR EX-WICHITAN GEN. SCHWEITER TUESDAY

Maj. Gen. L. Henry Schweiter, 55, Carlisle, Pa., former chief of staff, USARVN (U.S. Army, Republic of Vietnam), and former Wichita resident, services at 3 p.m. Tuesday in Arlington (Va.) National Cemetery Chapel. He died Wednesday in a Carlisle hospital after a long illness.

A native Wichitan, Schweiter was graduated from Kansas State College, Manhattan, in 1939 and commissioned as a second lieutenant. He entered the military service in 1941 after obtaining a master of arts degree and serving as an instructor at the University of Missouri, Columbia.

During World War II, Schweiter saw action in the defense of Bastogne, Belgium, during the Battle of the Bulge.

As a lieutenant colonel, he participated in landings at Inchon and Wonson, Korea and commanded a battalion in the 32d Infantry Regiment, 7th Infantry Division.

Between the Korean War and the Vietnam conflict, Gen. Schweiter served in command positions in the United States and Europe and held key staff positions with the joint Chiefs of Staff.

Schweiter was promoted to brigadier general in 1966 and to major general in 1968.

He received the Distinguished Service Medal; the Silver Star with Oak Leaf Cluster for gallantry; two Purple Hearts; the Bronze Star Medal with three Oak Leaf Clusters and the Distinguished Flying Cross.

Survivors include his widow, Virginia; a son, Henry James, and three daughters, Gail Ann, Mary Jean and Caroline, all at home; his mother, Mrs. Bertha Schweiter, Wichita; a brother, Otis, San Anselmo, Calif., and two sisters, Mrs. William A. Nixon, Wichita, and Mrs. Lyman Bratzler, Lansing, Mich.

STOP THE BOMBING

HON. BELLA S. ABZUG

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mrs. ABZUG. Mr. Speaker, as the bombing of North Vietnam continues and as the mining of the ports of that country continues it must become clear to all that we are not winding down the war in Southeast Asia but merely changing its character. We have replaced our ground troops in South Vietnam with Air Force personnel in Thailand and Navy personnel off the coast, but the devastation continues unabated.

I would like to call to your attention a TV editorial that was heard on the CBS affiliate in New York City:

WCBS–TV EDITORIAL

Subject: Stop the bombing
Spokesman: Sue Cott
Broadcast: August 17, 1972, 6:55 p.m.

Last week the American combat role ended in Vietnam. But American involvement was far from over. Because as the ground war was grinding to a halt, the air war had reached a new high. We find this accelerated massive air war disturbing and baffling. For past experience proves that this is a bankrupt policy.

According to the Cornell University Air War Study Group's report, by the end of last year the United States had dropped three times as many bombs on Indochina than were dropped on all of Europe, Asia and Africa in World War II. But this brutal punishment did not bring North Vietnam to its knees—nor did the bombing prevent supplies from reaching its troops. Rather the population of North Vietnam was mobilized to meet the challenge and rebuild the roads and bridges knocked out by American bombs.

Now the United States is once again committing enormous manpower and fire power to the air war. And there is no question that this vast deployment of power and technology has made life more difficult for the North Vietnamese. But it still doesn't seem to be bringing the end of the conflict any closer. Even commanders in the field have admitted that there has been little tangible effect on the war itself.

The bombing however, has had a tangible effect in human terms. For whether it is official policy or not, many civilians have been killed—or made homeless. And ironically more in South Vietnam than in the North. The Cornell Study estimates that there were over a million civilian casualties and six million refugees in South Vietnam. What's more, the devastation of this rural society has been ruinous.

If we really want to save Vietnam, let's stop the bombing before there's nothing left to save.

A TRIBUTE TO THE LATE MOST REVEREND JAMES A. McNULTY

HON. HENRY P. SMITH III

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. SMITH of New York. Mr. Speaker, on Labor Day afternoon the Niagara frontier lost a great spiritual and community leader. The Most Reverend James A. McNulty, Bishop of the Roman Catholic Diocese of Buffalo since 1963, entered the heavenly fellowship of saints on that day.

During the last decade, Bishop McNulty has led his church in western New York to new plateaus of strength and spirituality, and he has ever been an outstanding ecumenical leader in the Buffalo and western New York community.

Bishop McNulty was a great leader, a good friend, and a fine citizen. His presence was enriching to all of us, and his passing is mourned by all of us.

WAGE-PRICE FREEZE POLL

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. EILBERG. Mr. Speaker, the morning newspaper in my city, the Philadelphia Inquirer, polls its readers on various topics several days a week.

On Monday, September 4, the paper published the results of the survey on the question, "Do you think the wage-price freeze has been a success?" The response was 81.3 percent "no," and 18.7 percent said "yes."

The results of this poll indicate clearly the feeling of the general public about the administration's economic policies. They have been a disaster for the workingman and his family.

As one of the persons who called the paper stated:

> Nixon has succeeded in freezing wages better than he has succeeded in freezing prices.

At this time I enter into the RECORD the results of the poll and the comments which accompanied them:

DO YOU THINK THE WAGE-PRICE FREEZE HAS BEEN A SUCCESS?

How you voted: no—81.3 percent; yes—18.7 percent.

SAMPLE "NO" COMMENTS

"Not to the working man" . . . "There are too many special favors" . . . "It is only enforced selectively" . . . "Nixon has succeeded in freezing wages better than he succeeded in freezing prices" . . . "This is another crazy scheme of the Nixon administration" . . . Control the government spending and they will have done something."

SAMPLE "YES" COMMENTS

"I am glad he had the courage to do it" . . . "Particularly since the public has profited from it" . . . "Without controls inflation would be a lot worse" . . . "A public success as far as it goes" . . . "I am very well pleased with it." . . . "For the working man it has been a success."

CHIEF BARRON'S ACHIEVEMENT

HON. WALTER FLOWERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. FLOWERS. Mr. Speaker, I am delighted to bring to the attention of my colleagues and others an article about Chief George Barron of the Bessemer Police Department. This interesting story appeared in the August 31 edition of the Bessemer News:

CHIEF BARRON'S ACHIEVEMENT

As a fellow veteran of World War II and among those who have educated children and seen them off to establish homes of their own, we stand in awe of the achievement of George Barron, chief of police in Bessemer.

As were so many of us veterans of the Great Depression, Mr. Barron did not enjoy a formal (i.e., college) education, but got a taste of it in attending a pretty rigid FBI National Institute course.

That, however, was nothing to the undertaking Mr. Barron entered into, in entering Samford University as a freshman, subject to all the rules and regulations (so far as curricula was concerned) as the freshmen fresh out of high school.

For about three and a half years Mr. Barron's days were divided into four parts: school, work, study and sleep, with the latter sometimes the sufferer.

Although there are numerous cases in which people even older than Mr. Barron have entered college classes and successfully completed them, we still think it's a feat well worth commending.

It must have taken some of the stamina that Mr. Barron exhibited in Marine Corps fighting during World War II, for him to have hung in there and completed the course.

In doing so, incidentally, he becomes (according to Commissioner Ed Porter) the only police chief in Alabama to have a BS degree in police administration.

We add our congratulations to the many he has received.

SALUTE TO COAST GUARD IN ALASKA

HON. NICK BEGICH

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 1972

Mr. BEGICH. Mr. Speaker, the Coast Guard in Alaska has a tremendous responsibility to safeguard the enormous shoreline of the State with the small number of vessels and craft available. Yet, they have done yeoman service, not only in the patrolling of Alaskan waters, and the apprehension of violators, but in other areas as well. Today I would like to salute the Guard for their efforts in two very unique situations which happened last month.

On August 8, 1972, the Coast Guard cutter *Confidence* while on patrol, intercepted an SOS from what was believed to be a Gibson Girl emergency radio in the Shumagin Island group. Later they monitored the words "Chirikof Island" and "no food." Weather was poor, and aircraft were unable to pinpoint the location of the transmission. The *Confidence* placed land parties ashore, and it was subsequently learned that Kodiak Airways had placed a group of persons on Chirikof Island 2 weeks before, and the party was to have come out 3 days before the transmission was received. Weather had precluded their removal. Late in the evening of August 8, the *Confidence* located seven very hungry people. Case closed.

St. Lawrence Island is in the Bering Sea, closer to the Siberian Peninsula than to the Seward Peninsula. This very isolation can cause difficulties, as happened in early August. The entire village meat supply was in imminent danger of spoiling when unusually high summer temperatures, coupled with problems with the freezing system, raised the temperatures in the village of Savoonga's freezer facility. The Coast Guard personnel took part in transporting 2 tons of salt to the Island which was used to keep the freezer brine at a safe operating temperature, thus saving the village meat supply.

In both instances, the actions of the Coast Guard were above and beyond the call of duty. I am certain that my colleagues join me in saluting the efforts of the U.S. Coast Guard in Alaska, and in thanking them for the extra concern they have so ably demonstrated in these instances.

Thank you.
